The Orissa famine of 1865-67 may be taken as the starting point because that induced to first great and organised effort to combat distress through State agency. It affected 180,000 square miles and 47,500,000 people. The Bengal Government was a little slow in appreciating the need for action, but late food was poured into the district in prodigious quantities. Thirty-five million units were relieved (a unit is one person supported for one day) at a cost 95 lakhs. The mortality was very heavy, and it is estimated that a million people or one-third of the population, died in Orissa alone. This was followed by the Madras famine of 1866, and the famine in Western India of 1868-70. The latter famine introduced India to the great migration from Marwar which was such a distinguishing feature of the famine of 1899-1900; it is estimated that out of a total population of a million and a half in Marwar, one million emigrated. There was famine in Behar in 1873-74, then came the great South Indian Famine of 1876-78. This affected Madras, Mysore Hyderabad and Bombay for two years and in the second year extended to parts of the Central and United Provinces and to a small tract in the Punjab. The total area affected was 257,000 square miles and the population 58,500,000. Warned by the excessive expenditure in Behar and actuated by the desire to secure economy the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been 5,250,000 in British territory alone. Throughout British India 700,000,000 units were relieved at a cost of Rs. 8½ crores. Charitable contributions from Great Britain and the Colonies aggregated Rs. 84 lakhs.

The Famine Codes.

The experiences of this famine showed the necessity of placing relief on an organised basis. The first great Famine Commission which sat under the presidency of Sir Richard Strachey, elaborated the Famine Codes, which amended to meet later experience, form the basis of the famine relief system to-day. They recommended (1) that employment should be given on the relief works to the able-bodied, at a wage sufficient for support, on the condition of performing a suitable task; and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the crop failure. In sending a Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine wage "is the lowest amount sufficient to maintain health under given circumstances. Whilst the duty of Government is to save life, it is not bound to maintain the labouring population at its normal level of comfort." Provincial codes were drawn up, and were tested by the famine of 1896-97. In that 307,000 square miles were affected, with a population of 69,500,000. The numbers relieved exceeded 4,000,000 at the time of greatest distress. The cost of famine relief was Rs. 7¼ crores, revenue was remitted to the extent of Rs. 1¼ crore, and loans given aggregating Rs. 1¾ crore. The charitable relief fund amounted to about Rs. 1¾ crore, of which Rs. 1¼ crore was subscribed in the United Kingdom. The actual famine mortality in British India was estimated at 750,000. The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate. But before the Local Governments had been given time to digest the proposals of this Commission or the people to recover from the stock, the great famine of 1899-1900 supervened.

The Famine of 1899-1900.

This famine affected 475,000 square miles with a population of 59,500,000. In the Central Provinces, Berar, Bombay, Ajmer, and the Hissar district of the Punjab famine was acute: it was intense in Rajputana, Baroda, Central India, Hyderabad and Kathiawar. It was marked by several distinctive features. The rainfall over the whole of India was in extreme defect, being eleven inches below the mean. In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train. Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be famine immune, were affected; the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late to save life. A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale. At the end of July 4,500,000 persons were supported by the State, Rs. 10 crores were spent on relief, and the total cost was estimated at Rs. 15 crores. The famine was also marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life. Aided by loans to the extent of Rs. 3½ crores, the Indian States did a great deal to bring their administration into line with that in British India. Although actual deaths from starvation were insignificant, the extensive outbreaks of cholera, and the devastating epidemic of malaria which followed the advent of the rains induced a famine mortality of approximately a million. The experiences of this famine were collated by the Commission presided over by Sir Antony MacDonnell. This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, whilst if their condition were allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the necessity of "putting heart into the people." The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of revenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non-official help. The wage scale was revised; the minimum wage was abolished in the case of able-bodied workers; payments by results were recommended; and proposals were made for saving cattle.

The modern system.

The Government of India are now in possession of complete machinery to combat the effects of drought. In ordinary times Government is kept informed of the meteorological conditions and the state of the crops; programmes of suitable relief works are kept up to date, the country is mapped into relief circles, reserves of tools and plant are stocked. If the rains fail, policy is at once declared, non-officials are enlisted, revenue suspended and loans for agricultural purposes made. Test works are then opened, and if labour in considerable quantities is attracted, they are converted into relief works on Code principles. Poor houses are opened and gratuitous relief given to the infirm. On the advent of the rains the people are moved from the large works to small works near their villages, liberal advances are made to agriculturists for the purchase of plough, cattle and seed. When the principal autumn crop is ripe, the few remaining works are gradually closed and gratuitous relief ceases. All this time the medical staff is kept in readiness to deal with cholera

which so often accompanies famine, and malaria, which generally supervenes when the rains break.

Famine Protection.

Side by side with the perfection of the machinery for the relief of famine has gone the development of famine protection. The Famine Commission of 1880 stated that the best, and often the only means of securing protection from the extreme effects of famine and drought, are railways and irrigation. These are of two classes, productive and protective. Productive works being estimated to yield profits which will pay interest and sinking fund charges are met from loans; protective works, which do not pay, directly from revenue. In order to guarantee that there should be continuous progress with protective works, the Famine Insurance Grant was instituted in 1876. It was decided to set apart from the general revenues Rs. 1½ crores annually or one million sterling. The first charge on this grant is famine relief, the second protective works, the third the avoidance of debt. The chain of protective railways is now practically complete. Great progress is being made with protective irrigation. Acting on the advice of the Irrigation Commission an elaborate programme of protective irrigation works has been constructed, particularly in the Bombay Deccan—the most famine-susceptible district in India—and in the Central Provinces.

The Outlook.

Such in brief is the official programme and organisation which has been built up out of the experience and practice of the past. Yet everything goes to show that Government activity to save human life will never be wanted in the future on the colossal scale of former times, even so recently as 1899-1900. Each succeeding failure of the rains indicates that there has been in silent progress an economic revolution in India. In the year 1918 the rains failed more seriously and over a wider area than during any monsoon in the recent history of India. The deficiency in the rainfall was more marked than in the great famine of 1899. Yet such was the increased resisting power of the people that instead of a demand for State relief from over five millions, the maximum number at any time in receipt of public assistance was never so large as six hundred thousand. The shock to the social life of the community was insignificant; the effects of the drought completely disappeared with the good rains of the following year.

Increased Resisting Power.

The causes of this economic change in the conditions of India, whose influence is widespread are many. We can only briefly indicate them here. There is a much greater mobility in Indian labour. Formerly when the rains failed the ryot clung to his village until State relief in one form or another was brought almost to his doors. Now at the first sign of the failure of the rains he girds up his loans and goes in search of employmnet in one of the industrial centres, where the supply of labour is rarely equal to the demand, or on the constructional works which are always in progress either through State or private agency in the country. Then the ryot generally commands some store of value, often mistermed a hoard. The balance of exports in favour of India in normal times is approximately £50 millions a year. The gold and silver bullion in which this is largely liquidated is distributed all over the country, in small sums or in ornaments, which can be drawn upon in an emergency. The prodigious coining of rupees during the last two years of the war, and the continuous absorption of gold by India, represent small diffused savings, which take this form owing to the absence of banking institutions and lack of confidence in the banking system. There has been a large extension of irrigation. More than one-third of the land in the Punjab is now under irrigation, and in other Provinces, particularly in the famine-susceptible tracts of the Bombay Deccan, irrigation works have been constructed, which break the shock of a failure of the rains. Then the natural growth of the population has been reduced by plague and famine diseases, followed by the great influenza epidemic of 1918-19, which swept off five millions of people. This has not only prevented the increase of congestion, but has brought some areas particularly in the Indian States, below their former population-supporting capacity. The increase of railways distributes the resources of the country with ease; the spread of the co-operative credit movement has improved rural credit. Finally, there is the considerable development of manufacturing industry, which is generally short of labour and helps to absorb the surplus of a famine year. Whilst the Government is completely equipped with a famine code, there is no reason to suppose that there will ever recur such an emergency as that of 1899. Famine can now be efficiently met by the liberal distribution of tagavi, the suspension and remission of the land revenus demand, the relief of the aged and othere who cannot work, the provision of cheap foddee for the cattle, with possibly some assistance in transporting the affected population of the famine-affected tract to the industrial centres.

The increased resisting power of the people was effectively demonstrated during the famine of 1920-21, which was due to the failure of the monsoon towards the end of the year 1920. The distress which appeared in the end of 1920 persisted during the early months of 1921 and regular famine was declared in parts of Madras, Bombay, Central Provinces and Baluchistan. Local distress prevailed also in Bengal, Punjab and Central India. The largest number of persons on relief of all kinds did not exceed 0·45 million which was considerably less than 3% of the total population of the area affected by the failure of the monsoon.

The Indian Famine Trust.

Outside the Government programme there is always scope for private philanthropy, especially in the provision of clothes, help for the superior class poor who cannot accept Government aid, and in assisting in the rehabilitation of the cultivators when the rains break. At every great famine large sums have been subscribed, particularly in the United Kingdom, for this purpose, and in 1899-1900 the people of the United States gave generous help. With the idea of providing a permanent famine

The following statement shows the income and expenditure of the Trust during the past seventeen years the figures at the end of 1927 being the latest available for a complete year.

(a) Includes a bequest of Rs. 26,545.
(b) Includes Rs. 3,366 refunded from the grant made in 1900 for the maintenance of Rajputana Orphans.
(c) Represent refunds from grants made in previous years.

Sir Frederic Gauntlett, K.B.E., C.I.E., I.C.S., Auditor-General with the Government of India, has been Secretary and Treasurer of the Trust since 1912.

fund, the Maharaja of Jaipur gave in 1900 a sum of Rs. 15 lakhs, in Government securities to be held in trust for the purposes of charitable relief in seasons of general distress. This Trust has now swollen to over Rs. 36 lakhs.

This Trust in a few years became swollen to Rs. 28,10,000 and has ever since been maintained at that figure. The money is invested and the principal never taken for expenditure. The income from it is utilised for relief work as necessary and unexpended balances are temporarily invested, so as to make available in years of trouble savings when expenditure is not necessary. The temporary investments—in Government Securities—at the end of 1927 stood at Rs. 6,14,600 and the cash balance at the same time was Rs. 24,323-10-11, so that the total available for expenditure at the commencement of 1928 was Rs. 6,38,923-10-11. The returns for 1928 were not complete when this chapter was revised.

The whole conditions to meet which the Trust was founded have changed in recent years. This is the result of the improved policy of Government in regard to famine relief and of the difference in the meaning of the word famine in consequence of the improvement of transport communications and other factors affected by modern progress. An area stricken by failure of seasonal rains now obtains supplies from other regions in a manner impossible before the development of railways and of modern marketing practice and Government help its people by loans given direct or through Co-operative Societies to tide them over the period of scarcity. The experience of successive visitations of scarcity in different parts of the country also proves that the general economic progress of the people makes them able to meet temporary periods of stress in a manner formerly unimaginable. Famine in the old terrible sense of the term has in fact ceased to occur. This was well illustrated by the events of 1919, when the land suffered from a failure of the rains more general throughout India and worse in degree than any previously recorded by the Meteorological Department but the crisis was borne with a minimum of suffering. The demands upon the Famine Trust have consequently so greatly diminished in their original sense that hardly any money is now distributed from it for the relief of famine, in the proper sense of the word, resulting from rain failure and expenditure has mainly become grants of assistance to sufferer, from floods. The total expenditure upon real famine in the old sense has been less than Rs. 2½ lakhs since 1919. The terms of the Trust fortunately permit of management on lines according with modern needs.

BOY SCOUTS.

The Boy Scouts movement, initiated in England by Lt.-Gen. Sir Robert Baden Powell (the Chief Scout), has spread widely in India, both among Europeans and Indians. The Viceroy is Chief Scout of India and the heads of Provinces, are Chief Scouts in their own areas. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance—inculcating loyalty and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves.

It is confidently anticipated that in the Boy Scout Movement will be found a natural means of bridging the gulf between the different races existing in India. The movement is non-official, non-military, non-political and non-sectarian. Its attitude towards religion is to encourage every boy to follow the faith he professes. Every boy admitted as a Scout makes a threefold promise to do his best: (1) to be loyal to God and the King; (2) to help others at all times; and (3) to obey the Scout law. The law referred to lays down—

1. That a Scout's honour is to be trusted;
2. That he is loyal to God and the King, his parents, teachers, employers, his comrades, his country and those under him;
3. That he is to be useful and to help others;
4. That he is a friend to all and a brother to every other scout, no matter to what social class the other belongs;
5. That he is courteous;
6. That he is a friend to animals;
7. That he obeys orders;
8. That he smiles and whistles under all difficulties;
9. That he is thrifty;
10. That he is clean in thought, word, and deed.

INDIAN HEAD-QUARTERS.

Patron.—H. R. H. The Prince of Wales, K.G.

Chief Scout for India.—His Excellency Lord Irwin.

Chief Commissioner.—(Vacant.)

General Secretary.—George Cunningham Esq., C.I.E., O.B.E., I.C.S.

General Council for India—

Ex-officio.—The Chief Commissioner for India.
The Provincial Commissioners.
The Presidents of Provincial Councils.

Elected.—(Not completed.)

Nominated.—(Not completed.)

Provincial Commissioner for Bombay Presidency—Sir Chunilal Mehta, M.A., LL. B., K.C.S.I.,

Provincial Secretary for Bombay—M. V. Venkateswaran, Esq., M.A.

Development.

yet electrified in Bombay and suburbs as by the B. B. & C. I. Railway's suburban service the G. I. P. Railway's electrified section thirty miles of Bombay and the needs of the B. E. S. & T. Company.

Nearly 100 miles southward of this Tata propose to erect two dams in the valley of the Koyna river, proposed by T. Arnall and developable on lines the two projects by Mr. Gibbs above partly to supply power to Bombay and develop a great assembly of electro-chemical industries near the power installation. The preliminary investigations for this scheme are proceeding. The catchment area for the lake 346 square miles and there will be a total after the rains of 112,600 million which will be sufficient to supply a load of 350,000 horse power for 8,000 per year. The preliminary estimates for a capital of Rs. 810 lakhs to carry scheme.

Mysore Installation.

The first hydro-electric scheme in India or, indeed, in the East, was River Cauvery, in Mysore State, inaugurated, with generating works mudram, in 1902. The Cauvery rises British district of Coorg, and flows Mysore. The first object with which lation was undertaken was the supply to the goldfields at Kolar. These are distant from Sivasamudram and for this was the longest electrical power sion line in the world. Current is also Bangalore, 59 miles away, where it is both industrial and lighting purposes.

The initial undertaking has constantly expanded since its inauguration, so total capacity, which was at first 6,000 power, is now approximately 25,000 is the maximum obtainable with which the Cauvery affords and, with the number of consumers and small, rapidly increasing, the of a completely new installation else be operated in parallel with or separate that at Sivasamudram, has been Two projects offer themselves. would involve the use of the River tributary of the Cauvery which has falls, and the second, known as the project, would have its power house Cauvery, 25 miles down-river from mudram and just within the borders State, adjacent to the Madras Presidency head of water available at Sivasamudram 400 feet, that on the Shimsha 618 which would generate 39,500 e. h. p. datu the Cauvery runs in rapids and a channel 20,000 feet long with a 22 would be necessary. There would generating units, each giving an 4,000 e. h. p. Future extensions additional 8,000 h. p. could be progressive spirit which has marked the ment of the works since their inception characterises the manner in which the of further extensions are being considered.

the seven great rivers eastward from the Indus stated to be capable of giving not less than three million horse-power for every thousand feet of fall from the Himalayas, while similar considerations apply to rivers in other parts. Some doubt is expressed as to the estimate of seven million horse-power in the Irrawaddy and Chindwin rivers, given in the Report of the London Conjoint Board of Scientific Studies.

The Report points out that the Bombay Presidency holds a unique position owing to its great existing and projected schemes at Lonavla, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources.

Bombay Hydro-Electric Works.

The greatest water-power undertakings in India—and in some respects the greatest in the world—are the Tata hydro-electric schemes recently brought to fruition, and constantly undergoing expansion, for the supply of power in the city of Bombay. Bombay is after London the most populous city in the British Empire and it is the largest manufacturing town in Asia. Its cotton mills and other factories use over 100,000 horse power of mechanical energy and until a year or two ago this was almost entirely provided by steam, generated by coal coming from a distance—mostly Bengal. The Tata Hydro-Electric Power Scheme, now an accomplished fact, marked one of the big steps forward made by India in the history of its Industrial development. It was the product of the fertile brain of Mr. David Gostling, one of the well known characters of Bombay, nearly a generation ago. The exceptional position of the Western Ghats, which rise 2,000 feet from sea-level which a very short distance of the Arabian Sea, and force the monsoon as it sweeps to land, to break into torrential rain at the mountain passes was taken full advantage of, and the table lands behind the Ghats form a magnificent catchment area to conserve this heavy rainfall in. Mr. Gostling pressed the scheme on the attention of Mr. Jamsetji Tata for years, and with perseverance collected data which he laid before that pioneer of the larger Industries in India. He summoned the aid of experts from England to investigate the plan. The scheme was fully considered for six long years. Meanwhile both Mr. J. N. Tata and Mr. David Gostling passed away, but the sons of the former continued the work of their father and on Mr. Gostling's death, Mr. R. B. Joyner's aid was sought to work out the Hydraulic side of the undertaking.

The scheme completed, a syndicate secured the license from Government and an endeavour was made to enlist the support of financiers of England who tried to impose terms which were not acceptable. Meanwhile, the attention of Sir George Clarke (now Lord Sydenham), then Governor of Bombay, and an engineer of distinction himself, was drawn to the scheme. The interest shown by him drew the attention of Indian Chiefs in the Presidency of Bombay

and outside it to its possibilities, funds flowed in and a company with an initial capital of 1,75,00,000 Rupees was started.

The hydro-electric engineering works in connection with the project are situated at and about Lonavla above the Bhor Ghat. The rainfall is stored in three lakes at Lonavla, Walwhan and Shirawta, whence it is conveyed in masonry canals to the forebay or receiving reservoir. The power-house is at Khopoli, at the foot of the Ghats, whither the stored water is conveyed through pipes, the fall being one of 1,725 feet. In falling from this height the water develops a pressure of 750 lbs. per square inch and with this force drives the turbines or water wheels. The scheme was originally restricted to 30,000 electrical horse power, but the Company, in view of the increasing demand for power from the Bombay mills, decided to extend the works by building the Shirawta Dam and issued further shares bringing the capital to Rs. 3,00,00,000, the capacity of the scheme being increased to more than 40,000 electrical horse power. Issued Capital 7 per cent. Preference 8,735 shares fully paid and Ordinary 18,000, out of which 10,000 are fully paid and 8,000 new shares, on which Rs. 400 have been called up. There is also a Debenture Loan of Rs. 85 lakhs. The works were formally opened by H. E. the Governor of Bombay on the 8th February 1915. At present there are about 44 mills with motors of the aggregate B. H. P. of 55,000 H. P. in service. In addition to the cotton and flour mills which have contracted to take supply from the Company for a period of ten years, an agreement has been completed whereby the Tata Hydro-Electric Company, the Andhra Valley Power Supply Company and the Tata Power Company between them supply the whole of the electric power required by the Bombay Electric Supply and Tramways Company, Limited, and also the power for the electrification of the Harbour Branch and Bombay-Kalyan section of the G. I. P. Railway. There remain many prospective buyers of electrical energy and the completion of the Company's full scheme will not suffice for all such demands. Besides the Bombay cotton mills, which alone would require about 100,000 horse power, there are, for instance, tramways, with possibilities of suburban extensions. The probable future demand is roughly estimated at about 160,000 H. P. Recently the Company has embarked upon a considerable scheme of extensions, these involving the impounding of a fourth lake at Kundley, near Lonavla, the duplication of the pipe line and the installation of additional machinery at the power house at Khopoli.

Investigations undertaken by Mr. H. P. Gibbs, with a view to further developing the electrical supply led to the discovery of a highly promising water storage site in the valley of the Andhra River, situated near the present lakes previously overlooked, as altogether different treatment and design were required. In this instance the draw off point is 11 miles upstream from the dam and at a level 112 ft. above the lowest river bed level at the dam. The water is taken through a tunnel 8,700 ft. long driven in solid trap rock through the scarp of the ghauts of which the pressure pipes are an extension. Seventy feet of the upper water in the lake can be drawn off comprising 75 per cent. of the total amount of water stored, both above and below draw off level. A scheme was prepared to be carried out by a separate company and providing for holding up the Andhra River by a Dam, about a third of a mile long and 192 feet high, at Tokerwadi. This dam holds up a lake nearly twelve miles long, the further end of which approaches the brink of the Ghats at Khand. Here, a tunnel, a mile and a quarter long, carries the water to the surge chamber, whence it enters the pipes for a vertical drop of about 1,750 feet to the generating station at Bhivpuri, about 17 miles from the generating station at Khopoli. The scheme is designed to yield 100,000 horse power in its full development. A new company to operate the scheme was formed on the 31st August, 1916, with an initial capital of Rs. 2,10,00,000, divided into 160,000 Ordinary shares of Rs. 1,000 each and 5,000 Preference shares of Rs. 1,000 each, this being the Andhra Valley Power Supply Company, Limited. This Company will pay annually to the Tata Hydro-Electric Power Supply Company 15 per cent. upon the profits (after making certain deductions), or a sum of Rs. 50,000, whichever shall be the larger sum, the intention being that the new company shall pay annually to the Tata Hydro-Electric Power Supply Company a minimum sum of Rs. 50,000. Power is being supplied to some thirty factories in Bombay absorbing roughly 40,000 electrical horse-power, as well as to the Bombay Electric Supply and Tramways Company and to the G. I. P. Railway for the first stage of their electrification scheme.

Just as the Andhra project has been developed as a northward extension of the original scheme, so a southward development also originated by Mr. Gibbs and developable on lines similar to those of the Andhra project in now Practically Completed under the name of the Nilla-Mula scheme, the name arising from the fact that the valleys of the Nila and Mula rivers are being dammed for the conservation of water for it. A company entitled The Tata Power Co., Ltd., was floated in the autumn of 1919 for the purpose, having a capital of Rs. 9 crores, divided into 30,000 7½% cumulative preference shares of Rs. 1,000 each and 60,000 shares of Rs. 1,000 each, the first and present issue being of 10,000 preference shares and 35,000 ordinary shares. A lake having an area of sixteen square miles and a catchment area of 112 square miles has been formed at Mulshi by the erection of a masonry dam 4,100 feet in length and 158 feet in height. At the end of the lake opposite to the site of the dam, a tunnel has been cut through the Western Ghats to a total length of 14,500 feet, at the further end of which the water enters the pipe line and descends to the turbine power house at Bhira, 1,750 feet below. The head of water is sufficient to generate 150,000 electrical horse-power at 11,000 volts, and after being transformed up to 110,000 volts the current is transmitted to the receiving station at Dharavi, Bombay, through an overhead line approximately 80 miles in length. Five generating units each of 30,000 electrical horse-power are being erected, and of these two are already in commercial operation. The power will be absorbed by mills, factories and local area not

yet electrified in Bombay and suburbs as well as by the B. B. & C. I. Railway's suburban service, the G. I. P. Railway's electrified service within thirty miles of Bombay and the evergrowing needs of the B. E. S. & T. Company.

Nearly 100 miles southward of this Messrs. Tata propose to erect two dams in the huge valley of the Koyna river, proposed by Mr. A. T. Arnall and developable on lines similar to the two projects by Mr. Gibbs above mentioned, partly to supply power to Bombay and partly to develop a great assembly of electro-chemical industries near the power installation. The preliminary investigations for this scheme are still proceeding. The catchment area for the lake will be 346 square miles and there will be a total storage after the rains of 112,600 million cubic feet, which will be sufficient to supply a normal load of 350,000 horse power for 8,000 hours per year. The preliminary estimates provided for a capital of Rs. 810 lakhs to carry out the scheme.

Mysore Installation.

The first hydro-electric scheme undertaken in India or, indeed, in the East, was that on the River Cauvery, in Mysore State, which was inaugurated, with generating works at Sivasamudram, in 1902. The Cauvery rises in the British district of Coorg, and flows right across Mysore. The first object with which the installation was undertaken was the supply of power to the goldfields at Kolar. These are 92 miles distant from Sivasamudram and for a long time this was the longest electrical power transmission line in the world. Current is also sent to Bangalore, 59 miles away, where it is used for both industrial and lighting purposes.

The initial undertaking has constantly been expanded since its inauguration, so that its total capacity, which was at first 6,000 horse power, is now approximately 25,000 h.p. This is the maximum obtainable with the water which the Cauvery affords and, therefore, with the number of consumers, large and small, rapidly increasing, the necessity of a completely new installation elsewhere, to be operated in parallel with or separately from that at Sivasamudram, has been recognised. Two projects offer themselves. The first would involve the use of the River Shimsha, a tributary of the Cauvery which has natural falls, and the second, known as the Mekadatu project, would have its power house on the Cauvery, 25 miles down-river from Sivasamudram and just within the borders of Mysore State, adjacent to the Madras Presidency. The head of water available at Sivasamudram is 400 feet, that on the Shimsha 618 feet net, which would generate 39,500 e. h. p. At Mekadatu the Cauvery runs in rapids and a dam and a channel 20,000 feet long with a 22½ feet bed would be necessary. There would be three generating units, each giving an output of 4,000 e. h. p. Future extensions yielding an additional 8,000 h. p. could be made. The progressive spirit which has marked the management of the works since their inception now characterises the manner in which the problem of further extensions are being considered.

Works in Kashmir.

A scheme of much importance from its size, but more interesting because of the developments that may be expected from it than for the part which its current supply already plays in the life of the countryside, is one installed a few years ago by the Kashmir Durbar, utilising the River Jhelum, near Baramulla, which lies thirty-four miles north-west of Srinagar. The head works of the Jhelum power installation are situated six and a half miles from the power house and the main connection between the two is a great timber flume. These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the generation of 20,000 electrical horse power. Four pipes 600 feet long lead from the forebay to the power house, and from forebay to water-wheel there is an effective head of 395 feet. There are four vertical waterwheels, each coupled on the same shaft to a 1,000 k.w., 3-phase, 2,300 volt, 25-period generator running at 500 r.p.m., and each unit is capable of taking a 25 per cent. overload, which the generator end is guaranteed to maintain with safety for two hours. The power house is of sufficient capacity to allow of 15,000 k.w. generating plant being installed within it. Two transmission lines run side by side as far as Baramulla, 21 miles distant, at which point one terminates. The other continues to Srinagar, a further 34 miles. The installation at Baramulla was originally utilised for three floating dredgers and two floating derricks, for dredging the river and draining the swampy countryside and rendering it available for cultivation, but these operations have temporarily been curtailed, so that only one dredger is now in operation. The lighting of Baramulla has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will soon spring up. At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting, but for heating. The greater part of Srinagar city is now electrically lighted and during the past year a motor load of over 100 k.w. has been connected with the mains, motors being hired out to consumers by the Electrical Department. This step was taken with a view to educating the people in the use of electric power and it has been entirely successful.

Recent Progress.

Apart from the development of the three projects in the Bombay Presidency the past four years have witnessed comparatively little progress in hydro-electric works. A small plant was completed and put into operation at Naini Tal during 1923, and the erection of another small plant was commenced at Shillong, but otherwise there is nothing to record. It is interesting to note, however, that preliminary investigations are proceeding with a view to the erection of hydro-electric plants in various parts of India. In the tea districts of Kalimpong and Kurseong, for example, it is proposed to harness a promising water-power site and to supply current to an important area in which are situated more than two hundred tea factories.

The Sutlej Hydro-Electric Project, at one time appeared to be one of the most promising propositions in the country, but owing to financial considerations it has now been indefinitely shelved. In Southern India a large number of sites have been investigated, and of these one on the Pykara river in the Nilgiris and another on the Kallar river on the borders of Travancore have been selected for development if and when the financial considerations can be satisfactorily settled. The Pykara river scheme is of some magnitude, and it is estimated that upwards of 50,000 horse-power will be available for electro-chemical industries which it is proposed to establish at Calicut on the West Coast. The Kallar river project is very much smaller, but it is interesting in being a scheme in which the Government of Madras and the Travancore Darbar will be jointly responsible, for the power house will be located on the British side of the river and the current transmitted to and distributed in Travancore State. Finally, there is a big combined project of hydro-electrification and irrigation in Hyderabad State. This scheme is still very much in the air, but the fact that it is under consideration is worthy of being placed on record in view of the somewhat unusual circumstance in India, that the tail water from the turbines will be made available for agricultural purposes and not allowed to run to waste.

The fact that the Bombay Electric Supply and Tramways Company has shut down its steam-driven generating plant and now takes its supply in bulk from the various Tata companies has been recorded above, and it is of more than passing interest to note that the Poona Electric Supply Company has put forward a similar proposition with effect from the time when power is available from the Tata Power Company's installation at Nila-Mula. This is a phase of hydro-electric distribution which is quite in its infancy in India, but it is possible to foresee the time when every village within a couple of hundred miles of a hydro-electric power station will receive its supply of electric current in bulk, thus greatly reducing capital and administrative charges and minimising the price of current to the consumer. It is a system which has become something of a fine art in California, where current is transmitted by overhead wires for many hundreds of miles at a pressure of 200,000 volts, or double the pressure commonly employed in India for overhead long-distance transmission.

Local Self-Government.

No field of the administration of India is likely to be more profoundly affected by the Reforms of 1919 than local government. This is one of the subjects transferred to Indian ministers, and there are many signs that the power will be freely used for the purpose of experiments in the direction of building up stronger and more vigorous local bodies. On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay. The difficulties in the way of progress were manifest. Local government had to be a creation —the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are however many indications that the dry bones of the mofussil are stirring; inasmuch as this being a transferred subject it is entirely provincial there will be the widest variation between province and province according to the special needs of each. We can indicate here only the broad tendencies, with the expression of opinion that this field will be one of the most important in the growth of nation-building forces in British India.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative entitles—tahsils, sub-divisions, and districts.

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting.... The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, *e.g.*, in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads."—(*Gazetteer of India.*)

The villages above described fall under two main classes, *viz.*—

Types of Villages.—"(1) The 'severalty' or raiyatwari village, which is the prevalent form

outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers, though some of the non-cultivated lands may be set apart for a common purpose, such as grazing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on payment of assessment. The village government vests in a hereditary headman, known by an old vernacular name, such as *patel* or *reddi*, who is responsible for law and order, and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled."

"(2) The joint or landlord village, the type prevalent in the United Provinces, the Punjab and the Frontier Province. Here the revenue was formerly assessed on the village as a whole its incidence being distributed by the body of superior proprietors, and a certain amount of collective responsibility still, as a rule, remains. The village site is owned by the proprietary body, who allow residences to the tenantry, artisans, traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is partitioned among the shareholders. The village government was originally by the *punchayet* or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the artificial character of this appointment, as compared with that which obtains in a raiyatwari village is evidenced by the title of its holder, which is generally *lambardar*, a vernacular derivative from the English word 'number.' It is this type of village to which the well-known description in Sir H. Maine's *Village Communities* is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under them."

Village Autonomy.—The Indian villages formerly possessed a large degree of local autonomy, since the native dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of communications, the growth of individualism, and the operation of the individual *raiyatwari* system, which is extending even in the north of India. Nevertheless, the village remains the first unit of administration; the principal village functionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or *Punchayet* and the Decentralisation Commission of 1908 made the following special recommendations:—

"While, therefore, we desire the development of a *punchayet* system, and consider that the objections urged thereto are far from insurmountable, we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure. We think that a commencement should be made by giving certain limited powers to *Punchayats* in those villages in which circumstances are most favourable by reason of homogeneity, natural intelligence, and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy, which must be the work of many years will require great care and discretion, much patience, and judicious discrimination between the circumstances of different villages; and there is a considerable consensus of opinion that this new departure should be made under the special guidance of sympathetic officers."

This is, however, still mainly a question of future possibilities, and for present purposes it is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what life they have. The Punjab Government has passed a Village Punchayat Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases. Other Governments are taking steps in the same direction.

Municipalities.—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute, from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, medical charity, and local public works. New Municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced. In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government. Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence and

responsibility were conferred on the committees of many towns by permtting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of provincial revenue suited to and capable of development under local management being transferred, with a proportionate amount of provincial expenditure, for local objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day.

The Present Position.—There are some 757 Municipalities in British India, with something over 18 million people resident within their limits. Of these municipalities, roughly 687 have a population of less than 50,000 persons and the remainder a population of 50,000 and over. As compared with the total population of particular provinces, the proportion resident within municipal limits is largest in Bombay, where it amounts to 20 per cent., and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent. of the total population. Turning to the composition of the Municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion. Ex-officio members are only 7 per cent. and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to one. The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction. For the discharge of these responsibilities, there is a municipal income of Rs. 14·03 crores derived principally from taxation, just over one-third coming from municipal property, contributions from provincial revenues and miscellaneous sources. Generally speaking, the income of municipalities is small, the four cities of Calcutta, Bombay, Madras and Rangoon together providing nearly 40 per cent. of the total. The heaviest items of this expenditure come under the heads of "Conservancy" and "Public Works" which amount to 15 per cent. and 14 per cent. respectively, "Water-supply" comes to 13 per cent., "Drainage" to 6 per cent. and "Education" to no more than 8 per cent. In some localities the expenditure on education is considerably in excess of the average. In the Bombay Presidency, excluding Bombay City, for example, the expenditure on education amounts to more than 21 per cent. of the total funds, while in the Central Provinces and Berar is is over 17 per cent.

District Boards.—The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate to which are two or more sub-district boards; while in Bengal, Madras and Bihar and Orissa, there are also Union Committees. Throughout India at large there are some 221 district boards with 556 sub-district boards and more than 800 Union Committees. This machinery has jurisdiction over a population which was some 213 millions in 1919-20. Leaving aside the Union Committees the members of the Boards numbered a little over 14,000 in 1922-23, of whom 62 per cent. were elected. As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians, who constitute 96 per cent. of the whole membership. Only 11 per cent of the total members of all boards are officials of any kind. The total income of the Boards in 1922 amounted to Rs. 11·32 crores, the average income of each district board being Rs. 5,00,000. The most important item of revenue is provincial rates, which represent a proportion of the total income varying from 25 per cent. in Bombay and in the N. W. F. Province to 63 per cent. in Bihar and Orissa. The principal objects of expenditure are education which has come remarkably to the front within the last three years and civil works such as roads and bridges. Medical relief is also sharing with education though in a less degree the Lion's share of the available revenue.

Improvement Trusts.—A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay and Calcutta the Improvement Trusts are continuing their activities which are described in a separate chapter (q.v.). In Bombay the work of the Improvement Trust is being developed by the Bombay Development Directorate. Other cities are beginning to follow the examples of these great cities and Improvement Trusts have been constituted in Cawnpore, Lucknow and Allahabad in the United Provinces and in several of the larger cities of the Provinces of India. Their activities have, however, been severely curtailed by the financial stress.

Provincial Progress.—There was passed in *Bengal* in 1919 a Village Self-Government Act embodying the policy of constituting Union Boards at the earliest possible date for groups of villages throughout the province. The number of these boards continues to increase, rising from 1,500 to more than 2,000. Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their wn affairs.

In *Bombay* the development of village self-government is also proceeding, as the result of an Act for constituting, or increasing the power of village committees, which was passed in 1920 by the Legislative Council. In this presidency, some 75 out of 157 municipalities had a two-thirds elected majority of councillors in the year 1920; and a distinct step forward has been projected by the administration in the direction of liberalizing the constitution of all municipal bodies. The policy of appointing a non-official president has been extended both to district and sub-district boards, and a large number of non-officials have also been appointed presidents of sub-districts (taluka) boards. In *Madras* also the institutions of local self-government continued to progress in an encouraging manner. The number of district boards in the Presidency was 24, with 882 members. The number of sub-district boards rose from 119 to 121. The total number of Municipal Councils rose from 73 to 80 and the proportion of Indian

to European and Anglo-Indian members further increased. In 1920-21 there were 54 municipal councils, consisting entirely of Indian members, as against 41 in the previous year. The average imposition of taxation per head of population is still very low, being only about Rs. 2. Nonetheless, 28 towns in the presidency possess a protected water-supply and water works schemes are either under execution or in contemplation in a number of others. The number of educational institutions maintained by municipal councils rose to 1,016 which was 99 more than in the previous year; while the net educational charges amounted to Rs. 12·61 lakhs.

In the *United Provinces* the new District Boards, which consist of non-official members only, with elected non-official Chairmen, were plunged straight-way into financial difficulties. In some cases the necessity for retrenchment was immediate resulting in the curtailment of medical relief and of allotments for the ordinary repairs of roads. Additional taxation has so far not been generally imposed and the Boards are still suffering from inexperience in husbanding public money and obtaining the full value for their expenditure. In the case of Municipal Finances, there has been some change for the better. The new Municipalities have shown a great interest in all forms of civic activity but they are still hampered in their work by political and communal obsessions. They are reluctant to impose new taxation but a considerable programme of expenditure lies before them. The restoration of municipal roads, the abatement of the dust nuisance and the renewal of water-works plant are problems calling almost everywhere for immediate solution. On the whole, the position is more hopeful since the rapid progress which was being made towards Municipal insolvency has been arrested.

In the *Punjab* municipal administration continued to show improvement, the general attitude of the members in regard to their responsibilities being promising for progress in the future. Generally speaking the finances are in a more satisfactory position than was the case in previous years. Expenditure on water-supply schemes is steadily increasing and the capital cost of schemes executed during 1924-25 amounted to over Rs. 21 lakhs as compared with Rs. 11 lakhs in the previous year.

Three Acts of considerable importance, providing for the creation of improvement trusts, for the more effective administration of smaller towns and for the establishment of village panchayats have been passed. Further, Municipalities and District Boards have been reconstituted in a more democratic form.

In the *Central Provinces*, the year 1920 witnessed the passing of a Local Self-Government Act which will guide into proper channels the undoubtedly growing interest in public matters. The continued reduction of official members and chairman, and the wider powers of control given to local bodies will be an incentive to the development of local self-government, leading to an increased sense of public duty and responsibility. Another very important measure regulating municipalities was passed into law in 1922. Its chief features are the extension of the Municipal franchise, the reduction of official and nominated members, the extension of the powers of Municipal Committees and the relaxation of official control.

In the *North-West Frontier Province*, the institution of local self-government is somewhat of a foreign growth. Certain of the municipal committees are still lax in the discharge of the responsibilities, and meetings are reported to be infrequent, but the attendance of non-official members is gradually increasing. Concerning Municipal administration the Local Government reports that the members continue to take a very great interest in their duties and that their attitude towards the responsibilities imposed upon them is on the whole satisfactory. Communal feeling shows itself in certain localities; but is in many instances off-set by the public spirit and initiative of individual members and there are considerable symptoms of advance in independence of action and in the smooth working of the Committees.

Local Government Statistics.

Municipalities.—With this general introduction we can now turn to the statistical results of the working of Local Self-Government. The following table gives information as to the constitution of municipal committees, taxation, &c., in the chief provinces in 1926-27:—

Province.	Population within Municipal Limits.	Number of Munici-palities.	Number of Members of Com-mittees.	Classification of Members.		Income.	Incidents per Head of Population.		Expenditure.
				Official.	Non-Official.		Rates and Taxes.	Total Income (excluding Extraordinary and Debt.)	
Presidency Towns.						Rs.	Rs. a. p.	Rs. a. p.	Rs.
Calcutta	1,077,264	1	90	1	89	2,63,14,432	16 5 1	19 14 1	2,95,44,804
Bombay City	1,175,914	1	106	3	103	20,49,07,617	24 0 5	27 6 7	20,51,33,911
Madras City	528,791	1	48	1	47	83,13,410	7 2 5	10 9 6	90,04,872
Rangoon	335,491	1	34	2	32	1,47,34,089	17 11 0	25 9 4	1,20,34,645
District Municipalities.

Calcutta Improvement Trust.

The Calcutta Improvement Trust was instituted by Government in January, 1912, with a view to making provision for the improvement and expansion of Calcutta by opening up congested areas, laying out or altering streets, providing open spaces for purposes of ventilation or recreation, demolishing or constructing buildings and re-housing the poorer and working classes displaced by the execution of improvement schemes.

The origin of the Calcutta Improvement Trust must, as in the case of the corresponding Bombay body, upon which the Calcutta Trust was to a large extent modelled, be looked for in a medical enquiry which was instituted into the sanitary condition of the town in 1896, owing to the outbreak of plague. It was estimated that the Trust might in the ensuing 30 years have to provide for the housing of 225,000 persons. The population of Calcutta proper, which includes all the most crowded areas, was 649,995 in 1891, and increased to 801,251, or by 25 per cent., by 1901. The corresponding figure according to the 1911 Census was 896,067 and this had increased by 1921 to 993,508.

The problem of expansion was difficult, because of the peculiar situation of Calcutta, which is shut in on one side by the Hooghly and on the other by the Salt Lakes.

Preliminary investigations continued for several years, so that it was only in 1910 that legislation was eventually introduced in the provincial legislature and the Trust instituted by it. The Bill provided for a large expenditure on improvement schemes and the provision of open spaces and for special local taxation to this end. The total capital expenditure up to 31st March 1928 amounted to nearly ten and a quarter crore. It also provided for the appointment of a wholetime chairman of the Board of Trustees and the membership of the Trust was fixed at eleven.

The following constituted the Board of Trustees at 31st March 1928:—Mr. J. A. L. Swan, C.I.E., I.C.S., Chairman; Mr. J. C. Mukherjea, Bar-at-Law, Chief Executive Officer, Calcutta Corporation *(ex-officio)*; Vacant, to be elected by the Corporation of Calcutta under Section 7 (1) (*a*) of the Calcutta Improvement Act, 1911; Mr. Prabhudoyal Himatsingha, elected by the elected councillors, Corporation of Calcutta, under Section 7 (1) (*b*) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. Charu Chandra Biswas, elected by Councillors other than elected Councillors of the Corporation of Calcutta, under Section 7 (1) (*c*) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. G. Morgan, C.I.E., elected by the Bengal Chamber of Commerce; Babu Hari Sankar Paul, elected by the Bengal Chamber of Commerce; Mr. H. Sudlow; F.R.I.B.A., Mr. L. S. Bingemann, I.C.S. Rai Badridas Goenka Bahadur, ; Lt. Bejoy Prosad Singh Roy, appointed by the Local Government.

During the 16 years that it has now been at work, the Trust have decided, and partly or entirely carried through, several improvement schemes for opening up congested areas, laying out or widening streets and providing open spaces.

In Central Calcutta many highly insanitary *bustees* have been done away with and several roads of an improved type laid out, the most important of which is the Central Avenue, 100 ft. wide, which at present extends from Beadon Street to Chowringhee, and will shortly be extended to Shambazar on the north.

In the north of the City, a park and play ground have been completed and several wide roads driven through that highly congested area. The approaches to the City have also been adequately widened.

The Suburban Areas to the South and South-East of Calcutta required greater attention and extensive development schemes were undertaken. Several open spaces and squares have been made in various parts. Insanitary tanks requiring approximately 2 crores C.ft. of earth have been filled up. Russa Road which forms the southern approach to the town has been widened to 150 ft. for a length of one mile and 100 ft. for a length of another mile. It now gives a most pleasant drive from Chowringhee to Tollygunge. To improve the drainage of this area a 100 ft. wide East to West road, from Ballygunge Railway Station to Chetla Bridge, and for recreation an artificial lake of 167 bighas with adequate grounds are being made.

Lastly, for the housing of the displaced population the Trust has undertaken on a large scale the following schemes:—

In the early stages three blocks of chawls were built in Wards Institution Street for persons of the poorer classes. It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect *bastis* of their own, the class of structures they were accustomed to live in. These chawls were then filled with persons of limited means, *e.g.*, School Masters, poor Students, Clerks and persons of the artisan class. As many as 1,200 people are housed in these chawls, these buildings, including land, cost Rs. 2,44,368 and are let at very low rents—ground floor rooms at Rs. 5 per mensem and top floor rooms on Rs. 6 per mensem, each room measuring 12'×12' with a 4 ft. verandah in front opening on to a central passage 7 ft. wide.

As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for bustees. Two sites with a lettable area of 16 bighas were acquired within the area of Maniktola Municipality, but they failed to attract because they were out of the way and were expensive.

KERBALA TANK LANE RE-HOUSING SCHEME.—In this scheme 4 detached and 35 semi-detached houses were built. The detached houses were sold last year as this scheme never became popular with the class of tenants for whom they were originally intended. Owing to this unpopularity the Board further decided to throw open to tenants of all classes 18 out of the remaining 35 semi-detached houses. This change of policy, however, produced no effect on the letting.

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Re-housing scheme had been sold by private sale shortly after the 31st March 1927.

BOW STREET RE-HOUSING SCHEME.—Seven blocks of buildings containing one-roomed, two-roomed and three-roomed suits have been constructed to re-house Eurasians and Anglo-Indians displaced by the operations of the Trust. This scheme has proved a striking success.

PAIKPARA RE-HOUSING SCHEME.—This scheme has an area of 36 bighas well laid out in 96 building sites. Special facilities are offered to dishoused persons for securing land in this scheme.

BOMBAY IMPROVEMENT TRUST.

The transfer of the Trust to the Municipality has now been effected by an Act of Legislature called "The City of Bombay Improvement Trust Transfer Act, 1925 (Bombay Act No. XVI of 1925). By virtue of this Act the powers and duties of the Trustees for the Improvement of the City of Bombay have been transferred and the property and rights belonging to the said Trustees have now been vested in the Municipal Corporation for the City of Bombay which is referred to as the Board, the President of the Corporation being also the President of the Board.

The execution of the powers and the performance of the duties vested in the Board is entrusted to a committee called the "Improvements Committee" subject to the general control of the Board. The Improvements Committee consists of eighteen members, that is to say, fourteen elected members and four nominated members. Of the elected members eleven are elected by the Board, one by the Bombay Chamber of Commerce, one by Indian Merchants' Chamber and one by the Millowners' Association out of their own bodies respectively. The nominated members are appointed by Government by notification, three of them being chosen from among the following:—

(*i*) The Director of Development, Bombay,

(*ii*) the Chairman of the Bombay Port Trust,

(*iii*) the Collector of Bombay, and

(*iv*) the Executive Engineer, Presidency District,

and the fourth by Government to represent labour from among the members of the Board.

The Municipal Commissioner has the right of being present at a meeting of the Committee and of taking part in the discussions thereat. but he shall not vote upon or make any proposition at the meeting. The Chief Officer, who is the Chief Executive Officer, is appointed by the Board subject to confirmation of Government. He has the same right of being present at a meeting of the Board and of the Committee and of taking part in the discussions thereat as a member of the said Board or Committee, but he must not vote upon or make any proposition at such meeting. He exercises general supervision and control over the acts and proceedings of all officers and servants of the Board in matters of executive administration and is directly responsible to the Board.

The specific duties of the Trust are to construct new and widen old streets, open out crowded localities, construct sanitary dwellings including those required for the Bombay City Police. The Trust derives its income from certain Government and Municipal lands vested in the Trust and the schemes it has undertaken. The Trust receives a contribution from Municipal revenues amounting to a definite share in the general tax receipts—approximating to 2 per cent. on assessments and subject to no maximum. Works are financed out of loans raised by the Board. By the close of 1925-26 the Board had raised Rs. 15,24 lakhs by loans and their total capital receipts (including grants of Rs. 54 lakhs received from Government) amounted to Rs. 18,23 lakhs out of which they had spent Rs. 113 lakhs on the improvement of Government and Municipal lands temporarily vested in the Trust and Rs. 15,92 lakhs on their acquired states and office buildings. The Trust have provided in their chawls accommodation for 37,000 persons.

The present Chairman and members of the Improvements Committee are as follows:—

(*a*) *Elected by the Board*:—

Mr. Hoosenally M. Rahimtoola, B.A., M.L.C., *Chairman*.

Mr. R. D. Bell, C.I.E., I.C.S.

Mr. W. Dillon, I.C.S.

Mr. G. K. Borade.

Mr. B. G. Horniman

Mr. N. G. Hunt.

Mr. K. F. Nariman, B.A., LL.B.

Mr. L. R. Tairsee.

Mr. Manu Subedar.

Mr. Mirza Ali Mohammed Khan, M.A., LL.B.

Mr. B. G. Parelkar.

The Hon'ble Sir Phiroze C. Sethna, Kt., O.B.E.

Mr. S. L. Silam, B.A., LL.B.

Mr. W. H. Neilson, O.B.E.

Mr. H. P. Mody M.A., LL.B.

Sir Vasantrao A. Dabholkar, Kt., C.B.E., M.L.C.

Dr. Accacio G. Viegas, L.M. & S.

Mr. Y. G. Pandit.

Municipal Commissioner—Mr. A. R. Dalal, I.C.S.

Chief Officer—Mr. R. H. A. Delves, F.S.I.

Secretary—Cawasjee Pestonjee Gorwalla, B.A.

Chief Accountant—Narayen T. Chawathey.

Engineer.—Mr. T. R. S. Kynnersley, A.M. I.C.E.

Trust Architect.—Mr. M. Framjee, L.C.E., L.R. I.B.A.

Land Manager.—Mr. M. S. Bharucha, L.C.E.

Estate Agent.—A. K. Dadachanji, L.C.E.

Bombay Development Scheme.

The Bombay Development Scheme in its widest sense represents concerted attempts by the three local bodies, the Municipality, the City Improvement Trust and the Port Trust, each working in its own sphere, and by the Government, to secure the rapid and adequate development of the city and suburbs of Bombay.

The Municipality is developing various areas in the city which will result in providing increased residential and business accommodation. The Mahim scheme will provide main avenue running north to south, in addition to the 60 feet road from Worli to Mahim Bazar and a large number of cross roads. It aims at the development of an area in which it may be possible to house, approximately, a population of 250,000. Provision has been made for a central park with a frontage on the bay and for a smaller park near the southern end of the area. The main contribution of the Municipality, however, towards the general development scheme lies in the great water and drainage projects which it is undertaking and which are essential for the health and well-being of the city.

Improvement Trust.—The Improvement Trust are developing the north of the Island on a large scale completing their old schemes, Dadar-Matunga and Sion-Matunga, and carrying on with the new schemes adopted in 1919, the total area of which amounts to about one-ninth of the area of the whole Island. Of the latter, the Worli scheme will provide for three classes of people, the richer class on the sea face, the middle class on the main road and a large area for the working classes on land reclaimed in the neighbourhood of the mills. At Dharavi the scheme for removing the tanneries and filling in the swamps to the south is in abeyance. The Sewri-Wadalla scheme is intended almost entirely for the working and lower middle classes, and the area included in it will, when the contemplated railway connections are made, be within easy access by rail from Victoria Terminus.

Port Trust.—The construction of the new cotton depot on the Mazgaon-Sewri reclamation has been completed and has released for other purposes the ground now occupied by the Cotton Green.

Government Programme.—The works for which Government are directly responsible are as follows :—

(*a*) The Industrial Housing Scheme providing one-room tenements for the working classes, to meet an actual existing shortage of accommodation as reported by the Municipal Commissioner in 1919.

(*b*) The Back Bay Reclamation, to reduce congestion in the business area and provide residential accommodation and open spaces in the south of the City.

(*c*) The development of South Salsette, including Trombay, partly for residential and partly for industrial purposes.

(*d*) The provision of other industrial areas at greater distances.

(*e*) The improvement of communications to the suburban areas.

The question of special measures for the development of Bombay was under the consideration of Government for many years. The results of the last general survey of the subject are contained in the report of the Bombay Development Committee submitted in May 1914. The war made it impossible then to carry out any large schemes. When the war had come to an end, it was found that owing to the large increase in the City's population during the war, and the high prices of the materials conditions were much worse than before, and that more rapid action was necessary.

Scope of Work.—In a speech to the Legislative Council in August 1920, His Excellency the Governor (then Sir George Lloyd) explained that the industrial housing scheme, which Government considered essential, would be carried out by them direct, instead of being entrusted to the Municipality or the Improvement Trust, because of the very heavy liabilities which already rested on those bodies. He introduced a Bill for the levy of a cess of one rupee per bale on cotton imported into Bombay, the proceeds of which would be used partly to provide additional revenue for the Municipality in view of its large programme of expenditure, partly to meet the loss anticipated on the housing scheme, and partly to assist development schemes in Salsette.

He announced Government's decision to establish a new Development Department and Directorate which as was at once a Department of Government and an executive organisation and was constituted a few months later. Some of the programme of work of the Department has since been completed but the greater part of it has been suspended for the present owing to depression in the land market, while the construction of more chawls has been held in abeyance owing to the decrease in population since the census of 1921. The Development Directorate was, therefore, abolished in January 1927 and the executive organisation reduced and reorganised. There is still a special branch of the Government Secretariat, *viz.*, the Development Department which deals with development operations.

Personnel.—The whole Development Department is in charge of the Honourable Sir GHULAM HUSAIN HIDAYATULLAH, KT., B.A., LL.B., J.P.

The Back Bay Reclamation Scheme is in charge of a Chief Engineer assisted by two Deputy Chief Engineers, one for the Dredging Section and the other for the Marine Lines, Colaba and Quarry Section.

The technical control over all works, other than the Back Bay Scheme, was transferred to the Public Works Department, towards the end of the year 1926.

The Government of India have appointed a special Audit and Accounts Officer for the Bombay Development Scheme, and have authorised his appointment as Deputy Financial Adviser under the Finance Department.

R. D. BELL, C.I.E., I.C.S., Secretary to Government, Development Department, and Commissioner, Bombay Suburban Division, (also holds the appointment of Land Manager).

H. St. C. Smith, J.P., Deputy Secretary to Government, Development Department, and Assistant Commissioner, Bombay Suburban Division.

R. B. Vachha, M.A., J.P., Assistant Secretary to Government, Development Department.

K. S. Framji, C.I.E., B.A., L.C.E., F.U.B.: Chief Engineer, Back Bay Reclamation Scheme.

E. M. Duggan, B.Sc., A.M. Inst. C.E., Deputy Chief Engineer, Reclamation Branch, Marine Lines, Colaba and Quarry Section.

C. R. Brims, Deputy Chief Engineer, Reclamation Branch, Dredging Section.

G. D. Kundaji, M.R. San. I. (Lond.), A.M.I.E. E.S. (Glas.), Marine Surveyor.

K. R. Doctor, F.S.I., L.C.E., A.M.I.E., Personal Assistant to the Land Manager, Development Department. (Also Assistant Development Officer, Kurla and Trombay areas, and Special Assistant to the Collector, Bombay Suburban District.)

S. M. Bharucha, B.A., Collector, Bombay Suburban District, and Salsette Development Officer. (Also Superintendent, Bombay Suburban Survey).

Land Acquisition.

G. C. Rowe, F.S.I., F.I. Arb., J.P., Land Acquisition Officer for the City of Bombay.

Audit and Finance.

The duties of the Financial Adviser are now carried out by the Secretary to Government, Finance Department.

S. M. L. Bean, Deputy Financial Adviser to Government, Development Department, and Audit and Accounts Officer, Bombay Development Scheme.

Military Lands Scheme.

S. M. L. Bean, Secretary, Board of Control.

I. C. Dare, B.A., F.R.S.A., F.S.I., A.M.I.E., M.I.S.E., Executive Engineer.

Back Bay Reclamation Scheme.—Having regard to the recommendations made by the Mears' Committee in January 1927 and in accordance with the wishes of the Legislative Council Government have decided for the present to confine future operations in connection with the Back Bay Reclamation Scheme to the reclamation of two blocks (Nos. 1 and 2) at the northern end of the area and of two blocks (Nos. 7 and 8) at the southern or Colaba end, with a marine drive along the existing foreshore connecting blocks Nos. 2 and 7. The area under reclamation has thus been reduced from 1,145 to 552 acres. A representative committee has also been constituted with a view to advise Government on all important matters connected with the reclamation. A layout plan in respect of the blocks which are proposed to be reclaimed has been prepared and is now before another committee specially appointed for the purpose. A revised detailed estimate in respect of the reduced scheme is also under preparation. Dredging into blocks Nos. 1, 7 and 8 is complete. Dredging into block No. 2 will be carried out during the dredging season of 1928-29, and thereafter all dredging operations will cease.

All the four blocks require to be topped with murum before they can be developed or otherwise utilised. The work of murum topping on block No. 8 has been given on contract and is expected to be complete by June 1929 when the blocks will be transferred in an undeveloped condition to the military authorities. An area of 24 acres in this block has already been transferred in 1927 for use as a military recreation ground. After the completion of block No. 8 the murum topping of blocks Nos. 1, 2 and 7 will be undertaken and the development of these areas by roads, water supply and sewerage will follow.

Industrial Housing.—In Bombay City apart from some minor schemes affecting Government properties, the work of the Development Department consists of Industrial Housing and the Back Bay Reclamation. There are four Housing schemes and Government have decided that till these are fully utilised further new schemes are not to be embarked on. The schemes which are now complete are as follows :—

1. *Naigaum*—42 chawls.
2. *DeLisle Road*—32 chawls.
3. *Worli*—121 chawls.
4. *Sewri*—12 chawls.

Each chawl with one exception contains 80 rooms of 160 square feet, superficial area. There is a *nahani* in each room, and each floor has its own water supply and modern sanitary conveniences. The areas, in which the chawls are situated, are conveniently situated near the mills and other factories, and are at the same time open and healthy and well provided with open spaces. Out of the 16,524 tenements ready for occupation, over 8,200 were occupied in December 1927 but the subsequent mill-strikes brought the numbers down to 6,500 in August 1928. Provision has been made for shops in the chawls and at Worli there is a specially constructed market place. The Bombay Municipality have opened vernacular schools in the chawls at DeLisle Road, Naigaum and Worli, and the Infant Welfare Society, the Young Men's Christian Association, and the Hindu Maha Sabha are doing good work in the same areas. A Municipal dispensary has been opened at Worli.

The average economic rent of the chawls works out approximately to Rs. 16 per month per tenement but the rents actually charged for rooms let singly are as follows :—

	DeLisle Road.	Naigaum.	Worli.	Sewri.
	Rs. a.	Rs. a.	Rs. a.	Rs. a.
Ground floor rooms .. .. .. } First floor rooms .. .. .. } Second floor rooms .. .. .. }	9 8	7 0	5 0	7 0
Third floor rooms	9 0	7 0	5 0	7 0

On this basis there will be, when the chawls are fully occupied, an annual loss of Rs. 16½ lakhs most of which is covered by the revenue from the cotton cess. Owing to the large number of vacancies, the loss at present is much more than this. The vacancies are mostly at Worli where 77 out of 121 chawls have not been brought into use. At Naigaum there are 5 unoccupied chawls and at DeLisle Road 4.

To large employers of labour, including Government Departments, to societies, institutions and similar organisations, or bodies, and to private individuals acting on behalf of any community or section of the public, concession rents, as under, are charged if whole chawls are rented :—

Chawl area.	Annual rent per chawl.
	Rs.
Worli	3,862
Naigaum	5,478
DeLisle Road	7,398

The above rents include charges for maintenance and repairs, sweepers and sanitary stores *plus* municipal taxes which may vary. These rents are equivalent to an inclusive rent of about Rs. 4, Rs. 5-11-0, and Rs. 7-11-0 per room per mensem at Worli, Naigaum and DeLisle Road, respectively. In fixing them a deduction has been made from the usual rents on account of vacancies, bad debts and the cost of rent collection The offer has so far been availed of by the B. B. & C. I. Railway Company, who have rented five chawls at Worli for housing their employees, by the Bombay Municipality who have taken one whole chawl for housing the employees of the King Edward Memorial Hospital and by Government for housing the police on the G. I. P. and M. & S. M. Railways.

As an experimental measure one chawl at DeLisle Road and one chawl at Naigaum have been converted into two and three-roomed tenements. Four chawls at Worli have been provided with electric lights, as an experiment.

Salsette.—In Salsette, the work of improving communications has been wound up except in the case of the Central-Salsette Tramway and operations are now restricted to departmental suburban schemes and town planning schemes. Nine out of twenty-four suburban schemes are now closed. Of seven residential schemes the most important are those at Khar, Chapel Road (Bandra) and Danda (within Bandra Municipal limits). The Khar scheme provides about 900 building plots between a new railway station of the same name and the sea. The new electric train services have shortened the journey to Bombay City (Victoria Terminus or Church Gate) to 35 minutes. Cheap bus services from and to the station and electric lights and fans have now been introduced. Plots in this scheme under the stimulus of the State-aided building scheme described below continue to find ready buyers. The Chapel Road scheme of 140 building plots is complete. The roads have been transferred for maintenance to the Municipality and only two plots remain for sale. The Danda scheme of 16 acres has excellent road connection with Bandra Station. It has an excellent site and is being gradually built over. The Chembur Garden Suburb scheme in north-west Trombay has been curtailed. The St. Anthony's Homes Co-operative Society have taken up a very large area in this scheme and seem likely to make a success of their enterprise. A small scheme at Santa Cruz (Willingdon South) is also successful. The schemes at Shahar and Kirol North (Ghatkopar) are dormant.

The Kurla-Trombay Railway is now under the control of the G. I. P. Railway. The passenger service from Kurla to Chembur is well patronised. An extension to Mandala which serves also the new Military Explosives Depot was opened in 1927.

The Central-Salsette Tramway runs from Anik to Kurla and then through the Shahar area lying between the G. I. P. and B. B. & C. I. Railways, to Andheri. It is now complete as a single line and was opened for traffic in January 1928.

The Salsette water-supply scheme obtains water from the Bombay Municipality's Tulsi and Vehar mains and supplies it in bulk to the Municipality of Bandra and Kurla. The Development Department has made its own distribution scheme in the areas of Andheri and neighbourhood, Vile Parle, Santa Cruz, Juhu, Khar, Ghatkopar and in Trombay.

In order to help people of moderate means to become owners of their homes, Government have sanctioned a scheme of financial assistance to intending purchasers of plots in the residential schemes of the Development Department. The essential feature of this scheme is that Government will advance at 6 per cent. interest, a sum equal to three-fourths of the cost of land and half the cost of the building which it is intended to erect, the advance being repayable in instalments spread over a period not exceeding 15 years. Another scheme for permanent Government servants on slightly easier terms has also been sanctioned. Government have also sanctioned the extension of the benefits of the State-aided building scheme to Co-operative Housing Societies for building houses on the tenant ownership system. The essential feature of this scheme is that Government will advance to Co-operative Housing Societies which acquire building plots in the estates managed by the Development Department subject to certain conditions, sums to the extent of three-fourth of the value of any plot *plus* half the estimated cost of the building proposed to be erected on it with interest at 5½ per cent. per annum, the advance being as in the former cases repayable in instalments spread over a period not exceeding 15 years.

Industrial Town.—The Ambernath Development Scheme aims at creating a new township to establish industries with all modern facilities. Roads have been provided in the factory area and for staff bungalows and workmen's quarters. The existing sewage arrangements are by means of septic tanks. A market to serve the residents of the area has also been provided. The G. I. P. Railway are running a shuttle service between Kalyan and Badlapur and are remodelling Ambernath Station to deal with the traffic of the factories. An arterial siding for the factories is also being arranged by the Railway.

The water scheme is located at Badlapur five miles from Ambernath Station. The works comprise—(*a*) A barrage across the Ulhas river

about 1½ miles from the railway station; (b) A set of Paterson rapid filters to filter three million gallons of water daily; (c) Protection wall for the Ulhas left bank.

The filtered water is pumped by electric power transmitted from Ambernath to a reservoir on the top of an adjoining hill commanding the factory area. The plant designed for a supply of three million gallons per day is capable of extension at a small cost to six million gallons per day. The reservoir has a capacity of about three million gallons. A proposal to supply the village of Badlapur with filtered water from the scheme has been sanctioned. Proposals for the supply of water to the Kalyan Municipality are under consideration.

A small power station supplies electric energy for running the permanent pumping plant at Badlapur and the factories in the area. The plant has been so laid out that it can easily be supplemented, should further demands arise in the future.

Town Planning Schemes.—The total number of town planning schemes undertaken in the Bombay Suburban District under the provisions of the Bombay Town Planning Act, 1915, is 25. The total area comprised in these schemes is 1486·34 acres. So far 15 town planninig schemes, comprising an area of 663.66 acres have been completed. The cost of works in the completed schemes amounts to Rs. 9,57,000.

Military Lands—Arrangements have been made with the Government of India involving the relinquishment by the military authorities of practically all the land they hold in the Fort area. The services displaced are to be reinstated partly at Deolali and partly at Colaba, where the military area is to be increased by about 245 acres at the southern end of the Back Bay Reclamation. The Government of India have to pay the Government of Bombay for this land. The cost of new buildings, etc., due to the removal of the military from the Fort is to be covered by the sale of the land to be vacated. A large area of land on the Paltan Road Estate (formerly the old Paltan Road Lines) has been sold to the Bombay Municipality. A few plots on the estate and another in Carnac Road have also been sold. The plots available for sale in the Mazagon Defence Yard site have all been sold, while the small site, known as the old Saluting Battery Site, situated at Strand Street on the Harbour Face, south of the Apollo Bunder, was sold to the Port Trust for road widening. The old town barracks in the Fort have been sold to the Bombay Municipality in connection with its Hornby Road Ballard Pier Scheme. New Indian Infantry Lines at Carnegy Lines near Marine Lines, New Indian Infantry Lines at Deolali, the temporary Mechanical Transport Depot at Colaba, the married officers' quarters at Colaba, the Pilot Bunder flats at Colaba, the quarters for the Genral Officer Commanding, Bombay District at Colaba, the new Explosive Depot at Trombay and the new building for Auxiliary Force Headquarters at Marines Lines have been completed. The Bombay Military Lands Scheme is in charge of a Board of Control, consisting of the Secretary to Government, Development Department and the General Officer Commanding, Bombay District. The Audit and Accounts Officer, Bombay Development Scheme, is also Secretary, Board of Control, and Financial Adviser and Audit Officer for the Military Lands Scheme. The staff employed on this scheme do not form part of the Development Department. As military land becomes ready for disposal, it is handed over by the military authorities to the Bombay Government and action in regard to its disposal is taken by the Development Department of Government.

RECLAMATION INQUIRY AND REPORT.

The progress of the Development Scheme came under acute public discussion in 1925-26, and in particular the Reclamation of Back Bay. There were discussions in the Legislative Council and elsewhere, and various committees set up by the Government of Bombay severely criticised the increase in the estimated cost, some indeed the whole financial basis of the Scheme. The Government of India, therefore, in its supreme capacity, set up an over-riding Committee to inquire into the progress and future of the Reclamation.

Chairman :—Sir Grimwood Mears, Chief Justice, Allahabad High Court.

Members : Sir M. Visvesvaraya, K.C.I.E., D.SC., M.I.C.E., Sir Frederick Thomas Hopkinson, K.B.E., M.I.C.E., and Mr. S. B. Billimoria, M.B.

Secretary :—Mr. R. B. Ewbank, C.I.E., I.C.S.

The terms of reference of the Committee were :—

Firstly, to inquire into the history of the inception and conduct of the Back Bay Reclamation Scheme.

Secondly, to make recommendations as regards future operations.

The Committee took evidence in India and in England, and on December 1st signed a unanimous report, which was issued early in 1927. The tenor of this is covered in the following official summary.

The object of the Back Bay Reclamation Scheme was to reclaim from the sea an area on 1,145 acres at an estimated outlay of about Rs. 367 lakhs. Government were prepared to spend on the scheme up to Rs. 400 lakhs if necessary. A revised estimate for Rs. 702 lakhs was approved within two years of the original sanction, and if the scheme is to be completed, a second revision of the estimate will be necessary. The total cost will approximate to about 900 lakhs gross, exclusive of interest charges. This total sum will be reduced by the 256 lakhs to be received from the Military authorities and any other subsequent receipts from sales of land. The programme of the reclamation, which was to have been completed by 1926-27, has completely broken down. If it is continued under present conditions it cannot be finished for many years to come.

It is believed that land reclaimed cannot in the near future be sold at remunerative prices and care should be exercised not to reclaim land in advance of the demand. The work is being constructed from public loans on which interest and sinking fund charges have to be met and Government are faced with a growing debt.

The difficulties in which the scheme is at present involved arise from :—

(1) the unsatisfactory character of the estimates;

(2) defective organisation;
(3) the failure of the dredging operations; and
(4) the fall in land values.

The defects in the various estimates would have been avoided if there had been sufficient and careful preliminary investigation. If an alternative comparative estimate for dry filling had been prepared at the outset and the cost of adequate dredging plant properly investigated, Government might have hesitated to commit themselves to the use of suction dredgers for this scheme. A dredging scheme costing Rs. 400 lakhs was an attractive financial proposition, but it might very well be considered to have changed its character when the cost went up to 702 lakhs. Reclamation by dry filling, if then practicable, might have proved cheaper.

As regards the organisation and arrangements made for the conduct of the scheme, these in themselves were almost unworkable. A reading of clause 3 of the agreement between the Secretary of State in Council and the firm of Meik and Buchanan shows that responsibility was not clearly defined between the Engineers and the Director of Development. Much of the technical work was left to an overworked Chief Engineer or was not done at all. There was no costing system, without which it was impossible properly to control expenditure.

Because nobody believed himself responsible for the due execution of the work, unwise decisions were taken and mistakes made, such, for instance, as commencing the construction of the sea wall from both ends, delay in sealing the rubble mound, undertaking dredging operations in Back Bay without consideration of cost, absence of preconcerted programmes to regulate operations, etc. All these militated against the success of the scheme and added to its cost.

The inability of the dredger to give the required output has been the chief cause of failure and has had a disastrous effect on the financial prospects of the scheme. The principal reason for the present serious position of the scheme was the ordering of the dredger on estimates and specifications put forward by Messrs. Simons and Company which were not examined with due care, the absence of proper guarantees for the sufficient output of the dredger and the acceptance of a quotation for a dredging plant without any real effort to secure competitive tenders.

The work having been undertaken in anticipation of realising large profits, the scheme was subjected to very great criticism when a period of acute trade depression set in with a consequent fall in land values. The trade depression was not a matter which could have been foreseen, although caution was necessary in undertaking a scheme of the magnitude at a time when world conditions were unstable. With the disappearance of the prospect of profits public criticism concentrated on the defects of the scheme.

The Future:—With regard to future operations, the following is a summary of the recommendations which we have made:—

(*i*) For financial reasons the completion of block 8 is a most urgent work.

(*ii*) The foreshore portion along blocks 3, 4, 5 and 6 should be filled in to an average width of 300 feet seaward of the present shore-line and brought up to the ground level of the reclamation. The strip should curve at both ends so as to join on with block 2 at the northern and block 7 at the southern end. This should be done as speedily as possible.

(*iii*) The foreshore strip should be reclaimed with moorum filling.

(*iv*) A complete lay-out of the area to be reclaimed should be prepared. The foreshore strip should be developed as soon as completed and blocks 1, 2 and 7 gradually as land is taken up.

The lay-out already prepared for the complete scheme (1,145 acres) should be re-examined with the help of a Committee; and the lay-one of the area now recommended for reclamation should fit in with the lay-out approved for the complete reclamation, if ultimately undertaken.

(*v*) The Corporation of Bombay should share the cost of development, and Government should arrive at an understanding with the Corporation on this point.

(*vi*) The results of the work on the "Sir George Lloyd" and the "Colaba" during the current season should be verified. If the cost of filling by dredging approximates to that of moorum and the quality of the reclaimed land is satisfactory, they might be used for blocks 1 and 2 after block 7 is completed. If not, they should be disposed of. Notice should not be given to the staff until this point is decided.

(*vii*) The reclamation should be removed from the control of the Development Directorate and carried out in accordance with one or other plans suggested in the report. A small committee, including one or two experienced engineers, should be constituted to advise Government on matters referred to them.

(*viii*) The work should in future, as far as possible, be carried out by contract agency.

(*ix*) Alternative estimates of the cost of the scheme now proposed are submitted. The extension of the 300-foot foreshore strip by additional strips of 400 feet and 300 feet, as need arises, is contemplated. Blocks 1 and 2, as being the most valuable in the whole project, should be completed as soon as possible. No part of them should be assigned for recreation purposes.

(*x*) Detailed revised estimates should be prepared at once. The form of tender issued by the Development Directorate should be revised.

(*xi*) Every endeavour should be made to complete the scheme proposed in three or four years. When a demand arises for completing the whole reclamation, the work may be carried out by moorum filling exclusively.

Conclusions:—Lord Lloyd left England charged by Mr. Montagu to take urgent steps to improve the housing conditions of Bombay. Whilst that did not necessarily imply the undertaking of a reclamation scheme, reclamation had nevertheless been considered for many years to be an integral part of any comprehensive scheme for the betterment of conditions. We are satisfied from the evidence that Mr. Montagu was deeply interested in the Reclamation, and wished it to be carried through. We think that Lord Lloyd and the Government of Bombay were justified in accepting Sir George

Buchanan as an expert to report on Mr. Kidd's scheme, and that having taken the man recommended by the Government of India, the proper and prudent course was to treat his opinion as final and authoritative.

Lord Lloyd's letter of 25th May 1919 shows conclusively that he had no predilection for a reclamation scheme, and that he was prepared to abandon it at once had Sir George Buchanan reported adversely on it.

Though we are aware that a Governor must necessarily rely upon his advisers for the details of any particular scheme, yet having regard to the personal interest displayed by Lord Lloyd, as disclosed by his evidence and that of Sir George Buchanan, we are surprised that his acute intelligence overlooked the apparent inadequacy of Sir George Buchanan's figures, even though he held the belief that the 1912 figures of Mr. Kidd were to some extent inflated. In the Report, Sir George Buchanan himself gave 241·90 lakhs as the figure which he would have estimated in 1912, and on that basis the work could not have been done by him in 1919 for less than 605 lakhs.

To a lesser extent we are surprised that Lord Lloyd, when reading Sir George Buchanan's report, did not notice that Sir George Buchanan described the clay as hard, whilst Messrs. Simons & Co. were putting forward an offer for a soft clay dredger.

We do not agree with Lord Lloyd that this was a technical point. The explanation may be a technical one, but the discovery of the apparent contradiction between the character of the clay as described by Sir George Buchanan and Messrs. Simons & Co. needed no technical knowledge. It stood out on the document and was, unless satisfactorily explained, a contradiction in term.

We are satisfied that Lord Lloyd acted throughout with the highest motives, anxious only to make good his undertaking to Mr. Montagu and to benefit the City of Bombay.

Sir George Curtis, who is living at Dinard, was too ill to attend. He has, however, furnished answers to certain questions which were sent to him. Although he was the Member in Charge during the inception of the scheme he has not been able at this distance of time to give us any information of value, and he cannot enlighten us at all as to the reason why no one in the Government of Bombay queried the varying desciptions of clay or compared the estimates of Mr. Kidd and Sir George Buchanan with reference to 1912 and 1919 prices.

The Estimates.—We cannot understand how Sir George Buchanan's figures found acceptance in Bombay and Delhi even with the addition of some 10 per cent. It was common knowledge that prices of plant, material and labour, when taken collectively had gone up at least 2½ times in the period between 1912 and 1919. The 1912 figure of Mr. Kidd—325·23 lakhs—had been accepted both by the Government of Bombay and the Government of India as a fair figure. If that was the belief, then 367·61 lakhs was a manifest underestimate, and proper scrutiny would infallibly have demonstrated it. When Sir George Buchanan was being questioned on these two sets of figures by the Committee, and the rise in prices and the inevitable inferences arising from them, he "preferred" not to answer the questions.

The failure of the Government of Bombay and the Government of India, and in particular the failure of Sir Sydney Crookshank, to notice the varying descriptions of clay contained in (*a*) Mr. Kidd's Report, (*b*) Sir George Buchanan's Report, (*c*) Messrs. Simons & Co.'s letter of 12th September, 1919, and the "general conditions" enclosed with that letter are regrettable.

The reports of Mr. Kidd and of Sir George Buchanan were not studied with due and proper care by the Bombay Government and the Government of India respectively.

The Government of Bombay ought to have approached the Port Trust and the Royal Indian Marine for permission to dredge in the Harbour before deciding on dredging as the mode of reclamation.

We consider that Sir George Buchanan ought to have made far more extended and careful local investigations. These occupied him for less than a fortnight in May, 1919.

He knew that the Port Trust had had "difficulties" with the dredgers "Kalu" and "Jinga" built by Messrs. Simons & Co. He ought to have made specific inquiries about this, but he did not do so. Mr. Messent, the engineer to the Port Trust, gave him at some time the pamphlet entitled "Some results of the working of the 'Jinga' and 'Kalu.'" A table of figures in that document showed that the average of both vessels was 1,126 cubic yards per hour as compared with 2,000 cubic yards per hour guaranteed and achieved on test. So little attention did Sir George Buchanan pay to this document that at first he said he had never seen it and knew nothing of the figures. A few days later he informed the Committee that he had found a copy of the document and that, as it bore Mr. Messent's initials, he no doubt got it from him.

In his letter of 25th July, 1919, to Messrs. Simons and Company, he wanted "your guarantee that the plant will do the work required." He did not get it. He wanted also a dredger "with a minimum capacity of 2,000 cubic yards of clay per hour." He did not get it. On the contrary, he ultimately accepted a specification in which these two most necessary stipulations were omitted.

Not having studied Mr. Messent's publication, he held the unfounded belief (which a careful reading of Mr. Messent's document would have dissipated) that the results of the work of the "Kalu" and "Jinga" justified him in specifying the same output per hour on test for the "Sir George Lloyd."

The Dredger.—Messrs. Simons and Company, through their representative Mr. McMurray, were well aware that hard clay existed in Bombay Harbour. Partly for that reason they refused a test on site. They suggested a dredger designed for soft clay but gave no guarantee that it would do the required work or give a minimum output of 2,000 cubic yards per hour. In drafting their offer of 12th September 1919, we think they were more concerned in protecting themselves than in supplying a dredger fit for the known purpose for which it was going to be used. Accepting

Mr. McMurray's own account of the interviews of July and August 1919, we disapprove of his attitude and that of his firm. Sir George Buchanan accepted any conditions they made, because he had the fixed belief that the harbour reclamation was in all respects the same problem as the Sewri, and because of his erroneous belief in the capacity of the "Kalu" and "Jinga."

The capacity of the dredger was much too low, and a guarantee of an output of soft clay "at the rate of" 2,000 cubic yards per hour on test meant infallibly an output under ordinary working conditions of much less. The position seems ultimately to have been appreciated by Sir George Buchanan, who, in his report of 15th December, 1924, thought it "improbable with the class of material now being taken from the harbour that the 'Sir George Lloyd' will do her estimated output of five million cubic yards per annum." In the same report he said "if we get two-thirds of the total output we shall be doing well."

Having regard to the great initial outlay and the need for speedy realisation, the time within which the work would be completed was an element of the highest importance.

We are convinced that no crew, however skilful and diligent, ever can or will get anything like five million cubic yards of material from the Harbour in any one season by the agency of the "Sir George Lloyd." In a deep bed of soft clay they probably would get from time to time material at the rate of 2,000 cubic yards per hour. The first two reasons given by Mr. Halcrow in his report and set out in the body of this document are conclusive against the possibility of any continuous happening of this kind. The material on the average is too stiff, the depth of material uncertain, the bed of the sea uneven, with upcropping rock, stones and moorum, the capacity of the dredger too low.

Whilst we are of opinion that the "Sir George Lloyd" would under test conditions have delivered 2,000 cubic yards of soft clay per hour, and therefore conformed to the building contract, of we are opinion that the "Colaba" did not do so, and that she was structurally weak. In our view she ought to have been stiff enough to take any variation in load without sustaining damage by vibration.

In November, 1919, Sir George Buchanan being in ignorance of the quality and characteristics of the silt or mud and clay in the harbour, ought, as a measure of prudence, to have advised the Government of Bombay that no decision should be come to to treat the reclamation as a dredging problem until check borings had been taken to ascertain the density, depth and resistance of the silt or mud and clay in various parts of the harbour, and also that it was essential to ascertain by experiment whether the material obtained from the bed of the sea would dry out when deposited in an area under reclamation. Certainty on these points could have been arrived at by December, 1919, and the check borings were all the more necessary as Messrs. Simons had at this time definitely refused a test at Bombay.

With regard to the order of the dredger we consider Sir George Buchanan committed grave errors of judgment. The principal cause of the failure of the dredging operations arose, in our opinion, from the fact that Sir George Buchanan did not take the trouble to ascertain the working records of the "Kalu" and "Jinga," and believing that they had done "extraordinarily good work" was of opinion that vessels of a slightly increased horse-power of the same type would be adequate for the work. A most serious mistake in connection with the order of the dredger was the assumption that a machine capable of dredging 2,000 cubic yards on a short test would be capable of averaging that quantity during a whole season.

The Wall.—The building of the sea wall at both ends simultaneously was disastrous. Though the suggestion emanated from the Government of Bombay who must therefore take the greater part of the responsibility, we are of opinion that Sir George Buchanan should have advised against it, and resisted it, and should in the circumstances of the sale of Block 8 to the Military have prepared a programme for the building of the wall and the commencement of the Reclamation from the Colaba end only.

Moreover, the building of the sea wall from both ends simultaneously prevented the continuance of the original and sensible plan which was to shut in an area as soon as possible and pump into it with the least possible delay.

We are quite unable to accept the theory set up by Sir George Buchanan that the phrases "soft clay" and "stiff clay" as used by him connoted the same density of material. Also we cannot accept his explanation that where he uses the words "hard clay" or "closely compacted clay" or other equivalent phrase, he meant, not that it was hard in its position in the harbour, but that it was of a character which would become hard when pumped into the reclamation.

The firm of Messrs. Meik and Buchanan did not prepare proper programmes of work nor adhere to any fixed programme. The reason of their indecision with regard to the dredging was due partly to the limitation of area by the Port Trust and Royal Indian Marine (for which neither the firm nor Sir George Buchanan can be held accountable), but principally to the fact that, having no certain belief in the quality of the material in the harbour, they were unable to formulate proper and precise future plans.

Sir George Buchanan did not realize that he was the expert to whom from first to last the Government looked for advice and assistance. He did not appreciate that when he found causes for complaint it was his duty to require them to be remedied, and in virtue of his responsibility for supervision to see that they were remedied. In his evidence he ascribed to himself a position of no power, weight or importance, and he allowed his opinion to be disregarded. We think that this was an entire misconception of his position, and he never ought to have allowed his advice to be set on one side. On such occasions as this happened he should at once have realised his duty to the Government of Bombay and assisted them by making the facts known to them, and we can have no doubt that Lord Lloyd and Sir Leslie Wilson would have welcomed information and would have given all help and encouragement

to Sir George Buchanan in any effort made by him to advance the work.

Responsibility.—The agreement of the 17th March, 1921, between the firm of Meik and Buchanan and the Secretary of State for India in Council was an unhappily framed document. Clause 3 gave Sir Lawless Hepper the opportunity of saying that as the Resident Engineer had to carry out the details of the work in accordance with the firm's instructions, that therefore the firm were responsible for the due execution of the works. On the other hand, Sir George Buchanan naturally pointed to the sentence, also in Clause 3, that the Resident Engineer should be "subject to the control of the Director of Development." From this arose a mutual misunderstanding. Thus from the outset neither Sir George Buchanan nor Sir Lawless Hepper seemed to have a very clearly defined idea of their respective duties. Later, when the disaster was threatening the enterprise, each relied upon his interpretation of the agreement. Sir Lawless Hepper, when giving evidence, insisted before us that Sir George Buchanan was entirely responsible for the due execution of the works, as if he were, in fact, a contractor who had undertaken them. On the other hand, Sir George Buchanan contended that that responsibility lay with Sir Lawless Hepper, pointing out that he it was who had control of the Resident Engineer, and that his firm has no power of dismissal over any of the staff. On the strict construction of the agreement we incline to the opinion that Sir George Buchanan is right, although there are statements of his to be found in his correspondence which would bear the interpretation that he did regard his firm as responsible for the actual carrying out of the works.

If the Government of Bombay intended to make Sir George Buchanan's firm responsible for the execution of the works, nothing was easier than to say so in plain and simple words, and as a necessary corollary to put the Resident Engineer entirely under the control of his firm, including the power of appointment and the power of dismissal. The provision that the Government of Bombay should pay the Resident Engineer would not have detracted from a provision that the firm should be responsible for the due execution of the work, nor from the legal position that the Resident Engineer would have been the servant and agent of Sir George Buchanan. In that way the position of Sir George Buchanan and Sir Lawless Hepper would have been perfectly clearly defined.

The reports of the Development Directorate, drafted by Sir Lawless Hepper, cannot be justified. They did not present a true picture of the progress of the work and concealed material circumstances.

We are of opinion that Sir Lawless Hepper had so much work in connection with the other Development Schemes that even if he had appreciated his responsibility for the execution of the works he could only have carried out that duty as regards the Reclamation by neglecting other duties relating to the other schemes.

Mr. Lewis was not a "specialist in sea works and dredging"; Sir George Buchanan ought not to have nominated him. He was however, greatly handicapped by the necessity of preparing a detailed project estimate, and this so absorbed his energies that he was unable to devote himself fully to supervising and pushing on the work. Very shortly after he became Resident Engineer we are satisfied that he was in ill health which became manifest and disabled him in 1922. It is most regrettable that he was allowed (contrary to Sir George Buchanan's advice) to remain at his post till July, 1924.

We are of opinion that Mr. Elgee, Mr. O'Rorke and Mr. Speirs have done their best on all occasions to promote the interests of the Reclamation, and that the quarry, constructional and dredging staff have done their duty.

It has been put forward that the Reclamation of Back Bay would, by providing more land in the business and residential area, in some way relieve housing conditions of the poorer classes. That, in our opinion, is too remote for serious consideration, but, has Back Bay proved to be the financial success which was anticipated, the advantage to all classes of persons in the City and throughout the Presidency would have been that there would have been available immense sums of money to be used for any purpose pleasing the Legislative Council. The confident anticipation of profits had no doubt considerable weight in causing the reclamation of Back Bay to be accepted as an integral and necessary part of any comprehensive plan of development.

Action on the Report.—Having regard to the recommendations made by the Mears' Committee and in accordance with the wishes of the Legislative Council, Government have decided for the present to confine future operations in connection with the Back Bay Reclamation Scheme to the reclamation and development of blocks Nos. 1, 2 and 7 and reclamation of block No. 8 (undeveloped) with a marine drive along the existing foreshore connecting blocks 2 and 7. The area under reclamation has thus been reduced from 1,145 to 552 acres. A representative committee has also been constituted with a view to advise Government on all important matters connected with the reclamation. A layout plan in respect of the blocks which are proposed to be reclaimed has been prepared and is now before another committee specially appointed for the purpose. A revised detailed estimate in respect of the reduced scheme is also under preparation. The dredger "Kalu" in conjunction with the intermediate pumping station "Jinga" will be commissioned to work in connection with block No. 1 from October 1927. The dredging into this block will be continued up to May 1928, and resumed in October 1928, if necessary. The entire work of murum topping on block No. 8 has been given on contract and proposals for letting out the remaining work on contract basis is under consideration. At the request of the Military authorities, an area of about 24 acres in block No. 8 has been prepared in advance of the rest of the block and was handed over in 1927 The remaining portion of block No. 8 is expected to be transferred to them by May 1928 at the latest. The programme of reclamation, as at present contemplated, is expected to be completed by 1931-1932.

The Indian Ports.

The administration of the affairs of the larger ports (*Calcutta, Bombay, Madras, Karachi, Rangoon and Chittagong*) is vested by law in bodies specially constituted for the purpose. They have wide powers, but their proceedings are subject in a greater degree than those of municipal bodies to the control of Government. At all the ports the European members constitute the majority and the Board for Rangoon consists mainly of European members.

The income, expenditure and capital debt, according to the latest figures obtainable from the Department of Commercial Intelligence and Statistics (India) of the six principal ports managed by Trusts (Aden is excluded from the tables) are shown in the following table:—

—	Income.	Expenditure.	Capital Debt.
	Rs.	Rs.	Rs.
Calcutta ..	3,21,27,748	3,15,44,101	17,75,31,194
Bombay ..	2,97,27,130	2,90,16,839	22,60,68,405
Madras ..	35,12,861	30,88,982	1,41,14,721
Karachi ..	68,02,570	64,01,613	4,35,24,000
Rangoon ..	85,88,932	71,33,776	3,78,90,182
Chittagong.	7,24.062	4,67,368	3,68,202

CALCUTTA.

The Commissioners for the Port of Calcutta are as follows. —

Appointed by Government.—

Mr. S. C. Stuart-Williams, Chairman.

Mr. T. H. Elderton. Deputy Chairman and Secretary.

Elected by the Bengal Chamber of Commerce.—Mr. B. E. G. Eddis, (Messrs. Gillanders Arbuthnot & Co.), Mr. J. Y. Philip, M.L.C., (Messrs. Kilburn & Co.), A. McD Eddis, M.L.C. (Messrs Gladstone Wyllie & Co.) Mr. H. C. Edmonson, (Messrs. Turner Morrison & Co.). Mr. J. H. Fife, (Messrs. Mackinnon Mackenzie & Co.), Mr. J. A. Tassie, (Messrs. James. Finlay & Co.).

Elected by the Calcutta Trades Association.—Mr. J. H. Wiggett, M.B.E., (Messrs. T.E. Thomson & Co.).

Elected by the Bengal National Chamber of Commerce.—Mr. J. C. Banerjee, Rai Bahadur, A. C. Banerjee (Messrs. Behar Firebricks & Potteries, Ltd.) Mr. Nalini Ranjan Sarker, M.L.C. (The Hindusthan Co-operative Insurance Society, Ltd.)

Elected by the Indian Chamber of Commerce.—Mr. D. S. Erulkar, (The Scindia Steam Navigation Co., Ltd.)

Elected by the Municipal Corporation of Calcutta.—Dr. Narendra Nath, Law, M.A.B.L., P.R.S., P.H.D.

Nominated by Government.—Mr. C. W. A. Carroll, (Agent, Bengal-Nagpur Railway), Mr. G. L. Colvin, C.B., C.M.G., D.S.O. (Agent, East Indian Rly.), Mr. N. Pearce, (Agent, Eastern Bengal Rly.), Mr. G. S. Hardy, I.C.S., (Collector of Customs) and Capt. C. A. Scott, D.S.O. R.I.M.

The principal officers of the Trust are—

Traffic Manager.—Mr. W. A. Burns.

Chief Accountant.—Mr. N. G. Park, C.A.

Chief Engineer.—Mr. J. McGlashan, M. Inst. C.E.

Deputy Conservator.—Commander C. V. L. Norcock, O.B.E., R.N.

Medical Officer.—Lt.-Col. H. B. Steen, I.M.S.

Consulting Engineer and London Agent.—Mr. J. Angus, M. Inst. C.E.

The traffic figures and the income of the Trust for the last thirteen years are as follows:—

Year.	Docks.			Jetties.	Stream.		Nett tonnage of shipping entering the Port.	Income.
	General Exports	Coal Exports	Imports.	Imports.	Exports.	Imports.		
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Rs.
1914-15	920,659	2,633,805	700,133	917,978			3,714,344	1,44,50,349
1915-16	1,054,985	1,610,645	570,997	788,481			2,967,798	1,59,35,456
1916-17	1,185,159	1,994,528	444,210	686,010			2,804,680	1,57,23,432
1917-18	995,112	1,014,993	363,383	633,693			2,094,011	1,58,39,175
1918-19	1,097,562	1,333,285	482,403	575,833			2,292,462	1,90,53,513
1919-20	1,146,479	2,264,976	653,066	713,746			2,941,846	2,23,55,614
1920-21	1,133,719	3,046,400	413,357	685,080			4,017,514	2,66,08,032
1921-22	974,783	1,687,222	697,361	622,411			3,446,021	2,19,17,042

1927-28	1,837,371	2,817,443	480,367	1,007,917	2,689,186	1,606,728	4,638,569	3,38,82,124

BOMBAY.

BOARD OF TRUSTEES.—*Nominated by Government*—Mr. W. H. Neilson, O.B.E., M. Inst. C.E., M. I. Mech. E. (Chairman), Mr. A. R. Dalal, I.C.S., Rear-Admiral Walwyn, C.B., D.S.O., R.I.M., Mr. A. M. Green, I.C.S., Sir Ernest Jackson, Kt., C.I.E., Mr. T. G. Russell, Mr. R. D. Bell, C.I.E., I.C.S., and the General Officer Commanding, Bombay District.

Elected by the Chamber of Commerce—Mr. F. C. Annesley, Sir Leslie Hudson, Kt., Mr E. Miller, Mr. G. L. Winterbotham and Mr. P. Barker.

Elected by the Indian Merchants' Chamber.—Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E., the Hon'ble Sir Manmohandas Ramji, Kt., Mr. Lalji Naranji, Mr. Mathuradas Canji Mattani and Mr. Lakhmidas Rowjee Tairsee.

Elected by the Municipality.—Mr. Fazul Ibrahim Rahimtulla and Mr. Meyer Nissim.

Elected by the Millowners' Association.—Mr. A. Geddis.

The following are the principal officers of the Trust :—

Dy. Chairman, W. R. S. Sharpe, M. Inst. T.

SECRETARY'S DEPARTMENT.

Secretary, N. M. Morris, *Deputy Secretary*, A. S. Bakre, M.A. (Cantab.), Bar-at-Law. *Head Clerk*, J. D. Mhatre.

CHIEF ACCOUNTANT'S DEPARTMENT.

Chief Acctt., C. P. Gay, *Deputy Acctts.*, J. F. Pereira, B.A., and W.D. Read, *Asst. Acctts.*, W. E. McDonnell, B. S. Turkhud, J.P., and R. O. Collyer, *Junior Asstt. Acctts.*, H. W. Scott and A. N. Moos, *Cashier*, V. D. Jog, *Ry. Audit Inspectors*, W. Casling, R. C. Palais and Bhikaji Ramchandra, *Supdt., Stores Accounts Branch*, O. Hyde, *Supdt., Establishment Branch*, A. R. Javeri.

CHIEF ENGINEER'S DEPARTMENT.

Chief Engineer, J. McClure, M. Inst. C.E., *Deputy Chief Engineer*, G. E. Bennett, M.Sc., M. Inst. C.E., M.I. Mech. E., *Executive Engineers*, C. W. Wales, M. Inst. C.E., B. C. Rowlandson, F. G. Carron, M. Inst. C.E., and A. Hale-White, M.A., A.M.I.C.E., *Senior Assistant Engineers*, G. E. Terry, A.M.I.C.E., J. A. Rolfe, P.E. Vazifdar, L.C.E. (1st Class), *Engineering Assistants*, E. L. Everatt, A.M.I.C.E., *Personal Assistant to the Chief Engineer*, T. B. Hawkins, *Mechanical Supdt.*, R. McMurray, M.I. Mech E., *Asst. Mechanical Supdts.* R. B. McGregor, A.M.I.M.E., B. C. Sharpe, S. J. Watt and W. O. A. Young, B. Sc. (Engr.), *Chief Foreman*, A. C. Strelley, M.I.M. A.E.E.

DOCKS MANAGER'S DEPARTMENT.

Docks Manager, C. N. Rich, B.A., *Deputy Docks Managers*, F. A. Borissow, W. G. H. Templeton, and F. Seymour Williams, *Deputy Manager* (Office), P. A. Davies, *Asst. Docks Managers, 1st and 2nd grade*, E. C. Joiley, A. Mattos, L. E. Walsh, C. W. Bond, F. J. Warder, D. L. Lynn, C. O. A. Martensz, P. B. Fenner, Nanabhoy Framji, E. J. Kail, and Perozshaw Bezonji, *Cash Supervisor*, T. D'Silva, *Cashier*, Robert Fernandez.

RAILWAY MANAGER'S DEPARTMENT.

Railway Manager, J. R. Reynolds, C.I.E., V.D. (on leave preparatory to retirement), *Ag. Ry. Manager*, D. G. M. Mearns, *Deputy Railway Manager Supernumerary*, A. F. Watts, *Ag. Dy. Ry. Manager*, H. A. Gardon, *Assistant Railway Manager*, S. G. N. Shaw, *Ag. Asstt. Rly. Manager*, C. F. Chard, *Asstt. Traffic Supdt.*, W. H. Brady. *Ag. Office Supdt.*, Kashinath Gangadhar.

PORT DEPARTMENT.

Port Officer, Capt. E. V. Whish, O.B.E., R.I.M., J.P., *Asstt. Port Officer*, Comdr. A. G. Kinch, D.S.O., R.I.M., *Harbour Master*, W. S. Hoseason J.P. *Alexandra Dock, Senior Dock Master*, T. G Warland. *Dock Master*, J. McMillan, *Senior Asstt Dock Master*, C. Halle, *Asst. Dock Master*, J. A. Puddington, *Berthing Masters*, H. F. Eddowes, D. Broadey, G. J. Kedge, F. H. Kellard *Prince's and Victoria Docks, Dock Masters*, C. H. Croie-Rees (I C. P. and Victoria Docks), *Dock Master*, A. J. Milness (Prince's Dock), *Astt. Dock Masters*, W. P. Bigg, *Berthing Masters*, W. J. Barter, A. M. Dudley, L. G. Grint. and another; *Port Deptt. Inspector*, J. Munster, *Office Supd.*, Moses Samuel.

LAND AND BUNDERS DEPARTMENT.

Manager, F. H. Taylor, P.A.S.I., M.R.S.I.; *Deputy Manager*, B. C. Durant, *Personal Asst. to the Land Manager*, R. G. Deshmukh, B.A., LL.B., *Office Supdt.*, W. O'Brien, *Asst. Managers*, S. J. Plunkett, W. H. Cummings and C. P. Watson, *Chief Inspector*, G. C. Battenberg, *Head Clerk*, D. A. Pereira.

CONTROLLER OF STORES DEPARTMENT.

Controller of Stores, H. E. Lees, *1st Assistant*, W. J. Wilson. *2nd Assistant*, G. P. Dooley, *Statistical Supdt.*, B. F. Davidson.

MEDICAL DEPARTMENT.

Administrative Medical Officer, Dr. W. Nunan, B.A., M.D., B.Ch., *Medical Officers*, Dr. F. D. Bana, M.B., M.R.C.S. (South District), Dr. A. D. Karkhanawalla, M.B.B.S. (North District), Dr. M. Vijayakar, L.M. & S., *Superintendent Antop Village.*

The revenue of the Trust in 1927-28 amounted to Rs. 2,81,07,566. The expenditure amounted to Rs. 2,73,54,098. The result of the year's working was a surplus of Rs. 6,59,517 under General Account which has been transferred to the Revenue Reserve Fund, and a surplus of Rs. 93,950 under Pilotage Account. The balance of the Revenue Reserve Fund at the close of the year amounted to Rs. 72,77,788. The aggregate captial expenditure during the year was Rs. 11,86,374. The total debt of the Trust at the end of the year amounted to Rs. 22,42,11,714.

The trade of the Port of Bombay during the last official year aggregated 251 crores in value.

The following statement shows the number of steam and square-rigged vessels which during recent years have entered the docks or been berthed at the harbour walls and paid dues.

The Indian Ports.

The administration of the affairs of the larger ports (*Calcutta, Bombay, Madras, Karachi, Rangoon and Chittagong*) is vested by law in bodies specially constituted for the purpose. They have wide powers, but their proceedings are subject in a greater degree than those of municipal bodies to the control of Government. At all the ports the European members constitute the majority and the Board for Rangoon consists mainly of European members.

The income, expenditure and capital debt, according to the latest figures obtainable from the Department of Commercial Intelligence and Statistics (India) of the six principal ports managed by Trusts (Aden is excluded from the tables) are shown in the following table:—

—	Income.	Expenditure.	Capital Debt.
	Rs.	Rs.	Rs.
Calcutta ..	3,21,27,748	3,15,44,101	17,75,31,194
Bombay ..	2,97,27,130	2,90,16,839	22,60,68,405
Madras ..	35,12,861	30,88,982	1,41,14,721
Karachi ..	68,02,570	64,01,613	4,35,24,000
Rangoon ..	85,88,932	71,33,776	3,78,90,182
Chittagong.	7,24,062	4,67,368	3,68,202

CALCUTTA.

The Commissioners for the Port of Calcutta are as follows.—

Appointed by Government.—

Mr. S. C. Stuart-Williams, Chairman.

Mr. T. H. Elderton, Deputy Chairman and Secretary.

Elected by the Bengal Chamber of Commerce.—Mr. B. E. G. Eddis, (Messrs. Gillanders, Arbuthnot & Co.), Mr. J. Y. Philip, M.L.C., (Messrs. Kilburn & Co.), A. Mc.D Eddis, M.L.C. (Messrs Gladstone Wyllie & Co.) Mr. H. C. Edmonson, (Messrs. Turner Morrison & Co.). Mr. J. H. Fife, (Messrs. Mackinnon Mackenzie & Co.), Mr. J. A. Tassie, (Messrs. James. Finlay & Co.).

Elected by the Calcutta Trades Association.—Mr. J. H. Wiggett, M.B.E., (Messrs. T.E. Thomson & Co.).

Elected by the Bengal National Chamber of Commerce.—Mr. J. C. Banerjee, Rai Bahadur, A. C. Banerjee (Messrs. Behar Firebricks & Potteries, Ltd.) Mr. Nalini Ranjan Sarker, M.L.C. (The Hindusthan Co-operative Insurance Society, Ltd.)

Elected by the Indian Chamber of Commerce.—Mr. D. S. Erulkar, (The Scindia Steam Navigation Co., Ltd.)

Elected by the Municipal Corporation of Calcutta.—Dr. Narendra Nath, Law, M.A.B.L., P.R.S., P.H.D.

Nominated by Government.—Mr. C. W. A. Carroll, (Agent, Bengal-Nagpur Railway), Mr. G. L. Colvin, C.B., C.M.G., D.S.O. (Agent, East Indian Rly.), Mr. N. Pearce, (Agent, Eastern Bengal Rly.), Mr. G. S. Hardy, I.C.S., (Collector of Customs) and Capt. C. A. Scott, D.S.O. R.I.M.

The principal officers of the Trust are—

Traffic Manager.—Mr. W. A. Burns.

Chief Accountant.—Mr. N. G. Park, C.A.

Chief Engineer.—Mr. J. McGlashan, M. Inst. C.E.

Deputy Conservator.—Commander C. V. L. Norcock, O.B.E., R.N.

Medical Officer.—Lt.-Col. H. B. Steen, I.M.S.

Consulting Engineer and London Agent.—Mr. J. Angus, M. Inst. C.E.

The traffic figures and the income of the Trust for the last thirteen years are as follows:—

Year.	Docks.			Jetties.	Stream.		Nett tonnage of shipping entering the Port.	Income.
	General Exports	Coal Exports	Imports.	Imports.	Exports.	Imports.		
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Rs.

The two dry docks were occupied during the year 1927-28 by 194 vessels, the total tonnage amounting to 696,415 tons which was more than the previous year by 70,612 tons.

KARACHI.

The members of the Board of Trustees of the Port of Karachi are as follows :—

Chairman.—J. B. S. Thubron, C.I.E.

Appointed by Government.—H. H. Hood, (Collector of Customs, Karachi); H. F. Lockwood, (Divisional Superintendent, North-Western Railway); Captain C. H. Peck, D.S.O., M.C., R.A. (D.A.A.Q.M.G., Sind Independent Brigade Area); Mir Ayub Khan, Bar-at-Law.

Elected by the Karachi Chamber of Commerce.—H. C. Whitehouse, (Strauss & Co.); E. A. Pearson, (Forbes, Forbes, Campbell & Co., Ld.) (On leave); J. R. N. Graham, V.C. (Grahams Trading Co.), (acting) W. M. Petrie, (Ralli Brothers); J. J. Flockhart (Mackinnon, Mackenzie & Co.)

Elected by the Karachi Indian Merchants' Association:—Lokamal Chellaram, Isherdas N. Mallik.

Elected by the Buyers & Shippers Chamber.—Jamshed N. R. Mehta (Vice-Chairman), Haridas Lalji.

Elected by the Karachi Municipality.—Tikamdas Wadhumal, M.A (Oxon), Bar-at-Law.

The principal officers of the Trust are :—

Secretary & Traffic Manager.—T. S. Downie, O.B.E.

Port Officer.—Capt. J. F. Vibart, O.B.E., R.I.M.

Chief Accountant—B. A. Inglet, B.A., C.A.

Chief Engineer.—W. P. Shepherd-Barron, M. Inst. C.E.

Deputy Chief Engineer.—H. A. L. French, M. Inst. C.E.

Chief Storekeeper.—R. A. Donde.

The Revenue receipts and expenditure of the Port of Karachi for the year 1927–28 were as under :—

Revenue receipts (excluding the Port Fund Account) Rs. 65,65,965. Revenue Expenditure Rs. 58,34,767. Surplus Rs. 7,31,198. Reserve Fund Rs. 45,25,700.

The number of vessels which entered the Port during the year 1927-28, exclusive of vessels put back and fishing boats was 2,938 with a tonnage of 2,602,353 against 3,023 with a tonnage of 2,382,713 in 1926-27. 950 steamers of all kinds entered the Port with a tonnage of 2,488,849 against 88[illegible] and 2,256,969, respectively, in the previous year. Of the above, 763 were of British nationality.

Imports landed at the ship wharves during the year totalled 630,458 tons against 600,805 in the previous year. Total shipments from the ship wharves were 760,356 tons in 1927-28 against 580,118 tons in 1926-27.

MADRAS.

The following gentlemen are the Trustees of the Port of Madras :—

Officials—Sir Bradford Leslie, Kt., O.B.E., M. Inst. C.E., M.I.E.E., Chairman and Chief Engineer; C. R. Watkins, C.I.E., (Collector of Customs); and Capt. C. R. Campbell, D.S.O., M.V.O., R.I.M. (Presidency Port Officer).

Non-Officials.—(1) *Nominatd by Government.*—F. B. Wathen, M.B.E., V.D., M. Inst. T.; P. Rothera, O.B.E., M. Inst. C.E.; I.M.I.E.; (2) *Representing Chamber of Commerce, Madras.*—W. O. Wright, Sir James Simpson, Kt., Kenneth Kay, F. Birley,; (3) *Representing Soutern India Chamber of Commerce, Madras.*—M. R. Ry. Diwan Bahadur Govindoss Chathoorbhujadoss Garu, Diwan Bahadur G. Narayanaswamy Chetty Garuti (4) *Representing Madras Trades Association.*—H. S. Walton, R. J. C. Robertson; (5) *Representing Southern India Skin and Hide Merchants' Association.*—M. Mohamed Ismail Sahib, Bahadur; *Representing Madras Piece-goods Merchants' Association.*—M. R. Ry. Rao Sahib B. Papayya Chetty Garu.

Principal Officers are :—Deputy Chief Engineer, W. Fyffe, M. Inst. C.E., M. I. Struct. E. Executive Engineer, M. R. Ry. Rao Bahadur K. Ganapathy Kudwa Avergal, B.A., B.C.E.; Mechanical and Electrical Engineer, Captain E. G. Bowers, M.C., A.M.I.E.E.; Assistant Mechanical Engineer, W. White, M.I. Mar. E.; Assistant Enginer, M. R. Ry. V. Dayananda Kamath Avergal, B.A., B.E.; Assistant Engineer, M. R. Ry. S. Nagabushanam Avergal, B.A., M.E. Assistant Engineer (Electrical), M. R. Ry. K. Subramaniam; Traffic Manager (on leave) J. G. Lord.; Assistant Traffic Managers, F. W. Stooke and James Chance; Chief Accountant, M. R. Ry. Rao Bahadur

RANGOON.

S. Narayana Aiyar Avergal, M.A.; Manager and Accountant, M. R. Ry. Rai Sahib S. Seshiah Avergal; Office Manager, J. L. Pinto.

The receipts during the year of the Port Trust on Revenue account from all sources were Rs. 45,04,712 as against 37,39,364 in 1926-27 and the gross expenditure out of revenue was Rs. 49,69,147. During the year 936 vessels with an aggregate tonnage of 3,013,109 tons, called at the port against last year's figure of 795 vessels of 2,609,935 tons.

The personnel of the Commissioners for the Port of Rangoon is comprised of seventeen members.—

Appointed by Government.—Mr. J. A. Cherry, C.I.E. (Chairman); Captain C.R. Goad, R.I.M. (Principal Port Officer); Messrs. W. Keay and T. Cormack.

Ex-officio.—Messrs. W. W. Nind (Collector of Customs); W. B. Brander, C.I.E., C.B.E., I.C.S., M.L.C. (Chairman, Rangoon Development Trust) and J.R.D. Glascott, C.I.E., M.L.C. (Agent, Burma Railways).

Elected by the Burma Chamber of Commerce.—Messrs. J. R. Turner, (Vice-Chairman); W. T. Howison and M. L. Burnet (one seat vacant).

Elected by the Rangoon Trades Association.—Mr. J. Fisher.

Elected by the Chinese Chamber of Commerce.—Mr. Lee Boon Tin.

Elected by the Burma Indian Chamber of Commerce.—Khan Bahadur Hajee Ahmed Chandoo and Virjeebhai Dahya.

Elected by the Small Rice Millers' Association.—U. Thwin.

Elected by the Rangoon Municipal Corporation.—U. Ba Pe, M.L.C.

Principal officers are—

Secretary.—Mr. C. Witcher.

Chief Accountant.—Mr. D. H. James, A.C.A.

Chief Engineer.—Mr. E.C. Niven, M. Inst. C.E.

Deputy Conservator.—Mr. H. N. Gilbert.

Traffic Manager.—Mr. E. J. B. Jeffery, (Officiating).

The receipts and expenditure on revenue account for the Port of Rangoon in 1927-28 were—

Receipts	..Rs. 86,36,636.
Expenditure	..Rs. 83,78,211.

The capital debt of the Port at the end of the year was Rs. 4,72,33,781. The balance (including investments at cost) at the credit of the different sinking funds on 31st March 1928 was Rs. 1,61,80,951.

The total sea-borne trade of Rangoon during the year 1927-28 was 5,558,831 tons of which 1,968,688 tons were imports, 3,575,075 tons exports and 15,068 tons transhipment. The tonnage of goods passed over the Commissioner's premises during the year amounted to 3,672,372 tons. The total number of steamers (excluding Government vessels) entering the Port was 1,627 with a total net registered tonnage of 3,886,950 being an increase of 179 steamers and 73,386 tons in nett tonnage over that of 1926-27.

CHITTAGONG.

Chittagong in Eastern Bengal, lying on the right bank of the river Karnafuli at a distance of 12 miles from the sea, was already an important port in the sixteenth century, when the Portuguese gave it the name of Porto Grande.

The construction of the Assam-Bengal Railway has facilitated the transport of trade with Assam and Eastern Bengal for which the Port of Chittagong is the natural outlet.

The chief exports are tea and jute and imports piece-goods, salt, oil and machinery.

FOREIGN TRADE 1927-28 Rs. (in lakhs).	
Imports	(*a*) 281·66
Exports	(*b*) 870·30
COASTING TRADE 1927-28 Rs. (in lakhs).	
Imports	(*c*) 544·75
Exports	(*d*)135·84

Port Commissioners.—J. Izat, C.I.E., Chairman; H. R. Wilkinson, C.I.E., I.C.S., Vice Chairman; Commander C. R. Bluett, R.I.M., M.E. Rahman, B.A.; G. A. Wilby; A. McKean; J.A. Oliver; F. C. Gray; Lal Mohan Choudhury; Abdul Rahaman; Jatindra Nath Roy Choudhury; Abdul Haq Duvash.

Port Officer and Secretary to the Port Commissioners.—Commander C. R. Bluett, R.I.M.

Port Engineer.—F. J. Green, B.Sc., A.M.I.C.E., &c.

Vessels of 25 feet draught can be accommodated during the greater part of the year at four jetties which are fitted with modern equipment and capable of quick despatch.

Two additional jetty berths will shortly be constructed.

It is anticipated that considerable improvement in the depth of the navigable channel of the Karnafuli River will be effected by the new powerful dredger of 2,000 tons hopper capacity commissioned during the current year and new rivetment works shortly to be carried out.

VIZAGAPATAM HARBOUR PROJECT.

The question of creating a harbour at Vizagapatam to supply an outlet for a large area of fertile country adjacent to the East Coast of India, hitherto undeveloped, with considerable mineral resources and without suitable access to the outside world, was first formulated by the Bengal Nagpur Railway Company. That the creation of such a port would have a beneficial influence on this area was unquestioned, for it is pointed out that Vizagapatam, lying as it does in front of the only practicable gap in the barrier of the

Eastern Ghats, is formed by nature to be the outlet of the Central Provinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications hitherto available. A necessary complement of the scheme is the construction of the proposed railway from Parvatipuram to Raipur which, with the existing coast line of the Bengal Nagpur Railway, would make a large and rich area tributary to the proposed port, and obviate the long and expensive circuit by Calcutta. A link would also be supplied in the most direct route to Rangoon from Europe by way of Bombay, while, from an imperial point of view, the possible provision of a fortified port on the long and almost unprotected stretch of coast between Colombo and Calcutta is held to be a consideration of great importance. The lofty projecting head-land of the Dolphin's Nose would, it is pointed out, offer facilities for this purpose as well as for protecting the entrance to the Port from the effects of south and south-westerly gales.

The Government of India have, with the approval of the Secretary of State and the Legislative Assembly, sanctioned the construction of the new railway line from Raipur to Parvatipur and the work is in progress. They have also decided to develop the port of Vizagapatam under their direct control and the port has accordingly been declared to be a major port.

The scheme for the construction and development of the Harbour will be carried out in sections. At present, the first section only has been sanctioned and consists of a wharf 1,500 feet long, capable of taking 3 or 4 steamers, according to their length, with moorings for two vessels in the harbour, *plus* accommodation at the oil jetty for 1 oil tanker or oil burning steamer. The wharf will afford a depth of 30 feet below low water ordinary spring tides and the entrance channel, through the creek to the harbour, will also be dredged to the same depth. In the first section also, goods facilities are provided for in the form of 2 large transit sheds with some 170,000 square feet of floor space, with necessary railway sidings and electric cranes, and passenger traffic is provided for by means of a dharamsala, a waiting-room and the necessary customs examination sheds. On the south side of the creek, away from the Harbour, an oil depot is also to be established where oil tankers can come alongside to fill storage tanks in the depot.

The estimated cost of the first section is about Rs. 240 lakhs and the time required to complete this will depend on the period that the dredging and reclamation work will take; but it is anticipated that it will be possible to berth ships in the new harbour in about 4 years' time.

The work is being carried out by a staff of Engineers under the direct charge of an Engineer-in-Chief, who comes under the administrative charge of the Agent, Bengal Nagpur Railway, who is *ex-officio* administrative officer for the development scheme. An advisory committee consisting of the above-mentioned officers and representatives of the Local Government, the Vizagapatam Port Administration and the commercial interests concerned, has also been constituted to advise in the development of the Harbour.

Good progress has been made with the initial portion of the development scheme. Most of the land has been acquired. A marine survey to investigate the sand travel and formation of the bar has been completed. Dredging of the inner Harbour by the Suction Dredger has been in progress since March 1928 and the construction of the Quay Wall is well advanced. Schemes for sewage and town planning have been prepared in consultation with the municipality and a malarial survey of the suburban area has been completed. Arrangements have also been made with the municipality for the supply of water to the Harbour area during construction.

In addition to the Suction Dredger, a Rock Breaker and Dipper Dredge is at work in the Entrance Channel removing the rock and hard overlay.

Education.

Indian education is unintelligible except through its history. Seen thus, it affords the spectacle of a growth which, while to one it will appear as a blunder based on an initial error easily avoided, to another it stands out as a symbol of sincerity and honest endeavour on the part of a far-sighted race of rulers whose aim has been to guide a people alien in sentiments and prejudices into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to-day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bodies and private persons of learning have in the past devoted their limited funds to meeting the demands of those who perceived the benefits of education, rather than to cultivating a desire for education where it did not exist. The result is that the structure has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the *intelligentsia* are in point of numbers at least educated to a pitch equal to that of countries whose economic conditions are more highly developed. As might be expected from this abnormal distribution of education, the form which it has eventually assumed contains corresponding defects. There have, however, in recent years been strong movements, leading to the passing of Primary Education Acts in several Provinces, in favour of the expansion of primary education among the masses.

The Introduction of Western Learning—In the early days of its dominion in India, the East India Company had little inclination for the doubtful experiment of introducing western learning into India. Warren Hastings, the dominating figure of the time, was a genuine admirer of the laws and literature of the East. His policy was to enable the ancient learning to revive and flourish under the protection of a stable government, and to interfere as little as possible with the habits and customs of the people. Even the Act of 1813 which set apart a lakh of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the encouragement of Sanskrit and Arabic. In the following year the Court of Directors instructed the Governor-General to leave the Hindus "to the practice of usage, long established among them, of giving instruction in their own homes, and to encourage them in the exercise and cultivation of their talents by the stimulus of honorary marks of distinction and in some cases by grants of pecuniary assistance."

It was from sources other than Government that the **desire for western knowledge** arose in India. In 1816, David Hare, an English watchmaker in Calcutta, joined hands with the enlightened Brahmin, Mohan Roy, to institute the Hindu College for the promotion of western secular learning. The new institution was distrusted both by Christian missionaries and by orthodox Hindus, but its influence grew apace. Fifteen years later, the Committee of Public Instruction in Bengal reported that a taste for English had been widely disseminated and that independent schools, conducted by young men reared in the Hindu College, were springing up in every direction. In Bombay, the Elphinstone Institution was founded in memory of the great ruler who left India in 1827. A still more remarkable innovation was made in 1835 by the establishment of the Calcutta Medical College, whose object was to teach "the principles and practice of medical science in strict accordance with the mode adopted in Europe." Many pronounced the failure of the undertaking to be inevitable; for, under the Hindu custom the higher castes were forbidden to touch the dead. This obstacle was surmounted by Madusudan Gupta who, with a few courageous pupils, began the dissection of a human body. From that time onward Indians of the highest castes have devoted themselves with enthusiasm and with success to the study of medicine in all its branches.

Another impetus to the introduction of western learning was the devotion of **Christian missionaries.** The humanitarian spirit, which had been kindled in England by Wesley, Burke and Wilberforce, influenced action also in India. Carey, Marshman and Ward opened the first missionary College at Serampore in 1818; and twelve years later, Alexander Duff reversed the whole trend of missionary policy in India by his insistence on teaching rather than on preaching, and by the foundation of his school and College in Calcutta. In Madras, the missionaries had been still earlier in the field; for as early as in 1787 a small group of missionary schools were being directed by Mr. Schwarz. The Madras Christian College was opened in 1837. In Bombay, the Wilson School (afterwards College) was founded in 1834.

Lord W. Bentinck's minute of 1835 (based upon Macaulay's famous minute) marks the somewhat tardy acceptance by Government of the new policy. Government then determined while observing a neutrality in religious matters to devote its available funds to the maintenance of secondary schools and colleges of western learning to be taught through the medium of English. But this decision did not entail that Oriental learning should be neglected; still less that the development of the vernaculars should be discouraged. Other changes powerfully contributed to the success of the new system. The freedom of the press was established in 1835; English was substituted for Persian as the language of the Courts in 1837 and in 1844 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western education. In the following decade the new learning took firm root in India; and, though the Muhammadans still held aloof, the demand for English schools outstripped the means of Government for providing them. Fortunately there has been of late a marked appreciation among Muslim leaders of the need of improving the instructional level of their co-religionists; and in many of the provinces of India a great impulse towards educational advance among the Muhammadan community is now noticeable.

Eastern Ghats, is formed by nature to be the outlet of the Central Provinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications hitherto available. A necessary complement of the scheme is the construction of the proposed railway from Parvatipuram to Raipur which, with the existing coast line of the Bengal Nagpur Railway, would make a large and rich area tributary to the proposed port, and obviate the long and expensive circuit by Calcutta. A link would also be supplied in the most direct route to Rangoon from Europe by way of Bombay, while, from an imperial point of view, the possible provision of a fortified port on the long and almost unprotected stretch of coast between Colombo and Calcutta is held to be a consideration of great importance. The lofty projecting head-land of the Dolphin's Nose would, it is pointed out, offer facilities for this purpose as well as for protecting the entrance to the Port from the effects of south and south-westerly gales.

The Government of India have, with the approval of the Secretary of State and the Legislative Assembly, sanctioned the construction of the new railway line from Raipur to Parvatipur and the work is in progress. They have also decided to develop the port of Vizagapatam under their direct control and the port has accordingly been declared to be a major port.

The scheme for the construction and development of the Harbour will be carried out in sections. At present, the first section only has been sanctioned and consists of a wharf 1,500 feet long, capable of taking 3 or 4 steamers, according to their length, with moorings for two vessels in the harbour, *plus* accommodation at the oil jetty for 1 oil tanker or oil burning steamer. The wharf will afford a depth of 30 feet below low water ordinary spring tides and the entrance channel, through the creek to the harbour, will also be dredged to the same depth. In the first section also, goods facilities are provided for in the form of 2 large transit sheds with some 170,000 square feet of floor space, with necessary railway sidings and electric cranes, and passenger traffic is provided for by means of a dharamsala, a waiting-room and the necessary customs examination sheds. On the south side of the creek, away from the Harbour, an oil depot is also to be established where oil tankers can come alongside to fill storage tanks in the depot.

The estimated cost of the first section is about Rs. 240 lakhs and the time required to complete this will depend on the period that the dredging and reclamation work will take; but it is anticipated that it will be possible to berth ships in the new harbour in about 4 years' time.

The work is being carried out by a staff of Engineers under the direct charge of an Engineer-in-Chief, who comes under the administrative charge of the Agent, Bengal Nagpur Railway, who is *ex-officio* administrative officer for the development scheme. An advisory committee consisting of the above-mentioned officers and representatives of the Local Government, the Vizagapatam Port Administration and the commercial interests concerned, has also been constituted to advise in the development of the Harbour.

Good progress has been made with the initial portion of the development scheme. Most of the land has been acquired. A marine survey to investigate the sand travel and formation of the bar has been completed. Dredging of the inner Harbour by the Suction Dredger has been in progress since March 1928 and the construction of the Quay Wall is well advanced. Schemes for sewage and town planning have been prepared in consultation with the municipality and a malarial survey of the suburban area has been completed. Arrangements have also been made with the municipality for the supply of water to the Harbour area during construction.

In addition to the Suction Dredger, a Rock Breaker and Dipper Dredge is at work in the Entrance Channel removing the rock and hard overlay.

Education.

† Includes Intermediate and Second Grade Colleges of the new type from 1922-23 onwards.

†† Includes scholars in University Departments and in the newly started Intermediate and Second Grade Colleges from 1922-23 onwards.

GROWTH AND ORGANISATION OF ENGLISH EDUCATION

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 1854. Perhaps its most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which may be considered the greatest curse of the country." For this purpose Departments of Public Instructions were created on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1835 whereby most of the available public funds had been expended upon a few Government schools and colleges, and instituted a policy of grants-in-aid to private institutions. "Such a system as this, placed in all its degrees under efficient inspection, beginning from the humblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in India, and lead to a gradual but steady extension of its benefits to all classes of people." Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madras and Bombay three years later. The affiliating type of university then became the pivot of the Indian education system. It has undoubtedly been of value in several ways. It enabled Government to select recruits for its service on an impartial basis : it did much, through the agency of its Colleges to develop backward places ; it accelerated the conversion of Indians to a zeal for western education ; and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scholars, but corporations of administrators ; they did not deal directly with the training of men, but with the examination of candidates; they were not concerned with learning, except in so far as learning can be tested by examination. The colleges were fettered by examination requirements and by uniform courses; their teachers were denied that freedom which teachers should enjoy : and their students were encouraged not to value training for its own sake but as a means for obtaining marketable qualifications. In certain important respects the recommendations in the despatch were not followed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts; they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions; they recommended the establishment of university chairs for advanced study. They were aware of the dangers of a too literary course of instruction ; they hoped that the system of education would rouse the people of India to develop the vast resources of their country ....and gradually, but certainly, confer upon them all the advantages which accompany the healthy increase of wealth and commerce. The encouragement of the grant-in-aid system was advocated to an even greater extent by the Education Commission of 1882, which favoured the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay. And, in the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the private institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sightedness, evils crept in which are now being removed gradually by the establishment of independent Boards of Intermediate Education charged with the administration of the high school and intermediate stages of education.

The Reforms of 1902-4.

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universites over the schools and colleges. The Chancelors of the Universities were empowered to nominate 80 *per cent.* of the ordinary members of the Senates and to approve the election of the remainder : the Government retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted by the officers of the Department of Public Instruction. Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects: but their scope was in practice limited to post-graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connexion with institutions lying outside those boundaries. Neither the Commission nor the Government discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system. They did not inquire whether the affiliating system could be replaced by any other mode of organisation, nor whether all schools might be placed under some public authority which would be representative of the universities and of the departments. They assumed the permanent validity of the existing system, in its main features, and set themselves only to improve and to strengthen it.

Recent Developments.

he passing of the Universities Act of 1904, there has been a considerable expansion of tional system. The two tables given below afford useful comparisons with previous years to illustrate the growth and expansion of education in India.

911–12	4,05,23,072	7,85,92,605
915–16	6,21,68,904	11,08,29,249
916–17	6,14,80,471	11,28,83,068
917–18	6,46,01,690	11,82,09,137
918–19	7,17,26,292	12,98,63,073
919–20	8,44,63,472	14,88,96,960
920-21	10,06,76,871	16,77,33,113
921-22	11,49,61,178	18,37,52,969
922-23	11,88,21,638	18,84,77,181
923–24	12,31,59,553	19,91,11,191
924-25	12,91,27,690	20,87,48,319
925–26	14,14,96,311	22,77,92,532
926-27	15,59,23,968	24,58,47,572

In 1926-27, the total expenditure on education in British India amounted to Rs. 24,58,47,572 of which 48·5 per cent. came from Government funds, 14·9 per cent. from Board funds, 21·2 per cent. from fees and 15·4 per cent. from other sources. In spite of this marked advance there is much lee-way to make up, as in the last census report the literate population of India was only 72 per thousand males and females per thousand 18.

The cost per scholar amounted to Rs. 22-0-7 as follows: to Govt. funds Rs. 10-11-2, to local funds Rs. 3-4-6, to fees Rs. 4-10-9 and to other sources Rs. 3-6-2.

The following table provides an interesting and valuable comment on the state of education in India 1921-22. Although the statistical returns show more than 8 millions of pupils at school it will be seen that over 76 per cent. of these are in the lower primary stage; and it may be safely deducted that over 50 per cent. of those at school never become literate. Of course, the total number of pupils at school is not a safe criterion of the state of education, and a sounder standard of comparison would be that number multiplied by the average period spent at school.

on.—The primary schools he direction of the local ralities. In 1911, the late pleaded in the Imperial for a modified system of education, but Government ot the proposal mainly for n recent years, eight proave passed Primary Educag the introduction of comoy local option. Bombay matter by a private Bill nto law in February 1918. Bills which followed were Orissa passed in February ed in May 1919 and of the passed in June 1919. Of easures, the Punjab Act 1919, the Central Provinces e Madras Act in December m Act in 1925. The City ary Education Act of erally the provisions of the Bombay Corporation introduce free compulsory ward. Not content with gislature passed a new Act for compulsory elementary ake better provision for the ontrol of primary education esidency. The Bombay and nces Acts apply only to Bengal Primary Education Act instance, to municipalities, extension to rural areas. ded within the scope of the d Orissa and Bengal Acts, while the Central Provinces Act is capable of extension to girls, and the remaining Acts are applicable to both sexes. The United Provinces legislature passed a second Primary Education Act in 1926, *viz.*, the United Provinces District Boards Primary Education Act. It allows the District Boards to introduce compulsion within their areas. All the Acts are drafted on very similar lines. If a local body at a special meeting convened for the purpose decides by a two-thirds majority in favour of the introduction of compulsion in any part of the area under its control, it may then submit to Government, for approval, a scheme to give effect to its decision. The scheme must be within the means of the local body to carry out with reasonable financial assistance from Government. Ordinarily the age limits of compulsion are from six to ten years though provision is made for prolonging the period. Provision is also made in all the Acts for the exemption of particular classes and communities and for special exemption from attendance in cases of bodily infirmity. Walking distance to a school is generally defined as one mile from the child's home. The employment of children, who should be at school, is strictly forbidden and a small fine is imposed for non-compliance with an attendance order. The Acts generally provide that, subject to the sanction of the local Government, education where compulsory shall be free. Such in brief are the ordinary provisions of the various provincial Education Acts. Local bodies have not however shewn as yet any great alacrity in availing themselves of the opportunity afforded them by these Acts as is testified by the following table:—

	Date of Act.	Areas under "Compulsion."	
		Municipalities and Urban Areas.	District Boards and Rural Areas.

* Includes Intermediate and 2nd grade Colleges of the new type.

The poverty of local bodies is usually the cause assigned to their diffidence to introduce compulsory education to any appreciable extent.

On the 31st March 1927, there were 1,89,348 recognised primary schools in British India containing 82,56,348 scholars. (The latter figure does not include scholars reading in the primary classes of secondary schools). The total direct expenditure on primary schools, during the year 1926-27, amounted to Rs. 6,95,21,696.

Secondary and High School Education. —The policy of Government is to maintain a small number of high schools which are to be regarded as models for private enterprise, and to aid private institutions. In 1911-12 there were 1,219 high schools for boys in India and in 1926-27 the number had risen to 2,687, the number of scholars in the former year being 390,881, and in the latter year 7,94,201. Some attempts have been made to give a greater bias towards a more practical form of instruction in these schools. The Commission of 1882 suggested that there should be two sides in secondary schools," one leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial and other non-literary pursuits." Some years later, what were called B and C classes were started in some schools in Bengal, but, as they did not lead to a university course, they have not been successful. In more recent years, the Government of India have advocated the institution of a school *final* examination in which the more practical subjects may be included. Efforts have also been made to improve the conduct of the matriculation and to emphasise the importance of oral tests and of school records. In Madras, this examination, which was placed under the direction of a Board representative of the University and of Government, proved somewhat cumbrous and certain modifications were made. In the United Provinces, and the Central Provinces the control of secondary education has been made over to special Boards created for this purpose. Similary, the Administration of Delhi has established a Board of Secondary Education for that province. In the Punjab and in Bombay, the school leaving examination is conducted by Boards. But the main difficulty has not yet been touched. The University which recognises the schools has no money wherewith to improve them : and the Department of Public Instruction, which allots the Government grants, has no responsibility for the recognition of schools, and no connexion whatever with the private unaided schools. This dual authority and this division of responsibility have had unhappy effects. The standard of the schools also is very low so that the matriculates are often unable to benefit by the college courses. In some provinces an endeavour has been made to raise the standard of the schools by withdrawing from the University the Intermediate classes and by placing them in a number of the better schools in the State.

There are schools for Europeans and Anglo-Indians which are placed under the control of special inspectors for European Schools. The education of the domiciled community has proved to be a perplexing problem, and in 1912 a conference was summoned at Simla to consider the matter. The difficulty is that European Schools are very remote from the general system of education in India.

Medium of instruction in public schools —The position of English as a foreign language and as a medium of instruction in public schools was discussed by a representative conference which met at Simla in 1917 under the Chairmanship of Sir Sankaran Nair, the then Education Member. Although it was generally conceded that the teaching of school subjects through a medium which was imperfectly understood led to cramming and memorising of text-books, the use of English medium was defended by some on the ground that it improved the knowledge of English. The result of the conference was therefore inconclusive. Some local authorities have since then approved of schemes providing for the recognition of local vernaculars as media of instruction and examination in certain subjects.

Cadet Training—Provision has been made by the Government of India for the training of cadets for the mercantile marine service and a ship, "I.M.M.T.S. Dufferin" has been stationed for this purpose in Bombay waters.

Boy Scout Movement.—A happy development in recent years has been the spread of the boy scout movement in public schools.

Medical Inspection.—Arrangements have been made for medical inspection of scholars.

Intermediate Colleges.—One important part of the Calcutta University Commission's recommendations has been accepted by the Government of the United Provinces and the Government of India and incorporated in the Acts establishing the Lucknow, Dacca and Aligarh Muslim Universities, and reconstituting that of Allahabad, namely, the separation of the intermediate classes from the sphere of university work and of the two top classes of high schools from the rest of the school classes. The separated classes have been combined together and the control over them has been transferred from the University to a Board of Secondary and Intermediate Education. Such a Board was constituted for the Dacca University area by a notification of the Government of Bengal in 1921. It contains twenty-two members of whom seven are elected by the University. The United Provinces Board was constituted by an Act passed in the same year. It consists of some forty members of whom approximately one-quarter represent the Universities in the Province. The Intermediate Examination Board of the Aligarh Muslim University was brought into existence by an Ordinance framed in 1922. It is composed of eight members.

Professional and Technical Education. —There are 42 Medical Colleges and schools with 9,6 07 students, 15 Law Colleges and schools with 8,213 students, and 22 Agricultural Colleges and schools containing 1,336 students. A research institute in agriculture was started by Lord Curzon at Pusa in Bihar, which has done valuable work. Conferences have been held at Pusa, Simla and Poona, with the object of providing a suitable training in agriculture. A Royal Commission on Agriculture has submitted its report and its recommendations are under consideration There are twenty-one training colleges for secondary teachers in various parts of India with about 1,260, scholars and normal schools for the training of vernacular teachers. There are 152 commercial

colleges and schools with 8,221 scholars. The most important among them is the Sydenham College of Commerce in Bombay. Industrial institutions are dotted about India, some maintained by Government, others by municipalities or local boards, and others by private bodies. The most important are the Victoria Jubilee Technical Institute in Bombay. The Indian Institute of Science at Bangalore, the product of generous donations by the Tata family. The tendency in recent years has been to place these institutions under the control of the Departments of Industries. In addition to a number of engineering schools, there are Engineering Colleges at Roorkee, Sibpur, Poona, Madras, Rangoon, Patna and Benares each of which except that at Roorkee, is affiliated to a university. There are also a number of engineering schools. They had 3,644 scholars on their rolls on the 31st March 1927. The engineering colleges maintain a high standard and great pressure for admission is reported from several provinces. There are schools of art in the larger towns where not only architecture and the fine arts are studied, but also practical crafts like pottery and iron work. There are two forest colleges at Dehra Dun and Coimbatore with 129 scholars in all. A Technical Institute is in existence at Cawnpore and a Mining School at Dhanbad. Mining and metallurgy are also taught by the Mining and Metallurgical college at Benares which provides a 4-year course leading to a B. Sc. degree in each subject. There are three colleges for veterinary training containing 330 students.

Universities.

There are sixteen universities in India, namely :—

No.	University.	Dates of Acts.	Territorial jurisdiction.
1	CALCUTTA ..	.. 1857, 1904, 1905 & 1921.	Bengal and Assam and certain adjacent Indian States.
2	MADRAS ..	.. 1857, 1904, 1905 and 1923.	The Presidency of Madras excluding the Telugu country and Coorg and certain Indian States.
3	BOMBAY ..	.. 1857, 1904 & 1905 ..	The Presidency of Bombay and certain Indian States (Baroda, &c.).
4	PUNJAB ..	.. 1882, 1904 & 1905 ..	The Punjab, the North-West Frontier Province, Baluchistan and adjacent Indian States (Kashmir, Patiala, &c.).
5	ALLAHABAD ..	.. 1887, 1904, 1905 and 1921.	Allahabad.
6	BENARES HINDU	.. Oct. 1915	Benares District.
7	MYSORE ..	.. July 1916	Mysore State.

17	AGRA ..	.. April, 1927	United Provinces (excluding the territorial jurisdictions of Allahabad, Benares, Aligarh and Lucknow Univercities), Rajputana and Central India.

* Actually established after 1925-26.

The foregoing statement mentions the universities incorporated by law for the time being in force. The first University in India, that of Calcutta, was founded in 1857. Between 1857 and 1887 four new Universities, at Bombay, Madras, Lahore and Allahabad were added. These five universities were all of the affiliating type. They consisted of groups of colleges, situated sometimes several hundred miles apart, and bound together by a legally constituted central organisation, which determined the qualifications for admission, prescribed the courses of study, conducted the examinations and exercised a mild form of control over the affiliated colleges. There was nothing under the system to limit the number of institutions affiliated to a University; and for thirty years, *i.e.*, from 1887 to 1917, the growing demand for

university education was met, not by the creation of new universities, but by enlarging the size of the constituent colleges and by increasing their number. By 1917 this inflation had been carried on so far that the composition of the original five universities stood as follows:—

University.	Colleges.	Scholars.
Calcutta	58	28,618
Bombay	17	8,001
Madras	53	10,216
Punjab	24	6,558
Allahabad	33	7,807

It had become obvious that further expansion on the same lines was no longer possible without a serious loss of efficiency and the Government of India had recognised in their resolution of 1913 the necessity of creating new local teaching and residential universities in addition to the existing affiliating universities. The development of this policy was accelerated by the strength of communal feeling and the growth of local and provincial patriotism, leading to the establishment of a number of teaching universities. The new type of universities has since been strongly advocated by the Calcutta University Commission which has offered constructive proposal as to the lines to be followed in university reform. A detailed account of the old and new Universities is given below.

The Universities of Calcutta, Bombay and the Punjab.—These three Universities alone still retain their old form, as measures for their reorganisation are still under consideration. On the 27th March 1921 an amending Act was passed by which the Governor-General ceased to be the Chancellor of the Calcutta University and now the head of the provincial government is the Chancellor of each of the older universities. The Vice-Chancellor is nominated by the Government concerned. The executive body is the Syndicate which is now organised so as to include a larger educational element. Over this body the Vice-Chancellor presides, all other members being elected by the Faculties, except the Director of Public Instruction who is a member *ex-officio*. The secretarial work is under the direction of the Registrar. The legislative body is the Senate which consists of from 75 to 100 members, 80 per cent. of whom are nominated by the Chancellor, the rest being elected by the Senate, or by its Faculties, or by the body of registered graduates. The Senate is divided into Faculties, which are in most cases those of arts, science, law, medicine, and engineering. There is an oriental faculty in the Punjab University alone. There are also Boards of Studies, whose duties are to recommend text-books or books which represent the standard of knowledge required in the various examinations. The newer universities differ considerably from the older universities in constitution.

Apart from the general tightening up of university control over its colleges, the chief feature of university development since the passing of the Act of 1904 has been participation by the universities in post-graduate teaching and research. In Madras a small number of university professors have been appointed; in the Punjab the services of a certain number of temporary professors from overseas have been engaged. In Bombay a certain number of college professors and others have delivered lectures to post-graduate students under the auspices of the University. But the most notable advance has been made in Calcutta, owing to the energy of the late Sir Asutosh Mookerjee and to the liberality of Sir Tarak Nath Palit and of Sir Rash Behari Ghosh. In 1916, a committee was appointed to investigate the matter. In accordance with its report, new regulations have been passed by the Senate, whereby all post-graduate teaching and research in arts and science in Calcutta is now conducted directly by the University, though many of the college teachers have been invited to take part in the work. Post-graduate councils in arts and science have also been constituted, which comprise all the teachers engaged in the work and a very small number of additional numbers appointed by the Senate.

The University of Madras.—This is one of the older universities. It has recently been reconstituted. The reconstituted University while functioning as teaching and residential University in so far as the city of Madras is concerned, continues to exercise its jurisdiction over its mofussil colleges which remain affiliated to it. The administration of the University is in the hands of a Senate which has been so constituted as to include both those who are educationists and those who are connected with the actual business and commercial life. A large elective element has been introduced in its composition. Government control over the details of administration has been decentralised. The affairs of the University are managed by the Senate through a body called the Syndicate, while the Academic Council, another new body, has charge of the academic matters. The affiliated colleges have been entrusted to the care of a new organisation called the Council of Affiliated Colleges. In accordance with the recommendations of the Calcutta University Commission, the Intermediate Examination Certificate has been made the admission test to the courses of the University. The Governor-General of India has been associated with the University as its Visitor with certain emergency powers. The Governor of Madras continues a Chancellor. The Vice-Chancellor is an elected whole-time officer.

The University of Allahabad.—This is another old University which has undergone reorganisation. In 1921 an Act was passed with a view to establishing a unitary, teaching and residential University at Allahabad while enabling the University to continue to exercise due control over the quality and character of the teaching given in its name by colleges affiliated to the University at Allahabad. The Agra University has now relieved it of its affiliating functions. The Governor-General is *Visitor*, and the Governor of the United Provinces *Chancellor*. The *Vice-Chancellor* is a whole-time officer. There is a *Court*, an *Executive Council*, an *Academic Council* a *Committee of Reference* dealing with expenditure only, a *Council of Associated Colleges*, &c.

The Mysore University was constituted under Regulation V of 1916, for the better encouragement and organisation of education in the State. His Highness the Maharaja is the Chancellor. The University is very similar in its constitution to the older Indian universities, having a Senate of not less than fifty and not more than sixty members; but, unlike the older universities, it gives seats on the Senate to the university professors *ex-officio.* It departs from existing practice by centralising university instruction in Mysore and Bangalore, and by conducting the work of the first year of the old college course in a few specially selected high schools. This University has been recognised by the Government of India as a University incorporated by law for the time being in force, that is to say, its examinations and degrees have been accorded the status of the corresponding examinations and degrees of a University incorporated by law in British India.

The Patna University.—Much thought has also been given to the evolution of a new type of university which will run abreast of the old. Patna university, which was constituted in 1917, is in most of its features a university of the old type, but certain innovations have been made. The Chancellor, who is the Governor of the province, may annul any proceeding of the University which is not in conformity with the Act and the Regulations. In the Senate the application of the elective principle has been extended, by increasing both the proportion of the elected Fellows and the categories of electing bodies; and the Senate includes representatives of the teaching staff and of the graduate teachers of recognised schools. Further, all colleges are given statutory representation on the Senate in the persons of their principals. The Syndicate is the ultimate authority in academic matters, subject to the proviso that any six of its members have the power to refer such matters to the Senate for review. The Vice-Chancellor is appointed by the local Government. In addition to other duties, he has the power to inspect all colleges of the University. The colleges affiliated to the University are of two kinds; colleges of the University whose buildings are situated within a specified area, and external colleges, whose buildings are situated in one of the four following towns: Muzuffarpur, Bhagalpur, Cuttack and Hazaribagh.

The Osmania University, Hyderabad.—The Osmania University was established under a Charter promulgated with a *Firman* of His Exalted Highness the Nizam, dated the 22nd September 1918. The fundamental principle underlying the working of the University is that Urdu forms the medium of education, although a knowledge of English as a language is compulsory in the case of all students. There is a Bureau of Translation attached to the University which produces text books required for college classes. The constitution of the University consists of a Council, a Senate, a Syndicate, Faculties and Boards of Studies. There is a Chancellor and a Vice-Chancellor, both *ex-officio* officers. The executive government of the University including general supervision and control over colleges is vested in the Council which is the highest authority and which performs the function assigned to Government in the case of British Indian Universities. The University possesses at present only one constituent college, *viz.*, the Osmania University College, which was opened in 1919. The Osmania University has been recognised by the Government of India as a University incorporated by law for the time being in force, that is to say its examination and degrees have been accorded the status of the corresponding examinations and degrees of a University established by law in British India.

The Hindu University, Benares.—The creation of the Hindu University, Benares, forms a landmark in the history of the Indian university system. The university is not designed to meet the needs of one province alone, but to draw students from all parts of India.

It has no monopoly, no privilege. Its energies are not diffused by the necessity of supervising distant colleges nor is its vitality impaired by the embarrassment of administrative duties other than those of organising its own teaching. It is therefore the first Indian university which is primarily a seat of learning and not an administrative organisation. Its constitution is therefore very different from those of the other Indian universities. A dividing line is made between administrative matters, entrusted to a large body called the Court, with an executive committee called the Council, and academy matters, entrusted primarily to a Senate, with an executive body called the Syndicate. The Court which is the supreme governing body besides its administrative powers, has the right to review the acts of the Senate, except where the Senate has acted in accordance with the Act, statutes and regulations. With a solitary exception it is composed entirely of Hindus. The senate has the entire charge of the organisation of instruction in the University and the colleges, the courses of study, and the examination and discipline of students, and the conferment of ordinary and honorary degrees. This university can recognise schools all over India.

The University of Dacca.—With the modification of the Partition of Bengal in 1911, Dacca ceased to be the capital of the separate province of Eastern Bengal and Assam. Shortly afterwards, the Government of India decided to establish a university of Dacca and the Government of Bengal appointed a committee to frame a scheme for the new University. The committee was instructed that the University should be of the teaching and residential and not of the federal type, and that it should be a self-contained organism unconnected with any colleges outside the limits of the city of Dacca. The committee which was presided over by the late Mr. R. (afterwards Sir Robert) Nathan presented its report later in the year. The report is of great value and in it certain new principles are enunciated. Great emphasis was attached to physical training and education and also to the tutorial guidance of the students. The University was to be very largely a State institution, and practically all its teachers and those of its colleges were to be Government servants. Though the colleges were to be separate units, each with its separate staff and buildings, they were to be linked together and with the University by a

close form of co-operation. The executive body, to be called the Council was to have very considerable powers, subject to the sanction of Government. The Council, which was to be a large and representative body, was to be the legislative authority, subject to the control of Government, and in other respects an advisory authority. The total cost of the full scheme was estimated at 53 lakhs, but deducting certain sums which were available from other sources the net cost was put down at nearly 40 lakhs, exclusive of recurring charges. These were expected to involve a net total of about 6½ lakhs annually. Before the scheme thus elaborated (which had received the Secretary of State's sanction) could be taken in hand, the war broke out. The Act constituting the University was passed in April 1920 and Mr. I. (now Sir) P. J. Hartog, C.I.E., was appointed the first Vice-Chancellor.

The Aligarh Muslim University.—It was the aim of Sir Syed Ahmed Khan years ago to place the benefits of a liberal education within the reach of the Muhammadan community; and in 1875 a school was opened which three years later was converted into the Muhammadan Anglo-Oriental College, Aligarh. The movement in favour of transforming this college into a teaching and residential university started, as early as the end of the last century. In 1911, during the visit of His Majesty the King-Emperor to India, His Highness the Aga Khan made an appeal which resulted in the collection of large subscriptions. A draft constitution was drawn up and a consultative committee was formed. But the draft constitution was not approved by the Secretary of State, and on the question of the right of affiliating colleges outside Aligarh in particular, there was a sharp difference of opinion. Government laid down, as in the case of the Hindu University, that the university should not have the power of affiliating Moslem institutions in other parts of India.

On October 15th, 1915, a meeting of the Moslem University Association was held at Aligarh, under the presidency of the Raja (now Maharaja) of Mahmudabad, when it was proposed that the meeting recommends the Moslem University Foundation Committee the acceptance of the Moslem University on the lines of the Hindu University. It was evident at the meeting that a large number of Indian Moslems were not prepared to accept a constitution for their university similar to that of the Hindu University.

In April, 1917, at a meeting of the Foundation Committee the following resolution was passed:—

"That this meeting of the Moslem University Foundation Committee hereby resolves with reference to the letter of the Government of India, Education Department, dated Delhi, 17th February 1917, D. O. No. 66, that the Committee is prepared to accept the best University on the lines of the Hindu University. It further authorises the Regulation Committee appointed at its Lucknow meeting, with the President and Honorary Secretary of the Moslem University Association as its *ex-officio* members, to take necessary steps in consultation with the Hon. the Education Member for the introduction of the Moslem University Bill in the Imperial Legislative Council."

The bill referred to above was ultimately introduced into the Council and was passed in September 1920. The Act came into force on December 1st, 1920.

The University of Rangoon.—Plans for a university in Burma had been under consideration for some years. After his arrival in Burma the then Lieutenant-Governor Sir Harcourt Butler thought that, on general grounds and with some reference to the needs of the province, the Rangoon University might usefully be of a more practical type than any yet attempted in India with courses in arts and science, pure and applied, technology, medicine, engineering, agriculture, law, forestry, veterinary, science and training, commerce and architecture. It might perhaps combine with university instruction practical studies at the Chief Court, the Pasteur Institute and the hospitals; and also at the Museum which the local Government was committed to build as soon as funds were available. It is possible in Burma to a greater extent than in any of the older and more advanced provinces in India to concentrate the intellectual energies of the province in one immediate neighbourhood and to develop a really many-sided university. An Act to establish a teaching and residential college at Rangoon was passed on the 24th October 1920. This Act however did not find favour with a section of Burmese and was consequently amended in 1923. The amending Act introduced greater popular and representative elements in the composition of the Council and invested the reformed Council with greater discretionary powers in matters affecting public interest, such as the question of admitting affiliation of *mofussil* colleges or of admitting more colleges to the status of constituent colleges. In short, it rendered the University more suited to the needs and aspirations of the province. The University authorities are the Chancellor, Vice-Chancellor, the Council (with an executive committee) and the Senate. The Council is the supreme administrative body while the Senate is an academic body with entire control of studies, examination and discipline. The Governor-General, as Visitor, has the right to cause inspection to be made.

The Lucknow University.—The foundation of this University may primarily be ascribed to the patriotism of the people of Oudh. It is a unitary teaching and residential University incorporated by an Act passed in 1920. The University authorities are (1) the Court, with powers of making statutes, (2) the Executive Council, which administers the property of the University and appoints examiners, (3) the Academic Council, which controls the teaching and advises the Executive Council on all academic matters, (4) a Committee of Reference (a Sub-Committee of the Court) deals with items of new expenditure only. The Governor-General, as Visitor, has the same power as in the case of the Rangoon University and other new, or reorganised, universities.

The Delhi University.—The Delhi University was created by an Act passed in 1922. The University depends for its existence mainly on the generosity of the Government of India who occupy the position of a local Govern-

† Excludes "Intermediate" Colleges of new type.
‡ Excludes expenditure on European education.

ment in relation to it. It is a unitary teaching and residential University, designed on the model recommended by the Calcutta University Commission for the Dacca University, possessing at present three constituent colleges. The Act provides for two schemes—a provincial and a permanent one. Under the provisional scheme, which is in force at present, the constituent colleges remain with their hostels, etc., in their existing buildings. They also retain intermediate classes. But there have been instituted, so far as possible and desirable, common classes for graduate teaching. The matriculation examination of an Indian University, or an equivalent examination, is the admission test to the University courses. The permanent scheme contemplates that the existing colleges in Delhi City would become intermediate institutions and that degree classes would be conducted in new buildings to be built in Imperial Delhi. There would be halls and hostels where students would receive tutorial instruction. The Intermediate Examination of an Indian University or an equivalent examination, would become the admission test to the University. The Governor-General is the *ex-officio* Chancellor. There is a Pro-Chancellor, a Vice-Chancellor and a Rector. The principal governing bodies of the University are a Court, an Executive Council and an Academic Council.

The Nagpur University.—This University was created by an Act passed in 1923. Its constitution follows the recommendations of the Calcutta University Commission and the provisions in other University Acts in so far as they are applicable to local conditions. In particular the recommendations of the Calcutta University Commission have been adopted in the matter of the appointment of the Chancellor and the Vice-Chancellor, and of their powers and duties, the composition and functions of the Court, the Executive and Academic Councils, and the relations of the University with Government. The University Act provides in the first instance for a University of an examining and affiliating type in which the existence of the colleges is preserved as the unit of instruction both in the University centre of Nagpur and in other places which contain colleges admitted to the privileges of the University. The Act is so framed as to permit of a gradual development of the University into a managing and teaching body which may supplement, or entirely replace collegiate by University instruction either by taking over the management of existing colleges or by instituting and maintaining its own colleges.

Andhra University.—In January 1926, the Governor-General accorded his assent to an Act, passed by the Madras Legislative Council, incorporating a new University in the Madras Presidency. The new University is called the Andhra University and is of an affiliating type and all colleges located in the Telugu country, whether first or second grade, professional or technical, have become affiliated colleges. The university endeavours to develop scientific and technical education with special reference to the industries of the Telugu districts; it appoints its own teaching staff and will ultimately build, control and maintain colleges, laboratories and hostels of its own. The Act contemplates the possibility of a rapid development in the study of Telugu in the use of the vernacular as the medium of instruction and examination, and also aims at the ultimate establishment of more than one unitary and residential university in the Telugu districts. The headquarters of the university have been located at Bezwada.

Agra University.—This University was established and incorpoarted by the Agra University Act, 1926 (United Provinces Act No. VIII of 1928). It is a purely affiliating University and has relieved Allaahbad University of its "external side" its territorial jurisdiction embraces the United Provinces (excluding the territorial limits of the Allahabad, Benares Hindu, Aligarh Muslim and Lucknow Universities), Rajputana and Central India.

The following statement mentions the normal admission tests to the various Indian Universities:—

Name of University.	Tests.	Remarks.
1. CALCUTTA	The Matriculation Examination of the Calcutta University.	
2. MADRAS	The School-leaving Certificate Examination of Madras at present: ultimately an Intermediate Examination.	
3. BOMBAY	The School-leaving Examination of the Bombay Joint Examination Board or the Matriculation Examination of the Bombay University.

* Includes 33 pupils in high classes.

There is still a leeway to be made good. All the influences which operate against the spread of education amongst the boys are reinforced in the case of women by the *purdah* system and the custom of early marriage.

Arts colleges, medical colleges, and the like admit students of both sexes, and a few girls attend them. The Lady Hardinge Medical College for Women at Delhi gives a full medical course for medical students. The Shreemati Nathibai Damodher Thackersey Indian Women's University was started some nine years ago by Professor Karve. It is a private institution and is doing good pioneer work.

Education in the Army.—The Army in India undertakes the responsibility of the education of certain sections of the community. Its activities are directed into various channels with certain definite objects, which may be summarised as follows :—

(*i*) The education of the soldier, British and Indian, in order to :—

(*a*) develop his training faculties;

(*b*) improve him as a subject for military training and as a citizen of the Empire;

(*c*) enhance the prospects of remunerative employment on his return to civil life.

(*ii*) The fulfilment of the obligations of the State to the children of soldiers, serving and ex-service (British and Indian).

(*iii*) The provision, as far as possible, of training for the children of soldiers, who have died in the service of their country.

(*iv*) The creation of a body of Indian gentlemen educated according to English public school traditions, which should provide suitable candidates for admission to the Royal Military College, Sandhurst.

The Prince of Wales' Royal Indian Military College, Dehra Dun.—A royal Military College has been established at Dehra Dun. The aim of this institution is to provide education on the lines of an English public school for the sons of Indian gentlemen, both civil and military, up to the standard required for the passing of the entrance examination of the Royal Military College, Sandhurst.

Administration.—The educational services are divided into (*a*) the Indian Educational Service, (*b*) the Provincial Educational Service, (*c*) the Subordinate Educational Service.

(*a*) The Indian Educational Service which comprises officers performing inspection and tutorial work, is subdivided into two branches—one for men and the other for women. Appointments to both branches were originally made by the Secretary of State for India in Council, but since May 1924 recruitment has been suspended and no further appointments will be made to this service. Each local Government will find its own recruits. All officers belonging to this service come under the special leave and pension rules. Under the recommendations made by the Lee Commission, members of non-Asiatic domicile are entitled to four free passages, 1st class B., P. & O., during their service and to overseas pay in sterling.

(*i*) Indian Educational Service (Men's Branch).—There is a time-scale of pay rising from Rs. 400 by annual increments of Rs. 50 to Rs. 1,250 a month. There are two selection grades—one for 15 per cent. of the cadre on Rs.1,250-50-1,500 a month and the other for 5 per cent. on Rs.1,550-100-1,750 a month. Officers of non-Indian domicile receive overseas pay in addition ranging from Rs. 150 to Rs. 250 a month. The principals of first grade colleges receive duty allowances of Rs. 150 or Rs. 550 a month. Allowances of Rs. 150 a month are also granted to the Assistant Directors of Public Instruction and to other officers holding similar administrative appointments. There is one Director of Public Instruction in each province. The posts of Director are treated as prize posts for the members of the I.E.S. Their pay varies from Rs. 1,500-50-1,750 a month in the North-West Frontier Province to Rs. 2,500-100-3,000 in the Presidencies of Madras, Bombay and Bengal. In some provinces the Directors have been made *ex-officio* Secretary, Deputy Secretary or Under-Secretary, in the local Education Departments.

(*ii*) Indian Educational Service (Women's Branch).—The organisation and conditions of service are similar to those in the Men's Branch. The pay is Rs. 400-25-850 a month, with a selection grade of Rs. 900-25-950-50-1,050 a month for 20 per cent. of the cadre. In cases where the provincial cadre is very small, one member of the service is eligible for a selection grade post, irrespective of the percentage maximum. Officers of non-Indian domicile are in addition granted overseas pay ranging from Rs. 100 to Rs. 150 a month. The principals of first grade colleges for women and ladies holding such administrative posts as the Deputy Directresses of Public Instruction are eligible for a duty allowance of Rs. 100 a month.

(*iii*) Stoppage of Recruitment to the I.E.S.—As a result of the Report of the Royal Commission on the Superior Civil Services in India, 1924, further recruitment to the I.E.S. was stopped with effect from May 1924. Under the scheme of the organisation of the new superior educational services, all the existing posts in the Indian Educational Service will be merged into new provincial cadres which will contain special appointments not less in number than those in existence on the 9th March 1926 On the constitution by local Governments or their new superior services, on particular appointments will be reserved for members of the Indian Educational Service as at present.

(*b*) The Provincial Educational Service.—This service also consists of two branches, one intended for men and the other for women. The service comprises posts more or less similar to those borne on the cadre of the Indian Educational Service, but of secondary importance. Candidates are recruited in India by local Governments. They are invariably graduates of Indian universities and natives of the province concerned.

(*i*) Provincial Educational Service (Men's Branch).—The minimum and maximum pay has been fixed at Rs. 250 and Rs. 800 a month respectively, and local Governments have been empowered to settle grading within these limits.

(*ii*) **Provincial Educational Service (Women's Branch).**—The minimum pay is Rs. 200 a month and the maximum pay Rs. 500 a month. As in the case of the Men's Branch local Governments are competent to fix grading within these figures.

(*c*) **The Subordinate Educational Service**—This service is meant for posts of minor importance. Each province has its own rate of pay. For example, in the Punjab the maximum pay of S.E.S. officers is Rs. 250 a month.

Department of Education, Health and Lands of the Government of India—In 1910 a **Department of Education** was established in the Government of India with an office of its own and a Member to represent it in the Executive Council. The first Member was Sir Harcourt Butler. In 1923, the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture. The enlarged Department has been designated the Department of Education, Health and Lands. Sir Muhammad Habibullah and Mr. G. S. Bajpai, I.C.S., are the present Member and Secretary, respectively. The Department possesses an educational adviser styled Educational Commissioner. The present Educational Commissioner is Mr. R. Littlehailes, C.I.E., M.A.

Calcutta University Commission.—The Report of the Calcutta University Commission was published in August 1919 and in the following January the Government of India issued a Resolution summarising the main features of the Report and the recommendations of the Commissioners.

The Government of India drew special attention to the following points in the Report:—

(*i*) High schools fail to give that breadth of training which the developments of the country and new avenues of employment demand.

(*ii*) The intermediate section of University education should be recognized as part of school education and should be separated from the University organisation.

(*iii*) The defects of the present system of affiliated colleges may be mitigated by the establishment of a strong central teaching body, the incorporation of unitary universities (as occasion arises), a modification of the administrative machinery which will admit of fuller representation of local interests, and supervision of different classes of institutions by several appropriately constituted bodies.

The Commission gave detailed suggestions for the reorganisation of the Calcuttta University, for the control of secondary and intermediate education in Bengal and for the establishment of a unitary teaching University in Dacca. These measures concerned only Bengal: but it was generally recognised that some of the criticism made by the Commissioners admit of a wider application. Committees were consequently appointed by the Universities of Madras, Bombay, Patna and the Punjab to consider the findings of the Commission. In the United Provinces two committees were appointed, one to prepare a scheme for a unitary teaching University at Lucknow, the second to consider measures for the reorganisation of the Allahabad University and the creation of a Board to control secondary and intermediate education

In Bengal the first outcome of the Commission's Report was the passing of the Dacca University Act in the Imperial Legislative Council in March 1920 mentioned in detail elsewhere. It is remarkable that the University which appears to have been least affected by the recommendations of the Calcutta University Commission has been the Calcutta University itself. In spite of many discussions and draft proposals by both the University and the Government the organisation of the Calcutta University has remained unaffected.

The Reforms Act.—The Reforms Act of 1919 has altered the conditions of educational administration in India. Education is now a 'transferred' subject in the Governors' provinces and is, in each such Province, under the charge of a Minister. There are, however, some exceptions to this new order of things. The education of Europeans is a 'Provincial reserved' subject, *i.e.*, it is not within the charge of the Minister of Education; and to the Government of India are still reserved matters relating to Universities like Aligarh, Benares and Delhi and all such new universities as may be declared by the Governor-General in Council to be central subjects. The Government of India are also in charge of the Chiefs' Colleges and of all institutions maintained by the Governor-General in Council for the benefit of members of His Majesty's Forces or of other public servants or of the children of such members or servants.

Chiefs' Colleges.—For the education of the sons and relatives of the Chiefs and Princes of India, whose families rule over one-third of the Indian continent, five Chiefs' Colleges are maintained, *viz.*—

(*i*) Mayo College, Ajmer, for Rajputana Chiefs;

(*ii*) Daly College, Indore, for Central India Chiefs;

(*iii*) Aitchison College, Lahore, for Punjab Chiefs;

(*iv*) Rajkumar College, Rajkote, for Kathiawar Chiefs; and

(*v*) Rajkumar College, Rajpur, for Central Provinces and Bihar and Orissa Chiefs.

In point of buildings, staffs and organisation these institutions approach English Public Schools. Students are prepared for a diploma examination conducted by the Government of India. The diploma is regarded as equivalent to the matriculation certificate of an Indian University. A further course of University standard called the Higher Diploma is conducted at the Mayo College. The examination for this Diploma is also held by the Government of India. Its standard is roughly equivalent to that of the B.A. diploma of an Indian University.

Inter-University Board.—The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter-University Board came into being during 1925. Twelve out of fifteen universities joined the Board. Its functions are :—

(*a*) to act as an inter-university organisation and a bureau of information ;

(*b*) to facilitate the exchange of professors ;

(*c*) to serve as an authorised channel of communication and facilitate the co-ordination of university work ;

(*d*) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries ;

(*e*) to appoint or recommend, where necessary, a common representative or representatives of India at Imperial or International conferences on higher education ;

(*f*) to act as an appointments bureau for Indian universities ;

(*g*) to fulfil such other duties as may be assigned to it from time to time by the Indian Universities.

Each member University has to make a fixed annual contribution towards the expenses of the Board.

The meetings of the Board are held yearly. The Board consists of one representative of each of the member Universities and one representative of the Government of India.

Indigenous Education.—Of the 11,157,496 scholars being educated in India 6,28,146 are classed as attending 'private' or 'un-recognised' institutions. Some of these institutions are of importance: The Gurukula near Hardwar and Sir Rabindra Nath Tagore's school at Bolpur have attained some fame, Mr. Gandhi's school at Ahmedabad has attracted attention and the numerous monastery schools of Burma are well-known. Connected with every big Mosque in northern India there is some educational organisation and the schools attached to the Fatehpuri and Golden Mosques at Delhi and the Dar-ul-Ulm, Deoband, are noted. These institutions generally have a religious or 'national' atmosphere and are possibly destined to play an important part in the future of India.

The Ayurvedic and Unani Tibbia College, Delhi, founded by the late Hakim Ajmal Khan, is an important unrecognised institution. It provides instruction in the indigenous system of medicine up to the highest standard and also gives some training in surgery.

Indian students in Foreign Countries.—Indian students still proceed to foreign countries, mainly, to Great Britain, America, Japan and Germany, to complete or supplement their education. It is difficult to estimate their number. But it would appear that there were in 1926-27 at least 1,644 Indian Students in Great Britain alone distributed as follows :—

	Institutions	No. of Students.
1.	Oxford	54
2.	Cambridge	113
3.	London	501
4.	Other English Universities and Welsh Universities	231
5.	Scottish Universities	261
6.	Belfast University	15
7.	Inns of Court	469
	Total ..	1,644

A report published by the Institute of International Education in December 1926 shows that during 1925-26 there were 170 Indians at various Universities and colleges in the United States of America. No information is however available regarding the number of Indian students in Japan or Germany.

The Co-operative Movement.

The Need.—More than seventy per cent. of the vast population of India subsist on agriculture and the majority of these millions generally live, under present conditions, from hand to mouth. The ryot's occupation is healthy and productive, and he is proverbially honest and straightforward in his dealings, except when years of famine and hardship make him at times crafty and recalcitrant. Owing to his poverty, combined with want of education and consequent lack of foresight, he has to incur heavy debts to meet occasional expenses for current seasonal purposes, the improvement of his land, or for ceremonial objects, and he has therefore to seek the assistance of the local money-lender, known as the Sowkar or the Mahajan. The rates of interest on such advances, though varying from province to province and even in different parts of a province, are generally very high. In addition to charging excessive rates, the Sowkar extorts money under various pretexts and often takes from the needy borrower bonds for amounts in excess of those actually advanced. One of the chief causes of the ryot's poverty is, that owing to the absence of security and his short-sightedness due to want of education, he did not as a rule collect and lay by his savings but frittered away his small earnings in extravagant and unproductive expenditure, on the purchase of trinkets and ornaments, and on marriage and other ceremonies. Tradition says that he hoarded coins under the ground with the likelihood that on his death the money was lost to his family for good. This absence of thrift and the habit of dependence, in case of difficulty, on the Government or on the Sowkar are the bane of his life. There is besides a general absence of ideals or desire for progress. A co-operative society changes all this, inasmuch as it provides him with a suitable institution in which to lay by his savings and teaches him the valuable lesson of self-help through the sense of responsibility he feels in being its member. Thus the chronic poverty and indebtedness of the Indian agriculturist afford a very good field for the introduction of co-operative methods, especially as his work is of a productive character likely to enable him to earn a better living under circumstances more favourable than they are at present.

Genesis of the Movement.—The question of improving rural credit by the establishment of agricultural banks was first taken up in the early nineties when Sir W. Wedderburn, with the assistance of the late Mr. Justice N. G. Ranade, prepared a scheme of agricultural banks which was approved of by Lord Ripon's Government but was not sanctioned by the Secretary of State. The matter was not again taken up until about fifteen years later when Lord Wenlock's Government in Madras deputed Mr. F. A. (now Sir Frederick) Nicholson, to report on the advisability of starting agricultural or land banks in the Presidency for the financing of the agricultural industry. There was in existence in Madras an indigenous system of banking available for persons of small means. This institution, called the Nidhi, corresponded in some respects to the provident funds and friendly societies in European countries. Though these Nidhis provided cheap capital to agriculturists the spirit of co-operation was lacking in them. Sir Frederick submitted an exhaustive report to Government suggesting that the formation of co-operative societies afforded an excellent means for relieving rural indebtedness. Unfortunately, the report was not received favourably either by the non-official public or by the Government of Madras, and no action was taken on the recommendations made in it. The next few years saw two of the worst famines from which India had ever suffered, and in 1901 Lord Curzon appointed a Commission to report on the measures to be adopted in future to protect the ryot from the ravages of famines and to relieve distress. The Commission laid stress on the proper working of the Agriculturists' Loans and the Land Improvement Loans Acts under which *takavi* advances are made by Government to cultivators. This system was given a long trial in the years previous to the great famines as well as during the years succeeding the 1899-1900 famines. But it is acknowledged on all hands that the system has not been successful in solving the problem of rural stagnation, as it is clear that it is not facility for obtaining cheap capital alone which will raise the agriculturist and relieve him from his debts, but the provision of capital combined with the inculcation of habits of thrift and self-help. This Commission also recommended that the principal means of resisting famines was by strengthening the moral backbone of the agriculturist and it expressed the view that the introduction of co-operation in rural areas might be useful in securing this end.

Co-operative Credit Societies Act.—These recommendations induced Lord Curzon to appoint a Committee with Sir Edward Law at its head to investigate the question and a report was submitted to Government recommending that co-operative societies were worthy of every encouragement and of a prolonged trial. Sir Anthony (now Lord) Macdonell and others were at the same time making experiments on similar lines in the United Provinces and the Punjab with satisfactory results. All these activities, however, took an organized shape only when Lord Curzon's Government introduced in the Imperial Legislative Council a Bill to provide for the constitution and control of co-operative credit societies. The main provisions of the Bill which became the Co-operative Credit Societies' Act (Act X of 1904) were:—

(1) That any ten persons living in the same village or town or belonging to the same class or caste might be registered as a co-operative society for the encouragement of thrift and self-help among the members.

(2) The main business of a society was to raise funds by deposits from members and loans from non-members, Government and other co-operative societies, and to distribute the money thus obtained in loans to members, or with the special permission of the Registrar, to other co-operative credit societies.

(3) The organization and control of co-operative credit societies in every Presidency were put under the charge of a special Government officer called the Registrar of Co-operative Credit Societies.

(4) The accounts of every society were to be audited by the Registrar or by a member of his staff free of charge.

(5) The liability of a member of a rural society was to be unlimited.

(6) No dividends were to be paid from the profits of a rural society but the profits were to be carried at the end of the year to the reserve fund, although when this fund had grown beyond certain limits fixed under the bye-laws, a bonus might be distributed to the members.

(7) In urban societies no dividend was payable until one-fourth of the profits in a year were carried to the reserve fund.

Soon after the passing of the Act, the local Governments in all the Presidencies and major provinces appointed Registrars with full powers to organise, register and supervise societies. In the early stages o the working of this Act, Government loans were freely given, and the response to the organising work of the Registrars was gradual and steady throughout most parts of the country.

Co-operative Societies Act.—As co-operation progressed in the country, defects were noticed in the Co-operative Credit Societies Act and these were brought to the attention of Government by the Conferences of the Registrars which were for some years held annually. In two directions the need for improved legislation was especially felt. In the first place, the success of credit societies had led to the introduction of co-operative societies for distribution and for purposes other than credit for which no legislative protection could be secured under the then existing law. And, secondly, the need for a free supply of capital and for an improved system of supervision had led to the formation of various central agencies to finance and supervise primary credit societies and these central agencies ran all the risks attendant on a status unprotected by legislation The Government of India recognising the desirability for removing these defects, decided to amend the old Act, and a Bill embodying the essential alterations proposed was introduced in the Imperial Legislative Council and after a few amendments it emerged from the Council as the Co-operative Societies Act (II of 1912) replacing Act X of 1904. The outstanding features of the new Act were as under:—

(*a*) It authorised the formation of societies for purposes other than credit, which was possible under the old Act only with the special permission of the Local Government. (This extension of co-operation to purposes other than credit marks an important stage in its development in India.)

(*b*) It defined, in precise terms, the objects for which co-operative societies could be organised.

(*c*) It removed the arbitrary division of societies into rural and urban and substituted a more scientific division in accordance with the form of liability adopted.

(*d*) It facilitated the growth of central agencies by insisting on limited liability, by means of a special clause about the registration of a society one of whose members is a registered society.

(*e*) It empowered Local Governments to frame rules and alter bye-laws so as to put restrictions on the dividends to be declared by societies and allowed to societies with unlimited liability the discretion to sanction distribution of profits to their members according to principles laid down by the Local Governments.

(*f*) It allowed societies with the permission of the Registrar to contribute from their net profits, after the reserve fund was provided for amounts up to 10 per cent. of their remaining profits to any charitable purpose as defined in the Charitable Endowments Act. (This kept the movement in touch with local life by permitting societies to lend assistance to local educational and charitable institutions.)

(*g*) It prohibited the use of the word "co-operative" as part of the title of any business concern except a registered society.

Composition of the Capital of Agricultural Societies.—On the organization of agricultural credit was necessarily concentrated the attention of the promoters, for it presented a far more important and far more difficult problem than urban credit. There was a great variety of types among the agricultural societies started in different provinces, and some Registrars adopted the "Raiffeisen," and some the "Luzzatti" methods in their entirety. The commonest type, as prevailing in the Punjab, Burma, and the United Provinces,—and now extended practically all over India—is the unlimited liability society with a small fee for membership and a share capital, the share payments to be made in annual instalments. In some places, the bye-laws insist on compulsory deposits from members before entitling them to enjoy the full privileges of membership. The system in Bombay and some parts of the Central Provinces is different, there being no share-capital but only an admission fee. Part of the working capital is raised by deposits from members and other local sympathisers, but the bulk of it in all provinces is obtained by loans from central and other co-operative societies. In all the Provinces, the Government set apart in the initial stages every year a certain sum to be advanced as loans to newly started co-operative societies, usually up to an amount equal to the deposits from members, raised by a society. State aid in the form of direct money doles to agricultural credit societies has now become an exception rather than the rule, and this withdrawal in no way hampers the development of the movement on account of the rapid increase of co-operative financing agencies and the growth of public confidence in the primary societies. Out of a total working capital of 27 crores, 23 crores were shares, 4 crores reserves, 1½ crores deposits of members, 1½ crore deposits from non-members and societies and 17 crores loans from central societies. In Bombay, since 1923, Government placed at the disposal of the Provincial Bank an allotment for distribution as advances to agriculturists under the Land Improvement Loans Act, such advances to be made through the primary

societies and the central banks to which these are affiliated.

Constitution of Agricultural Credit Societies.—The typical agricultural credit society in India corresponds to the "Raiffeiser society," the management being gratuitous, the profits indivisible, and the area of work limited. In the Punjab, the United Provinces and Burma where shares form an integral part of the system, the distribution as dividend of a portion of the profits after ten years' working is permitted under certain restrictions, although in the Punjab the tendency now is to make the profits wholly indivisible and the shares non-withdrawable. In several parts of the country there are villages where a few literate agriculturists may be found, but many of these are hardly fit enough to undertake the responsible work of a secretary, being practically ignorant of account keeping. In such villages either the village school-master or the village accountant is appointed secretary. In some places, where a suitable person is not available on the low pay a single society can afford, neighbouring societies are grouped together with a whole-time, well paid secretary. In the Central Provinces, especally and to a certain extent in Bihar and Orissa, Bengal and the United Provinces, the accounts are written up by group secretaries, clerks or Moharrirs, controlled more or less by the inspecting staff of central banks to which societies are affiliated. As the work of societies develops, the need for trained secretaries is being felt more keenly, for it is now realized that the function of a secretary does not consist merely in writing the accounts correctly. With a view to meet the demand for trained secretaries, training classes have been organized in Bombay, in the Punjab, in Burma and elsewhere during the last few years, and efforts have been made to provide education in co-operation through the new educational and propagandist associations which have been started in some of the major provinces. Arrangements have also been devised in some provinces to educate the members of managing committees in the principles of the movement through peripatetic instructors and courses of simple lectures are delivered at central villages, wherein existing Unions have been utilized to promote such co-operative education among rural workers.

Internal Management of Societies.—The managing committee of a society consists of five to nine members, the chairman being usually one of the leading persons in the village. The daily work is carried on by the secretary, but the managing committee supervises this and has alone the power to admit new members, to receive deposits, to arrange for outside loans, to grant loans to members and to take notice of defaulters. The practice is now growing of fixing the normal credit of every member once or twice in the year at a general meeting and the committee can sanction loans only within the limits so fixed. The accounts of the society are kept by the secretary and the necessary forms, papers, and books are usually supplied from the Registrar's office or the central organizations referred to above to simplify the work of the secretary. The books are kept according to the rules framed by the Local Governments and are open to inspection by important local officials and the Registrar and his staff. The accounts are audited, at least once a year, by the auditors working under the Registrars of Co-operative Societies, and the societies are inspected from time to time by honorary or paid inspectors. In Burma and Madras, the supervision is carried out by unions, while in the United Provinces, Bihar and Orissa, Ajmere-Merwara and Bengal the responsibility for supervision rests mainly with the central banks. In the Central Provinces, the inspection is controlled by the Provincial Federation working through the central banks. In Bombay, supervision is conducted partly by unions, partly by central banks and partly by honorary organizers. In the Punjab, while paid for by societies, the inspecting staff works under the direct orders of the Provincial Union with the Registrar as its president

The supreme seat of authority in co-operative societies is the entire body of members assembled in general meetings at which every member has one vote and one only. At the annual general meeting held at the close at the co-operative year the accounts are submitted, the balance-sheet passed, and the managing committees with the chairmen and secretaries are elected. The general meeting fixes in some provinces the borrowing limit of individual members, lays down the maximum amount up to which the managing committee may borrow during the ensuing year, dismisses members for misconduct or serious default, and settles the rates of interest for loans and deposits. All the net profits of a society are annually carried to the reserve fund, which is indivisible, that is, incapable of distribution as dividend or bonus, which cannot be drawn upon without the sanction of the Registrar, and which must be invested in such a manner as the rules framed under the Act may prescribe. It is intended to meet unforeseen losses and to serve as an asset or security in borrowings. Except in the Central Provinces and Madras, and to some extent in a few other provinces, the reserve funds of primary societies are generally utilised as an addition to their working capital, unless they have considerable outside deposits and have to make special arrangements in respect of fluid resource to cover such borrowings.

Main defects.—The main defects of primary societies may be summarized. The most prominents is the evil of unpunctuality. The percentage of over dues to total outstandings was a little over 20 for all the provinces and States, but was as high as 30 in some provinces. These arrears are due more to easy going ways of life and the narrowness of margin between income and expenditure than to recalcitrancy. Next is the frequent apathy of the members in the work of the societies owing to their lack of education and an absence of higher ideals. The general body very often leaves affairs wholly to the discretion of the committee and the committee transfers its powers to the chairman, secretary or some other member. Then there is the objectionable practice of making book-adjustments and taking *benami* loans. A grave defect is the inability of the societies to act as

real banks, accepting for deposit money when presented, meeting withdrawals of such savings deposits or temporary surplus funds without delay, and granting loans on demand according to actual requirements. In many a society, activity is displayed only twice in the year, once during the cultivation season when loans are advanced, and again after harvest time when recoveries are made. In several provinces, members have to wait for weeks before they can get funds for agricultural operations, and as such operations must be proceeded with, resort to the money-lender is not uncommon. With the approval of normal credits in advance and the provision of banking facilities through the opening of branches of district banks or the starting of central banks for smaller areas this defect is now being gradually remedied. To provide for members who want large loans on the security of land for clearance of debt or agricultural improvement, separate land mortgage societies have been started in the Punjab, and may be found necessary in other Provinces where large amounts are required by agriculturists on the security of their landed property. To provide finance the Punjab Provincial Bank, after entering into an agreement has issued long term debentures bearing interest 6 per cent. to the extent of Rs. 5 lakhs. A similar scheme for land mortgage banks for groups of villages has also been accepted in Madras where the local Government have agreed to the subscribe to half the capital required if the other half is raised locally. A few banks have already commenced working. But the system does not seem to have found favour and the revision of the scheme is under consideration. It is proposed in Burma to have for the work of land mortgage credit a separate organization, distinct from the organization for co-operative credit. In Bombay, the assistance asked for from the State for the scheme of co-operative land mortgage banks is the recognition of the land mortgage bank's debentures as trustee securities, and a Government guarantee for payment of interest. The Government of Bombay have approved of the starting of three societies for land mortgage credit, but in the initial stages finance will be provided for these bodies by the existing Bombay Provincial Bank, the debentures issued by which, in accordance with its agreement with the Secretary of State, will be purchased by Government to the extent of Rs. 5 lakhs. As the bye-laws in many provinces, place a limitation on the amount of loan that can be advanced to an individual and financing agencies are often unable to make long term advances, societies cannot be said everywhere to have supplanted the money-lender.

Non-Agricultural Credit Societies.—Non-agricultural credit societies have grown up in towns and cities as part of a movement for improving the economic condition of persons engaged in handicrafts and cottage industries, of artisans and small traders, members of particular castes and employees of big firms and Government departments. These societies have usually a limited liability. This is due partly to the absence of any assets in real property among their members, but mainly to the field of their work not being compact as is the case with agricultural societies, where every member may be expected to know every other member. Their constitution is based on the 'Schulze Delitzsch' model. In most societies the management is honorary, though sometimes, when the sphere of a society's work is extended, a paid staff is employed. There is in all societies a substantial share capital, payments being made in monthly instalments, and the rest of the working capital is obtained by local deposits from members and others. Loans from co-operative banks and societies usually form only a meagre proportion of the capital. At the end of the year 1925-26, out of a total working capital of nearly nine crores, only 80 lakhs were held from central banks.

At the end of every year, one-fourth of the net profits must be carried to the reserve fund and the balance may be distributed as dividend or bonus. There are a few drawbacks in the working of these societies. The most serious of these complaints are that the spirit of co-operation is lacking in many non-agricultural societies, that there is too great a desire to go in for profit-making and dividends, and a growing tendency to make the societies close preserves once they have started running on profitable lines. The rates of interest on loans are at times higher than they ought to be, and the men at the head of the societies are loth to admit new members who are in need of loans for fear of the latter cutting down the profits.

Included in this group are communal societies, and societies of employees of firms, railway companies and Government offices. There are again, in Bombay and Burma, a few societies organized on the lines of the People's Banks of Italy to assist small traders and artisans in towns and there are also some societies comprising members of particular communities. The larger banks in Bombay and Burma open current accounts, grant cash credits and overdrafts and issue or discount local bills of exchange. In Bombay, during the last few years some of the urban people's banks have also begun to finance traders on the security of goods, including agricultural produce, and this line of work is expected to develop considerably in course of time. These banks give promise of developing a truly non-capitalist system of banking run for the people and by the people, providing for the person of small means those modern banking facilities which have so largely assisted in developing trade and industries in other countries. Some of the larger non-agricultural societies, after meeting the needs of their members, have large balances on hand, which they were allowed, with the previous sanction of the Registrar, to advance to smaller primary societies. This practice is, however, being now discontinued, and the surpluses of all primary societies are being concentrated in their central banks through which all finance is provided.

With the growth of industries and the development of cities, an important labouring class has grown up in big industrial towns, and this class is as deeply indebted and as badly remunerated as the agriculturists ultimately are. Co-operation, if introduced, among people of this class, provides opportunities of organization for common ends, besides

being the means of their economic regeneration. Systematic efforts have been made, however, only in a few centres; elsewhere urban co-operation has so far been confined more or less to middle class people. The first experiment among backward classes was initiated in Bombay under the auspices of an organization known as the Debt Redemption Committee. Considerable work in this direction has also been done in Madras, through social workers and the Labour Department, particularly among the depressed classes and among the low-paid employees of municipal bodies. The Social Service League of Bombay and the Y. M. C. A. in several other centres have lately started a large number of credit societies among factory workers, and the formation of co-operative credit societies for workers in factories has come to be recognized as an essential feature of every well-considered scheme of industrial welfare work.

Loans advanced.—The total amount of loans advanced to members by agricultural and non-agricultural societies during the year 1925-26 were Rs. 12,00,70,559 and Rs. 7,34,51,258, respectively. Loans are mostly given on the security of two co-members. Under the Act, societies are allowed, subject to certain conditions, to advance loans on the hypothecation of moveable or immoveable property, and there is nothing unco-operative in this so long as personal security, which is the central principle of co-operation, is given and the borrower's property is recognized as only a secondary or collateral protection. Mortgages are taken occasionally, especially as security for long-term loans or loans for large amounts. Agricultural credit societies are not permitted to grant advances on the security of moveable property without the special sanction of the Registrar, owing to the difficulty likely to be experienced in valuing such property and keeping it in safe custody. Recently, however, in Madras, Bombay, and Burma the practice has grown up of granting short-term advances against agricultural produce to be kept in possession by the societies or by some central organization on their behalf. The system of advances on the specific security of crops in the fields has also been introduced in some provinces. Loans for agricultural purposes are made repayable at harvest time, while two or three annual instalments are allowed for repayment of advances taken for purchase of bullocks, carts, implements or for ceremonial or domestic expenses. The repayment of loans for liquidation of previous debt or for land improvement or purchase and installation of agricultural machinery is spread over a longer period extending from five to ten years.

It is impossible to insist on the restriction of loans to productive objects and there are circumstances under which unproductive loans are permissible and even advisable. What should be and generally is borne in mind is that precautions are taken by societies that the expenditure is inevitable and that it is not excessive in amount. The chief objects of the loans advanced are cultivation expenses, purchase of live-stock, fodder, seed, manure and agricultural implements, payment of rent, revenue or irrigation dues, land improvement and sinking of wells, purchase of new lands, repayment of debt or redemption of mortgaged land and personal maintenance in times of scarcity in agricultural societies; and for purchase of raw materials, for industries, or trade, for house-building, for education or medical relief and for food and other necessaries of life in non-agricultural societies. The rates of interest vary from 9⅜ per cent. in Madras and Bombay to 12½ in the Punjab, and 15 in almost all the other major provinces, both for agricultural and non-agricultural societies. Rates of lending by central banks vary from about 7 or 8 per cent. in Madras and Bombay, to 9 in the Punjab, 10 in Burma and about 12 in all the other major provinces. An unsatisfactory feature of the co-operative system in some of the provinces is the laxity and unpunctuality in the matter of repayment of loans by members and a general apathy in the matter on the part of societies. As co-operation is both financially and educationally a failure unless punctuality in repayment is ensured, no efforts are spared by organizers to educate societies in this respect. The Co-operative Societies' Act grants to societies priority of claim over other creditors (except the State or the landlord) to enforce any outstanding demand due to the societies from members or past members upon the crops or other agricultural produce, and upon the cattle, fodder or agricultural implements, in cases where loans have been advanced for the purposes specified. Law courts have ruled that the claim is not valid unless a decree is obtained by a society in its favour in advance. To carry out the intention of the framers of the legislation the Maclagan Committee recommended the conversion of this claim into a lien and thus get over the legal difficulty, and this has already been done under the Bombay Co-operative Societies Act, 1925. Most local Government have also framed rules under the Act enabling the Registrar to refer disputed claims to arbitration and to enforce the awards of the arbitrator in the same manner as decrees of the Civil Court. Under the rules in some provinces, and according to the new Act in Bombay, sums due under awards of arbitrators are, under certain conditions, made recoverable according to the procedure allowed for the recovery of arrears of land revenue. The Local Governments of Bengal, and Bihar and Orissa were the first to adopt enactments enabling the contributions levied by the liquidator of a cancelled society to be collected in the same manner as arrears of land revenue on an application being made in that behalf by the Registrar of Co-operative Societies. Legislation on similar lines has since then been adopted in almost all other provinces.

The Financing of Agricultural Societies.—As soon as the initial stage of the movement passed, a very urgent problem had to be faced. This was to finance agricultural societies the number of which was growing rapidly. And the problem was solved in different provinces according to the special conditions and the stages of development the movement had attained. In Madras, a central bank, which lent to co-operative societies all over the Presidency, was started without Government aid as early as in 1907. This was followed by the starting of banks at district head-quar-

ters. In other Presidencies, district and taluka banks were established making good the deficiency in the local capital of the societies within their respective areas of operations and in some places joint stock banks were persuaded to make advances to agricultural societies direct or through the medium of local central banks. A large number of prosperous non-agricultural societies, as stated above, could afford to make temporary advances to agricultural societies out of their surplus funds. Government aid was also freely given in a few Provinces, although with the progress of the movement, this aid was discontinued. In Bombay, there was no movement to start local financing agencies and the slow increase in the number of societies made it difficult for central banks with a restricted area of operations to work successfully. Accordingly, the Bombay Central Co-operative Bank was founded in 1911, with the object of financing co-operative societies throughout the Presidency. Later on, local central banks came to be started, and have taken over from the central bank at Bombay the work of financing societies in the various districts. The bank at Bombay has, therefore, assumed the functions and even the name of a Provincial Bank. It confines its dealings with primary societies to those areas where central banks are not likely to be established in the near future or where special local circumstances favour direct relations with a strong financial organization. For areas served by it, the Provincial Bank has opened twent-one branches, and twenty branches have been started by several of the leading district central bank.

The Madras Central Bank referred to above has also been converted into a Provincial Bank working through the district banks. A Provincial Bank with central banks and societies affiliated to it is in existence in Upper Burma, and this Bank finances primary societies either through the affiliated local banks of which, however, the majority are new and with resources undeveloped, or through the guaranteeing unions composed of societies. An Apex Bank was started in the Central Provinces in 1913 to form a link between the central banks and the joint stock banks with branches in the province. It led to the establishment of a Provincial Bank with a similar constitution in Bihar and Orissa. A Provincial Bank composed of central banks as shareholders has been started in Bengal, where, as also in Bihar and Orissa, primary societies are at present financed by central banks at district or *taluka* headquarters. In the United Provinces, primary societies are financed on the same system, and there, too, the starting of a Provincial Apex Bank under which central banks will be federated has long since been under contemplation, but the proposal has been finally abandoned by the Local Government. The Punjab has a local central banking system and an Apex-Bank with central banks, and societies as share holders has been started, with power to issue debentures, as in Bombay, with interest guaranteed by Government. Debentures of the value of Rs. 5 lakhs have already been issued with interest at 6 per cent. guaranteed by Government. In addition to the Provincial Banks mentioned above, Assam has a Provincial Bank as also the Indian States of Mysore and Hyderabad.

The constitution of central banks is not uniform, but the existing banks may be classified under three general heads :—(1) banks of which the membership is confined to individuals or where societies are admitted as members on exactly the same footing as individuals, (2) banks of which the membership is confined to societies, and (3) banks which include societies and individuals as their members and secure to societies separate representation on the board of directors. The majority of the central banks are of the mixed type and there are hardly any of them which now adhere to the old capitalist constitution. The federal type is theoretically the best, but the paucity of the resources of the constituent primary societies, the lack of personnel and the need for enlisting the support of the urban middle classes have all combined to make the mixed type the most popular in almost all provinces. In Bengal and the Punjab, as also to a smaller degree in the United Provinces and Bihar and Orissa, there has recently been an increase in the number of federal central banks, which are found to work well, provided their area of operations is much smaller than a revenue district and they serve a compact group of well-established societies. Branches of banks, central and provincial, have been tried with success only in Bombay.

Functions of Central Banks.—The functions of central banks are to balance the funds of societies and to supply capital. But their duties are not limited to the provision of banking facilities only, but often include the organisation and supervision of societies. Hence in all the major provinces with the exception of the Punjab, Madras and Burma, central banks perform the functions of supervision and guidance of the societies affiliated to them, and in some they also organise new societies and even take up the work of training and propaganda. Usually, the unit of area for a central bank is fixed as co-terminous with the whole of a revenue district, as the personnel necessary for its successful working may be difficult to secure in a smaller area. However, in most of the provinces of Upper India and Bengal there are in existence central societies for *talukas* and occasionally for smaller tracts. An important class of institutions included under the statistics of central societies are unions. These may be described as federations of societies which are maintained for supervision, either combined or not with the assessment or guarantee of loans to primary societies. They do not, however, undertake banking business, except in the Punjab, the unions in which save for the smallness of the area they cover, in no way differ from the pure type of central bank referred to above. These supervising unions have a very restricted area of operations, covering an area not larger then a taluka. They form integral parts of the provincial organization in Burma and originally in the Central Provinces also, in one province serving as a link between primary societies and the provincial bank and in the other between primary societies and local banks. The system has also been extended to Madras

though in that province no guarantee is undertaken by the unions. In Bombay, guaranteeing unions were introduced as local agencies for supervision and assessment of credit, but the policy now is to have new unions which eschew the guarantee and work as supervising and local controlling bodies with a fairly wide area of operations and engage competent well-trained supervisors. In Burma and Madras, some progress has been made in federating the unions into district councils intended to co-ordinate local activities and represent local co-operative interests.

Organization and Propaganda.—It may be mentioned that in most of the provinces, the work of organizing and looking after the societies was in the earlier days done by the Registrar with the help of a staff of assistant registrars, auditors and other officers and a few honorary non-official workers. In Bengal, Bihar and Orissa, and the United Provinces where the central bank system has developed properly, the directors of the central banks, either themselves or through a paid agency, organise societies and, as stated above, surpervise their working. Apart from these, the number of honorary workers is steadily increasing and in some provinces there is a staff of specially appointed honorary organisers who regularly assist the Registrars. The activities of the honorary workers are often, however, spasmodic and unorganized, and in most of the major provinces the need has been felt for some co-operative institution which will co-ordinate and systematize the efforts of non-official workers, and place their activities on a responsible basis. The objective is to have the movement directed and controlled through self-governing representative bodies like organisation societies or federations existing in Germany, England, Ireland and elsewhere. Such institutions carry on active educational propaganda, and through the agency of local committees and groups of workers, assist in the organization of new societies and attend to their supervizion. Arrangements are made for carrying on the audit of societies—for which Government cannot continue to increase the official staff to an unlimited extent—on payment of some fixed contributions. Finally, such federations gradually manage to have the ultimate voice in the determination of policy, and subject to the statutory powers of the Registrar may hope to take over, in course of time, the entire control of the co-operative organization in a province. In the Central Provinces, there functioned as a controlling body a federation of Co-operative Banks and Societies which provided a regular and efficient system of supervision audit and control, arranged for the training of the federation staff, attempted to secure uniformity of practice among co-operative institutions and to promote their interests and foster the spread of co-operation by active propaganda. The working of this Federation was adversely criticised in the report of a Committee of Inquiry appointed by the Local Government in 1922, and it was proposed that this body should be dissolved and replaced by separate educational institutes for the Central Provinces and Berar. Though the Federation has not been dessolved institutes for education and propaganda have already been started in Berar and the Jubbulpore and Nerbudda Divisions. A Provincial Union is also in existence in Madras, whose objects are mainly educational and propagandist. Its activities comprise the issuing of co-operative journals the organization of training classes and the holding of conferences. Its constitution and its line of work have now been revised so as to make it the central self-governing organization in the movement but its working has been considerably hampered by lack of funds and want of support from societies. Its relations both with societies, unions, district federations and the local organizations forAndhradesa. Malabar and Kanara are still undefined. A Central Institute to focus the efforts of co-operative workers and to carry on propagandist work was established in Bombay in 1918. The objects of this institution are to develop the co-operative movement in the Presidency, by promoting the study of co-operation and by co-ordinating the activities of several existing propagandist and organization agencies. The Institute has no powers of control, though it is expected to ascertain and represent the views of co-operators on questions affecting the movement. The activities of the Institute in the mofussil are carried on through its divisional branches formed on a linguistic basis and local branches in all the revenue districts of the Presidency. This is one of the most active among the non-official central organizations in India, and has established international relations. The Provincial Co-operative Institute, as well as similar organizations in other parts of India, join in the celebration of the International Co-operators' Day on the first Saturday in July. Public addresses, social gatherings, conversaziones processions and mes; meetings are arranged on this day in villages, towns and cities. Its constitution has recently been revised with a view to give to societies a larger representation and a predominant share in the working. The Institute receives a handsome grant from Government, but will be in a position to increase its income from within the movement under its revised bye-laws. In Bengal, a similar propagandist organization has been started with identcial aims. The Society has taken over some of the educational and propagandist work hitherto performed by the Co-operative Department, and has assisted in the organization of various non-credit activities, among which prominent mention may be made of the starting of Co-operative Societies for the sale of jute and paddy and the supply of agricultural requisites. It has projected a scheme for the training of members of village societies and their secretaries. A federation with a constitution more or less similar to that of the Central Provinces Federation but having divisional boards to decentralize control is also in existence in Bihar and Orissa, and has appointed a special officer for propaganda and development. In the Punjab, a provincial union, with the Registrar as President, has been organized to conduct the audit and inspection of primary societies and to undertake general propagandist work. The United Provinces have a standing committee serving as an advisory Board for the Registrars Departmant, while in Burma, the audit of primary societies is conducted by a Provincial Co-operative Council consisting of representatives of co-operative institutions. This also assists in the organization of the provincial conference and acts as an advisory body to the Registrar. Organization, supervision and propa-

ganda are furthered by district federations of unions of primary societies. Educational and propagandist bodies like the Institute in Bombay have been started in the States of Hyderabad, Mysore, Baroda and Travancore. These are all recent developments and it is still too early to forecast on what lines the transfer of work to representative co-operative agencies will be carried out. In the beginning of the year 1926, an informal Conference of all these institutes and federations was held in Bombay at which it was decided to convene an All-India Conference periodically and to establish closer contact among these bodies by the starting, if necessary, of an All-India Confederation of these bodies. At another conforence held in September 1928, this idea was given a more definite shape. Along with this Conference was also held another Conference of Provincial Co-operative Banks in different provinces and Indian States, the most important subject for the consideration of which was the proposal for the formation of an All-India Bank. To secure co-ordination in the working of existing provincial banks, to bring about closer touch and to convene periodical Conferences, an association of the provincial banks has been started to which has been referred for consideration the proposal for an All-India Co-operative Bank. This Association has made a good beginning by educating public opinion on the place of co-operative banking in the proposed scheme of a central bank and co-ordination of banking through the agency of a Reserve Bank of India. As a result of its efforts the joint select Committee of the Indian Legislature made provision in the Reserve Bank Bill, which has now been abandoned, for the appointment of a Director on the Board of the Reserve Bank to represent provincial co-operative banks and also for the negotiation of certain types of bills and securities presented by such banks.

Other forms of Co-operation.—After the passing of the amended Co-operative Societies' Act in 1912, the application of co-operation to purposes other than credit was greatly extended, but it is only during the last few years that a general demand for producers and consumers' societies has arisen. The total number of non-agricultural non-credit societies was 3,764: 614 for purchase and sale, 13 for production 1,017 for production and sales and the remaining 2,120 for other forms of co-operation. Before the year 1918-19, there were only a few stores societies all over the country. In all provinces, particularly in Madras, a beginning had been made in the direction of distributive co-operation among the middle classes, while in Bengal and the United Provinces some attention had been devoted to the starting of stores for students living in hostels attached to colleges. The movement obtained popular favour in view of the increasing prices of the daily necessaries of life, and the profiteering which assumed serious proportions at the close of the War. Supply unions, store societies, and distributive departments attached to credit societies were organized in some provinces, while arrangements were contemplated for obtaining cheap, wholesale supplies for the various distributive organizations. The work of organizing co-operative distribution in rural areas was pushed ahead with a fair amount of success under official auspices in the Punjab and Madras. but in both provinces a setback is now evident. Neither the supply unions nor the primary purchase and sale societies are in a flourishing condition. The consumers' movement in urban areas received particular attention in Bombay, Madras, Bengal, Burma, and a few other provinces, but with the disappearance of the special conditions which generated enthusiasm in the years immediately succeeding the close of the War, stagnation has set in, and only a few among the numerous store societies started in these provinces have firmly established their position and continue to enjoy the loyal support of their members. Attempts have been made in two or three provinces to revive the movement by the starting of central organizations for joint wholesale purchase, but the proposals have not yet taken definite shape. Apart from the Triplicane Stores in Madras which stands in a class by itself, the only successful consumers' societies are stores for college students, some communal hostels or boarding houses and a few agencies for supply of special requisites.

In some Provinces, efforts have been made to revive the ancient handicrafts of the country and cottage industries by organizing co-operative societies for the cottage workers. Many of these societies merely provide cheap credit, but in some places they undertake the supply of raw materials and the sale of manufactured goods. An important industry which flourished in India before the introduction of machinery was handloom weaving and efforts have been made to revive it by the formation of co-operative societies of handloom weavers. Most of the weavers' societies are merely credit societies, but some undertake the purchase of yarn for members, and others have store branches to sell the cloth produced by members. They have also been instrumental in introducing improved looms and methods among the conservative weaving classes. In Bengal and the Punjab, much success has attended the organization of central unions among weavers' societies, and similar intensive work in Bihar and Orissa and Bombay has also met with good results. Other industrial societies, to be found in very small numbers here and there are those for "gaolees" or milkmen, dyers, basket and brass workers in the Central Provinces, "Chammars" and "Dhors" in Bombay and the Punjab, lacquerware workers, carpenters, wood-carvers, blacksmiths and potters in Mysore, where the State provides special facilities in the shape of loans and technical assistance for the development of artisans' societies. In Bombay, the producers movement has extended to communities of workers like coppersmiths and goldsmiths, carpenters, dyers, and others, and drawing its inspiration from the ancient guild spirit animating the communities, it aims at creating a strong economic organization among these various industrial workers and craftsmen, based on self-help and self-government. Another off-shoot of this movement is the starting of co-operative societies among skilled or unskilled labourers on the lines of the labour societies of Italy. The initiative came from Kashmir, while experimental societies were also started in Madras, and in Bombay. The object of these is to organize

labourers to tender for contracts for public or private works, to eliminate the middleman contractor, and to utilize the profits for the economic and social betterment of the labouring community. The Indian Industrial Commission in the course of their inquiries devted some attention to the development of small and cottage industries and the possibility of reviving them by the introduction of co-operation. Their recommendations on this subject were, however, not very definite and no action appears to have been taken on these. The development of subsidiary occupations in rural areas also came up for consideration by the Royal Commission on Agriculture in India. Who were of opinion that technical education and co-operative organization were the only means by which the smaller industries could hold their own. The Commission particularly recommended the grant of advances to artisans' societies for purchase of and improved machinery and suggested the linking up of the cultivator through co-operative agency with localized factories dealing with agricultural produce.

An interesting development during recent years is the provision of housing through co-operative societies. A good number of housing societies have been started in Bombay City and suburbs and also in a few other centres in the Presidency like Ahmedabad and Karachi. They are generally organized on the co-partnership system, under which the society owns the houses and lets them to members at fixed rents. The scheme is feasible for such sections of the middle classes as can provide a certain proportion of the initial capital. Tenant-ownership societies have also been started and are now more favoured than Co-partnership societies There are some building societies in Madras and a few more in Mysore, but their activities are confined mainly to the provision of capital for building schemes and only occasionally extend to the joint purchase of land or of building materials. The Punjab has only one society for co-operative housing and town planning. The Local Governments of Bombay and Madras as also the State of Mysore set apart annually some funds to be advanced to housing societies at fair rates of interest and with repayments spread over a number of years.

The province of Burma was a pioneer in the matter of cattle insurance, and to support the village insurance societies which have been started in the province, there has been organized a central re-insurance society, which receives some financial backing from Government. In the other provinces where it has been introduced co-operative insurance for cattle has made only slight progress, and in Burma, as also in the Punjab where the movement had advanced so far as to necessitate the starting of a re-insurance society there has been a set-back recently.

Agricultural Co-operation.—Co-operative societies have, until recently, been organized only to supply cheap credit to their members, but there are various other fields of work to which they may extend their activities. The total number of agricultural non-credit societies is 2,298 of which 379 were societies for purchase and sale, 655 for production, 328 for production and sale and 743 for other forms of co-operation. Grain banks have, in some provinces, been started with advantage, receiving deposits in kind and allowing these to accumulate to be sold at profitable rates or distributed to the members in times of scarcity. Such banks have been started in Bihar and Orissa, Bengal, Mysore and Coorg. Societies on a similar basis for the storage of fodder have been started in Baroda. Another direction in which the co-operative principle is being applied is the starting of societies for purchase of and distribution among members of pure and selected seed. A number of small societies for supply of seed, and seed unions have been organized in the Bombay Presidency and in the Central Provinces and Berar. Societies for the co-operative purchase and sale of manure will also prove a great boon, and a few such stores have been established in Madras, Bengal, Bihar and Orisa and Bombay. In the Punjab and in Madras, the supply of agricultural requisites has been undertaken either by the credit societies on the commission-indent system or special supply unions are organized for bulking orders, making contracts, distributing goods, and collecting payments.

Joint sale of produce gets popular as co-operative credit thrives and agriculturists become less dependent on local traders. While Burma led the way by starting societies for the joint sale of paddy, the most interesting developments in the direction have taken place in Bombay Societies for the sale of agricultural commodities, chiefly cotton and jaggery, have been started, in several districts all over the Presidency. Co-operative marketing of cotton has recently made much progress in the Dharwar, Broach and Surat districts where these have led to the starting of a few co-operative ginning factories controlled by cotton-growers. This aspect of co-operation has lately attracted considerable attention and attempts similar to those made in Bombay have been made in Madras and the Punjab, in the latter province with considerable success at Lyallpur and Montgomery. In Bengal, there has been a move recently to organize the sale of jute and paddy on co-operative lines. A vigorous propaganda has been undertaken for the purpose and a central depot has been opened for the sale of jute principally in Calcutta. It will indeed be a great achievement if these efforts are successful and the cultivator obtains adequate returns for his produce. At present he buys in the dearest market and sells in the cheapest. But if co-operative purchase and sale show good progress, his economic position will be much improved. Apart from separate societies for the purpose, credit societies and central banks, in a few parts of the country, arrange for the joint supply of agricultural requisites. In some places, credit societies undertake the joint purchase of agricultural implements for members, while in others separate registered societies are started for the purpose of selling implements or supplying these on hire. In some provinces in Upper India, this work is performed by central banks for the societies affiliated to them. Apart from separately registered societies in Bombay, the branches of the Provincial Bank have helped consider-

ably in the distribution of seeds, manures and fertilizers, the supply of agricultural implements, and the sale of produce, particularly jaggery.

Efforts have been made in various parts of the country to solve the problem of milk-supply—to reduce the price and increase the purity—by starting co-operative dairies, composed either wholly of gaolis or milkmen or the producers and the consumers together. The most successful of these efforts has been the group of milk supply societies started in the neighbourhood of Calcutta which have federated themselves into a union. The union has, with the help of the Calcutta Municipality and the expert officers of Government erected a well equipped modern plant for pasteurizing milk, and while the milk supply it controls has been satisfactory to consumers it is interesting to note that by co-operation the producers have also considerably improved their economic position, having paid off debts, bought more cattle, put up decent cattle sheds and accumulated substantial sums in their local societies in the shape of shares and reserves. Co-operative creameries and ghee producing societies have also been started in one or two provinces. Another interesting development is the starting of cattle-breeding societies in the Punjab and elsewhere. It is anticipated that these societies will assist in supplying the keen demand that exists for bulls of good stock. In a few provinces there are societies for rice-hulling, the manufacture of jaggery and for joint irrigation. The latter is an interesting development of co-operation which though tried also in Bombay appears to have established itself in popular favour especially in the Burdwan Division of Bengal. This tract, once very flourishing, has been ravaged in recent years by frequent floods and famines, and the population had lost all initiative and sunk into poverty, while their lands deteriorated and malaria claimed a heavy toll. The starting of irrigation societies has opened a new chapter in the history of the tract and has revived the energy of the people and brought them together for common economic endeavour. Ginning on co-operative lines has also been attempted. An interesting experiment in agricultural co-operation is the starting in the Punjab of societies for the consolidation of small and scattered holdings. These arrange to regroup and re-allot the small and scattered holdings of members and if voluntary action proves sufficient for the purpose in other provinces, one of the gravest evils of modern Indian agriculture will be solved without the aid of State help or legislation. After the last floods that occurred four years ago in the central parts of the Madras Presidency co-operative societies were started to enable agriculturists to reclaim their land by clearing away the layers of sand and replacing the soil. These societies received assistance from Government, both in the shape of long term capital and facilities for transport of material. Similarly after the heavy flood, of 1927 in North Gujarat and Western Sind reconstruction societies have been started in the devastated areas for repair and rebuilding of houses. The Punjab has in canal areas some societies for silt clearance, and reclamation of waste lands, and Burma has led the way in the colonization of newly developed lands on co-operative lines. A number of societies have recently been started in the Punjab to promote better farming, some of which merely call upon members to undertake certain improvements and introduce approved method of agriculture while others go a stage farther and employ a staff for local experiment, research and demonstration work. In Bombay, a beginning was made in the direction of starting co-operative societies for joint farming and the movement may lead to the evolution of a system of co-operative cultivation of land, such as has been extremely successful in Italy, in undeveloped tracts like those to be irrigated under the Sukkur Barrage Scheme. Proposals to encourage this form of co-operation have been submitted to the Government of Bombay by the Sind Co-operative Institute.

Co-operation has already been successful to some extent in redeeming the chronic indebtedness of the agriculturist, but if the improvement in his economic condition is to be permanent it is essential that he should be prevailed upon to adopt improved methods of production. The Agricultural Departments in various provinces do undertake propagandist work with this object, but their efforts have not proved as successful as they ought to be. A co-operative society provides an effective agency for reaching the agriculturist, and in many places societies have been the means of bringing home to him the need for improved methods and have been made the centres for conducting the propagandist activities of the Agricultural Department and district Agricultural Associations. As a result, a few societies have been enterprising enough to purchase modern agricultural implements, and the machinery reecommended by the Department and to use the proper manures and the certified varieties of seeds. "Wherever agriculture and co-operation have experienced the assistance which each can derive from association with the other they are fast developing a truly organic connection." To this end, joint efforts are being promoted in almost all provinces as both the Departments are in charge of one Minister. This co-ordination is secured by joint conferences, and joint boards of co-operation and agriculture and the starting of local agricultural associations registered under the Co-operative Societies Act. Several of these bodies have lately been started in Bihar and Orissa and in Bombay. In Bombay the taluka development associations undertake active propagandist work, hold demonstrations, and assist in the work of general economic improvement of the agriculturists. The subject of agricultural co-operation and even of agricultural credit came under enquiry by the Royal Commission of Agriculture in India whose Report was published during the year. The Commission describe the co-operative movement as the greatest hope for the salvation of the rural masses from their crushing burden of debt and look upon it as the natural basis for social educational and economic development in India where the predominant industry is agriculture. They admit that there are defects in the present organization for rural credit but are confident that under the influence of patient persistent and sytematic education of the members in the

principles and meaning of co-operation these defects are bound to disappear in course of time. The provision of this education in co-operation should, the Commission hold, be the principal care of provincial Co-operative Departments, and though the strengthening of the official staff is suggested the Commission also recommend the organization of supervising unions, federations and institutes and the grant of financial support. Recommendation are also made for developing joint marketing of agricultural produce on co-operative lines and for utilizing the agency of co-operative organizations in the work of agricultural demonstration and propaganda, the supply of approved varieties of seeds, implements and manures, the consolidation of holdings and for social and educational betterment.

Committee on Co-operation in India.—In July 1914, the Government of India issued a lengthy Resolution on Co-operation in India, surveying its progress in the country during the previous ten years. In October, Government appointed a Committee under Sir Edward Maclagan to examine whether the movement, especially in its higher stages, and in its financial aspect was progressing on sound lines and to suggest any measures of improvement which seemed to be required. The enquiry was to be directed primarily to an examination of such matters as the constitution and working of central and provincial banks, the financial connection between the various parts of the co-operative organization, the audit, inspection, and management of all classes of societies, and the utilization of the reserve funds. In its Report, which was issued in September 1915, the Committee stated that it had not confined its enquiries to the subjects referred to it, for it had to recognise that the financial welfare of the higher stages of the co-operative system was largely based on the soundness of the foundation. The Government of India passed orders in 1918 on the recommendations in the light of the opinions of the Local Governments. With a view further to elicit opinion on the recommendations, a special conference of the Registrars was convened in August 1918, to which all the Registrars and a few selected non-official co-operators were invited. The Conference was also asked to consider the suggestion made by the Committee on Co-operation that as the financing of the movement involved grave difficulties which baffled solution unless the discounting of pro-notes was arranged through an Imperial State Bank or the several Presidency Banks, a careful examination of the question was immediately called for. A proposal was made for the appointment of an expert committee, but the Government of India shelved it by stating that they would assemble the committee at some date convenient to them. The question has again assumed some importance in view of the proposal for an all-India Co-operative bank referred to above and also in view of the fact that the Report of the External Capital Committee issued in 1925 makes prominent mention of the value of the co-operative organisation in developing the banking resources of the country. Pursuant to the recommendations of the External Capital Committee, the Chambers of Commerce, both Indian and European, have urged the appointment of a committee to enquire into the best methods of developing banking in India.

Provincial Legislation.—Under the Reforms, co-operation has been made a provincial subject and also a transferred subject. The control of Co-operative Departments has been entrusted to Ministers and in Bombay the United Provinces, and the Central Provinces, Bills have been drawn up for enactment by the local Legislative Councils to take the place of the Co-operative Societies Act. The Bombay Co-operative Societies Bill was introduced in the Bombay Legislative Council in July 1924, and was finally passed into law in 1925. It reproduces, in the main, the framework of the Act of 1912 but introduces the following important modifications:—

(*i*) The adoption of a scientific system of classifying societies.

(*ii*) The improvement of the procedure for liquidation of cancelled societies.

(*iii*) The extension of summary powers of recovery to the awards of arbitrators.

(*iv*) The provision of penalties against specified offences.

No other provincial Council except Burma where a Provincial Act was placed on the statue book in 1927 has yet enacted legislation on similar lines.

Provincial Inquiries.—In the Central Provinces, owing to the drying up of recoveries and the issue of large advances to agriculturists to tide over the bad season of 1920-21 the fluid resources of the movement were seriously depleted and the Apex Bank was able to meet its liabilities only with the financial assistance of Government. The fluid resources of the Provincial Bank were replenished and the Local Government, with the concurrence of the Government of India, placed credits at the disposal of the Provincial Bank and made advances direct to primary societies in the from of Tagavi loans. A Committee of Inquiry was appointed which made sweeping recommendations, the most important of which was a proposal to liquidate the Provincial Bank and to place central banks in direct touch with commercial banks. This recommendation was, however, subsequently turned down by the Local Government although some other recommendations such as the division of agricultural finance into short-term crop loans and long-term non-crop loans met with a considerable measure of public support. In Bengal and the Punjab, the return of favourable seasons averted any breakdown of the system, which threatened to overtake the local co-operative organizations when agricultural scarcity on a wide scale caused serious difficulties some years ago. The same may now be asserted of the United Provinces, where there appeared to be some danger of the strain not being quite successfully withstood. The problem there is now that of pushing ahead, and a Committee was appointed in 1925 to hold a comprehensive inquiry and to suggest the lines of future development. The Report of the Committee which was published last year contains numerous recommendations on matters of detailed administration and proposals for strengthening the official

staff of the Co-operative Department. The Committee recommend that central banks should be relieved of the work of supervision and inspection which should be entrusted to a staff working under the directions of the Standing Committees of Co-operators. The Committee further suggested that a beginning might be made in the direction of constituting an apex bank for the province but their proposal has not found favour with the local Government. Committees of Inquiry were also appointed in Bihar and Orissa and Mysore, in the former to advise about financial organization and official control and in the latter to lay down a policy of development particularly in relation to higher finance, non-credit co-operation, agricultural improvement and the relief of indebtedness. In September 1927, on the recommendation of the Madras Legislative Council, the Government of Madras appointed a Committee of seven members to enquire into the progress of the Co-operative movement in the Presidency and to suggest suitable measures for effecting necessary improvements. The Report of the Committee was published in 1928, and deals exhaustively with the defects of the movement and sets forth in detail the suggested remedies. Prominent among these is the improvement and strengthening of the system of supervising unions and the linking up of these with the provincial unions through district federations. The provincial union and district federations are charged with the duty of providing education and training and a system of liberal grants-in-aid is proposed to these bodies. Central Banks are advised to undertake the inspection of affiliated societies by appointing their own staff and at the time subsidising the federation for the work of supervision All other important recommendations are the separation of short term and long term finance in rural credit societies and the creation of a central land mortgage bank for the issue of debentures to finance local land mortgage banks. The Agricultural Commission were of opinion that similar inquiry could, with advantage be undertaken in other provinces and pursuant to this suggestion the Government of Burma have already decided to appoint a Committee of inquiry.

Effect of Crises on Co-operation.—It is hardly possible without any close and scientific inquiry, such as has not yet been carried out, to appreciate accurately the effects of the co-operative movement in enabling agriculturists to resist the rigours of a famine as also to judge the reaction of the latter on the co-operative organisation as there is an interplay of various economic forces affecting the life and industry of agriculturists, the proportionate value of which cannot be estimated easily. The agricultural season of 1918-19, however, put the co-operative organisation in most provinces to a very severe test and the reports for the succeeding years afford some indication of the resisting power of the co-operative organization.

With a better appreciation of the dependence of the agricultural finance on the vagaries of seasons, and a more systematic management of the funds of central societies it is anticipated that in future the situation arising out of a failure of rains will be satisfactorily met. In 1913 and the following months, practically the whole of the country was subjected to a banking crisis of considerable magnitude, but a marked feature of this crisis was a tendency to withdraw deposits from commercial institutions and to place them in co-operative banks. The outbreak of the War brought another set of influences into play and there was a temporary tendency to withdraw deposits and a temporary cessation of new deposits. The disturbance was not serious except in two or three provinces and by the end of the year 1914-15, the situation became practically normal. In two of the provinces where the situation caused some anxiety owing to the cessation of fresh deposits in central banks, the Government sanctioned advances to central societies to be utilized in the grant of urgent loans to agricultural societies or to meet withdrawals of deposits. The floods that overtook practically the whole of North Gujarat and one district of Sind in the earlier part of the monsoon of 1927 affected the working of Co-operative Societies in the flooded areas, but on the whole, the movement rose to the occasion. Early arrangements were made for helping agriculturists to resow and to replenish their stocks of grain or fodder and replace lost cattle, implements or domestic necessaries of life. Advances were made for these purposes at the special rate of 5 per cent. interest and, later on, demands were investigated for rebuilding or repairing houses and funds were provided either through co-operative agency or suitable recommendations were made to the local officials of Government. A charitable fund was also started for relief of distress among members and contributions to this were received from all parts of India and also from Russia.

Social Reform.—Co-operation has in some places stimulated the desire for education and members of rural societies have been known, even at advanced ages, to receive the elements of education to enable them to put their signatures on their societies' papers, and to take a lively interest in the internal work of their institutions. In Bombay, night schools for adults were started with the aid of a splendid donation made by the late Sir Vithaldas D. Thackersey, while in the Punjab, Bihar, Bengal and elsewhere such expenditure on education is incurred by co-operative institutions themselves. In the Punjab separate rural societies have been registered to conduct night schools and also to insist on compulsory education for the children of members. The Punjab also possesses a number of societies for promotion of better living, the members of which societies lay down a social Code for themselves. Breach of this code involves punishment by fines. In Bengal, attempts have been made to fight the scourge of malaria and to promote village sanitation by starting anti-malarial Co-operative societies. The societies are federated into a central union in Calcutta which supplements the local funds, co-ordinates the working of the societies, issues literature on hygiene and sanitation, and arranges with local doctors for provision of free medical relief to members. There are not a few cases where a society has set its face against drunkenness, expelled members notorious for their intemperate habits and has insisted on good moral conduct and

attempted to improve the standard of life. Societies have occasionally condemned excessive expenditure on marriages, and have thus indirectly trained members to habits of thrift. The liquidation of old debts again has been rendered possible to a great extent and many an agriculturist who was formerly in a state of chronic indebtedness has been relieved of all his debts and freed from the necessity of incurring new ones. Credit has been much cheapened and it is now possible for the agriculturist to borrow at 9 to 18 per cent. what he could not borrow at less than 20 to 75 per cent. formerly. It has been calculated that in interest alone the agriculturists of India, by taking loans from co-operative credit societies instead of from the village money-lenders, are even now saving themselves from an unnecessary burden of over a crore of rupees. The village rates of interest have naturally gone down considerably. And the Sowkar is, in most places, not the terror and the force that he was. Business habits have been inculcated with the beneficial result that the agriculturist has learnt to conduct his own work more efficiently. Thrift has been encouraged and the value of savings better appreciated. Special societies are started in the Punjab to promote thrift, while in Bombay, Bengal and Bihar & Orissa, savings of members are attracted to the village credit societies and, either special facilities are provided or special propaganda is conducted to induce members to save and deposit voluntarily. Association in a public institution for common good has brought home to the people the blessings of unity and litigation has often decreased in villages with co-operative societies. In the Punjab a number of societies have been started in rural areas whose members agree to refer all disputes to arbitration by their elected committees and to abide by the awards of arbitrators. Participation in the management of societies has instilled among members the important lessons of self-help and self-reliance ; but the most important achievement of co-operation has been the development of a sense of communal life—a feeling of "all for each and each for all"—among members of village societies and the gradual revival of the corporate instincts which made Indian rural organization famous in the world's history.

The following statements show the progress of the co-operative movement in different provinces, and contain some information about their detailed working till the end of the official year 1926-27:—

Number of Societies for all India, showing the increase since 1906-07.

—	Average for 4 years from 1906-07 to to 1909-10.	Average for 5 years from 1910-11 to 1914-15.	Average for 5 years from 1915-16 to 1919-20.

* Including Straits Settlement, Federated and Unfederated Malay States.

Origin of Indian Emigration.—Emigration is prohibited by the Hindu Shastras, and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purposes of labour dates from the beginning of the 19th century. From 1800 A. D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tapioca, and cocoanut plantations of Penang, and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830, when a French merchant, named Joseph Argand, carried some 150 artizans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground, and between 1834 and 1837 obtained at least 7,000 recruits from Calcutta. The Government of India at a very early stage realised the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well-being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1837), which also provided that contracts should be determinable after 5 years.

History of Emigration.—Under the above Act emigration during 1837 was permitted to Mauritius, British Guiana and Australia (89 men, the first and last direct emigrants to Australia). In 1838 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable, and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence, emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1849 gave rise to a system of emigration from French Indian ports to Réunion and Bouron, which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1858 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act, based on a convention with the French Government was passed legalising and regulating emigration to Réunion Martinique, Guadeloupe, and French Guiana. At XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada, and in 1872 to Surinam. Owing to the removal of the Straits Settlements from the control of the Government of India in 1867, emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony, these restrictions were removed in 1872, subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana. A commission of enquiry was appointed, and their report led to important legislation in the colony for the protection of Indian immigrants, which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius, commissions of enquiry were also instituted in both these colonies, and their reports in 1872 brought to light a number of points requiring amendment.

Recent Legislation.—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882, when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Pitcher and Mr. Grierson) to ascertain, in the N. W. P. and in Bengal respectively, the way in which the system of recruitment actually worked, the respects in which it was open to improvement, and the attitude of the people towards emigration. Their reports were reviewed by the Government of India, and finally in 1883 the law was again recast and consolidated by Act XXI of that year. This Act specifies the countries to which emigration is lawful, but empowers the Governor General in Council to add to the list by notification, and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and or excessive mortality among emigrants in such country, or on the ground that proper measures have not been taken for the protection of emigrants, or that the agreements made with them in India are not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908, when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, Fiji, the Seychelles, the Netherlands Colony of Dutch Guiana and the Danish Colony of St. Croix. Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the

demand for fresh labour having died out Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chimanlal, and they arrived at the conclusion that the time has come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control, and the definition of "Emigrant" was extended to cover all persons "assisted" to depart from India.

Present Position.—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three:—

(*a*) Control of emigration.

(*b*) Rights of Indians to admission to other parts of the Empire.

(*c*) Rights and disabilities of Indians domiciled overseas.

These questions may be considered separately.

Control of Emigration.—So far as unskilled labour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigration Act of 1922 are as follows:—

"10. (1) Emigration, for the purpose of unskilled work, shall not be lawful except to such countries and on such terms and conditions as the Governor-General in Council, by notification in the *Gazette of India*, may specify in this behalf.

"(2) No Notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legislature and has been approved by a resolution of each Chamber, either without modification or addition, or with modifications and additions to which both Chambers agree, but, upon such approval being given, the notification may be issued in the form in which it has been so approved."

Under this law emigration has been legalized to Ceylon on the following conditions:

(1) The emigrant shall—

(*a*) have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of Ceylon, or

(*b*) have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.

(2) The emigrant shall not, before leaving British India, have entered into a contract of service for a period exceeding one month.

(3) Within six months from the issue of this Notification, or within such further period as the Governor General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that any contract of service for a period exceeding one month entered into by an emigrant shall be void.

(4) No part of the cost of his recruitment, subsistence during transport, or transport shall be recoverable from any emigrant and all expenses in this connection shall be defrayed from a common fund to be raised in such manner and managed by such agency as may appear suitable to the Colonial Government.

(5) The Government of Ceylon shall at any time when so desired by the Governor General in Council admit and give all facilities to an Agent appointed under section 7 of the Act.

(6) Within one year of his arrival in Ceylon any emigrant who has been assisted to emigrate at the cost of the common fund referred to in clause (4) shall, on satisfying the Agent appointed under section 7 of the Act that his return to his home is desirable either on the ground of the state of his health or on the ground that the work which he is required to do is unsuitable to his capacity, or that he has been unjustly treated by his employer, or for any other sufficient reason, be repatriated free of cost to the place of recruitment, and the costs of such repatriation shall be defrayed by the Government of Ceylon or the Ceylon Planters' Association.

(7) If at any time there is no Agent appointed under section 7 of the Act, the Government of Ceylon shall appoint a person to perform the duties of the Agent as set forth in clause (6).

(8) Within six months from the issue of this Notification, or within such further period as the Governor-General in Council may by notification appoint, the Legislature of Ceylon shall have enacted that no payment made in India by a recruiter to an emigrant to enable him to pay off debts before emigrating shall be recoverable.

(9) The Government of Ceylon shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of persons emigrating to Ceylon in accordance with this Notification.

Similar conditions have been imposed in the case of Malaya. Emigration was also permitted to Mauritius for a period of 1 year only with effect from May 1st. 1923, and limited to a number not exceeding 1,500 labourers. The terms were more onerous than in the case of nearer Colonies and the arrangement has now lapsed.

Emigration to British Guiana for the purpose of unskilled work has also been declared lawful on the terms and conditions given below, but the date from which emigration is to commence has not yet been fixed :—

Emigration to British Guiana.—Emigration to British Guiana for the purpose of unskilled work shall be lawful with effect from such date as the Governor-General in Council may with the concurrence of the Governor of British Guiana notify in the *Gazette of India* on the following terms and conditions, which shall thereupon become operative :—

(1) The family shall be the unit for the purposes of emigration. Not more than 500 families shall be permitted to emigrate and the number of persons included in the said 500 families shall not exceed 1,500.

(2) The emigrants shall either have been recruited by a person licensed for that purpose by and responsible to an officer (hereinafter called the Emigration Commissioner) appointed by the Government of British Guiana, or have applied direct to the Emigration Commissioner for an assisted passage and have been accepted by him.

(3) No part of the cost of his recruitment or subsistence during transport shall be recoverable from any emigrant and all expenses in this connection shall be borne by the Government of British Guiana or met from funds at their disposal.

(4) The Government of British Guiana shall, at any time when so desired by the Governor General in Council, admit and give all facilities to an Agent appointed under section 7 of the Act.

(5) If at any time there is no Agent appointed under section 7 of the Act, or if the Agent is absent or unable to perform his duties, the Government of British Guiana shall at the request of the Governor-General in Council appoint a person to perform temporarily the duties of the Agent.

(6) Prior to the arrival of the emigrants a Settlement Commission shall be appointed in British Guiana to select and prepare suitable agricultural land for the emigrants and generally to supervise their employment. The Agent referred to in clause (4) shall, on appointment, be a member of such Commission.

(7) The Government of British Guiana shall offer to each family for its separate enjoyment a holding comprising not less than five acres of suitable agricultural land prepared for cultivation on the terms hereinafter set out in a locality which shall be healthy and shall have an adequate supply of good drinking water. All expenses in connection with the preparation of the holdings shall be borne by the Government of British Guiana and shall in no case be recoverable from an emigrant.

The annual rent of the holding shall be fixed by the Settlement Commission at a rate not exceeding the lowest rate paid in the locality.

After an emigrant has been in occupation of a holding for three years, he shall, provided that he has cultivated a portion of the holding either by himself or through some member of his family, be entitled to a grant of the holding on payment at any time during the ensuing four years of such fees not exceeding 24 dollars as may be fixed by the Settlement Commission.

On the expiry of seven years from the date of the commencement of his occupation of a holding an emigrant shall acquire absolute ownership in the holding provided that he has paid the rent and fees referred to in the foregoing paragraphs of this clause and has brought under cultivation either by himself or by some member of his family half the area of his holding.

(8) An emigrant on arrival in British Guiana shall be housed and maintained without charge by the Government of British Guiana for at least one month.

(9) If any emigrant so requires loans shall be made to him for maintenance, house accommodation, payment of rent and for agricultural purposes generally. Free medical assistance and free skilled supervision shall be provided.

(10) Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of 7 years from the date of his arrival in British Guiana.

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 3 and not more than 5 years from the date of his arrival in British Guiana on payment to the Government of British Guiana of half of the cost of his passage from his residence in India to British Guiana.

Any emigrant shall be entitled to repatriation at the expense of the Government of British Guiana to the place of his former residence in India on the expiry of more than 5 and not more than 7 years from the date of his arrival in British Guiana on payment to the Government of British Guiana of quarter of the cost of his passage from his residence in India to British Guiana.

(11) Notwithstanding anything contained in the last preceding clause the Government of British Guiana on the request of an Agent appointed under section 7 of the Act shall repatriate at its own expense and without any payment by or on behalf of the emigrant to the place of his former residence in India any emigrant at any time after his arrival in British Guiana.

(12) An emigrant shall be at liberty at any time after his arrival in British Guiana to take up work or employment other than or in addition to the cultivation of a holding on lease from the Settlement Commission.

(13) The ordinance enjoining compulsory education in British Guiana shall be enforced to the same extent in the case of Indian children as in the case of children belonging to other communities.

(14) Boards of arbitration in regard to wages shall be established before the arrival of the emigrants and Indians shall be adequately represented on such boards.

(15) Any Indian who has emigrated to British Guiana before the date of this notification and under any agreement in force at the date of this notification is entitled to an assisted return passage to India shall not be required to pay more than 25 per cent. of the excess in the cost of his return passage and clothing over the cost of such passage and clothing at the time of his first arrival in the colony.

(16) Any Indian who has emigrated to British Guiana before the date of this notification and has at the date of this notification become or thereafter becomes destitute shall be entitled to be repatriated to India at the expense of the Government of British Guiana without being further required to prove that he has become incapable of labour.

(17) The Government of British Guiana shall furnish such periodical reports and returns as may be required from time to time by the Government of India in respect of the welfare of the persons emigrating to the Colony in accordance with this notification.

Admission of Indians to Other Parts of the Empire.—On the motion of the Government of India this question was discussed at the Imperial War Conferences, 1917 and 1918, and the policy accepted by the self-governing dominions and the British Government was embodied in the following resolutions:—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the composition of its own population by means of restriction on immigration from any of the other communities.

"(2) British citizens domiciled in any British country, including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, including temporary residence for the purpose of education; such right shall not extend to a visit or temporary residence for labour purposes or to permanent settlement.

"(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition: (*a*) That not more than one wife and her children shall be admitted for each such Indian; and (*b*) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian."

The first paragraph of this resolution has regularized the various restrictions on immigration which the self-governing dominions have, from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration, the objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to be unsuited to the requirements of the Union. Canada prohibits the landing of any person who has come to the Dominion otherwise than by continuous journey from the country of which he is a native and unless he possesses in his own right 250 dollars. Newfoundland and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side has assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries, by means of passports. A bill has also been passed by the Indian Legislature empowering the Government of India to make rules "for the purpose of securing that persons not being of Indian origin, domiciled in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and administration of such possession to persons of Indian domicile." With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya colony where, as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921, which was recorded in the following terms:—

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities, but recognises that there is incongruity between the position of India, as an equal member of the Empire, and the existence of disabilities upon British Indians lawfully domiciled in some parts cf the Empire, and this Conference, therefore, is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised."

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless feel bound to record their profound concern at the position of Indians in South Africa and hope that by negotiations between India and South Africa a way can be found as soon as may be to reach a more satisfactory position."

The Right Hon'ble Srinivasa Sastri visited the Dominions of Australia, Canada, and New Zealand in the course of 1922 as the emissary of the Government of India to assist them in giving effect to this resolution. The main object of his mission was to appeal to the Governments and public of Canada and Australia fully to enfranchise qualified domiciled Indians. In Australia, Indians resident in Queensland and Western Australia have neither the provincial nor the federal franchise. In Canada, Indians resident in British Columbia are excluded from the dominion as well as the provincial franchise. While successful in securing a more sympathetic atmosphere towards Indians, he failed to bring about any modification in the existing electoral laws.

The question of giving effect to this resolution of 1921 was raised by the Indian representatives at the Imperial Conference, 1923. Their proposal was as follows:—

"Let the Dominion Governments who have an Indian population, let His Majesty's Government in the areas under their direct control, such as Kenya, Uganda, Fiji and other places where there are Indians resident, appoint Committees to confer with a Committee which the Government of India will send from India and explore the avenues of how best and how soonest the principle of equality implicit in the 1921 Resolution may be implemented."

This proposal was favourably received by the Dominion Premiers, excluding General Smuts; and by the Secretary of State for the Colonies who cordially agreed that there should be full consultation and discussions between him and a Committee appointed by the Government of India upon all questions affecting British Indians domiciled in British Colonies and protectorates and mandated territories. In pursuance of the proposal, the Government of India appointed a Committee in March 1924 composed of Mr. J. Hope Simpson, M.P., *Chairman*, H. H. the Aga Khan, Sir B. Robertson, Diwan Bahadur T. Rangachariar, M.L.A., and Mr. K. C. Roy with Mr. R. B. Ewbank, C.I.E., I.C.S., as Secretary to make representations to the Colonial Office on certain outstanding questions affecting Indians in Kenya and Fiji. The Committee assembled in London early in April 1924 and dispersed towards the end of July. During this period they had several interviews with the Secretary of State for the Colonies and the officials of the Colonial Office, in which they made representations upon a variety of important matters affecting Indians in Kenya, in Fiji and

in the mandated territory of Tanganyika. In regard to Kenya, the representations covered all questions of interest to India dealt with in the decision of His Majesty's Government. The result of these representations was announced by Mr. J. H. Thomas in the House of Commons on August 7th, 1924. The situation in Kenya has also been improved as a result of the work of the Committee by the decision of the Indian community to relinquish their former attitude of non-co-operation and to accept an arrangement by which they will select five members to be nominated by the Governor to the Legislative Council. The result of the representations which the Committee made on certain outstanding questions relating to Indians in Fiji was announced on January 12th, 1927, when the Government of India published the more important papers relating to the negotiations which had been going on with the Colonial Office for some time. The main results of these negotiations may be summarised under the following heads :—

(1) **Representation in the Legislative Council.**—Indians have up to the present been represented in the Fiji Legislative Council by one nominated non-official member. The number of seats provided for the elected representatives of the Indian community has now been increased to three. The seats will be filled temporarily by nomination till the necessary amendment of the Letters Patent can be effected to enable the Indian community to return members by election.

(2) **Municipal Franchise.**—The question of facilities for the representation of Indians on the Municipal Councils will be referred to the Government of Fiji for examination in the first instance by a local committee on which the Indian community will be adequately represented.

(3) **Appointment of a Special Officer to look after Indians.**—The Secretary of State for the Colonies has been unable to agree to the appointment of an Agent of the Government of India in Fiji but is considering a proposal to make an addition to the Fiji Government Service of an Officer possessed of special Indian experience and language qualifications who will be competent to act as Adviser to the Governor on matters affecting Indians in Fiji and will be given a seat in the Fiji Legislative Council. An authorised representative of the Government of India may also visit the Colony occasionally to examine and report upon specific questions of interest to that Government on the understanding that if and when such a visit is made a copy of his report or at least the general nature of it will be communicated to the Governor of Fiji before the representative leaves the colony and prior to its submission to the Government of India.

These results may not be all that the Government of India pressed for or that Indian opinion desired, but they represent an improvement on the existing position and may, if received with good will and worked in good faith by the parties primarily concerned, lead to arrangements more in consonance with Indian aspirations. The immediate and the most important objective is the dispelling of racial distrust and animosity. To assist in its speedy achievement the Government of India have, after careful consideration, decided not to publish the report of their Deputation which visited Fiji in 1922. They are anxious to avoid anything that may rekindle dying controversies.

Summary of Present Position.—Outside Australia, N. Zealand and Canada the position stands as follows :—

(1) **South Africa.**—The main grievances of Indians, which led to a passive resistance movement headed by Mr. Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914, and by the guarantee known as the Smuts-Gandhi agreement. The substance of this agreement is embodied in the following extracts from letters:

(i) Mr. Gorges, Secretary for the Interior, to Mr. Gandhi, June 30th, 1914: "With regard to the administration of existing laws, the Minister desires me to say that it always has been, and will continue to be, the desire of the Government to see that they are administered in a just manner and with due regard to vested rights."

(ii) Mr. Gandhi to Mr. Gorges, July 7th, 1914: "By vested rights I understand the right of an Indian and his successors to live and trade in the township in which he was living and trading, no matter how often he shifts his residence or business from place to place in the same township."

This has been officially interpreted to mean "that the vested rights of those Indians who were then living and trading in townships, whether in contravention of the law or not should be respected."

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were as follows :—

(1) Law 3 of 1885 (Transvaal), the Gold Law of the Transvaal (Act No. 35 of 1908) and Act No. 37 of 1919 should not be repealed.

(2) There should be no compulsory repatriation of Asiatics; but

(3) Voluntary repatriation should be encouraged.

(4) There should be no compulsory segregation of Asiatics; but

(5) A system of voluntary separation should be introduced under which municipalities should have the right, subject to certain conditions—

(*a*) to lay out residential areas for Asiatics;
(*b*) to set aside certain streets or portions of the town for Asiatic traders to which existing license holders should gradually be attracted.

(6) These areas should be selected and allocated by a board of independent persons, in consultation with the Municipal Council and Asiatic community.

(7) In Natal the right of Asiatics to acquire and own land for farming or agricultural purposes, outside townships, should be confined to the coast belt, say, 20 to 30 miles inland.

(8) A uniform "License Law" applicable to all the Provinces of the Union should, be possible, be enacted. If that is impracticable, the law relating to the issue of Trade Licenses in the Cape Province, the Transvaal and Natal should be assimilated in a comprehensive consolidating Act of Parliament providing, *inter alia*:—

(*a*) That the granting of all licenses to trade (not being liquor licenses) shall be entrusted to municipal bodies within the area of their jurisdiction; outside those areas, to divisional Councils in the Cape Province, and in the other Provinces to special Licensing Officers appointed by the Administrator.

(*b*) The grounds upon which an application for the grant of a new license may be refused.

(*c*) That the reasons for the refusal to grant any license shall be recorded, together with any evidence tendered for or against the application.

(*d*) That, in the case of the refusal of a license on the ground that the applicant is not a fit and proper person to hold the same or to carry on the proposed business, there shall be a final appeal to a Special Appeal Board, appointed by the Administrator.

(*e*) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop, store or other place of business.

(9) There should be no relaxation in the enforcement of the Immigration Laws, and more active steps should be taken to deal with prohibited immigrants who have evaded the provisions of those laws.

(10) The administration of the Asiatic policy of the Government should be placed in the hands of one official, under whose charge would come all administrative functions, together with the official records relating to Asiatics. This officer should also be entrusted with the duty of securing full statistics regarding Asiatics in the Union and of the arrivals in and departures from South Africa. Details of all applications for trade licenses, and transactions in connection with the purchase of land and property made by Asiatics throughout the Union, should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1913.

On the other hand, he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner, give a ready ear to any complaints or grievances and generally safe-guard their interests.

From the above it will be observed that the Commission recommended the retention of a law prohibiting the ownership of land by Asiatics in the Transvaal, and another of its recommendations, threatened the right which Indians had previously enjoyed of acquiring and owning land in the Uplands of Natal. Against this latter proposal the Government of India earnestly protested, but it was not accepted by the Union Government.

Present Position.—Indians enjoy both the political and municipal franchise only in the Cape Province and the municipal franchise only in Natal. In the remaining two provinces they are not enfranchised. They are subjected to differential treatment in the matter of trading licenses, specially in the Transvaal. Their immigration into the Union is barred and severe restrictions exist on inter-provincial migration. In the Transvaal they are not allowed to acquire immovable property outside locations and on the Witwatersrand they are subject to the restrictions of the Gold Law.

The anti-Asiatic party have made several efforts, especially in Natal, further to curtail the rights of Indians. Some of these are merely irritating social disabilities, such as railway regulations debarring Indians from travelling in any other carriages except those reserved for them, and similar rules restricting their use of tramways at Durban, and excluding them from race courses and betting club rooms. Examples of recent anti-Asiatic legislation of major importance are:

(*a*) The Natal Rural Dealers Licensing Ordinance, transferring the power of granting trading licenses from the Licensing Officer to an elected Licensing Board, on which Indians may not sit.

(*b*) The Durban Land Alienation Ordinance. This Ordinance, which enables Municipalities in selling land to assign it for particular communities, and to that extent to secure segregation, has been allowed on condition that Asiatics are given reasonable opportunity for acquiring adequate residential sites.

Anti-Asiatic feeling in South Africa.—A bill for the segregation of Asiatics known as the Class Areas Bill was introduced in the Union Assembly in March 1924, which though not specifically directed against Indians, contained provisions which could be used for the compulsory segregation of all Asiatics in certain areas. Indian opinion was deeply agitated over the prospect of this legislation which it was apprehended might in the existing state of public opinion in South Africa result in the economic ruin of a large number of Indian traders in the Union. In response to the vigorous protests made by the Government of India the Union Government gave an assurance that it was their desire and intention to apply the measure if it became law in a spirit of fairness to the interests and reasonable requirements of resident Indians. The Government of India whilst welcoming the assurance were unable to rest satisfied with this position and made every effort to persuade the Union Government to abandon the project. For the moment they have succeeded, as in consequence of the unexpected dissolution of the South African Parliament the bill has lapsed.

In Natal an Ordinance was introduced in the Provincial Council in 1921 dealing with the township franchise to the detriment of the Indian community. It was again introduced in 1922 and in a modified form in 1923 but in each instance the Union Government withheld its approval. In 1923, the Union Government itself introduced a measure entitled "The Class Areas Bill," containing provisions which could be used in urban areas for the compulsory segregation of Asiatics. Indian opinion was deeply exercised over the prospects of this legislation, despite the assurance of

the Union Government that it desired to apply the measure in a spirit of fairness to the interests and reasonable requirements of Indian residents. But in consequence of the unexpected dissolution of the South African House of Assembly in April, 1924, the Bill lapsed. Towards the end of December 1924, news was received that the Government of South Africa had given its consent to the Natal Borough Ordinance. This measure while safeguarding the rights of Indians already on the electoral roll of Boroughs, prevents further enrolment of Indians as burgesses. Similarly the Natal Township Franchise Ordinance (No. 3 of 1925) was passed to or to render Indians ineligible for Township Franchise in future. Further, towards the end of January 1925, news was received that the Union Government had gazetted a Bill to amend the Mines and Works Act in order to take powers to refuse certificates of competency to natives or Asiatics in certain occupations. The Government of India made suitable representations in the matter to the Union Government and the Select Committee to which the measure was referred altered its wording so as not to refer to Asiatics and natives directly. The Bill as amended by the Select Committee was passed by the Union Assembly but rejected by the Senate. In January 1926 it was reintroduced and in May it was adopted in a joint Session of the Senate and the Assembly, by eighty-three votes to sixty-seven. In reply to representations made by the Government of India they were informed that there was no present intention on the part of the Union Government of extending regulations beyond the position as it existed prior to the judgment of the Transvaal Provincial Division of the Supreme Court in the case Rex *versus* Hildick Smith when it was held that certain regulations with reference to mines and works which have actually been in force in the Union of South Africa since 1911 and in certain provinces for many years before that date were not valid under sections of the Act in terms of which they were promulgated. The Government of India have also been assured that should any such extension of the scope of these regulations be contemplated in future every reasonable opportunity will be given to all the parties in the Union interested in the matter to make representations.

In July 1925, a more comprehensive Bill, known as the Areas Reservation and Immigration and Registration (Further Provision) Bill, was introduced in the Union Assembly. The Government of India made effective representations against the provisions of this Bill both on grounds of principle as well as of detail.

Deputation to S. Africa.

Towards the end of November 1925, the Government of India, with the concurrence of the Government of South Africa, sent a deputation to South Africa, the personnel of which was as follows :—

- G. F. Paddison, Esq., C.S.I., I.C.S., Commissioner of Labour, Madras—*Leader*.
- Hon'ble Syed Raza Ali, M.C.S.—*Member*.
- Sir Deva Prasad Sarvadhikary, Kt., C.I.E.—*Member*.
- G. S. Bajpai, Esq., C.B.E., I.C.S.—*Secretary*.

The main purpose of the deputation was to collect as soon as possible first-hand information regarding the economic condition and general position of the resident Indian community in South Africa and to form an appreciation of the wishes and requirements of the Indian community in South Africa. Its preliminary report was received in India early in January. On the basis of the facts disclosd in that report the Government of India felt justified in renewing their proposal for a round table conference and pressed that, if that proposal was still unacceptable, there was a case for a fresh enquiry before the proposed legislation was proceeded with. Neither of these suggestions commended themselves to the Union Government who, however, expressed their willingness to give the Government of India an opportunity of placing the case of the Indian Community in South Africa fully before them by offering to take the course of proposing the reference of the Areas Reservation Bill to a Select Committee before, instead of after, the second reading, in order that the Indian objections to the Bill might be heard in respect of its principles as well as of its details. This offer the Government of India accepted, and their deputation appeared before the Select Committee early in March and presented the Indian case against the Bill. Their advocacy was effective and after further correspondence with the Union Government the Government of India suggested that the right method of arriving at a real and effective solution of the Indian question would be for both parties to enter the conference without being committed in advance to any particular solution of the questions at issue. They suggested that the Union Ministers might confer informally with the Leader of the Indian deputation in order to ascertain whether the obstacles in the way of a conference could not be overcome. The suggested conversations took place at Capetown early in April and resulted in a better understanding and appreciation of the respective points of view and difficulties of the two Governments. The Union Government impressed upon the Government of India that public opinion in South Africa would not view with favour any settlement which did not hold out a reasonable prospect of safeguarding the maintenance of western standards of life by just and legitimate means and on this basis agreed to enter a conference the recommendations of which would be subject to confirmation by the Governments of both countries. They also agreed, subject to the approval of the Union Parliament, to postpone further progress with the Areas Reservation Bill until the results of the conference were available. The following formula was accepted by both Governments as the basis on which the conference should be held: "The Government of the Union of South Africa and the Government of India have been further in communication with each other regarding the best method of arriving at an amicable solution of the Indian problem. The Government of the Union have impressed upon the Government of India that public opinion in South Africa will not view with favour any settlement which does not hold out a reasonable prospect of safeguarding the maintenance of Western standard of life by just and legitimate means. The Government of India are prepared to assist in exploring all possible me-

thods of settling the Asiatic question and have offered to enter into a Conference with the Union Government for the purpose. Any proposal that the Conference might make would be subject to confirmation by the Governments of the two countries. The Union Government have accepted the offer of the Government of India and in order to ensure that the Conference should meet under the best auspices, have decided, subject to the approval of the Selected Committee and Parliament, not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill until the results of the Conference are available."

The reception accorded by Indian opinion to the decision to hold such a conference augured well for its success. At the same time, in order to enable representatives of the various political parties in South Africa to appreciate India's point of view and to strengthen the better understanding created by the visit of the Government of India Deputation to South Africa, the Government of India extended and the Union Government accepted an invitation to send a representative deputation to this country. The deputation arrived in India on the 18th September 1926. They visited almost all the principal towns of India including the Khyber Pass and Landi Kotal and returned to South Africa on the 13th October 1926.

On the 16th October 1926, it was announced that the conference between the representatives of the Union Government and those of the Government of India would take place at Cape Town on the 20th of December. The Government of India Delegation to South Africa consisted of the following :—

(1) Hon'ble Khan Bahadur Sir Muhammad Habibullah, K.C.I.E., KT., Member of Governor General's Council	Leader.
(2) Hon'ble Mr. G. L. Corbett, C.I.E., I.C.S., Secretary to the Government of India in the Commerce Department	Dy. Leader
(3) Right Hon'ble V. S. Srinivasa Sastri, P. C.	Member
(4) Sir D'Arcy Lindsay, KT., C.B.E., M.L.A., ...	"
(5) Hon'ble Sir Phiroze C. Sethna, KT., O.B.E., ...	"
(6) Sir George Paddison, K.B.E., C.S.I., I.C.S., M.L.A., ...	"
(7) G. S. Bajpai, C.I.E., C.B.E., I.C.S., Dy. Secretary to the Government of India in the Department of Education, Health and Lands	Secretary.

The Delegation sailed for South Africa on the 24th November 1926, and reached Cape Town on December 16th. It received a warm welcome on arrival and unstinted hospitality from the Union Government and important public bodies, official and unofficial, European and Indian, during its sojourn in the Union. At the Conference which was opened by the Prime Minister of South Africa, General the Hon'ble J. B. M. Hertzog, on December 17th, the Union Government were represented by: The Hon'ble Dr. D. F. Malan, M.L.A., (Chairman) The Hon'ble F. W. Beyers, K.C., M.L.A., The Hon'ble F. H. P. Creswell, D.S.O., M.L.A., The Hon'ble T. Boydell, M.L.A., Mr. C. F. Schmidt, Mr. H. N. Venn and Mr. H. Pring. Its session lasted till January 13th. A provisional agreement was arrived at between the two delegations and the Indian representatives started on the return journey to India on January 13th to submit the results to the Government of India. The agreement, after ratification by both Governments, was announced in both countries on February 21st.

Both Governments in it reaffirmed their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life. Here is a summary :—

The Union Government recognises that Indians domiciled in the Union who are prepared to conform to western standards of life should be enabled to do so. For those Indians in the Union who desire to avail themselves of it the Union Government recognise a scheme of assisted emigration to India or other countries where western standards are not required. Union domicile will be lost after three years' continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants, under the assisted emigration scheme, who desire to return to the Union within three years will only be allowed to do so on refund to the Union Government of the cost of assistance received by them.

The Government of India recognise their obligation to look after such emigrants on their arrival in India. Admission into the Union of wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 3 of Resolution XXI of the Imperial Conference of 1918 which lays down that Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition (*a*) that not more than one wife and her children shall be admitted for each such Indian and (*b*) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian.

In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments, and in order that the agreement may come into operation under most favourable auspices and have a fair trial the Union Government of South Africa decide not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill. The two Governments agreed to watch the working of the Agreement reached and to exchange views from time to time concerning any changes that experience may suggest. The Union Government of South Africa also requested the Government of India to appoint an Agent in order to secure continuous and effective co-operation between the two Governments.

Both in the Council of State and the Legislative Assembly supplementary statements explaining the salient points of the Agreement were made by Sir Muhammad Habibullah and Mr. Bhore. In India, the settlement was on the whole well-received. In South Africa the more responsible newspapers, both English and Dutch, *e.g.*, the "Cape Times" and "Die Burger," paid handsome tributes to both

delegations for the statesmanship which they had brought to bear on their work, and the eminently reasonable and practical character of the results achieved by them. The majority of people in both countries doubtless regard it as a good first step in the solution of a complicated problem and the spirit, of which it is the outcome, as the best guarantee of a progressive and friendly adjustment honourable to both parties.

The friendly relations which were happily established between the Government of India and the Union Government of South Africa as a result of the agreement not only continue but have grown in warmth and sincerity. The Government of India sent out as their first Agent in South Africa the Right Hon'ble Srinivasa Sastri, P.C., who was a member of the Government of India's Delegation to the Cape Town Conference. His appointment was received with universal approval both in India and South Africa, the satisfaction felt by the Union Government being indicated by their decision, as an act of grace to make his appointment, to extend an amnesty to all Indians illegally present in the Union. On their part the Union Government after the ratification of the Agreement by the two Governments, lost no time in introducing legislation to give effect to their undertakings under it, so that when Mr. Sastri arrived in South Africa in June last all that remained to be done was to take action under Part III of the Agreement relating to the measures required for the upliftment of the Indian community. Most of the provisions of this part concern the Province of Natal where the bulk of the Indian population of the Union is resident, and the Union Government were not slow in moving the Provincial Administration to appoint a Commission to enquire into the condition of Indian education in that province, and to devise the means necessary for its improvement. Co-operation with this Commission on the part of the Government of India was provided by the Deputation from India of two educational experts—Mr. K. P. Kichlu, I.E.S., Deputy Diretcor of Education in the United Provinces and Miss C. Gordon, B.E., (Edin.) Madras Educational Service, Lecturer in Kindergarten methods at the Government Training College at Saidapet to advise and assist the Commission in its investigations and deliberations.

A notable feature of the present situation is the marked spirit of friendliness and good-will which now animates the Union Government in dealing with all problems affecting the domiciled Indian community. An example of this occurred in the year 1927 when a measure was introduced in the Union Parliament known as the Liquor Bill, clause 104 of which purported to prohibit the employment of Indians on any licensed premises—hotels, clubs, breweries, etc. The appearance of this clause, which threatened the livelihood of 3,000 Indians engaged in such occupations, caused consternation among them and the Minister in charge decided to withdraw the clause from the scope of the Bill.

Much of the credit for the salutary measures referred to and the spirit of friendliness which they denote is due to the Right Hon'ble Mr. Sastri, the Agent of the Government of India in South Africa, whose tact and honesty earned for him the confidence of the European community, offical and non-official alike and an increasing measure of their sympathy and assistance in furtherance of the Indian cause. Gratifying response was made by the Indians to this appeal for £20,000 for the purpose of opening a combined Teacher's Training and High School in Durban, an institution which will meet an urgent need and considerably ease the problem of Indian education in the province. The institution will, when it is erected and equipped, be handed over to the Government of Natal for management. The land for it has been provided by the Borough Council.

(2) **Kenya Colony.**—The grievances of Indians domiciled in this Colony are fully set forth in the published despatch of the Government of India, dated October 21st, 1920. The controversy centred round the following points:—

(*a*) FRANCHISE.—Indians have not the elective franchise. The Government of India proposed that there should be a common electoral roll and a common franchise on a reasonable property basis *plus* an educational test, without racial discrimination for all British subjects.

(*b*) SEGREGATION.—Professor Simpson who was sent to East Africa to report on Sanitary matters, recommended segregation on sanitary grounds. The Government of India objected, firstly, that it was impracticable, secondly, that it was commercially inconvenient; and thirdly, that Indians are in practice unfairly treated in the allocation of sites.

(*c*) THE HIGHLANDS.—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area has now been given out, and the Government of India claim that there is no land left to which Lord Elgin's decision applies. This decision has now, however, been extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(*d*) IMMIGRATION—Suggestions have been put forward for restricting Asiatic immigration into Kenya. The Government of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle indefensible.

THE SETTLEMENT.—The decisions of the British Government were contained in a White Paper presented to Parliament in July 1923. It was held that the guiding principle should be that "the interests of the African native must be paramount," and in light of this it was decided:—

(*a*) FRANCHISE.—A communal franchise was adopted with 11 seats for elected Europeans, 5 elected Indians, one nominated Arab, one missionary representing the Africans, and a nominated official majority. One Indian is also appointed on the Governor's Executive Council.

(*b*) SEGREGATION.—The policy of segregation as between Europeans and Asiatics is abandoned.

(*c*) THE HIGHLANDS.—The existing practice is maintained both as regards initial grants of land and transfers. A similar reservation in the low lands is offered to Indians.

(*d*) IMMIGRATION.—Racial discrimination in immigration regulations is rejected. But in the economic interests of the Africans, further control over immigration is necessary. Some arrangement is required for securing a strictly impartial examination of applications for entry into Kenya. The Governors of Kenya and Uganda have been instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 18th, 1923, and recorded " their deep regret that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them " and reserved liberty to reopen the case on a suitable opportunity. They stated their intention of making representations regarding the action to be taken to implement these decisions, particularly in the matter of the Immigration regulations.

Following upon the Kenya award statutory action was taken by the local administration on the franchise question. Adult sufferage on communal lines was conferred upon Indians. As regards immigration, the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views; and that earnest attention would be given to any representation which their Committee desired to make. As has already been stated such a Committee was appointed in March 1924. The following statement made by the Secretary of State for the Colonies in the House of Commons on 7th August 1924 shows the result of the representation made by the Colonies Committee :—

"(1) IMMIGRATION.—My position is that if danger ever arises of such an influx of immigrants, of whatever class, race, nationality or character, as may likely be prejudicial to the economic interest of the natives, I hold myself entirely free to take any action which may be necessary. Conflicting statistics which have been laid before me have not enabled me to reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) FRANCHISE.—I have given careful consideration to representations in favour of a common poll, but I am not prepared to resist the conclusion already arrived at that in the special circumstances of Kenya, with four diverse communities, each of which will ultimately require electoral representation, the communal system is the best way to secure the fair representation of each and all of these communities.

(3) HIGHLANDS.—I consider that the Secretary of State for the Colonies has no alternative but to continue pledges, expressed or implied, which had been given in the past, and I can hold out no hope of the policy in regard to agricultural land in the Highlands being reconsidered.

(4) LOWLANDS.—It was proposed to reserve an area in the lowlands for agricultural immigrants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the areas. At present any consideration of the matter is in suspense pending receipt from the colony of reports from the native and agricultural points of view on the areas in question."

With regard to the announcement in connection with "Lowlands" the question of deputing an officer to examine these areas was considered by the Government of India who thought it inadvisable to proceed any further with the idea.

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya, and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-co-operation and to select five members for nomination by the Governor to the Legislative Council.

In June 1924, His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough, to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests, the Government of India urged that the Indian point of view should be heard before the Committee came to any conclusions. This request was granted, but further action in the matter was suspended, pending the publication of the report of the Commission presided over by Major Ormsby Gore, which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee. The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th, 1925. On June 9th, Major Ormsby Gore announced in the House of Commons that, in view of the completeness of the report presented by the Commission which, under his chairmanship, had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1926, information reached the Government of India, that the Government of Kenya contemplated undertaking legislation at an early date in order to make the European and Indian communities responsible for the net

cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll-tax. The Indian community resented this differentiation and, ultimately, the Colonial Government decided that both communities should pay the same form of tax, *viz.*, an adult poll tax. For Europeans this has been fixed at 30 shillings and for Indians at 20 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January, 1927.

In view of the issue of another White Paper in July 1927, in which it was announced that His Majesty's Government had authorised the Secretary of State for the Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

The announcement excited serious apprehensions in India with regard to the future position of Indians in those Colonies. A deputation drawn mainly from both houses of the Indian Legislature also waited on His Excellency the Viceroy on the 17th September 1927, and represented the position of Indians in East Africa. One of the suggestions made by the deputation was that permission may be given for a small deputation appointed by the Government of India to go over to East Africa in order—

(*a*) to make a general survey of these territories in relation to Indian interests therein, and

(*b*) to help the resident Indian community in preparing their evidence for the Commission.

The Government of India readily accepted this suggestion and, with the approval of His Majesty's Government, sent Kunwar Maharaj Singh, C.I.E. and Mr. R. B. Ewbank, C.I.E., I.C.S., to East Africa. These officers visited Kenya, Uganda, Zanzibar and Tanganyika and their services are understood to have been greatly appreciated by the resident Indian communities. The personnel of the Commission was announced by the Secretary of State for the Colonies on November 14th, 1927, and was as follows:—The Right Hon'ble Sir Edward Hilton-Young, P.C., G.B.E., D.S.O., D.S.C., M.P. (*Chairman*), Sir Reginald Mant, K.C.I.E., C.S.I., Sir George Schuster, K.C.M.G., C.B.E., M.C., and Mr. G. H. Oldham, *Members*, with Mr. H. F. Downie, (*Secretary*). The Commission left England on December 22nd, 1927, and travelled *via* the Nile to Uganda, and thence to Kenya, Tanganyika, Zanzibar, Nyasaland, and Northern Rhodesia, visiting the chief centres and hearing the views of representatives of different sections of the community. The Commission also visited Salisbury for the purpose of conferring with the Government of Southern Rhodesia. The report of the Commission was published last winter.

During the year 1927, another matter which engaged Government and the public in India was the report of the local Government Commission which was appointed by the Governor of Kenya in July 1926, to make recommendations as to the establishment or extension of local Government for certain areas in the Colony:—The report of the Commission was submitted to the Governor of Kenya in February 1927. The recommendations made were numerous and so far as Indians were concerned they involved a decrease in the proportion of Indian representation on the local bodies at Nairobi and Mombasa and the creation of an European elected majority in both places. This caused resentment among Indians in the Colony and resulted in the abstention from the Legislative Council of four out of five Indian representatives. The Government of India submitted representations to His Majesty's Secretary of State for India on the subject.

(3). **Fiji and British Guiana.**—Emigration to Fiji was stopped in 1917, under Rule 16 (B) of the Defence of India (consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure if possible, a renewal of emigration to the Colony, an un-official mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver-General to the Fiji Government, arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1920. To secure a favourable reception for the mission the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January, 1920, and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March 1920, that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that "the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji." In July 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge, subject to his approval. Arrangements with regard to the contemplated deputation, however, were postponed until January 1921, owing to the announcement of Lord Milner's policy in regard to Indians in Kenya, and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation, an announcement was made on the 27th June, 1921. But owing to the inability of the two Indian members Messrs. Srinivasa Sastri and Hirdaynath Kunzru, who had been nominated to join the Committee which as finally constituted consisted of Messrs. Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma, and Lieutenant S. Hissam-ud-din Khan, did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers, as from January 1920, while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence, large

numbers left Fiji. Many arrived in India comparatively destitute ; while others, who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions, found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also, being in difficulties owing to the unfavourable economic situation in India, strongly desired to return to the territories from which they had come. During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government, and after full consultation with representative public men, arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony, as well as of such near relations as they desired to take with them. Admirable work was done among these distressed persons by the Emigrants Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April, 1922, and submitted its report to the Government of India. It has not been published.

British Guiana.—The Indian population in this colony belong almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919, a deputation consisting of the Hon'ble Dr. J. J. Nunan, Attorney-General, and Mr. J. A. Luckhoo, a prominent Indian who was a member of the combined court, visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature, which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs. Pillai, Keatinge and Tivary visited British Guiana. Mr. Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture, Bombay; Diwan Bahadur P. Kesava Pillai, was an elected member of the Madras Legislative Council of which he was also Vice-President ; and Mr. Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January, 1924. Towards the end of the month a deputation from the Colony of British Guiana, consisting of Sir Joseph Nunan, Kt., and the Hon. Mr. J. C. Luckhoo, K.C., arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonization scheme put forward by the deputation, they would, before making any definite recommendation, like the Government of India to depute an officer to British Guiana to report on certain matter. Kunwar Maharaj Singh, M.A., C.I.E., Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September 1925. His report was received on February 1st, 1926, and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled. The colonisation scheme has not yet come into operation as the Colonial Government are not in a position at present to afford the cost which it involves.

In March 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The Government of India consulted in the matter the Standing Emigration Committee of the Indian Legislature and are now watching events.

(4) **Other Parts of the Empire.**—In Ceylon, Mauritius, and Malaya, the position of Indians has on the whole been satisfactory, and the matters have gone smoothly. The Government of India have now appointed their own Agents in Ceylon and Malaya. The question of the fixation of a standard minimum wage for Indian state labourers in Ceylon and Malaya has been the subject of negotiations between the Govt. of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act, 1922. So far as Ceylon is concerned a settlement satisfactory to the Govt. of India and that of Ceylon has been arrived at, *i.e.*, the standard wage and other outstanding questions affecting the interests of the labourers and the draft legislation to give effect to it was passed by the Ceylon Legislative Council. in December 1927 as "Indian Labour Ordinance No. 27 of 1927." The Standard Rates of Wages agreed upon have been introduced with effect from the 1st January 1929. In regard to Malaya, Standard Wage Rates which are considered suitable by both the Indian and Malayan Governments have been introduced in certain areas and the question of their extension to the rest of Malaya is engaging attention.

In April 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a further period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an officer for the purpose and to give him all facilities ; and in December, 1924, an Indian Officer of Government, Kunwar Maharaj Singh, left India to conduct the necessary inquiry.

Kunwar Maharaj Singh's report was published by the Government of India in August 1925. The various recommendations made in the report have been commended to the consideration of the Colonial Government.

In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius *viz.*, that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population now resident in the Island, the Colonial Govt. expressed their willingness to give effect to several of them.

The present position of Indians in the Dominions is that under the Canadian Dominion Election Act, Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces. In New Zealand, Indians enjoy the franchise on the same footing as all other British subjects. In Australia, a Bill was introduced in the Commonwealth Senate on the 12th June 1925, amending sub-section (5) of section 39 of the Commonwealth Electoral Act, 1918-24, by adding after the word "Asia" the words, "except British India." This measure gives the Commonwealth franchise to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr. Sastri on the occasion of his visit to Australia in 1922. The Bill was passed by the Senate and under it the Indians will enjoy both the State and Commonwealth franchise throughout, Australia except in Queensland and in Western Australia where Indians do not enjoy the suffrage in respect of election for the Lower House. By Acts which have recently been passed by the Commonwealth Parliament, British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics. Old Age Pension is payable to men above 65 years of age, or above 60 years, provided such persons are of good character and have resided continously for at least 20 years. An Invalid Pension is obtainable by persons, who, being above 16 years of age and not in receipt of an Old Age Pension, have whilst in Australia, become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind, provided they have resided continously in Australia for at least five years.

Maternity allowance to the amount of £ 5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant of the Commonwealth or intends to settle there. This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government. In Western Australia and Queensland they are still subject to certain disabilities of which exclusion from the State franchise, is perhaps, the most important.

Indians in Great Britain.

Nearly seventy years have gone by since the Parsee community, in the persons of the late Dadabhai Naoroji and other members of the firm of Cama & Co., led the way in the sojourn of Indians in England for business purposes. This lead it has since maintained, though there are both Hindu and Mahommedan business men firmly established there. Nor are the professions unrepresented, for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth. The number of the latter, especially Parsees, is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. An Indian (Mr. Ameer Ali) was appointed to the Judicial Committee of the Privy Council. In 1910 and another (the first Lord Sinha) in 1926. Three Indians are on the Secretary of State's Council. In 1919 Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government. In the spring of 1923 Mr. (now Sir) Dadiba Dalal was appointed High Commissioner for India being the first Indian to hold the office. He resigned towards the end of 1924 to be succeeded by Sir Atul Chatterjee, previously a member of the Government of India. The early years of the present century saw the gathering of a new Indian element in permanent residence—that of retired officials and business men, or people of independent means who from preference or in order to have their children educated in England, leave the land of their birth and seldom if ever visit it again. Further, the stream of Indian summer visitors includes wealthy people who come regularly. There is an Indian Social Club, founded in 1912, with Sir M. M. Bhownaggree as president, which arranges for dinners and other functions to celebrate Indian festivals or to honour Indian visitors of special distinction. Sectionally, however, the only Indian community to be fully organised is that of the Parsis. They have an incorporated and well-endowed Parsi Association of Europe. The Arya Bhavan, a home for orthodox Hindus visiting London was opened at 30, Belsize Park, Hampstead, in the summer of 1928. Meanwhile Indian business interests had been organised by the formation of the Indian Chamber of Commerce in London, with Offices at 53, New Broad Street, E.C. 2. The British-Indian Union, 10 Grosvenor Gardens, S. W. I.under the presidency of H. R. H. the Duke of Connaught and with Lord Reading as Chairman, is a valuable agency for promoting friendship and understanding between the people of Great Britain and India.

The Indian Pavilion at the British Empire Exhibition in 1924 and 1925 with its gleaming towers and minarets and its cool, fountain-filled forecourt was one of the most conspicuous and admired architectural features of Wembely. The continuous education of visitors in regard

to the products and artwares of India was of great value and did much to spread a vogue for Indian artistic workmanship. This success was one of many considerations leading to the decision to build a permanent India House to be the office of the High Commissioner and where a show of products and artware will replace the small, though choice exhibition of Indian wares at the present office of Grosvenor-Gardens, S.W.1. The building is being erected in Aldwych, near Bush House, to the design of Sir Herbert Baker, A.R.A., and will cover a site of 12,400 square feet. It will house all departments of the High Commissioner's Office, except the Store Department, which is opp. the Thames at Belvedere Road, Lambeth.

The Students.

Under normal conditions it is the student community which constitutes the greatly preponderating element and creates an Indian problem. Its numbers multiplied ten or twelve-fold in the quarter of a century before the war. After a very considerable temporary check caused by the Great War the number rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ordinary graduate or under-graduate student, there are some youths of good family, including heirs of Indian States, admitted into our public schools, such as Eton and Harrow. There are over 300 Indians at the Inns of Court. Since the war there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students, there are fully 2,000 young Indians (some five per cent. of them women) in London, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other centres. London absorbs about half the total.

The Advisers.

It is well known that until a few years ago the young Indian apart from inadequately supported unofficial effort and the chance of coming under the influence of English friends of their families, were practically left to their own devices. But in April 1909 Lord Morley, created for their benefit a Bureau of Information and appointed Dr. (now Sir) T. W. Arnold to the charge of it under the title of Educational Adviser. The Bureau was located at 21, Cromwell-road, together with the National Indian Association and the Northbrook Society, which were thus given spacious quarters for their social work among the young men. (For Burmese students distinct club accommodation is provided, partly by subventions from Indian revenues, in the commodious Albion House, St. Peter's Square, Hammersmith, W. 6.) In India provincial advisory committees exist to help and advise intending students, but in some instances have been replaced by University Committees. The work of the Bureau rapidly expanded, and in consequence Lord Crewe in 1912 re-organised the arrangements under the general charge of a Secretary for Indian students, Mr. (now Sir) C. E. Mallet who resigned at the close of 1916. He was succeeded by Dr. Arnold under the designation of Educational Adviser for Indian Students to the Secretary of State. Mr. N. C. Sen followed Dr. Arnold as Local Adviser in London. At Oxford, the Oriental Delegacy, and at Cambridge, the Inter.-Collegiate Committee have been instituted to deal with Oriental students generally; whilst Local Advisers for Indian students have been appointed at Manchester, Edinburgh and Glasgow.

These arrangements underwent far-reaching revision in the autumn of 1920 in connection with the setting up, under the Act of the previous year of a High Commissionership for India in the United Kingdom. The "agency work" Sir William Meyer, took over from the Secretary of State included that connected with Indian students. Sir T. W. Arnold accepted an appointment long pressed upon him as Professor of Arabic at the School of Oriental Studies, and the High Commissioner appointed Mr. N. C. Sen and Dr. Thomas Quayle at Joint Secretaries for the Education Department. The administrative work hitherto divided between the India Office and 21, Cromwell-road, was consolidated at the offices of the High Commissioner, thereby obviating a good deal of duplication of files and papers.

The whole situation was investigated by a committee of inquiry which sat in 1921 under the chairmanship of Lord Lytton. Arrangements had been made for the Committee to continue their investigations in India in the cold weather of 1921-22, but were abandoned in consequence of the refusal of the Legislative Assembly to vote the necessary grant. This largely accounts for the somewhat tentative form of the recommendations of the unanimous report published in October 1922. The opinion was expressed that the only permanent solution of the problem is to be found in the development of education in India. Attention was invited to the diminution of the number of Indian students proceeding abroad that would result from giving effect to recommendations made for such development by previous commissions, and by the establishment of an Indian Bar. The Committee held that it should be possible to secure admission both to British universities and, subject to certain reservations, to the works of manufacturing firms in Great Britain for all Indian students competent to profit by the facilities afforded, provided that some machinery existed to ensure their distribution to the places best suited to their requirements. Subsequently a committee presided over by Sir Edward Chamier recommended the creation of Indian Bars, which should have the effect of much reducing the number of Indians going to the Inns of Court. An Act for the purpose was passed by the Indian Legislature in 1926.

The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives of all organisations interested in the social and intellectual welfare of young Indians in Great Britain to discuss the best means for co-ordinating their efforts. Accordingly the High Commissioner held a conference in July 1925, when plans were formulated to help to meet the needs of students more particularly in respect to suitable boarding accommodation in London: The subject had been previously discussed at a

meeting of the East India Association (April 27, 1925) when a paper was read by Mr. F. H. Brown. The conference came to the conclusion that, since non-official effort admittedly does not meet the need fully the hostel and club at 21, Cromwell-Road should be maintained, more particularly to provide accommodation for new comers. A small committee with Mr. A. D. Banerjee (Warden of 21, Cromwell-Road) as Secretary was established to assist students in obtaining suitable accommodation.

Under the presidency of Lord Hawke an Indian Gymkhana Club in 1921 acquired its own sports ground at Osterley, the total cost of purchase and equipment being estimated at £15,000. Generous gifts were made by some Ruling Princes and others, particularly the Maharaja of Patiala, but further help is required. The cricket eleven of the Club has an excellent record in matches at Lords and the Oval and with suburban clubs.

A notable development of 1920 was the opening of the "Red Triangle" Shakespeare Hut in Bloomsbury, off Gower Street, as a union and hostel for Indian and Ceylonese students up to the number of 500. The hostel was removed to permanent premises 106-112, Gower-street, close to University College in the autumn of 1923. It is Indian both in conception and control, the warden Mr. P. D. Runganadhan, and committee being responsible not to the National Council of Y. M. C. A. in London but to the Indian National Council in Calcutta. While the organization has a definitely moral and spiritual, as well as a social purpose, it is not a proselytising agency. There is a steady average of some 550 members, and the hostel is exceptionally fortunate in securing the voluntary services of men and women of great distinction in many fields for the regular Sunday afternoon and other lectures. The cost of building and furnishing has been met and the question of extending the hostel accommodation is under consideration.

Societies: Literary, Scientific and Social.

Agricultural and Horticultural Society of India (Calcutta).—Founded 1820. A Class Annual subscription Rs. 32. Entrance fee Rs. 8. B Class Annual subscription Rs. 12. *Secretary*: S. Percy-Lancaster, F.L.S., F.R.H.S., M.R.A.S. 1, Alipore Road, Alipore.

Agri-Horticultural Society of Burma.—*Superintendent*, C. A. Giffening, Agri-Horticultural Gardens, Kandawglay, Rangoon.

Agri-Horticultural Society of Madras.—Established 1835. Quarterly subscription for members in Class A Rs. 7, in Class B Rs. 3. *President:* H. E. The Rt. Hon. Viscount Goschen: *Chairman:* The Hon. Justice Sir William Phillips, Kt., I.C.S. *Hon. Secretary:* Mr. H. A. B. Vernon, I.C.S. *Hon. Treasurer:* Dewan Bahadur G. Narainaswamy Chetty Garu, Teynampett, S.W., Madras. *Nursery Superintendent:* Mr. N. Ramalingam Naiker. *Foreman, Ornamental Garden*: Mr. N. Munisawmy Naiker.

Anglo-Indian League.—To protect the interests of Anglo-Indians. *President:* Dr. H. W. B. Moreno, PH.D. *Honorary Secretary:* Dr. I. H. James. *Hon. Treasurer:* Mr. S. V. Cowen. *Office:* i 2, Wellesley Square, Calcutta.

Anthropological Society of Bombay.—Founded 1886, to promote the prosecution of Anthropological research in India; to correspond with Anthropological Societies throughout the world; to hold monthly meetings for reading and discussing papers; and to publish a journal containing the transactions of the Society. Annual subscription Rs. 10. *President:* Shams-ul-Ulma Dr. Jivanji Jamshedji Modi, B.A., Ph.D., C.I.E., 172, Hornby Road, Bombay. *Hon. Secretary:* Principal J. McKenzie, M.A.

Benares Mathematical Society.—Founded in 1918 for the encouragement and promotion of research in the various branches of Pure and Applied Mathematics, and in the History of Mathematics. It conducts a journal "The Proceedings of the Benares Mathematica Society" in which original papers on Mathematics are published and maintains a library. There are about 60 members from all parts of India. Admission fee Rs. 10. Annual subscription Rs. 12 (resident members) and Rs. 5 (non-resident members). *Patron*: Sir William Marris, K.C.S.I., K.C.I.E. *Life President:* Dr. Ganesh Prasad, M.A. (Cantab), D.Sc. *Secretary:*

Prof. Chandi Prasad, M.A., B.Sc. *Treasurer:* Prof. Pashapati Prasad, M.A., B.Sc.

BHANDARKAR ORIENTAL RESEARCH INSTITUTE, POONA.—The Institute was inaugurated on the 6th of July 1917, the 80th birthday of late Sir R. G. Bhandarkar, at the hands of H. E. Lord Willingdon, who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental Antiquities, to provide an up-to-date Oriental Library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of the late Dr. Sir R. G Bhandarkar which he had bequeathed already to the Institute was handed over after his demise by his executors to the Institute and is now located in the Central Hall of the Institute. Since the 1st of April 1918 the Government of Bombay have transferred to the custody of the Institute the unique collection of nearly 20,000 manuscripts at the Deccan College together with a maintenance grant of Rs. 3,000 a year. Government have likewise entrusted to the Institute a grant of Rs. 12,000 a year for the publication of the Government Oriental Series. The Institute has undertaken to edit the *Mahabharata* critically at the request of the Chief of Aundh who has promised a grant of Rs. 5,000 annually for that purpose. Grants are being received from the University of Bombay, and the Governments of Bombay, Burma, Baroda and Madras. The Institute has a journal called "Annals of the Bhandarkar Institute" published four times a year. It also held under its auspices the First Oriental Conference on the 5th, 6th and 7th of November 1919 under the patronage of H. E. Sir George Lloyd and the presidency of Sir R. G. Bhandarkar. Owing to liberal donations from the Tatas and the Jain community, the Institute is housed in a fine building near the hills behind the Home of the Servants of India Society. Minimum membership dues Rs. 10 a year or Rs. 100 compounded for life. Members can, subject to certain conditions, borrow books from the library and get the Journal free and other publications at concession rates. *Secretary*: Dr. S. K. Belvalkar, M.A., Ph.D. (Harvard).

BOMBAY ART SOCIETY.—Founded 1888; to promote and encourage Art by exhibitions of Pictures and Applied Arts, and to assist in the establishment and maintenance of a permanent gallery for pictures and other works of Art. Annual exhibition usually held every January. Annual subscription Rs.10 ; Life member Rs. 100. *Secretary*: S. V. Bhandarkar, Bandra, Bombay.

BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY.—Founded 1804, to investigate and encourage Oriental Arts, Sciences and Literature. Annual subscription Rs. 60. *Secretary:* Dr. Edward Parker, Town Hall, Bombay.

BOMBAY NATURAL HISTORY SOCIETY. (Registered under Act XXI of 1860.)—Founded 1883 to promote the study of Natural History in all its branches. The Society has a membership of about 1,700 and a museum with a representative collection of the different vertebrates and invertebrates found in the Indian Empire and Ceylon. In 1921 the Society was entrusted with the management of the Natural History Section of the Prince of Wales Museum, and a great part of the Society's collections have been transferred to that Museum. A Journal is published quarterly which contains articles on natural history and sport as well as descriptions of new species and local lists of different orders. The Society's library is open to members and books may be borrowed under special arrangement by members residing in the mofussil. The Society's Taxidermist Department undertakes the curing and mounting of trophies for members. Annual subscription Rs. 25. Entrance fee Rs. 20. *Patrons:* H. E. The Viceroy of India H. R. H. the Prince of Wales. *Vice-Patron:* H. H. The Maharao of Cutch, G.C.S.I., G.C.I.E., H. H. the Maharaja of Jodhpur, K.C.S.I., K.C.V.O., H. H. the Maharaja of Rewa, K.C.S.I., H. H. The Maharani of Dhar, and Mr. F. V. Evans, Liverpool; Sir David Ezra, Kt., A. S. Vernay, Esq., London. *President:* H. E. The Rt. Hon. Sir Leslie Wilson, P.C., G.C.I.E., C.M.G., D.S.O. *Vice-Presidents:* The Hon. Mr. J. E. B. Hotson, C.S.I., I.C.S., and H. H. The Maharao of Cutch, G.C.S.I., G.C.I.E., Rev. E. Blatter, S.J., PH.D., F.L.S. *Honorary Secretary:* Sir Reginald Spence, Kt., F.Z.S. *Curator:* S. H. Prater, C.M.Z.S. *Asstt. Curators:* C. McCann, Salim A. Ali, M.B.O.U., V. S. La Personne. *Head Clerk:* Mr. A. F. Fernandes. *Offices:* 6, Apollo Street, Bombay.

BRITISH AND FOREIGN BIBLE SOCIETY.—Since 1811 the British and Foreign Bible Society has been at work in this country. It has 6 Auxiliaries in India and an Agency in Burma. The first Auxiliary was established in Calcutta, in 1811, then followed the Bombay Auxiliary in 1813, the Madras Auxiliary in 1820, the North India Auxiliary in 1845, the Punjab Auxiliary in 1863, the Bangalore Auxiliary in 1875, while the Burma Agency was founded in 1899. The Bible or some portion of it is now to be had in nearly 100 different Indian languages and dialects and the circulation throughout India and Burma reached nearly 8,00,000 copies in 1924. The Bibles, Testaments, and Portions in the various vernaculars are sold at rates which the very poorest can pay, and at considerable loss to the Society. Grants of English Scriptures are made to Students who pass University examinations, as under:—

The New Testament and Psalms to Matriculates.

Portions of Scriptures in the important vernaculars have been prepared in raised type for the use of the Blind and large grants of money are annually given to the different Missions, to enable them to carry on Colportage and Bible Women's work. Besides the British and Foreign Bible Society, there is Bible work carried on in India, and Burma in a much smaller way by the Bible Translation Society—which is connected with the Baptist Missionary Society—the National Bible Society of Scotland, the American Bible Society and the Tranquebar Tamil Bible Society.

The following table shows the growth in the British & Foreign Bible Society's work during the past few years in India and Burma :—

TABLE OF CIRCULATION OF THE B.F.B.S. IN INDIA.

Auxiliaries.	1925.	1924.	1923.	1922.
Calcutta	122,781	107,084	148,026	111,567
Bombay	164,820	161,263	133,608	181,388
Madras	238,371	215,247	231,681	249,676
Bangalore	30,315	29,088	45,099	35,866
North India	133,238	144,930	191,692	168,091
Punjab	81,593	61,781	65,578	71,369
Burma	71,328	63,472	65,832	68,306
Total copies of Scriptures ..	842,446	782,865	881,516	886,978

These returns do not include the copies which any Auxiliary has supplied to London or to other Auxiliaries and agencies during the year.

BRITISH INDIAN PEOPLES' ASSOCIATION.—To protect the interests of Domiciled Europeans, Anglo-Indians and Indians alike. *President:* Raja Rishee Case Law, C.I.E., M.L.C. *Joint Hony. Secretary:* Dr. H. W. B. Moreno, Ph-D. *Office:* 2, Wellesley Square, Calcutta.

BRITISH MEDICAL ASSOCIATION (Bombay Branch).—Founded 1886, to promote Medical and the Allied Sciences and the maintenance of the honour and interests of the Medical Profession. *Secretaries:* Dr. B. B. Yodh, Sandhurst Building, Sandhurst Road, Bombay; and Dr. F. D. Bana.

BOMBAY MEDICAL UNION.—Founded 1883 to promote friendly intercourse and exchange of views and experiences between its members and to maintain the interest and status of the medical profession in Bombay. The entrance fee for Resident members Rs. 5, monthly subscription Rs. 2, Absent members Re. 1, and non-resident members yearly subscription Rs. 5. *Hon. President:* Dr. V. Bhajekar *Hon. Vice-Presidents:* Dr. S. H. Banker and Dr. Deshmookh. *Hon. Librarians:* Dr. S. Popat and Dr. Lam, R.C. *Hon. Treasurer:* Dr. P. T. Patel. *Hon. Secretaries:* Dr. S. P. Kapadia and J. E. Spencer, Top Floor, Alice Building, Hornby Road, Bombay.

BOMBAY SANITARY ASSOCIATION.—Founded to create an educated public opinion with regard to sanitary matters in general; (b) to diffuse the knowledge of sanitation and hygiene generally, and of the prevention of the spread of disease amongst all classes of people by means of lectures, leaflets and practical demonstrations and, if possible, by holding classes and examinations; (c) to promote sanitary science by giving prizes, rewards or medals to those who may by diligent application add to our knowledge in sanitary science by original research or otherwise; (d) to arrange for homely talk or simple practical lectures for mothers and girls in the various localities and different chawls, provided the people in such localities or chawls give facilities. The Sanitary Institute Building in Princess Street, which has lately been built by the Association, at a cost of nearly Rs. 1,00,000 the foundation stone of which was laid by Lady Willingdon in March, 1914, and opened in March, 1915, is a large and handsome structure with a large Lecture Hall, Library, Museum, etc., and also provides accommodation for King George V. Anti-Tuberculosis League Dispensary transferred to the Municipality in 1924 and Museum and the office of the Assistant Health Officer, C and D Wards, and the Vaccination Station. *Hon. Secretary,* Dr. J. E. Sandilands, M.C., M.A., M.D., Executive Health Officer, Bombay.

CALCUTTA CHESS SOCIETY.—To encourage Chess and Chess contests, open to all. *President:*—The Hon'ble Mr. Justice M. N. Mukerji, M.A., B.L. *Vice-President:* Dr. H. W. B. Moreno, *Hon. Secretary:* D. Dhara. *Hon. Treasurer:* B. B. Ghosh, 93, Lower Circular Road, Calcutta.

EUROPEAN ASSOCIATION.—The European Association was established in 1883 under the title of the European and Anglo-Indian Defence Association and was re-established in 1912 under the title of the European Defence Association, but the present title was adopted in 1913. The Association has for its major object the organisation of European

influence in the political life of India. The Head Offices (Central Administration) are at 17, Stephen Court, Park Street, Calcutta. *President*, Mr. C. B. Chartres. *Vice-Presidents:* The Hon. Sir Arthur Froom, Kt. and Mr. T. D. Edelston: *General Secretary*, Colonel J. D. Crawford, D.S.O., M.C., M.L.A.; *Asst. General Secretary*, Miss L. I. Lloyd: *Hon. General Treasurer*, Mr. C. S. Cooper: *Publication*, "The Review of India", obtainable from any Branch or from the General Secretary.

BRANCHES OF THE EUROPEAN ASSOCIATION.—

ASSAM.—*Chairman*, Col. W. D. Smiles: *Secretary*, C. Buckingham Jones. Bengal, Eastern. *Chairman*, R. R. Beamish, *Secretary*, L. K. Nixon.

BIHAR, NORTH.—*Chairman*, J. B. Norman, *Secretary*; W. H. Meyrick

BENGAL, WESTERN.—D. M. Archibald. *Secretary*, W. V. Curtain.

BOMBAY.—*Chairman*, J. E. Needham. *Secretary*, A. Parry.

CHITTAGONG.—S. A. Hollingsworth. *Secretary*, C. Brian Boys.

DARJEELING.—*Chairman*, Major J. C. Little; *Secretary*, R. S. Hutchinson.

DOOARS.—*Chairman*, W. L. Travers C.I.E., O.B.E., M.L.C.; *Secretary*, A. Johnson.

KANKINARRAH.—*Chairman*, A. K. Thomas; *Secretary*, W. G. Kidd.

MADRAS.—G. W. Chambers, M.L.C.; *Secretary*, J. K. Metherell.

MANBHUM.—*Chairman*, T. C. Murray; *Secretary*, B. Wilson Haigh, M. I. Chem.

MOULMEIN.—*Chairman*, W. A. W. Dawn; *Secretary*, L. E. C. Everard.

PUNJAB.—*Chairman*, Owen Roberts, *Secretary*, Major R. Corridon, M.V.O., M.B.E.

SIND.—*Chairman*, C. S. W. Stanley. *Secretary*, G. Jacob.

SYLHET.—*Chairman*, W. E. Mackenzie; Hill. *Secretary*, W. B. Culbard.

CACHAR.—*Chairman*. T. A. Everard. *Secretary*, T. A. Everard.

UNITED PROVINCES.—*Chairman*, J. G. Ryan, M.B.E. *Secretary*, H. B. Hawkins.

TRICHINOPOLY.—*Chairman*, R. H. Martin. *Secretary*, R. H. Martin.

CALCUTTA.— *Chairman*. W. H. Thompson M.L.C. *Secretary* Miss L. I. Lloyd.

INDIAN ASSOCIATION FOR THE CULTIVATION OF SCIENCE (Calcutta).—*Honorary Secretary*, Prof. C. V. Raman, M.A., D.Sc., F.R.S., 210, Bow Bazaar Street, Calcutta.

INDIAN CHEMICAL SOCIETY.—Was founded in 1924 with Sir P. C. Ray as *President*, and Professor J. N. Mukherjee, 92, Upper Circular Road, Calcutta, as *Secretary*. *Bombay Members of the Council*, Dr. A. R. Normand (Wilson College) and Dr. A. N. Meldrum (Royal Institute of Science). Bombay Branch of the Indian Chemical Society. *President:* Dr. A. N. Meldrum; *Vice-Presidents:* Dr. A. R. Normand and Rev. Fr. J. F. Caius. *Joint Secretaries*: Dr. Mata Prasad and Mr. R. N. Bhagvat. *Treasurer:* K. B. Dr. A. K. Turner. *Members of the Executive Committee:* Dr. S. A. Kamat, Dr. N. F. Vajifdar and Mr. E. J. M. Hudson.

INDIAN INSTITUTE OF POLITICAL AND SOCIAL SCIENCE.—Founded on 30th March 1917 to promote a systematic study of political and social science in general and Indian political and social problems in particular in all their aspects taking the terms 'political' and 'social' in their widest sense; to organise free and well-informed discussions on current political and social topics as well as on abstract political and social questions; to formulate considered views on current political and social questions; to publish literature and make representations from time to time on questions arising or necessary to be raised in the interest of the public; and to form and maintain a library for the promotion of the above objects. Office: Servants of India Society, Sandhurst Road, Girgaum, Bombay. *President*, K. Natarajan, Esq., B.A. *Secretaries*, Dr. B. R. Ambedkar, M.A., PH.D., D.SC.(Econ.), London, Bar-at-Law, and Mr. S. G. Warty, M.A.

INDIAN MATHEMATICAL SOCIETY.—Founded in 1907 for the advancement of Mathematical studies in India. It conducts a bi-monthly journal in which papers on mathematical subjects are published and maintains a library with current mathematical periodicals in all languages and new books on the subject. The library is located in the Fergusson College, Poona, whence the journals and books are circulated to members by post. The journal of the Society is published in Madras. There are about 225 members from all parts of India. *President*, V. Ramaswami Aiyar, M.A., Deputy Collector, Chittoor. *Secretaries*, Prof. M. T. Naraniengar, Bangalore and Prin. N. M. Shah, Poona. *Librarian*, Prof. V. B. Naik, Poona.

INDIAN ROADS AND TRANSPORT DEVELOPMENT ASSOCIATION, LTD.—The Association was formed in 1926 and registered in October 1927, and is conducted on similar lines to the European Association with a Council having Headquarters in Bombay. The subscriptions for membership of the Association are Rs. 10 (Life Membership) and Re. 1 annual subscription.

The aims and objects of the Association are to promote the cause of Road Development throughout India by making representations to the Government of India, Government of Provinces, District Boards and other public bodies concerned, regarding the construction, improvement and maintenance of Roads and Bridges and the improvement of methods of transport; to make representations to all or any of the bodies regarding the adjustment of taxation, customs duties and excise affecting motor vehicles and other modes of transport and employment of same, in such manner as

to facilitate the development of Road Transport throughout India; to educate the public by means of propaganda work and to create authoritative public opinion with regard to the needs of, and advantages to be derived from improved road communications. All persons, firms or companies interested in Road and Transport problems are eligible for election as members.

The Council consist of the following Members—H. E. Ormerod, (President); Sir N. N. Wadia, K.B.E., C.I.E., (Vice-President); E. Miller, M.L.C., R. Ricardo; S. Guevrek; Sir Hugh Cocke, M.L.A., and G. H. Cooke, representing Madras Branch. Secretary and Treasurer—W. Chubb,

Branches are already in existence in Bombay, Calcutta, Madras, Karachi and Assam, and others are being formed in important centres.

INDIAN SOCIETY OF ORIENTAL ART (Calcutta.)—*President*, Sir Rajendra Nath Mookerjee, K.C.I.E.; *Vice-President*, Mr. O. C. Gangoly, Solicitor. Editor "*Rupam*"; *Joint Hon. Secretaries*, C. W. E. Cotton, and G. N. Tagore; *Assistant Secretary*, P. Chatterjee, *Hon. Treasurer*, Rai Fanindra Lal De, Bahadur. *Office*—6A, Corporation Street, Hindusthan Buildings, First-floor, Calcutta.

THE INDIA SUNDAY SCHOOL UNION.—The India Sunday School Union is an interdenominational organisation having for its object the strengthening of religious and moral education throughout the Indian Empire. It embraces a Score of Auxiliaries, which are generally associated with language areas. There is a number of full-time workers, European and Indian, but much help is given in all parts of the organisation by honorary helpers.

The I. S. S. U. was founded in Allahabad in 1876. Its general committee is made up of representatives from the National Christian Council of India, from the auxiliaries, and from other sources. Funds for the carrying on of the work are partially found in India, but the major part is still provided by The World's Sunday School Association. The headquarters of the Union is at Coonoor in the Nilgiri Hills where besides the office and well-stocked book shop there is The St. Andrew Teacher Training Institution. In this Institution's leaders in religious education from all parts of India are trained for their duties.

Besides the central training college the chief activities of the Union are the providing of literature for the religious educational needs of India, good literature for teachers and for children, extension courses of lectures delivered in English or vernaculars in all parts of the Empire, the arranging of teachers' conventions and conferences, the arrangement of examinations in Scripture for teachers and scholars in the Sunday Schools.

The following journals and quarterlies are published by the I. S. S. U.:—

The India Sunday School Journal,

The Senior Lesson, Quarterly,

The Junior Lesson, Quarterly,

Senior Scholars' Self-Teaching Quarterly.

Approximately a million scholars in Sunday Schools and Day Schools are touched by the activities of the Union, and 60,000 to 70,000 teachers.

The officers of the I. S. S. U. are—*President*—Bishop J. W. Robinson, Delhi; *Treasurer*—W. H. Warren, Madras; *General Secr tary*—E. A. Annett, Coonoor.

INSTITUTION OF ENGINEERS (INDIA).—The organisation of the Institution commenced in 1919 and it was inaugurated by H. E. Lord Chelmsford early in 1921. Its object is to promote and advance the science, practice and business of engineering in India on the same lines as are adopted by the Institutions of Civil, Mechanical and Electrical Engineers in the United Kingdom. The standard of qualification is the same. Membership is divided into three classes, *viz.*, Members, Associate Members and Associates, and there is an additional class for students. *President*, J. S. Pitkeathly, C.I.E., C.V.O. D.S.O. *Secretary*, F. Powell Williams. *Offices*—8, Esplanade Row, East P. O. Box 669, Calcutta.

MADRAS FINE ARTS SOCIETY.—*Patron*, H. E. the Rt. Hon. Viscount Goschen; *President*, The Hon. Mr. Justice E. H. Wallace; *Secretary*, P. F. Fyson, Chepauk, Presidency College, Madras.

MADRAS LITERARY SOCIETY AND AUXILIARY OF THE ROYAL ASIATIC SOCIETY.—*Secretary*, B. W. Batchelor Messrs. Binney & Co., Madras.

NATIONAL HORSE BREEDING AND SHOW SOCIETY OF INDIA.—Formed in 1923. Objects: To form a national body of public opinion on horse-breeding matters; to encourage and promote horse-breeding in India; to protect and promote the interests of horse-breeders and to give them every encouragement; to improve and standardise the various types of horses bred in India; to prepare an Indian stud book; and to promote uniformity in all matters connected with horse shows in India. *Patron-in-Chief*:—H. E. The Viceroy, *President*, Colonel E. Hearle Cole, C.B., C.M.G., Coleyana, Montgomery District, Punjab; *Secretary*, Major-General Sir Bernard James, C.B., C.I.E., M.V.O. The Society issues the following publications: An Illustrated Quarterly Journal in English and Urdu, Stallion Register and Supplement, Indian Stud Book, Record of Country Bred Racing, Ahmednagar Stud Book, Show Judging Pamphlet. The Society holds The Imperial Delhi Horse Show Annually in February. *Registered Office*—Remount Camp, Kingsway, Delhi.

NATIONAL INDIAN ASSOCIATION.—Founded in 1870. Its objects are:—(*a*) To extend in England, knowledge of India, and interest in the people of that country. (*b*) To co-operate with all efforts made for advancing Education and Social reform in India. (*c*) To promote friendly intercourse between English people and the people of India. In all the proceedings of the Association the principle of non-interference in religion and avoidance of political controversy is strictly maintained. It has branches in Bombay, Madras, Ahmedabad, Nagpur, Calcutta, Rangpur and Lahore.

Hon. Secretary, Miss Beck, 21, Cromwell-road, London. Publication, *The Indian Magazine and Review*, (8 members a year) which chronicles the doings of the Association in England and in India, and takes note of movements for educational and social progress. It publishes articles about the East to interest Western readers, and articles about the West to interest readers in the East. *Life Members*—Ten Guineas. Annual Subscriptions: Members, one Guinea; County Members, Ten shillings; Associates Students, Seven shillings and Six pence.

PASSENGERS' AND TRAFFIC RELIEF ASSOCIATION. (Established in 1915). *Head Office*—139, Medows Street, Fort, Bombay. Objects: (*a*) To inquire into and ascertain grievances with respect to passengers in India generally. (*b*) To petition Government, Local bodies, Railway, Steamers and other companies carrying passengers and traffic; to take all proper and necessary steps to obtain redress with regard to the said grievances. (*c*) To hold periodical meetings and discuss questions relating to grievances. (*d*) To start branch offices throughout India, and to affiliate societies and bodies having objects similar to this Association. (*e*) To start a fund to meet expenses for carrying out the objects of the Association. *President*—Meyer Nissim, Esquire, M.A., *Vice-Presidents*—L. R. Tairsee Esquire, B.A., Lachmandas Daga, Esquire. *Hon. Secretaries*—Jivraj G. Nensey, Esquire, Khan Bahadur P. E. Ghamat. *Assistant Secretary*—Pestonji Jamsetji, Esquire.

PHILATELIC SOCIETY OF INDIA.—Formed March 1897; Annual subscription Rs. 15. *Secretary*, Jno. Godinho, 15, Burrow's Street, Bombay.

PHOTOGRAPHIC SOCIETY OF INDIA (Calcutta): —Annual subscription Rs. 30 (Town Members) and Rs. 15 (Mofussil members). Entrance fee Rs. 20 and Rs. 10. The Society is affiliated to the Royal Photographic Society of Great Britain, London and holds annual exhibitions, distributes a monthly journal to members, and undertakes developing, printing and enlarging work from its members only. There are excellent work-rooms apparatus and reading room at the Society's Headquarters at 229, Lower Circular Road, Calcutta. *Hon. Secretary:* A. Hearn, 229, Lower Circular Road, Calcutta.

POONA SEVA SADAN SOCIETY.—This Institution was started in 1909 by the late Mrs. Ramabai Ranade, Mr. G. K. Devadhar and a few other ladies and gentlemen in Poona and registered in 1917. It is now working independently though for a few years in the beginning it was conducted as a branch of the Bombay Seva Sadan. Its main object is to make women self-reliant and to train them for missionary work undertaking educational and medical activities for their sisters and brethren, especially the former in backward areas and working on a non-sectarian basis. Nominal fees are now being charged for instruction, except for the Music Classes, for Special Classes in English, and for High School classes, etc. There are eight different departments subdivided into 60 classes. Arrangements are made for training Nurses and Midwives and women Sub-Assistant Surgeons at the Sassoon Hospital, Poona, and a hostel is maintained for the former and two for those attending the Sub-Assistant Surgeon's Classes. There is a Public Health School affiliated to the Lady Chelmsford League for Maternity and Child Welfare, Delhi. The number in these three hostels is now about 85. Besides there is a full-fledged Training College named after Bai Motlibai Wadia with about 46 students excluding those in the V. F. Class for being trained as Mistresses for Vernacular schools. This College is probably the only college in India maintained by a non-official, non-Christian missionary body teaching the full course. The results of the Certificate Examinations held in the year 1927-28 under the authority of the local Government Training College for Women were as follows: I year senior 12. The total number of certificates granted so far is 347 now. The Practising School for little girls attached to the Training College has now eleven classes with 265 students reading up to the Marathi VI Standard, English being taught in the V standard class. Primary Classes for grown up women teaching up to the Marathi V Standard are attended by about 105 women. It is here that poor women are recruited for training as a teacher, nurse, midwife, or doctor. Special classes for teaching English, First Aid, Home Nursing were attended by about 93 students; the Music Classes by 112 students, and the Work room Classes for teaching Sewing, Embroidery, Hosiery and Weaving by 158 women. Thus, the total number of pupils is 984 to-day. There are two branches of the Society started at Satara and Baramati which are named after Lady Vithaldas Thakersey, the wife of the greatest helper of the Society so far, the late Sir Vithaldas D. Thakersey. Besides there are branches started at Bombay (Dadar and Girgaum), Sholapur, Ahmednagar, Alibag, Nasik, Nagpur, Gwalior and Madras for either educational or medical work or for both. Thus the total number of women and girls including about 150 duplications on the rolls at these various Centres of the Society is over 1,500. There are in Poona six hostels, three of which are located at the headquarters and the other three in the Raste's Peth and the Somwar Peth for Nurses, etc., under training at the Sassoon Hospital. The number of resident students is above 260 in these six hostels. One of the three hostels at the headquarters is intended for women of depressed classes. The number of these women at present is 7. In connection with the medical branch a Committee has been formed in England, which will enable the Society to send fully qualified Nurses there to undergo further training. Two fully qualified Nurses have so far been sent by the Society for their post graduate course in Public Health Nursing at Bedford College for women, London, with the partial help of a scholarship of the League of Red Cross Society, Paris. There is an active Infant Welfare centre and ante-natal clinics with the average daily attendance of 50 excluding expectant mothers.

The Society has extended its medical activities in Bombay by undertaking, with the help of two charitable Trusts in Bombay, to

work out the scheme of Maternity, Infant Welfare, Child Welfare and General Nursing for the women and children of the Bhatia Community under the supervision of Mr. G. K. Devadhar, the organiser of the society. This scheme has a Maternity Hospital and Nursing Home, and three Infant Welfare centres. Besides, there are Maternity Hospitals and Nursing Homes at Ahmednagar, Alibag, Nasik. and Sholapur under the management of the society in connection with other organizations. Now Her Excellency the Countess of Irwin, the Countess of Reading, Lady Wilson, Lady Lloyd, Lady Willingdon, Lady Sydenham and Lady Chelmsford are Hon. Patronesses. The institution is largely dependent upon public contributions and Government assistance. The annual expenditure of the whole organization now exceeds Rs. 2,50,000. *President*: Shrimant Saubhagyavati H.H. the Ranisaheb of Sangli; *Honorary Organiser and General Secretary*: Mr. Gopal Krishna Devadhar, M.A., C.I.E.; *Local Secretary and Treasurer*: Mrs. Yamunabai Bhat; *Lady Superintendent and Secretary for Development and Collections*: Mrs. Janakibai Bhat (Kaiser-i-Hind Silver Medal); *Joint Lady Superintendents*: Mrs. Saralabai Naik, M.A., and Miss Dwarkabai Bhat, B.A., B.T.; *Hon: Secretaries, Nursing and Medical Education Committee*: Rao Bahadur Dr. P. V. Shikhare, L.M. & S., Dr. V. C. Gokhale, L.M. & S. and Dr. N. L. Ranade, B.A., M.B.B.S.

PRESS-OWNERS' ASSOCIATION, Bombay—Started on 30th April 1919 to promote the interests of the printing and litho presses and allied trades, to bring about harmony and co-operation among press owners and proprietors and to take such steps as may be necessary in furtherance of the above objects.

Office:—Gaiwadi, Girgaum, Bombay 4.

President:—Shet Pandurang Javjee.

Secretary—Mr. Manilal C. Modi.

RANGOON LITERARY SOCIETY.—*President*, H. E. The Governor of Burma. *Hon. Secretary*, Mrs. C. Peacock, 17, York Road.

RECREATION CLUB INSTITUTE.—This Institution was started in 1912-13 by the members of the Ismaily Dharmic (religious) Library in Bombay. Its central office is in Bombay with branches at Ahmedabad, Ahmednagar, Karachi, Hyderabad (Sindh), Poona, Warangal, etc. The aims and objects of the society are to elevate and improve the social, economic and spiritual condition of the depressed and poor classes of people and with that intent to found primary schools, associations and such departments and to take all constructive means to achieve the above objects. The Institute has 2 orphanages with 150 inmates, industrial works, domestic industries, sales depots, Clubs, Libraries, etc. It also issues two Anglo-Vernacular papers, The *Ismaily* (a weekly) and The *Nizari* (a monthly). *Hon. Secretary*, Mr. Hasan Lalji Devraj.

ROYAL SOCIETY OF ARTS, INDIAN SECTION.—This Society was founded in London in 1754. Its recently published history by Sir Henry Trueman Wood, late Secretary of the Society, gives the following account of the Indian Section. In 1857, a proposition was made by Mr. Hyde Clarke, who wrote to the Council suggesting that "a special section be formed for India, another for Australia, one for English, America and so on." It was suggested that the Indian Section should meet once a fortnight for the reading of papers. Nothing came of the suggestion until ten years later when Mr. Hyde Clarke returned to England, and in 1868 he renewed his proposal, but only proposing the formation of a Committee which should organise conferences on Indian subjects. This time the suggestion was taken up more warmly. Mr. Hyde Clarke himself was placed on the Council, and the Indian Conferences, which soon developed into the Indian Section, were started. "The Indian Section thus established became a most important department of the Society. It has had great results in India by spreading information as to the directions which the development of Indian manufactures and Indian products could most usefully take, and in England by giving similar information as to the industrial resources and progress of India itself. The Section has received great help from the Indian press and it has in return been of service to the Indian press in supplying useful information to it. It has been of great value to the Society itself as the means by which many members have been added to its list, so that in fact, thanks to a very large extent to the work of the Indian Section and of the allied section for the Colonies, a large proportion of the present number of members come from the dependencies of the Empire abroad." *Secretary of the Society*: G. K. Menzies, M.A.; *Secretary of the Indian and Dominions and Colonies Sections*: W. Perry, B.A., I.C.S. (retired) 18, John Street, Adelphi, London, W. C. 2.

SERVANTS OF INDIA SOCIETY.—The Servants of India Society which was founded by the late Mr. Gopal Krishna Gokhale, C.I.E., in 1905, has its Head-quarters in Poona and its objects are "to train national missionaries for the service of India and to promote by all constitutional means the true interests of the Indian people." Its government is vested in the First member or President and a Council. On the death of Mr. Gokhale in February, 1915, the Right Hon'ble Mr. V. S. Srinivasa Sastri was elected President and continues to hold the office being duly re-elected thrice. Mr. G. K. Devadhar, M.A., C.I.E., was unanimously elected the President of the Society when the Right Hon. V. S. Srininivas Sastri resignee the Presidentship before proceeding to South Africa as Agent to the Governor-General of India in 1927. Besides the headquarters, it has present four branches, *viz.*, (1) in Bombay, (2i)n Madras, (3) in the United Provinces, (4) in the Central Provinces. Moreover, it has several additional centres of its activities under the branches such as, Calicut, Mangalore,

Lucknow, Lahore and Cuttack, Orissa. Each Branch consists of ordinary members, members under training and permanent assistants who work under the direction of Senior Member. Mr. N. M. Joshi, a nominated member of the Legislative Assembly, representing labour interests. The branches engage both in propagandist and active work of political, educational, social, rural credit co-operative and philanthropic character in which they secure the help of a large number of voluntary workers, both men and women. A fair idea of the work of a branch can be had from a brief description of the operations of the Bombay Branch whose members have so far undertaken activities in various fields. (1) Social purity like the Holika Sammelan of Bombay, (2) Social reform organization under the auspices of the Indian National Social Conference, (3) rousing public opinion about elementary education, (4) promotion of the cause of elevation and education of Indian women by building up institutions like the Poona Seva Sadan Society with its many branches with 1,500 (including duplications of about 150) women and girl pupils in nearly 121 classes of its many departments and 16 hostels at Poona and at brnaches. Mr. G. K. Devadhar, M.A., C.I.E., is its Hon. Organiser and General Secretary. (5) Social Service as carried out by the Social Service League of Bombay of which Mr. N. M. Joshi, B.A., is the Honorary General Secretary, (6) spread of co-operative movement among the agriculturists, compositors in the city of Poona and mill-hands in Bombay. The co-operative societies, as at Hadapsar and other villages around Poona, started for the benefit of these poor people, number over 35 with a total membership of over 1,800, capital of nearly three lakhs and a total turn-over of five lakhs per year. Nineteen of these societies which are in Bombay for poor labouring classes are so conducted as to free their members entirely from their chronic indebtedness. Mr. G. K. Devadhar is the Hon. Secretary of the Debt Redemption Committee, Bombay. The membership of the latter group consists of sweepers, scavengers, mill-hands numbering above 550 and debt amounting to nearly three lakhs of rupees have been cleared off. Moreover, educational work was organized by starting a Co-operative Quarterly and by starting a Co-operative Secretaries' Training Class in Bombay for 60 Secretaries from the various districts for three years. These are now transferred to the Central Co-operative Institute, Bombay, of which Mr. G. K. Devadhar is now the President. These three experiments on such a scale were the first of their kind in India, (7) relief work connected with wide-spread calamities by organizing the Plague Relief Committee of Poona, which succeeded in making inoculation popular in the Deccan, the Salumbra Fire Relief Committee which arranged for the Relief to sufferers for five years and life pensions and by undertaking a scheme of non-official relief during the famines of 1907-08 and 1914 in the United Provinces, the famine in Gujarat and Kathiawar of 1911-12 and the famine of 1913 in the district of Ahmednagar, and that of 1918-1919 in Gujerat and the Deccan; and in 1920 in Orissa near Puri, (8) Influenza relief was well organized by members of these associations in Bombay and Poona. Since the outbreak of the Malabar Rebellion in August 1921 the members of the Society organised the work of relief which was administered with the help of outside organizations like the Poona Seva Sadan, the Y. M. C. A., etc., and in collecting funds from all over the country especially Bombay. Thus from all over the country substantial help to the extent of nearly Rs. 3,50,000 was collected. For the first six months about 19 camps with nearly 27,000 men, women and children of all castes and creeds were maintained very efficiently and during the later six months thousands of Hindu and Moplah families were supported in their villages in the disturbed and the destroyed parts of the district of Malabar. This work was closed in the beginning of October 1922. Mr. G. K. Devadhar as Vice-President of the Malabar Central Relief Committee directed the work on behalf of the Servants of India Society. In 1924 the Society organised the South Indian Malabar Flood Relief Central Fund in Bombay with a view to giving relief to the poor people, especially the Panchamas, who had suffered from unprececented floods in the districts of Malabar, Trichinopoly, Coimbatore, Tanjore, and the Indian States of Mysore, Travancore and Cochin. Mr. G. K. Devadhar was the Hon. General Secretary and Treasurer and the late Mr. C. S. Deole, one of the Hon. Secretaries of the Fund. The distribution of relief was carried on with the help of Y. M. C. A. workers in the different districts, (9) organizing public opinion on the question of Indians in South Africa, (10) its political work is conducted strictly on constitutional lines and thus it was able to start District Congress Committees in several wards of the city of Bombay. These conducted a political quarterly, (11) it started in Bombay an organization called the Indian Economic Society with a view to promoting the study of Indian economics on right lines and also conducted a vernacular class. (12) A new association called the Indian Liberal Club had been started to carry on political propaganda. It is now reorganized as Institute of Economics and Political Science. After the death of Mr. Deole, Mr. Varti, M.A., is the Hon. Secretary. Besides, the society was engaged in conducting a scheme of welfare work to supply cheap grain, cheap cloth and cheap credit at Jamshedpur, Mr. K. J. Chitalia, one of its Members, has started a Gujarati ladies' organization called the Bhagini Samaj for work among women in Gujarat and Kathiawar. Mr. A. V. Thakkar has started in the District of Panch Mahals in Gujarat a mission for the Bhils for the improvement of the Bhil population and it is called the *Bhil Seva Mandal.* In 1927 the members of the Society took a very active part in collecting funds and organising very suitable measures of relief to those who suffered from the devastating floods in Gujarat (British), Baroda, Kathiawar, Sind and in

Orissa. The work of building houses for the depressed classes in the town of Baroda and of reconstructing several villages still continues. The Society also takes active interest in the organization of labour movement in India. Mr. N. M. Joshi, B.A., is a nominated member of the Legislative Assembly successively for nine years. Two of its Members, Messrs. N. M. Joshi and R. R. Bakhale, are conducting a labour monthly called the "All-India Trade Union Bulletin," which has been recognized as the Official organ of the All-India Trade Union Congress. Since its start the United Provinces Branch have organized bands of volunteers who rendered assistance, in a manner that called forth general approbation, to the pilgrims at the Kumbha Mela in Hardwar and Allahabad, the ladies of the Poona Seva Sadan assisting in this work in the earlier days. One of the principal activities of this branch is the widespread of Boy Scouts in Northern India. The Society engages in journalistic work also, having in its control the *Hitavada*, an English weekly in Nagpur, and the *Dnyan Prakash*, a Marathi daily and weekly in Poona. The Society has been conducting, with Mr. Vaze as editor, an English weekly called *The Servant of India*. The U. P. Branch had in addition undertaken the publication of pamphlets on public questions and has sent out three such publications together with a large quantity of leaflets This Branch has taken lead in organizing the *Boy Scout Movement* all over the province through the local Seva Samitis. The Madras Branch engages itself principally with co-operative organization, publishing in three languages Co-operative Bulletin and conducts Co-operative Industrial Societies and the Social Service League activities in the city of Madras. In 1924 it did the work of distributing relief to the refugees in the flooded areas of the Madras Presidency. On the West Coast the Society carries on through the Devadhar Malabar Reconstruction Trust and the Depressed Classes Mission a large amount of educational, economic and social reconstruction work for the benefit of the depressed classes, the weavers and others including the Moplahs; it maintains a hostel for more than 20 boys of the Panchama community and has five centres where these and other people are helped to settle in colonies on lands either granted by Government or private inviduals or purchased. The expenses incurred by the Central Home of the Society in Poona together with its four branches coupled with the various centres working under them exceed Rs. 85,000 a year and this amount is made up by contributions from Indians, rich as well as poor. The present number of workers, enlisted by the Society is about 30, most of whom are University men of considerable standing. Besides, there is a large number of devoted associates and other helpers—men as well as women—connected with the institutions started by the members of this Society.

President.—Mr. G. K. Devadhar, M.A., C.I.E., and Senior Member, Bombay Branch, The Right Hon'ble Mr. V. S. Srinivasa Sastri, B.A., L.T., Royapetta, Madras Senior Member' Madras Branch (on leave), Pandit Hirday Nath Kunzru, B.A., B.Sc., Vice-President of the Society and Senior Member, U. P. Branch, Mr. Natesh Appaji Dravid, M.A., Senior Member; Central Provinces Branch, Mr. A. V. Patwardhan, B.A., Senior Member Business Branch, Poona, Messrs. Joshi, Vaze and Krishna Prasad Kaul, B.A., together with the senior members of Branches constitute the Council of the Society with Mr. G. K. Devadhar as its President. Mr. Anant Vinayak Patwardhan, B.A., is the Secretary of the Society. Six young men, nearly all graduates who were admitted on probation, were last year enrolled as members under training. In 1923 and 1924, two members were admitted as members under training and one young man, an M.A., on probation. In 1927 one and in 1928 three more were admitted as probationers. The Society mainly depends upon the public for its support. In 1926 the Society's Press in Poona was burnt inflicting a very heavy loss which was nearly made good by the public by contributing to its Fire Relief Fund a sum of two lakhs of rupees. The foundation. stone of the new Press building was laid by Sir Jamshedji Jijeebhoy, Bart. K.C.S.I., The Wadia Charities gave the largest donation.

SEVA SADAN.—The Seva Sadan Society was started on the 11th of July 1908, by the late Mr. B. M. Malabari. It is the pioneer Indian ladies' society for training Indian sisters ministrant and serving (through them) the poor, the sick and the distressed. The Society has its headquarters in Gamdevi, Bombay. The Society maintains the following departments of work: (1) Home for the Homeless; (2) Ashrams (Training Homes); (3) Marathi Normal Classes; (4) Home Education Classes; (5) Industrial Department including a workroom, Sewing, Cutting, Hosiery, Cane-work, Cookery, Fancy Embroidery and Artificial Flowers are among the chief industries taught. Total number of women in the different classes is nearly 450.

Secretary, Miss B. A. Engineer, M.A., LL.B. M.B.E., J.P.

CONSUMPTIVES' HOME SOCIETY.—This Society was started by the late Mr. B. M. Malabari and Mr. Dayaram Gidulmal on the 1st of June 1909. It was registered under Act XXI of 1860. Mr. Malabari secured a large grant of land in a Himalayan pine forest in Dharampur (Simla Hills) from H. H the Maharaja of Patiala, for a Sanatorium for Consumptives. His Highness also gave a donation of Rs. one lakh. In 1911 by special permission the Sanatorium was named "The King Edward VII Sanatorium." The Sanatorium has its special water works known as the Lady Hardinge Water Works, presented by the late Sir Chinubhai Madhavlal, Bart., of Ahmedabad. The Sanatorium has a Guest House: The Noshirwan Adul Guest House for visitors to Dharampore. It has accommodation for 90 patients including the special Punjab Block built from a grant of the Punjab Government and reserved for European patients. Most of the blocks

and cottages are built by Parsis. The Sanatorium has its own dairy and is called the Bai Pirojbai R. H. Patuck Dairy. The Recreation Hall is called "The Sir Bhupinder Singh Recreation Hall" after the name of the Maharaja of Patiala. Mr. Malabari collected an Endowment Fund of about Rs. 67,000 lodged with the Treasurer, Charitable Endowments, under Act VI of 1890. Nearly Rs. 2, 60,000 have been spent on laying out the sites, buildings, etc., and the current annual expenditure is about Rs. 46.000. The Senior and Junior Medical Officers are in charge of the Sanatorium. The Office of this Society is situated at the Seva Sadan Buildings, Gamdevi, Bombay. Mr. S. P. Wadia is the Hon. Secretary and Mr. K. M. Jhaveri is the Hon. Treasurer.

SOCIETY FOR THE PROTECTION OF CHILDREN IN WESTERN INDIA.—Office and Homes at King's Circle, Matunga.

Founded—To prevent the public and private wrongs of children and the corruption of their morals; to take action for the enforcement of the laws for their protection, and, if necessary, to suggest new laws or amendments of the existing laws; to provide and maintain an organization for these objects; to promote education; and to do all other lawful things incidental or conducive to the attainment of the foregoing objects. Subscription for annual membership, Rs. 10; for Life Membership, Rs. 100. *President*:—Dr. Sir Temulji B. Nariman ,Kt.

Honorary Secretaries: Dr. Mrs. D. A. De-Monte, Mr. R. P. Masani, M.A., and Mr. J. G. Modi, M.A. *Hon. Treasurer*, Khan Bahadur H. S. Katrak.

THEOSOPHICAL EDUCATIONAL TRUST.—This Society was established in 1913 and stands for the education of Indian boys and girls, in which the physical, emotional, intellectual and religious welfare are equally attended to. The general educational policy of the Trust is embodied in "Principles of Education" by Dr. Besant. The chief schools and colleges maintained are (1) Theosophical School and College at Adyar (Residential and Co-educational); (2) Theosophical College and High School at Madanpalli (Co-Educational): (3)Theosophical School or Boys at Benares; (4) Theosophical College for Women at Benares. It is under contemplation to open a Unitary Residential University at Madanapalli and apply for a charter *President*, Dr. Annie Besant; *Secretary*, Mr. Iqbal Narain Gurtu, M.L.C., *Treasurer*, Mr. A. Schwarz, (*Headquarters* are at Adyar.)

WESTERN INDIA NATIONAL LIBERAL ASSOCIATION—(*Founded in* 1919).—The Association was formed, in pursuance of clause (*b*) of Resolution XI of the First Session of the All-India Conference of the Moderate Party, with a view—to do sustained work for the political progress and the moral and material welfare of the people; to give expression from time to time to the considered opinion of the Party on matters of public interest; and to inform and educate public opinion in this presidency in support of its views, policy and methods.

The Association accepts Article I of the Constitution of the Indian National Congress Organization as it stood in 1919 and will work for the fulfilment of the declaration made by His Majesty's Government on the 20th August 1917, in accordance with the principles embodied therein. For the promotion of its aims and objects the Association shall pursue the following principles, policy and methods:—(*a*) Law-abiding and constitutional methods of agitation or work; (*b*) Co-operation with Government, whenever possible and constitutional opposition to it, whenever necessary; and (*c*) Fostering a spirit of broadminded liberalism based on principles of liberty, equality and fraternity, among the different classes and communities of the people.

The affairs of the Association are conducted by a Council consisting of 46 members who are elected every three years.

President, The Hon'ble Sir D. E. Wacha, Kt., M.C.S.; *Vice-President*, Sir Chimanlal H. Setalvad, K.C.I.E., LL.D., *Hon. Secretaries*, Mr. Kazi Kabiruddin, Bar.-at-Law, Mr. J. R. B. Jeejeebhoy; Mr. J. R. Gharpure, B.A., LL.B., and Mr. N. M. Joshi, B.A., M.L.A. *Assistant Secretary*:—Mr. V. R. Bhende. *Office*:—Alice Building, Hornby Road, Fort, Bombay.

WOMEN'S INDIAN ASSOCIATION.—This Association was started in Advar, Madras, in 1917, with aims of service to women similar to those of the Seva Sadan in Bombay. In ten years it has been able to start 70 branches and it has now over 3,000 members. It establishes classes, meeting places, and regular lecture programmes for women in each of these branches. Each branch is autonomous and works according to the need of the locality. Classes are held to teach the vernaculars, English, needle-work—plain and fancy—first-aid, rattan-work and music. Weekly lectures are given on subjects of general interest relating to women, such as health, education, religion, civic responsibilities, woman suffrage, etc. Though started entirely as an educational institution, the movement for the Reform Bill proved that a most necessary part of work for the advancement of women was propaganda in support of woman suffrage. Accordingly the gaining of the vote for women was added to the objects of the Association and the Association specialises on woman suffrage and the removal of sex disqualification from all franchises and candidatureship for local boards, municipal and legislative councils. Valuable work along these lines has been done by the Association as this is the only woman suffrage organization in India. The Association publishes a monthly magazine, *Stri-Dharma* Edited by Shrimati Malati Patwardham, B. A., in English with Hindi, Tamil and Telugu articles. (Rs. 4 to non-members, Rs. 2 to members). It is an all-India Association. Its largest branch is in Bombay, its greatest number of branches in South India, but yearly additional branches are being started in other provinces, and there are flourishing branches as far north as Lahore and Lashkar. The prospects of rapid growth

for the Association are very bright as it has been found that women everywhere welcome the self-development which the establishment of these branches brings. The Association is affiliated with the International Woman Suffrage Alliance and the International Women's League for Peace and Freedom.

Objects:—

To present to women their responsibility as daughters of India;

To band women into groups for the purpose of self-development, education, and the definite service of others;

To secure the abolition of child-marriage and child-parenthood;

To help them to realise that the future of India lies largely in their hands, for as wives and mothers, they have the task of training and guiding and forming the character of the future rulers of India;

To secure for women the vote for Municipal and Legislative Councils as it is or may be granted to men

To secure for women the right to be elected as members on all Municipal and Legislative Councils.

Headquarters: Adyar, Madras. *President*—Dr. Annie Besant. *Vice-Presidents*—Dr. Multhulakshmi, M.L.C. Mrs. Jinarajadasa. *Hon. General Secretary*—Shrimati Malati Patwardhom, B. A. *Hon. Treasurer*—Shrimati Ammu Swaminadhan.

YOUNG MEN'S CHRISTIAN ASSOCIATION.—This Association, which was founded by the late Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men.

The Young Men's Christian Association, though relatively new to India, is spreading rapidly. The 'local' Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a National Council which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Ceylon.

There are now over 60 Associations affiliated to the national union and many other village Associations with many thousands of members of all races and creeds. The following Associations own one or more buildings which serve as the local headquarters:—Allahabad; Bangalore; Alleppey; Bombay; Calcutta; Calicut; Coimbatore; Colombo; Galle; Hyderabad; Jubbulpore; Kandy; Karachi; Kunnamkulam; Kottayam; Lahore; Madras; Nagpur; Naini Tal; Poona; Rangoon; Secunderabad; Simla; Ootacamund; Wellington; Delhi; Jaffna; Madura; Murree; Risalpur; Trivandrum. The others use rented or rent-free buildings.

The work of the National Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted by 114 specially trained full-time Secretaries. A feature of the Y. M. C. A. in India is the international character of its Secretariat. It is made up of 19 Americans, 4 Canadians, 21 Engishmen, 2 Scotchmen, 1 Swiss, 2 Anglo-Indians and 65 Indians and Ceylonese.

The classes of people reached by the Indian Y. M. C. A. and the lines of service it attempts to do for them may be stated as follows:—

Generally:—1. Literature:—Publication of original works and reprints. Four series: "Heritage of India;" "Religious Quest of India;" "Religious Life of India"; "Makers of Modern India."

2. Lecture Bureau:—Many thousands of slides on a wide variety of educational and recreational topics serving a clientele in over 700 centres in India.

3. Physical—Training Physical Directors for schools and colleges, fostering playground movement, Olympics.

4. British Army Work in a number of centres and especially on the N. W. Frontier.

Boys:—Scouting, Boys' Clubs, Camps, etc.

Students:—Hostels and Institutes in most University Centres.

Indian students in Britain:—Specially in London, Edinburgh and Glasgow.

"*Citizens*":—(*i.e.*, English-educated Indians Ceylonese and Burmese): Reading Rooms, Libraries, Lectures, Group Conferences; Study-Circles; handling many subjects of vital interest—social, intellectual and religious.

Soldiers:—Institutes and Holiday Homes.

Anglo-Indians:—Hostels, Institutes, Employment Bureaux.

Europeans:—Hostels, Institutes, Employment Bureaux.

Labourers in Mills:—"Welfare" Work.

Indians in Fiji.—

Rural Communities.—"Rural Reconstruction" work embracing Co-operative Banking, Distribution, Cattle Insurance and Arbitration, Cottage Industries, and Adult Education in four Selected Centres.

A monthly magazine, the YOUNG MEN OF INDIA, is issued at Rs. 5 per annum, including postage.

The work of the National Council (excluding that of the 170 local Y.M.C.As.) calls for a Budget of Rs. 2,02,622 in 1928. Of this sum, Rs. 70,000 has to be raised from the public in India.

The Headquarters of the National Council is 5, Russell Street, Calcutta. The officers are:—

Patron:—His Excellency Baron Irwin of Kirby-Underdale, P.C., G.C.S.I., G.C.I.E., Viceroy and Governor-General of India.

President of the National Council:—The Most Rev. Dr. Westcott, Metropolitan of Indian.

General Secretaries:—K. T. Paul, O.B.E., and Dr. S. K. Datta.

The Bombay Association now possesses four well-equipped buildings:—Wodehouse Road, Lamington Road, Rebsch Street and Reynolds.

Road. The President is Mr. W. H. Neilson, G.B.E., M.I.C.E., and the General Secretary is Mr. H. W. Bryant, M.B.E. In connection with each building there is a well managed hotel, one for Anglo-Indian apprentices, one for Indian students, one primarily for European business men, and one for Indians. There is also 'Welfare' Work for labourers in Naigaon; Secretary, W. E. D. Ward. There is city-wide Physical Work programme.

Young Women's Christian Association of India, Burma and Ceylon.—This Association founded in the year 1875 was organized nationally in 1896. The aim of the Association is to promote the physical, intellectual, social and spiritual welfare of young women and girls in India, European, Anglo-Indian and Indian. This is done by the establishment of local branches in different centres. At present they number 95 including city and student branches. The Associations in big cities have a large membership including most classes of the community. The needs of girls are met by physical drill, recreation, clubs and classes, lectures, commercial classes, Bible Study and devotional meetings, and meetings for social intercourse. Boarding Homes, some of them holding as many as 70 girls, are established where there is a demand for them and the Association, at present, owns 24 including 8 holiday homes in the hills. These hostels accommodate working girls, teachers, nurses, students and apprentices. Rates vary according to the residents' salaries and accommodation though all equally receive the benefits of a comfortable home, good food and wholesome surroundings. The holiday homes provide cheap holidays in healthy surroundings and also accommodate girls who work in the hills during the hot season. In addition to holiday homes Summer Conferences are held annually at Ootacamund and in the North Indian Centre. Special Girls Camps are arranged from time to time in many centres.

Travellers' aid work is done in the large ports, especially Colombo, and a large number of transient guests and visitors are accommodated in the Homes in these centres. The Association also runs employment bureaux through the agency of which many girls find positions. The Commercial schools train girls for office and business life. These larger Associations are manned by a staff of trained secretaries, some of whom come from Great Britain, America, Australia, New Zealand and Canada. The others are found and trained in India. In many of the smaller branches where the work is of a simpler nature, it is carried on by voluntary workers who render faithful service year by year. The majority of the Indian branches are also carried on in this way. The Student Department is affiliated to the World's Student Christian Federation and has 42 branches in the various Schools and Colleges.

The Association, which is affiliated to the World's Committee of the Young Women's Christian Association, is international and inter-denominational. Full membership is confined to members of the Christian Church, but Associate membership is open to any girl or woman of good character, no matter what her religion may be. The National Headquarters are situated in Calcutta and business is conducted by the National Committee which has a representative membership in all parts of India, also in Burma and Ceylon.

The Patroness of the Association is H. E. Lady Irwin.

Copies of the annual reports and other printed matter can be obtained from the National Office which is at 160, Ashutosh Mukerji Road, (P. O. Elgin Road), Calcutta. The Official Organ of the Association is the "Woman's Outlook," an illustrated monthly magazine, which supplies women living in India with a good magazine at the price of Rs. 2-0-0, post free, per annum.

ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA.

The Association of British University Women in India was established in 1913. Its objects are :—

(1) To facilitate intercommunication and co-operation between women belonging to the universities of the United Kingdom, resident in India.

(2) To provide a means of keeping in touch with the universities of the United Kingdom, by communication with the British Federation of University Women, and otherwise as may seem expedient.

(3) To act as an organisation which shall afford opportunity for the expression of united opinion and for concerted action by university women.

Membership is open only to those women who hold degrees in any university in the United Kingdom, or hold Oxford or Cambridge Honours Certificates; but Associate Membership is open to women who have studied at a British University for two years and each Branch may admit as Honorary Members women who have advanced the higher education and interests of women.

The Association of British University Women has four branches. The addresses of the Honorary Secretaries are as follows :—

Hon. General Secretary :—Mrs. E. F. Hingeley, c/o P. O. B. 535, Bombay.

Hony. Local Secretaries.

Bombay ..Mrs. Blair, Arthur House, Cooperage, Bombay.

Calcutta ..Hon. Secretary c/o Miss Cornelia Sorabji, 28, Chowinghee, Calcutta.

Delhi ..Mrs. Blomfield, Aurinzet Rd., Raisina, Delhi.

Punjab ..Mrs. Irving, 16, Davis Road, Lahore.

The Delhi and Punjab Branches came into existence in 1918. The Calcutta and Bombay Branches are influential and have repeatedly intervened with good effect to educate public opinion with regard to subjects affecting women. All Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc., and have supplied, through the

International Federation of University Women, information on Secondary Education in India to the League of Nations. They have been the means of introducing women on to University Senates and Municipalities. The Calcutta Branch carried through an important exhibition of Food Products.

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub-committee, organized public meeting for women on subjects affecting their interests about which legislation was being or had been recently enacted.

A valuable part of the work of the Association was the establishment of **Women's Employment Bureau** in Calcutta and Bombay. They were remarkably successful. The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council; the Calcutta Bureau has ceased to exist.

As a means of promoting friendships between women from various parts of the United Kingdom, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform.

Federation of University Women in India.

This is an organization conceived to unite for service and fellowship all University Women of whatever race or University who may be resident in India. Units representing British Universities, Indian Universities and American Universities severally have existed since 1913 (Britain) and 1920 (India and America) respectively.

These Units are now fused together into one body: and are as such affiliated to the International Federation of University Women which embraces 27 countries of the world and has its headquarters at Crosby Hall, Cheque Walk, London.

This International Federation is then a kind of League of Nations in which the University is the Unit: and the opportunities it affords for better understanding for world-friendship, and world-service, will easily be imagined.

As forming one Family, its Members help the common cause of women: they help one another by inspiration and interchange of service: they help the country for which as individual Units they stand, inasmuch as that country is swept forthwith by reason of its place within the International Federation alone, into world statistics and the dignity of recognition by the League of Nations at Geneva.

The benefit to Members individually also is great. The Club Houses of the Federation all over the world are open to them. Equally so are all Scholarships and Fellowships offered by the Federation.

During 1928 these last have included. Scholarships from Great Britain and America which gave free tuition, board and residence at certain Colleges to students for a degree: residential scholarships at Crosby Hall, valuable Fellowships and Prizes offered chiefly for Medical or Scientific research by Australia and America.

Membership is open to Women Graduates of any University through the Unit representing that University. Colonial Graduates are at present attached to the British Unit.

Subscriptions.—British Unit ..Rs. 3 a year.
Indian Unit ..Rs. 2 a year.
American Unit .Rs. 2 a year.

The Federation has Branches in Bombay, Calcutta, Lahore, Madras: Kodaikanal. Each Branch has its local Committee. But as a whole the Federation is under a Central Committee with Headquarters at Calcutta for the years 1928 and 1929.

OFFICE BEARERS, CENTRAL COMMITTEE.

President—Mrs. Stewart Macpherson.

LOCAL REPRESENTATIVES.

Bombay ..Miss Rustomjee
Mrs. Doctor.
Calcutta ..Mrs. Kellas.
Miss S. Ray.
Lahore ..Mrs. Dodd.
Mrs. Das.
Madras ..Mrs. Janakiamna.

Honorary General Secretary Miss Cornelia Sorabji, Bar Library, High Court, Calcutta.

Applications for membership should be made to the Honorary General Secretary who will forward the same to the Local Secretary to whose Unit it may appertain.

EX-SERVICES ASSOCIATION, INDIA AND BURMA.

The following shows some of the work carried out during 1926 by the Association, which undertakes in India and Burma the work on behalf of British Ex-Officers and British Ex-Service men to which the late Earl Haig pledged himself in England :—

(*a*) 260 applicants provided with employment despite most unfavourable conditions.

(*b*) Over Rs. 2,36,400 expended in affording assistance to British Ex-Service men and the dependents of these in India and Burma, and a further £350 contributed to Earl Haig's Association at Home for the assistance of those Ex-Members of the Indian Services who after returning to England were in distress and want.

Men were started in business, distress arising from sickness and from unemployment was relieved, School fees were paid and School outfit provided for numerous children, repatriation and emigration expenses were met, board and lodging were provided while men looked for work, windows, orphans and deserted, wives assisted, expenses of training were borne, legal and medical expenses were met.

(*c*) Miscellaneous assistance of every description was given to applicants. Matters of pay, pensions and gratuities were assisted. information and advice as to Colonial Settlement were given, legal advice was afforded, letters of recommendation to possible employers were given, civil employment offered in India to serving soldiers was investigated, and the wants of large numbers of ex-officers and ex-service men were gone into at interviews.

H. E. the Commander-in-Chief is the President of the Association.

The Church.

In the ordinary acceptance of the term there is no established Church in India. An Ecclesiastical Establishment is maintained for providing religious ministrations, primarily, to British troops, secondarily to the European civil officials of Government and their families. Seven out of the fourteen **Anglican Bishops** in India are officers of the Establishment, though their episcopal jurisdiction far transcends the limits of the Ecclesiastical Establishment. The stipends of the three Presidency Bishops are paid entirely by Government and they hold an official status which is clearly defined. The Bishops of Lahore, Lucknow, Nagpur and Rangoon draw from Government the stipends of Senior Chaplains only but their episcopal rank and territorial titles are officially recognised. The Bishops of Colombo, Chota Nagpur, Tinnevelly-Madura, Travancore-Cochin, Dornakal, Assam and Nasik are not on the establishment. The last of the bishoprics to be founded was that of Nasik. In its relations with Government it is subordinate to the see of Bombay, from which it was formed in 1928. But the maintenance of the Bishopric is met entirely from voluntary funds.

The **ecclesiastical establishment** includes four denominations—Anglican, Scottish, Roman and Wesleyan. Of these, the first two enjoy a distinctive position, in that the Chaplains of those denominations (and in the case of the first-named the Bishops) are individually appointed by the Secretary of State and rank as gazetted officers of Government. Throughout the Indian Empire there are 134 Anglican and 18 Church of Scotland chaplains whose appointments have been confirmed. The Roman Catholics and Wesleyans receive block-grants from Government for the provision of clergy to minister to troops and others belonging to their respective denominations. The Wesleyan Methodist Church has a staff of military chaplains in India who receive a fixed salary from Government and 25 chaplains working on a capitation basis of payment by Government. Churches of all four denominations may be built, furnished and repaired, wholly or partly at Government expense.

The Anglican Communion has at last attained to **self-government**. In Dec. 1927 the Royal assent was given to an Indian Church Measure and Bill and Jan. 1, 1928, was fixed as the date of their coming into operation. These laws have effected two great changes in the affairs of the Church. Up to the present the General Council has been a body unrecognised by law. It is now empowered to legislate for the Church. Further, property which has been held for the Church by the Bishops and Archdeacons as Corporation Sole will now be transferred to Trust Associations which will be established under the Act. The actual date of severance of the legal bond between the Church in India and the Church of England has not yet been fixed, but by order of the King in Council it must be some day in 1930. After the severance is complete the Church in India will be as free to manage its own affairs as is the Church of any one of the other great Dominions. Apprehension was felt by many that freedom would involve drastic departures from the faith and practice of the Church of England. Such fears have already been proved groundless, in the first place by the adoption of a Constitution wholly Anglican in ideal and principle and secondly by the pledge given in the most solemn manner, at the instance of purely Indian dioceses, that the right of European congregations to worship according to the Use of the Church of England will be most carefully safeguarded.

After the date of severance the law of the Church will be its own "Canon Law" passed by the General Council. In every fully constituted Diocese there is a Diocesan Council composed of the Bishop, all the clergy who hold his license, and lay representatives from every parish. The Diocesan Councils manage all purely domestic matters and have the right of petitioning the General Council about any subject of wider importance which may interest them. They elect a given number of priests and laymen to be their representatives on the General Council. General Councils are held not less than every three years and usually at Calcutta. They consist of three "Houses," Bishops, Priests and Laymen. Every Diocesan Bishop has a place in the House of Bishops. The other two Houses are formed by the elected representatives of the Diocesan Councils. The three Houses usually sit and vote together, but any House has the right to meet alone if it desires to do so in order to formulate its policy or classify its opinions. A "Canon" of the Church is a Resolution passed with additional precautions ensuring due consideration by all three Houses. In all questions touching faith or Order the position of the episcopate as the divinely authorised teacher of the Church is most carefully safeguarded and the Bishops alone, without the concurrence of the other Houses, can issue Determinations about both subjects. But no Determination of the Bishops can be the subject of disciplinary action until it has become a Canon.

Another great change which will almost immediately take place will be the **election of the Bishops** to vacant sees by the dioceses over which they are to rule. State appointment after the date of severance will cease. Except for the Bishops, the Establishment of Chaplains will continue unchanged. In the course of the debate upon the Indian Church Bill in the House of Lords the Secretary of State for India stated that the Government of India acknowledged that the provision of Chaplains and the maintenance of churches for the use of its European servants were duties of moral obligation. Very few Europeans therefore will notice any change at all in the services of their Church. But the Indian section of the Church has at least been set free to develop along lines more suitable to the Indian character than those fixed for English people during the controversies and persecutions of the fifteenth century.

So far as the European and Anglo-Indian communities are concerned the activities of the Church are not confined to public worship and pastoral functions. The **education** of the children of those communities is very largely in the hands of the Christian denominations. There are a few institutions such as the

La Martiniere Schools, on a non-denominational basis; but they are exceptional. In all the large centres there exist schools of various grades as well as orphanages, for the education of Europeans and Anglo-Indians under the control of various Christian bodies. The Roman Catholic Church is honourably distinguished by much activity and financial generosity in this respect. Her schools are to be found throughout the length and breadth of the Indian Empire; and they maintain a high standard of efficiency. The Anglican Church comes next, and the American Methodists have established some excellent schools in the larger hill-stations. The Presbyterians are also well represented in this field, particularly by the admirable institution for destitute children at Kalimpong, near Darjeeling. Schools of all denominations receive liberal grants-in-aid from Government, and are regularly inspected by the Education Departments of the various provinces. Thanks to the free operation of the denominational principle and its frank recognition by Government, there is no "religious difficulty" in the schools of the European and Anglo-Indian communities.

Christian Missions.

The tradition that St. Thomas, the Apostle, was the first Christian missionary in India is by no means improbable. History, however, carries us no further back than the sixth century, when a community of Christians is known to have existed in Malabar. Since then the so-called **Syrian Church** in south-west India has had a continuous life. Except in its infancy this Church (or rather these Churches for the Syrian Christians are now divided into four communions) has displayed little of the missionary spirit until quite recent times. Western Christianity was first introduced into India by the Portuguese, who established their hierarchy throughout their sphere of influence, Goa being the metropolitical see of the Indies. St. Francis Xavier, a Spaniard by race, took full advantage of the Portuguese power in Western India to carry on his Christian propaganda. His almost super-human zeal was rewarded with much success, but many of the fruits of his labour were lost with the shrinkage of the Portuguese Empire. It is really to the work of the missionaries of the **Propaganda** in the 17th century that the Papacy owes its large and powerful following in India to-day. The Roman Catholics in India number 1,823,000, of whom 332,000 were added during the decade 1911-1921. The total of "Syrian" Christians (exclusive of those who while using the Syrian liturgy, are of the Roman obedience) is 315,000, as against 367,000 in 1901. Protestant Christians (the term throughout this article includes Anglicans) number 2,930,000, an increase of 547,000 since 1911. Thus, the total number of Christians of all denominations in India is now close on five millions. In fact it probably exceeds that figure at the present moment, as these statistics are taken from the Census Report of 1911, and the rate of increase during the previous decade was nearly 100,000 per annum.

The Protestant Churches made no serious attempt to evangelise India till 1813. They have thus been at work in the Indian mission field for over 110 years, and the statistical results of their efforts are given above. It is now, however, generally recognized that Christian missions are producing indirect effects in India which lend themselves only incompletely to any sort of tabulation. The main agency of this more diffusive influence of Christianity is the missionary school and college. The **Protestant missions** fill a considerable part in the elementary education of the country. According to the 1923 *Report of the National Christian Council for India* they are teaching 420,255 children in 12,699 elementary schools, mostly situated in villages. The majority (243,895) of children in these schools are non-Christians. The same is true also of the secondary schools and in a still greater degree of the colleges. The former number 523 with 70,254 male and 25,303 female pupils. There are 40 colleges affiliated to Universities, containing 20,062 male and 1,209 female students. Of these as many as 14,148 are non-Christians. From the standpoint of missionary policy much importance is attached to these agencies for the indirect propagation of the Christian faith. The statesman and the publicist are chiefly interested in the excellent moral effect produced by these institutions amongst the educated classes, and the higher educational ideals maintained by their staffs. The principal **University colleges** under Protestant auspices are the Madras Christian College; the Duff College, Calcutta; the Wilson College, Bombay; the Forman College, Lahore, and three women's colleges—the Women's Christian College at Madras, the Isabella Thoburn College at Lucknow, and the Women's Christian Medical College at Ludhiana. The Roman Catholics have a large number of educational institutions, ranging from small village schools to great colleges preparing students for University degrees. But the proportion of Christian students in their institutions is very much larger than in those of the Protestant bodies. The proportion of literates amongst native Roman Catholics is probably lower than amongst the Protestant converts; but compared with Hindus and Mahomedans it is conspicuously higher. The Roman Catholics have some 3,000 elementary schools in which 98,000 boys and 41,000 girls are receiving instruction. In middle and high schools they have 143,000 boys and 73,000 girls and in University colleges about 5,000 students of both sexes. These figures, however, include a large proportion of Europeans and Eurasians, who are an almost negligible quantity in Protestant mission schools and colleges.

More recent, but producing even more widespread results, is the **philanthropic work** of Christian missions. Before the great famine of 1878, missionaries confined themselves almost exclusively to evangelistic and educational activity. The famine threw crowds of destitute people and orphan children upon their hands. Orphanages and industrial schools became an urgent necessity. But the philanthropic spirit is never satisfied with one kind of organisation or method. A great stimulus was also given to medical missions. **Hospitals and dispensaries** have sprung up in all parts of the mission field; and leper asylums

are almost a monopoly of Christian missionary effort. In 1911 the total number of medical missionaries working under Protestant societies in India was 118 men and 217 women, the majority of the former being also ordained ministers of religion. There are 184 industrial institutions in which 59 different arts and crafts are taught, ranging from agriculture to type-writing. In this department the **Salvation Army** hold a prominent place; and the confidence of Government in their methods has been shown by their being officially entrusted with the difficult work of winning over certain criminal tribes to a life of industry. The indirect effect of all this philanthropic activity under missionary auspices has been most marked. It has awakened the social conscience of the non-Christian public, and such movements as "The Servants of India" and the mission to the Depressed Classes are merely the outward and visible sign of a great stirring of the philanthropic spirit far beyond the sphere of Christian missionary operations.

Reunion.—For very many years Indian Christians have shown that they felt much more acutely than Europeans the scandal and disadvantage of the divisions of Christendom. These divisions are due to a very much greater extent than is always recognized to political causes, and in the political conflicts of the sixteenth and seventeenth centuries, when they became crystallised, India had no part. Even those differences amongst Christians which have a purely religious origin and foundation seem to be of very little account to Indian converts. For them the great dividing line is that between Christ and Mahommed or Shiva and Vishnu. Standing before a background of paganism they are conscious of a real fundamental unity in Christ. Compared with the greatness of the gulf which separates Christian from non-Christian, the differences of "confession" and "order" which separate Christian from Christian seem to be wholly artificial and negligible. In consequence the reunion movement, which is noticeable all over the world, is nowhere so strong as in India. In South India it has already resulted in the formation of the South India United Church, which is a group union of five of the principal Protestant communions, and as these bodies are in communion individually with all, or almost all, the other Protestant bodies at work in India the Union may be regarded as a Pan-Protestant Union. The S.I.U.C. is at present negotiating with the Anglican Church. If as seems probable the negotiations are successful the result will amount to a union of all the Christian bodies in South India, except the Roman Catholics, on the basis of the last Lambeth encyclical. This will mean that a real National Indian Church will come into being. Although it will be tolerant of almost every expression of Evangelical opinion and will retain the freedom of development characteristic of Protestantism, by its acceptance of the Catholic creeds and the Historic Episcopate, it will be linked up with the Catholic tradition of the Anglican Church.

Anglican Missionary Societies.

The Church Missionary Society carries on work in India in seven different missions—the United Provinces, South India, Travancore and Cochin Bengal, Western India, Punjab and Sind and the Central Provinces and Rajputana. The names are in order of seniority. Work was begun in what are now called the United Provinces in 1813, in Bombay in 1820, in the Punjab in 1851, and in the Central Provinces in 1854. The Society has always kept Evangelistic work well to the fore; but it also has important medical missions, especially on the N.-W. Frontier, and many schools of the Primary, Middle and High standards. The Church of England Zenana Missionary Society is an offshoot of the C. M. S. controlling the work of 162 missionary ladies. The number of ordained European missionaries of the C. M. S. in India and Ceylon is 160, European laymen 30 and European laywomen 258. The Society claims a Christian community of 2,21,359 of whom 63,655 are adult communicants.

Society for the propagation of the Gospel.-Statistics of the work of this Society are not easily ascertained, as much of it is done through Diocesan institutions, which, while financed and in many cases manned by the S. P. G., are entirely controlled by the Diocesan authorities. The best known of the S. P. G. missions is that at Delhi, commonly called the Cambridge Mission to Delhi, carrying on educational work at St. Stephen's College and School. At the College there are about 200 students under instruction, and at the High School 800. The College hostels accommodate 100 students. Missions to the depressed classes exist in Burma, in the Ahmednagar District and in several parts of South India, especially in the Diocese of Tinnevelly-Madura. The S. P. G. also maintains an important Criminal Tribes Settlement at Hubli, in the Bombay Carnatic. There are 116,000 Indian Christians under the aegis of the S. P. G.; 90 ordained European missionaries and 98 European lady workers.

Other Anglican Societies.—The Oxford Mission to Calcutta was started in 1880. It works in the poorest parts of Calcutta and also at Barisal. There are 11 mission priests of this Society, and 16 Sisters. In addition to its work amongst the poor, the Oxford Mission addresses itself to the educated classes in Bengal and issues a periodical called *Epiphany*, which is known all over India.

The Society of St. John the Evangelist (commonly known as the Cowley Fathers) has houses at Bombay and Poona, and small stations in the Bombay Konkan. In Bombay its missionary work centres round the Church of Holy Cross, Umarkhadi, where there is a school and a dispensary. The Christians are chiefly drawn from the very poorest classes of the Bombay population. At Poona the Society co-operates with the Wantage Sisters and in Bombay with the All-Saints' Sisters. Other Anglican sisterhoods represented in India are the Clewer Sisters at Calcutta and the Sisters of the Church (Kilburn) at Madras. The St. Hilda's Deaconesses' Association of Lahore carries on important educational work (chiefly amongst the domiciled community) in the Punjab. The mission of the Scottish Episcopal Church at Nagpur, the Dublin University Mission at Hazaribagh, and the Mission of the Church of England in Canada

working at Kangra and Palampur (Punjab) should also be mentioned under the head of Anglican Missions.

An interesting development has lately taken place in the Anglican communion. In 1922 the foundations were laid of a new Religious community called the Christa Seva Sangh or the Society of the Servants of Christ. The aim of its members is to enable Indians and Europeans to live together a common life based upon the three-fold vows of poverty, chastity and obedience and by living together to develop the Religious life along lines peculiarly suited to India. Indians appreciate fully the value of "renunciation". The Sangh hopes to commend Christianity to India by presenting it with a concrete illustration of Christian asceticism. The first Ashram of the Brotherhood was consecrated by Dr. Palmer, Bishop of Bombay, in 1928. It is situated in Poona and it contained at the time of consecration 13 Brothers, of whom 6 were Indians and 7Europeans. It shows every sign of life and growth.

Bengal Ecclesiastical Department.

Westcott, The Right Reverend Foss, D.D. .. .. Lord Bishop of Calcutta and Metropolitan of India.

SENIOR CHAPLAINS.

Ridsdale, Rev. Arthur Cyril .. .. (On leave.)
Grimes, Ven'ble Cecil John .. .. Archdeacon of Calcutta.
D'yer, Rev. Basil Saunders, B.A. .. .. .. Chaplain, Barrackpore.
Birch, Rev. Ormonde Winstanley, M.C. .. .. Chaplain, Shillong.
Thomson, Rev. Thomas Albert .. .. .. Chaplain, Bankipore.
Williams, Rev. Henry Frank Fulford, M.A. .. Chaplain, Dinapore.
Wilkinson, Rev. Earnest Roland, M.A. .. .. Chaplain, Darjeeling.
Lee, Rev. Philip Erskine, M.A. .. .. .. (On leave.)

And 7 Junior Chaplains.

CHAPLAINS OF THE CHURCH OF SCOTLAND.

Mitchell, Rev. James Donald, M.A.B.D. .. .. Presidency Senior Chaplain, Church of Scotland, Bengal, and Senior Chaplain, St. Andrew's Church.
McCaul, Rev. Mathew Wilson, B.A. .. .. Second Chaplain, St. Andrew's Church, Calcutta.

CHAPLAINS OF THE CHURCH OF ROME.

Perior, The Most. Rev. Dr. Ferdinand, S.J. .. Archbishop, Calcutta.
Bryan, Rev. Leo., S.J. .. .. Chaplain, Alipore Central Jail.

Bombay Ecclesiastical Department.

Palmer, Right Reverend Edwin James, M.A. .. Lord Bishop of Bombay.
Martindale, Ven'ble Henry, M.A. .. .. .. Archdeacon.
Walker, G. L. .. .. Registrar of the Diocese.

SENIOR CHAPLAINS.

Hill, Rev. Edward Eustace .. .. (On leave.)
Collier, Rev. Charles Bernard Gray, M.A. .. .. Chaplain, St. Mary's, Poona.
Hewitt, Rev. George .. .. Ahmednagar.
Ryall, Rev. Charles Richard, M.A., B.D., B.A. .. Ghorpuri.
Mason, Rev. Charles Douglas Thomas, M.A., A.K.C. .. Chaplain, Deolali.
Harvey, Rev. George Frederick, M.A. .. .. Senior Presidency Chaplain.
Dart, Rev. John Lovering Campbell, M.A. .. .. Domestic Chaplain to the Bishop of Bombay and Chaplain of Mahableshwar.
Wormald, Rev. Robert Leonard, M.A. .. Belgaum.
Gaul, Rev. A. C., M.A. .. .. (On leave.)
Ashley-Brown, Rev. W. .. .. Kirkee.
Church, Bombay. (On leave.)

And 6 Junior Chaplains.

CHAPLAINS OF THE CHURCH OF SCOTLAND.

THE ROMAN CATHOLIC CHURCH.

With regard to numbers, the *Catholic Directory of India*, 1924, gives the following tables:—

—	1901	1911	1921
1. *British India and Indian States*—			
(*a*) Latin Rite	1,312,224	1,614,620	1,851,408
(*b*) Syriac Rite	315,923	364,660	440,488
2. *French India*	25,859	25,918	25,480
3. *Portuguese India*	262,650	296,148	288,741
Total, India	1,916,656	2,301,346	2,606,117
4. Ceylon	285,018	322,163	363,986
Total, India and Ceylon ..	2,201,674	2,623,509	2,970,103

NOTE (1):—In 1860, the total for India and Ceylon was 1,170,854. In 1880 it had risen to 1,610,265 and in 1900 to 2,201,674.

NOTE (2):—In 1926 the total for India and Ceylon has been worked out at 3,241,744, showing an increase of quarter of a million in five years.

NOTE (3):—The number of Catholics under the Royal Patronage of Portugal (the Padroado) in 1921 were reckoned at 604,802, of whom more than half are in British India.

NOTE (4):—In 1860 there were 1,504 priests. In 1921 there were 3,156.

The Catholic community as thus existing is composed of the following elements:—

(1) The "Syrian" Christians of the Malabar Coast, traditionally said to have been converted by the Apostle St. Thomas. They were brought under allegiance to the Pope by the Portuguese in 1599, and placed first under Jesuit bishops and then under Carmelite Vicars Apostolic. They are at present ruled by an Archbishop and three suffragan Bishops of their own Syriac rite.

(2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and up the west coast, Ceylon, Bengal, etc.

(3) European immigrants at all times, including British troops.

(4) Modern converts from Hinduism and Animism in recent mission centres.

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline. To meet this decline fresh missionaries were sent out by the Congregation *de propaganda fide*, till by the middle of the 19th century the whole country was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "Padroado" or royal patronage, and the propaganda clergy. This conflict was set at rest by the Concordat of 1886. At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows:—

Of the **Portuguese Jurisdiction**:—

The archbishopric of Goa (having some extension into British territory) with suffragan bishoprics at Cochin, Mylapore and Damaun (all three covering British territory).

Of the **Propaganda Jurisdiction**:—

The archbishopric of Agra with suffragan bishoprics of Allahabad and Ajmere.

The archbishopric of Bombay, with suffragan bishoprics of Poona, Mangalore, Calicut, Trichinopoly, and Tutticorin.

The archbishopric of Calcutta, with suffragan bishoprics of Dacca, Krishnagar and Patna; and the Prefecture Apostolic of Assam.

The archbishopric of Madras, with suffragan bishoprics of Hyderabad, Vizagapatam and Nagpur.

The archbishopric of Pondicherry (French) with suffragan bishoprics of Mysore, Coimbatore and Kumbakonam.

The archbishopric of Simla with suffragan bishopric of Lahore and the Prefecture Apostolic of Kashmere.

The archbishopric of Colombo (Ceylon) with suffragan bishoprics at Kandy, Galle, Jaffna and Trincomalee.

The archbishopric of Verapoly, with suffragan bishopric of Quilon.

One archbishopric and three bishoprics of the Syriac rite for the Syrian Christians of Malabar.

Three Vicariates Apostolic of Burma.

Propaganda changes:—

New dioceses formed:—Tuticorin by division of Trichinopoly; Calicut by division of Mangalore; Chittagong by division of Dacca; Dinajpur by division of Krishnagar; Ranchi by division of Calcutta. Other changes are planned in the Central Provinces, Burma, etc., but are not yet carried out.

Padroado changes:—

In May 1928 an agreement was made between the Holy See and Portugal to modify the arrangements of the Concordat of 1886. The diocese of Damaun is merged in the Archdiocese of Bombay, and a complete readjustment is to take place in relation to Malapore and Madras, the main object being to obliterate "double jurisdiction." At the time of revising these notes, however, these changes have not come into effect.

The European clergy engaged in India almost all belong to religious orders, congregations or mission seminaries, and with a few exceptions are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number about 1,000 besides which there is a body of secular clergy mostly native to the

The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplaincies are derived mainly from Europe, that is, from the collections of *the Society for the Propagation of the Faith* and of *the Holy Childhood*, helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction and probation. This, while keeping down the record, has the advantage of guaranteeing solid results.

The Holy See is usually represented by a Delegate Apostolic of the East Indies who resides at Bangalore. At present this post is occupied by the Most Rev. Edward Mooney, D.D., appointed in 1925.

...urch of Scotland ...ander Duff, one ...missionaries, was ...he first to open ...ade the medium for instruction; and where religious teaching was given daily. Similar educational missions were soon afterwards started in Bombay and Madras. Educational work is still an important branch of the mission work of the Church, but the Bombay College was closed in 1819 and in 1907 the College in Calcutta was united with the College of the United Free Church of Scotland, to form the Scottish Churches College. In the Punjab Evangelistic work is being carried on from eight centres under seventeen missionaries. The baptised Christian community now numbers over 14,000. Work commenced in Darjeeling in 1870 is now carried on throughout the whole Eastern Himalayan district, and there is a Christian community there of over 8,000. In the five mission districts of Calcutta, the Eastern Himalayas, Madras, Poona, and the Punjab there were at the end of 1919 over 24,787 baptised Indian Christians. In connection with these missions the Women's Association of Foreign Missions does invaluable service, in school, medical and zenana work, having in India 41 European missionaries, 163 teachers, over 50 schools, three hospitals and six dispensaries.

The Church of Scotland has also done much to provide education for European children in India. Together with the United Free Church, St. Andrew's Church has six representatives on the governing body of the Anglo-Scottish Education Society, and the two churches exercise pastoral supervision over the Bombay Scottish Orphanage. In Bangalore there is the St. Andrew's High School, and both in Bangalore and in Madras the local congregation supports the school for poor children. The Ayrcliff Girls' Boarding and High School is under the care of the Kirk-Session of St. Andrew's Church, Simla. The now well-known St.

THE CANADIAN BAPTIST MISSION.—Was commenced in 1873, and is located in the Telugu Country to the north of Madras, in the Kistna, Godavari, Vizagapatam and Ganjam Districts. There are 22 stations and 387 outstations with a staff of 99 missionaries, including 8 qualified physician, and 1,120 Indian workers, with Gospel preaching in 1,520 villages. Organised Churches number 96, communicants 19,882 and adherents 13,469 for the past year. Twenty-one Churches are entirely self-supporting. In the Educational department are 503 village day schools, with 16,737 children, 14 boarding schools, 2 High schools, a Normal Training school, a Bible Training School for Women, a Theological Seminary providing in all for 1,000 pupils, and an Industrial school. There are 6 Hospitals, two leper asylums and an Orphanage. The Mission publishes a Telugu newspaper. Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. During the last decade membership has increased by 80 per cent., the Christian community by 85 per cent., and scholars by 500 per cent. Indian Secretary is the Rev. E. J. Church, Yellamanchiti, Vizagapatam.

AMERICAN BAPTIST FOREIGN MISSION SOCIETY, organized in 1814, has Missions in Burma begun 1814; Assam 1836; Bengal and Orissa 1836; South India 1840. It owes its rise to the celebrated Adoniram Judson. Until 1910 the Society was known as the American Baptist Missionary Union. There are 33 main stations in Burma, 13 in Assam, 10 in Bengal Orissa, 29 in South India, besides many outstations. All forms of missionary enterprise come within the scope of the Society.

The great work of the Mission continues to be evangelistic and the training of the native preachers and Bible-Women, and extends to many races and languages, the most important of which, in Burma, has been the practical transformation of the Karens, whose language has been reduced to writing by the Mission. The work in Assam embraces 9 different languages and large efforts are made amongst the employes of the tea plantations. The Mission Press at Rangoon is the largest and finest in Burma.

Last year the field staff numbered 314 missionaries, 7,064 Native workers. There were 1,892 Churches of which 1,272 were self supporting. Church members number 1,27,828. In the 2,107 Sunday Schools were enrolled 9,60,000 pupils. The Mission conducted 2,741 schools of all grades with 91,091 students enrolled. 14 Hospitals and 34 Dispensaries treated 6,364 in-patients and 1,05,879 out-patients. Indian Christians contributed over Rs. 6,74,000 for this religious and benevolent work during the year.

THE AMERICAN BAPTIST ASSAM MISSION was opened in 1836. and has 13 main stations staffed by about 45 missionaries. There are 725 Native workers, 384 organized churches, 37,149 baptised members, 318 Schools of all grades including 1 High, 2 Normal, 2 Bible and 13 Station schools. 3 Hospitals and 8 Dispensaries treated 326 in-patients and 18,032 out-patients during the year. Mission work is carried on in 9 different languages.

Secretary : Mr. C. E. Olney, Gauhati, Assam

AMERICAN BAPTIST, BENGAL-ORISSA MISSION, commenced in 1836. Area of operation : Midnapore district of Lower Bengal, Balasore district of Orissa and Jamshedpur Mission staff 30, Indian workers 300. Two English Churches and 25 Vernacular Churches, Christian Community 5,000. Two dispensaries. Educational: One Theological and two Boys' High Schools and two Girls' High Schools and 118 Elementary Schools, pupils 3,360. One Industrial School for carpentering, iron work and motor mechanics. The Vernacular Press of this mission printed the first literature in the Santali language.

Secretary : Rev. H. I. Frost, Balasore, Orissa.

THE AMERICAN BAPTIST TELUGU MISSION.—Was commenced in the year 1836, and covers large parts of Nellore, Guntur, Kistna, and Kurnool Districts, parts of the Deccan and an important work in Madras and the surrounding vicinity. Its main work is evangelism, but there are also Educational and Medical Institutions of importance. Industrial Settlement work for the Erukalas is carried on at Kavali and vicinity. Industrial departments are maintained also in connection with the Mission High Schools at Nellore, Ongole and Kurnool. Organized Telugu Churches number 236, with 88,713 baptized communicants. There are 102 missionaries, and 2,190 Indian workers. The mission maintains a Theological Seminary at Ramapatnam for the training of Indian preachers. A Bible Training School for the training of Telugu women is located in Nellore. A total of 32,689 receive instruction in 1,270 primary schools, 16 secondary schools and 4 high schools. In Medical work 8 Hospitals and 12 Dispensaries report 3,823 in-patients, 47,286 out-patients, and 115,073 treatments during the year.

Secretary : Miss E. J. Draper, Nellore.

THE AUSTRALIAN BAPTIST MISSION.—With 2 missionaries, established at Serajgunge, E. Bengal.

Missionary-in-charge : Rev. T. C. Kelly, Mission House, Serajgunge.

THE AUSTRALIAN BAPTIST FOREIGN MISSION.—(Incorporated) Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal. The staff numbers 43 Australian workers. There are 2,586 communicants and a Christian community of 5,553.

Secretary, Field Council: Rev. P. F. Lanyon, Mymensingh E. B.

THE STRICT BAPTIST MISSION.—Has 15 European Missionaries, and 120 Indian workers in Madras, and Salem District. Communicants number 270 ; organised Churches 8 ; elementary schools 41, with 1,625 pupils.

Treasurer and Secretary : Rev. D. Morling, Namakal, S. India.

PRESBYTERIAN SOCIETIES.

THE IRISH PRESBYTERIAN CHURCH MISSION.—Operates in Gujarat and Kathiawar with a staff of 41 Missionaries of whom 7 are qualified doctors and an Indian staff of 404 including school teachers. There are 10 Organised Churches, a communicant roll of 1,828, and a Christian community of 7,143. In Medical work there are 3 Hospitals, 6 Dispensaries, with 1,238 in-patients and 11,064 new cases and a total attendance of 43,033. The Mission conducts 3 High schools, 2 Anglo-Vernacular schools and 123 Vernacular schools affording tuition for 6,610 pupils. 4 Orphanages, a Divinity College at Ahmedabad, a Teachers' Training College for Women at Borsad and a Mission Press at Surat. The Mission has made a speciality of Farm Colonies, of which there are about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 6 missionaries is a branch of the activities of the above, working in the Panch Mahals and Rewa Kantha districts, with Farm Colonies attached.

Secretary: G. Wilson, Ahmedabad.

THE UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA.—The Sialkot Mission of the above Church was opened at Sialkot, Punjab, in 1855. It is now carrying on work in ten districts of the province and one in the N. W. F. Provinces. Its missionaries number 171, and its Indian workers 876. Its educational work comprises one Theological Seminary, one College, six High Schools, one Industrial School, nine Middle Schools, and 195 Primary Schools. The total enrolment in all schools was 15,371 in 1926. The Mission is also carrying on Medical work through six hospitals and eight dispensaries. The total Christian community in connection with the Mission is 84,322 and Church-membership 34,287.

General Secretary: Rev. W. D. Mercer, Gujranwala, N. Punjab.

THE AMERICAN PRESBYTERIAN MISSION operates in 3 main sections known as the Punjab, North India and Western India Missions. The American Staff (including women) numbers 270 and the Indian Staff 1,352. There are 35 main stations and about 240 out-stations. Organized churches number 82, 25 of which are self-supporting. There are 11,985 communicants and a total baptized community of 82,000. Educational work as follows: 2 Men's Colleges, and an interest in the Isabella Thoburn and the Kinnaird Colleges for women, students 1,820, Theological School 1, students 24; Training Schools for village workers 2, students about 180; High Schools 14, students about 2,100; Industrial Schools 4; Agricultural Demonstration Farms 4; Teachers' Training Departments 7; The Miraj Medical School and an interest in the Ludhiana Medical School for women, students 170; Elementary Schools 230; Schools of all grades 241, pupils 12,023; Medical work: Hospitals 6; Dispensaries 17. Sunday Schools 371 with 13,491 pupils. Contributions for Church and Evangelistic work on the part of the Indian Church, Rs. 51,422.

The Hospital at Miraj, founded by Sir William Wanless, and now under the care of C.E. Vail, is well-known throughout the whole of S.W. India, and the Forman Christian College at Lahore under the principalship of Rev. E. D. Lucas, D. D., is equally well-known and valued in the Punjab. The Ewing Christian College (Dr. C. A. R. Janvier, Principal) has grown rapidly in numbers and influence.

Secretary of Council of A.P. Missions in India, Rev. H. C. Velte, M.A., D.D., Saharanpur.

Secretary, Punjab Mission: Rev. W. J. Weir, M.A., Lahore.

Secretary, North India Mission: Rev. W. T. Mitchell, M. A., Mainpuri, U. P.

Secretary, Western India Mission: Rev. H. K. Wright, M.A., Ahmednagar.

THE NEW ZEALAND PRESBYTERIAN MISSION:—Commenced as recently as 1910 at Jagadhri, Punjab.

Secretary: Miss A. E. Henderson, Jagadhri, Dist. Ambalia.

THE UNITED CHURCH OF CANADA MISSION—Commenced in 1877 has 12 main stations in Indore, Gwalior, Rutlam, Dhar, Jaora, Sitamau and Banswara. The Mission staff numbers 73; Indian workers 290. This Mission works in conjunction with the Malwa Church Council of the United Church of Northern India, which reports for this part of its territory. Organised Churches 14. Unorganised Churches 13, Communicants 1,445, Baptised non-communicants 4,013. Total Christian community 5,832.

Educational work comprises Elementary and Middle Schools, High Schools for boys and girls, College, Theological Seminary and Classes. Industrial teaching and work are done in the three Girls' Boarding Schools, women's industrial work in Mhow and Rutlam and in Rasalpura Boys' School. Technical and practical training is given in Printing, Weaving and Carpentry. The Medical work is large. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals and also a number of dispensaries in central and out-stations.

Secretary of Mission.—Rev. J. T. Taylor, D.D., Indore, C. I.

Secretary of Church.—Rev. C. D. Donald, B. D., Kharua (Dt. Indore), C. I.

THE CANADIAN PRESBYTERIAN BHIL MISSION Alirajpur, Jobat and Barwani States are now under the Canadian Presbyterian Bhil Mission.

Secretary:—Rev. J. Buchanan, M.D., D.D. (on furlough); E. Toombs, Amkhut, Alirajpur, C. I.

THE WELSH CALVINISTIC METHODIST (PRESBYTERIAN) MISSION established in 1840 with a staff of 40 Missionaries, 950 Indian workers, occupies stations in Assam in the Khassia and Jaintia Hills, the Lushai Hills and at Sylhet and Cachar. The Khassia language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Communicants number 29,850; the total Christian community 81,461; organised Churches 650: Elementary schools number 626, Scholars 17,209: in addition

country, numbering about 2,000 and probably about 2,000 nuns. The first work of the clergy is parochial ministration to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people; their schools being frequented by large numbers of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St. Xavier's College, Calcutta, St. Peter's College, Agra, St. Xavier's College, Bombay, St. Joseph's College, Trichinopoly, St. Aloysius College, Mangalore, Loyola College, Madras, teaching university courses; besides a large number of high schools and elementary schools. The education of girls is supplied for by numerous convent schools worked by religious congregations of nuns to say nothing of orphanages and other charitable institutions. The total number under education amounted in 1904 to 143,051 boys and 73,164 girls, later figures being unavailable. As to missionary work proper, the country is covered with numerous modern mission centres, among which those in the Punjab, Chota Nagpur; Krishnagar, Gujerat, the Ahmednagar district and the Telugu coasts may be mentioned. (Full particulars on all points will be found in the Catholic Directory already quoted.) The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplaincies are derived mainly from Europe, that is, from the collections of *the Society for the Propagation of the Faith* and of *the Holy Childhood*; helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction and probation. This, while keeping down the record, has the advantage of guaranteeing solid results.

The Holy See is usually represented by a Delegate Apostolic of the East Indies who resides at Bangalore. At present this post is occupied by the Most Rev. Edward Mooney, D.D., appointed in 1925.

THE SCOTTISH CHURCHES.

The Church of Scotland.—The Chaplaincy work of the Church of Scotland dates from 1814, when the Rev. Dr. Bryce landed in Calcutta, and organised a congregation of his Scottish fellow countrymen. The centenary of the churches in the three Presidency towns was celebrated: Calcutta, 1914: Bombay, 1919; Madras, 1921. Since 1903 there have been eighteen chaplains on the staff, of whom nine belong to the Bengal Presidency, five to Bombay, and four to Madras. These minister both to the Scottish troops and to the civil population of the towns where they are stationed, but when there is a Scottish regiment the chaplain is attached to the regiment, instead of being posted to the station where the regiment happens to be placed and as a rule moves with the regiment. There are three Preidency senior Chaplains in charge of Bengal, Bsombay, and Madras respectively. There are churches in the chief towns of the Presidencies, and churches have also been built, in all considerable military stations, *e.g.*, Chakrata, Lucknow, Peshawar, Ranikhet, Rawalpindi, Sialkot, Umballa and Jubbulpore. In addition to the regular establishment there are a number of acting Chaplains sent out by the Colonial Committee of the Church of Scotland, and these are serving in such stations as Rawalpindi, Lahore, Cawnpore, Meerut, Mhow and Quetta. The Additional Clergy Societies in India contribute towards the cost of this additional establishment. In other places such as Sialkot, Murree, Dalhousie, and Darjeeling, regular services are provided by Scottish Missionaries. Simla has a minister of its own sent out from Scotland.

The Mission work of the Church of Scotland dates from 1829, when Alexander Duff, one of the greatest of modern missionaries, was sent to Calcutta. He was the first to open schools where English was made the medium for instruction; and where religious teaching was given daily. Similar educational missions were soon afterwards started in Bombay and Madras. Educational work is still an important branch of the mission work of the Church, but the Bombay College was closed in 1819 and in 1907 the College in Calcutta was united with the College of the United Free Church of Scotland, to form the Scottish Churches College. In the Punjab Evangelistic work is being carried on from eight centres under seventeen missionaries. The baptised Christian community now numbers over 14,000. Work commenced in Darjeeling in 1870 is now carried on throughout the whole Eastern Himalayan district, and there is a Christian community there of over 8,000. In the five mission districts of Calcutta, the Eastern Himalayas, Madras, Poona, and the Punjab there were at the end of 1919 over 24,787 baptised Indian Christians. In connection with these missions the Women's Association of Foreign Missions does invaluable service, in school, medical and zenana work, having in India 41 European missionaries, 163 teachers, over 50 schools, three hospitals and six dispensaries.

The Church of Scotland has also done much to provide education for European children in India. Together with the United Free Church, St. Andrew's Church has six representatives on the governing body of the Anglo-Scotish Education Society, and the two churches exercise pastoral supervision over the Bombay Scottish Orphanage. In Bangalore there is the St. Andrew's High School, and both in Bangalore and in Madras the local congregation supports the school for poor children. The Ayrcliff Girls' Boarding and High School is under the care of the Kirk-Session of St. Andrew's Church, Simla. The now well-known St.

Andrew's Colonial Homes at Kalimpong, Bengal, though not directly part of the work of the Church of Scotland, were initiated by and are being locally managed by missionaries of that Church. The homes exist for the benefit of the domiciled European Community, and are doing magnificent work. There are now twenty cottages, and about 600 children in residence. Further information may be found in "Reports of the Schemes of the Church of Scotland," Blackwood & Sons; "The Church of Scotland Year Book" and "The Handbook of the Church of Scotland in India and Ceylon."

The United Free Church of Scotland.—This branch of the Scottish Church has only three purely European congregations in India, two in Calcutta, Wellesley Square, and Howrah and one in Bombay, Waudby Road. In Calcutta the Howrah Church is in the district of the mills, and every effort is made to minister to the Scottish Engineers and other workers in the mills. As noted above members of these congregations co-operate with the Established Church of Scotland in providing education for European children.

The Church carries on Mission work in seven different areas. They are Bengal (Calcutta, Kalna and Chinsura); the Santal Parganas, with five stations; Western India (Bombay, Poona and Alibag); Hyderabad State (Jalna, Bethel and Parbhani); Madras (Madras City, Chingleput, Sriperumbudur and Conjeeveram); the Central Provinces (Nagpur, Bhandara, Wardha, and Amraoti); Rajputana, where the extensive work instituted by the United Presbyterian Church in 1860 is now carried on from eleven centres.

The work falls into three main divisions, evangelistic, medical, and educational. The Christian community has been organised in all the chief centres into congregations which form part of the Indian Presbyterian Church, and this Church is seeking to take an increasing share in the work of evangelism. There are nineteen Mission Hospitals, among which are four excellently equipped and staffed Women's Hospitals, in Madras, Nagpur, Ajmer, and Jaipur. From the days of Duff in Calcutta and Wilson in Bombay the Mission has given a prominent place to education. It has many schools in all parts of its field and it has also made a large contribution to the work of higher education through four Christian Colleges. The Scottish Churches College, Calcutta, is under the joint management of the Church of Scotland and the United Free Church. The Madras Christian College, which owes so much to the work of Dr. William Miller, is now under the direction of a Board representing several Missionary Societies. Wilson College, Bombay, with which the names of Wilson and Dr. Mackichan are specially associated and Hislop College, Nagpur, are under the direct management of the United Free Church.

BAPTIST SOCIETIES.

THE BAPTIST MISSIONARY SOCIETY OF GREAT BRITAIN.—Formed in 1792, largely through the efforts of Dr. Wm. Carey, operates mainly in Bengal, Bihar and Orissa, the United Provinces, the Punjab and Ceylon. The Baptist Zenana Mission and the Bible Translation Society have been united with this Society. The staff of the united Mission in India and Ceylon numbers 193 missionaries and about 1,689 Indian and Singalese workers. Connected with the Society are 339 Indian and Singhalese Churches, 264 Primary Day Schools, 25 Middle and High Schools, and 4 Theological Training Colleges. The Church membership at the close of 1927 stood at 20,461 and the Christian community at 59,317. The membership during the past ten years has increased by about 53 per cent. and the community by 50 per cent. in the same period. Amongst the non-caste people great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self-supporting.

Special work amongst students is carried on in Calcutta, Dacca, Cuttack and Delhi, where hostels have been erected for the prosecution of this form of work.

EDUCATIONAL WORK.—Ranges from Primary School to Colleges. Serampore College, the only College in India able to bestow a theological degree granted under Royal Charter by His Danish Majesty in 1827, confirmed by the British Government in the Treaty of purchase of the Settlement of Serampore in 1845, and placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary Educational operations, Arts and Theological. It was affiliated in 1857 to the newly-formed Calcutta University; reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an Inter-denominational basis for the granting of Theological Degrees to qualified students of all Churches.

As the only College in India granting a Theological Degree a large number of students are now resident in the College. In Arts, the College prepares for the Calcutta Arts Examinations. *Principal* : Rev. G. Howells, M.A., B.D., B.LITT., PH.D.

There is a vernacular institute also at Cuttack for the training of Indian preachers and Bible schools in several centres.

There are 9 or 10 purely English Baptist Churches connected with the Society, but English services are carried on in many of the stations. Medical work connected with the Society is carried on in 6 Hospitals, and 8 Dispensaries. Two large Printing Presses for both English and Vernacular work are conducted at Calcutta and Cuttack. The Secretaries of the Mission are the Rev. John Reid and W. Craig Eadie, Esq., 48, Ripon Street, Calcutta.

The Headquarters of the Mission are at 19, Furnival Street, Holborn, London. The total expenditure of the Society for 1926 amounted to £239,684.

THE CANADIAN BAPTIST MISSION.—Was commenced in 1873, and is located in the Telugu Country to the north of Madras, in the Kistna, Godavari, Vizagapatam and Ganjam Districts. There are 22 stations and 387 outstations with a staff of 99 missionaries, including 8 qualified physician, and 1,120 Indian workers, with Gospel preaching in 1,520 villages. Organised Churches number 96, communicants 19,882 and adherents 13,469 for the past year. Twenty-one Churches are entirely self-supporting. In the Educational department are 503 village day schools, with 16,737 children, 14 boarding schools, 2 High schools, a Normal Training school, a Bible Training School for Women, a Theological Seminary providing in all for 1,000 pupils, and an Industrial school. There are 6 Hospitals, two leper asylums and an Orphanage. The Mission publishes a Telugu newspaper. Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. During the last decade membership has increased by 80 per cent., the Christian community by 85 per cent., and scholars by 500 per cent. Indian Secretary is the Rev. E. J. Church, Yellamanchiti, Vizagapatam.

AMERICAN BAPTIST FOREIGN MISSION SOCIETY, organized in 1814, has Missions in Burma begun 1814; Assam 1836; Bengal and Orissa 1836; South India 1840. It owes its rise to the celebrated Adoniram Judson. Until 1910 the Society was known as the American Baptist Missionary Union. There are 33 main stations in Burma, 13 in Assam, 10 in Bengal Orissa, 29 in South India, besides many outstations. All forms of missionary enterprise come within the scope of the Society.

The great work of the Mission continues to be evangelistic and the training of the native preachers and Bible-Women, and extends to many races and languages, the most important of which, in Burma, has been the practical transformation of the Karens, whose language has been reduced to writing by the Mission. The work in Assam embraces 9 different languages and large efforts are made amongst the employes of the tea plantations. The Mission Press at Rangoon is the largest and finest in Burma.

Last year the field staff numbered 314 missionaries, 7,064 Native workers. There were 1,892 Churches of which 1,272 were self supporting. Church members number 1,27,828. In the 2,107 Sunday Schools were enrolled 9,60,000 pupils. The Mission conducted 2,741 schools of all grades with 91,091 students enrolled. 14 Hospitals and 34 Dispensaries treated 6,364 in-patients and 1,05,879 out-patients. Indian Christians contributed over Rs. 6,74,000 for this religious and benevolent work during the year.

THE AMERICAN BAPTIST ASSAM MISSION was opened in 1836. and has 13 main stations staffed by about 45 missionaries. There are 725 Native workers, 384 organized churches, 37,149 baptised members, 318 Schools of all grades including 1 High, 2 Normal, 2 Bible and 13 Station schools. 3 Hospitals and 8 Dispensaries treated 326 in-patients and 18,032 outpatients during the year. Mission work is carried on in 9 different languages.

Secretary: Mr. C. E. Olney, Gauhati, Assam

AMERICAN BAPTIST, BENGAL-ORISSA MISSION, commenced in 1836. Area of operation: Midnapore district of Lower Bengal, Balasore district of Orissa and Jamshedpur Mission staff 30, Indian workers 300. Two English Churches and 25 Vernacular Churches, Christian Community 5,000. Two dispensaries. Educational: One Theological and two Boys' High Schools and two Girls' High Schools and 118 Elementary Schools, pupils 3,360. One Industrial School for carpentering, iron work and motor mechanics. The Vernacular Press of this mission printed the first literature in the Santali language.

Secretary: Rev. H. I. Frost, Balasore, Orissa.

THE AMERICAN BAPTIST TELUGU MISSION. —Was commenced in the year 1836, and covers large parts of Nellore, Guntur, Kistna, and Kurnool Districts, parts of the Deccan and an important work in Madras and the surrounding vicinity. Its main work is evangelism, but there are also Educational and Medical Institutions of importance. Industrial Settlement work for the Erukalas is carried on at Kavali and vicinity. Industrial departments are maintained also in connection with the Mission High Schools at Nellore, Ongole and Kurnool. Organized Telugu Churches number 236, with 88,713 baptized communicants. There are 102 missionaries, and 2,190 Indian workers. The mission maintains a Theological Seminary at Ramapatnam for the training of Indian preachers. A Bible Training School for the training of Telugu women is located in Nellore. A total of 32,689 receive instruction in 1,270 primary schools, 16 secondary schools and 4 high schools. In Medical work 8 Hospitals and 12 Dispensaries report 3,823 in-patients, 47,286 out-patients, and 115,073 treatments during the year.

Secretary: Miss E. J. Draper, Nellore.

THE AUSTRALIAN BAPTIST MISSION.—With 2 missionaries, established at Serajgunge, E. Bengal.

Missionary-in-charge: Rev. T. C. Kelly, Mission House, Serajgunge.

THE AUSTRALIAN BAPTIST FOREIGN MISSION.—(Incorporated) Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal. The staff numbers 43 Australian workers. There are 2,586 communicants and a Christian community of 5,553.

Secretary, Field Council: Rev. P. F. Lanyon, Mymensingh E. B.

THE STRICT BAPTIST MISSION.—Has 15 European Missionaries, and 120 Indian workers in Madras, and Salem District. Communicants number 270; organised Churches 8; elementary schools 41, with 1,625 pupils.

Treasurer and Secretary: Rev. D. Morling, Namakal, S. India.

PRESBYTERIAN SOCIETIES.

THE IRISH PRESBYTERIAN CHURCH MISSION.—Operates in Gujarat and Kathiawar with a staff of 41 Missionaries of whom 7 are qualified doctors and an Indian staff of 404 including school teachers. There are 10 Organised Churches, a communicant roll of 1,828, and a Christian community of 7,143. In Medical work there are 3 Hospitals, 6 Dispensaries, with 1,238 in-patients and 11,064 new cases and a total attendance of 43,033. The Mission conducts 3 High schools, 2 Anglo-Vernacular schools and 123 Vernacular schools affording tuition for 6,610 pupils, 4 Orphanages, a Divinity College at Ahmedabad, a Teachers' Training College for Women at Borsad and a Mission Press at Surat. The Mission has made a speciality of Farm Colonies, of which there are about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 6 missionaries is a branch of the activities of the above, working in the Panch Mahals and Rewa Kantha districts, with Farm Colonies attached.

Secretary: G. Wilson, Ahmedabad.

THE UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA.—The Sialkot Mission of the above Church was opened at Sialkot, Punjab, in 1855. It is now carrying on work in ten districts of the province and one in the N. W. F. Provinces. Its missionaries number 171, and its Indian workers 876. Its educational work comprises one Theological Seminary, one College, six High Schools, one Industrial School, nine Middle Schools, and 195 Primary Schools. The total enrolment in all schools was 15,371 in 1926. The Mission is also carrying on Medical work through six hospitals and eight dispensaries. The total Christian community in connection with the Mission is 84,322 and Church-membership 34,287.

General Secretary: Rev. W. D. Mercer, Gujranwala, N. Punjab.

THE AMERICAN PRESBYTERIAN MISSION operates in 3 main sections known as the Punjab, North India and Western India Missions. The American Staff (including women) numbers 270 and the Indian Staff 1,352. There are 35 main stations and about 240 out-stations. Organized churches number 82, 25 of which are self-supporting. There are 11,985 communicants and a total baptized community of 82,000. Educational work as follows: 2 Men's Colleges, and an interest in the Isabella Thoburn and the Kinnaird Colleges for women, students 1,820, Theological School 1, students 24; Training Schools for village workers 2, students about 180; High Schools 14, students about 2,100; Industrial Schools 4; Agricultural Demonstration Farms 4; Teachers' Training Departments 7; The Miraj Medical School and an interest in the Ludhiana Medical School for women, students 170; Elementary Schools 230; Schools of all grades 241, pupils 12,023; Medical work: Hospitals 6; Dispensaries 17. Sunday Schools 371 with 13,491 pupils. Contributions for Church and Evangelistic work on the part of the Indian Church, Rs. 51,422.

The Hospital at Miraj, founded by Sir William Wanless, and now under the care of C.E. Vail, is well-known throughout the whole of S.W. India, and the Forman Christian College at Lahore under the principalship of Rev. E. D. Lucas, D. D., is equally well-known and valued in the Punjab. The Ewing Christian College (Dr. C. A. R. Janvier, Principal) has grown rapidly in numbers and influence.

Secretary of Council of A.P. Missions in India, Rev. H. C. Velte, M.A., D.D., Saharanpur.

Secretary, Punjab Mission: Rev. W. J. Weir, M.A., Lahore.

Secretary, North India Mission: Rev. W. T. Mitchell, M. A., Mainpuri, U. P.

Secretary, Western India Mission: Rev. H. K. Wright, M.A., Ahmednagar.

THE NEW ZEALAND PRESBYTERIAN MISSION:—Commenced as recently as 1910 at Jagadhri, Punjab.

Secretary: Miss A. E. Henderson, Jagadhri, Dist. Amballa.

THE UNITED CHURCH OF CANADA MISSION—Commenced in 1,877 has 12 main stations in Indore, Gwalior, Rutlam, Dhar, Jaora, Sitamau and Banswara. The Mission staff numbers 73; Indian workers 290. This Mission works in conjunction with the Malwa Church Council of the United Church of Northern India, which reports for this part of its territory. Organised Churches 14. Unorganised Churches 13, Communicants 1,445, Baptised non-communicants 4,013. Total Christian community 5,832.

Educational work comprises Elementary and Middle Schools, High Schools for boys and girls, College, Theological Seminary and Classes. Industrial teaching and work are done in the three Girls' Boarding Schools, women's industrial work in Mhow and Rutlam and in Rasalpura Boys' School. Technical and practical training is given in Printing, Weaving and Carpentry. The Medical work is large. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals and also a number of dispensaries in central and out-stations.

Secretary of Mission.—Rev. J. T. Taylor, D.D., Indore, C. I.

Secretary of Church.—Rev. C. D. Donald, B. D., Kharua (Dt. Indore), C. I.

THE CANADIAN PRESBYTERIAN BHIL MISSION Alirajpur, Jobat and Barwani States, are now under the Canadian Presbyterian Bhil Mission.

Secretary:—Rev. J. Buchanan, M.D., D.D. (on furlough); E. Toombs, Amkhut, Alirajpur, C. I.

THE WELSH CALVINISTIC METHODIST (PRESBYTERIAN) MISSION established in 1840 with a staff of 40 Missionaries, 950 Indian workers, occupies stations in Assam in the Khassia and Jaintia Hills, the Lushai Hills and at Sylhet and Cachar. The Khassia language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Communicants number 29,850; the total Christian community 81,461; organised Churches 650: Elementary schools number 626, Scholars 17,209: in addition

to Industrial Schools and Training Institutions and 2 Theological Seminaries. Three Hospitals and several Dispensaries provide annually for more than 10,000 patients.

Secretary: Rev. F. J. Sandy, Durtlang, Aijal.

THE ARCOT MISSION of the Reformed Church in America organised in 1853 occupies most of the North and South Arcot and Chittoor districts in S. India with a staff of 52 Missionaries and 718 Indian ministers and workers. Churches number 17, Communicants 5,527; total Christian community 20,761; Boarding schools 16, scholars 1,057; Theological school 1, students 30; Voorhees' College, Vellore, students 139. High schools 3, scholars 2,013; Training schools 2, students 92; Industrial schools 2, Agricultural Farm and School 1, total pupils 229; Elementary schools 221, scholars 8,497. Two Hospitals and 4 Dispensaries with a staff of 45 provided for 1,975 in-patients and 29,380 out-patients excluding the Union Medical College, Hospitals and Dispensaries, Vellore.

The Union Mission Medical College for South India and a Union Mission Training School are located at Vellore, the head quarter of the Mission. The Union Mission Tuberculosis Sanitarium for S. India is near Madanapalle, Arogiavaram P. O., Chittoor Dist.

Secretary : Rev. W. H. Farrar, Arni, S. India.

CONGREGATIONAL SOCIETIES.

THE AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS.—Has two large Missions, the American Marathi Mission, and the Madura Mission. The Marathi Mission covers a considerable part of the Bombay Presidency, with centres at Bombay, Ahmednagar, Satara and Sholapur. It was commenced in 1813, the first American Mission in India. Its activities are large and varied. The staff at the beginning of 1928 consisted of 54 missionaries and 641 Indian workers operating in 8 Stations and 130 out-stations exclusive of Bombay City. Organised Churches number 68 with 9,289 communicants, and 6,709 adherents. There is a Leper work at Sholapur. The Educational work embraces 15 training and secondary schools, with 1,241 pupils and 136 primary schools, with 6,067 pupils, three-fifths of whom are non-Christians. A Theological College at Ahmednagar trains for the Indian Ministry. Zenana work and Industrial work are vigorously carried on, the latter embracing carpentry and lace work. A school for the blind is conducted on both Educational and Industrial lines. Sixty-six thousand patients were treated in the Hospitals and dispensaries of the Mission last year. This Mission was the first to translate the Christian scriptures into the Marathi tongue. At Sholapur, a settlement for Criminal Tribes is carried on under the supervision of Government. *Secretary*: Rev. William Hazen, M.A., Sholapur.

THE MADURA MISSION.—In the south of the Presidency founded in 1834, has a staff of 65 missionaries and 977 Indian workers, operates in the Madura and Ramnad Districts and has a communicant roll of 10,454 and a total Christian community of 29,240 and 33 organized Churches most of which are entirely self-supporting and self-governing. These Chruches are an integral part of the South India United Church. Schools number 323 with 17,280 pupils. In Madura there are a First Grade College, high and training schools for girls and hospitals for men and women. At Pasumalai, three miles from Madura, a high school, training school, theological institution, trade school and school of agriculture. Five elementary boarding schools are found in as many out-stations, industrial work is increasingly a part of the curricula of all schools above the lower grade. The Secretary is the Rev. John J. Banninga, M.A., D.D., Pasumalai.

THE ARCOT MISSION commenced under the American Board was transferred to the Reform Church of America in 1851.

THE SCANDINAVIAN ALLIANCE MISSION OF NORTH AMERICA.—Embraces two Branches, one in Bengal and the other in Khandesh. The mission staff in Khandesh is represented by fourteen missionaries, and forty Indian workers. There are seventy-five communicants, and a Christian community of about three hundred, thirteen elementary schools provide for two hundred and eighty pupils.

Secretaries: Rev. Paul Ringdahl, Amalner, East Khandesh; and Rev. Dover, Baksa Duar, Bengal.

THE SWEDISH ALLIANCE MISSION.—Working among the Bhils in West Khandesh has 20 missionaries and 71 Indian workers. There are 8 congregations with a total membership of 923 of whom 363 are communicants. There are 8 Elementary Schools, 2 Training Schools and 5 School Homes. The pupils in all schools are 355.

Secretary: Rev. Gustaf Westmo, Dondaiche, West Khandesh.

FREE CHURCH OF FINLAND MISSION.—Total Mission Staff is represented by 8 Missionaries, 3 native Pastors, two Catechists, two Teachers. There are about 120 communicants and total community 400. There are two day schools, one evening school, one hospital, four dispensaries, Weaving and Hand-Carder industries.

Secretary: Miss E. Kronqwist, Lachen, *via* Gangtok, Sikkim State.

THE LONDON MISSIONARY SOCIETY.—Commenced work in India in 1798 and occupies 3 centres in N. India, 12 in S. India and 7 in Travancore. The Mission engages in every form of Missionary activity.

The European staff numbers 135, Indian workers 2,380; Organised Churches 520; Communicants 21,824 and Christian Community 142,255. There are 1 Christian College, students 159; 2 Theological Institutions, students 70; 4 Training Institutions, pupils 114; 12 high schools, pupils 4,849; 25 Boarding schools, scholars, 1,167 and 862 Elementary schools with 46,371 scholars. In medical work Hospitals number 6, Dispensaries 14, qualified doctors 9 Europeans, 61 Assistants and 8,880 in patients and 198,757 out-patients for the year.

The main centres of the Mission in N. India are at Calcutta and Murshidabad L.M.S. work in the United Provinces is being closed but a Union Mission of the W. M. S., C. M. S. and L. M. S. is shortly to be opened in Benares City with the Rev. J. C. Jackson of the L. M. S. as Superintendent. This Mission will concentrate

especially on work amongst pilgrims and students. Special efforts are made amongst the Nama Sudras and the aboriginal tribes known as the Majhwars, Cheros and Pankas. The S. India district and Travancore are divided into the Kanarese, Telugu, Tamil, and Malayalam fields with 19 stations and 800 outstations. At Nagercoil (Travancore) is the Scott Memorial College with 985 students, a Church and congregation said to be the largest in India, and a large Printing Press, the centre of the S. Travancore Tract Society.

Bengal Secretary: Rev. Vaughan Rees, Behrampore. Dist. Murshidabad. *Benares Superintendent.*—Rev. J. C. Jackson, Benares, U. P.

ALL-INDIA MISSIONS.

THE CHRISTIAN AND MISSIONARY ALLIANCE.—Dates from the year 1893 under the name of the International Missionary Alliance, but a number of its missionaries were at work in Berar Province much earlier. Work is carried on in the Provinces of Berar, Khandesh, Gujarat. There is a staff of 75 missionaries and 145 Indian workers. The number of mission stations is 19, with additional out-stations. There is a Christian community of 2,306 adults. There are 4 Boarding Schools, 2 for boys and 2 for girls, 2 Training Schools for Indian workers and 1 English congregation at Bhusawal.

Executive Secretary: Rev. W. Moyser, Akola, Berar, C.P.

THE CHURCH OF THE BRETHREN (AMERICAN)—Opened work in 1895, and operates in Broach, Surat and Thana Districts, also in Baroda and Rajpipla States. Its staff number 60 foreign workers including missionaries' wives, and 235 Indian workers. The Baptized (immersed) membership stands at 3,564. Education is carried on in 7 Girls' Boarding Schools, 7 Boarding Schools for Boys, and 134 Village Day Schools. Females under instruction number 657, males 3,001, total under instruction 3,658. There are 85 Sunday Schools having 165 teachers and a total enrolment of 3,372. There were 28,115 calls at mission dispensaries in 1924. The foreign medical staff consists of five doctors, four nurses, and one medical Evangelist. At Umalla, Rajpipla State, there is a Home for Babies with 37 inmates. Industrial work is carried on in six of the Boarding Schools, and a vocational training school was opened at Anklesvar in June 1924. Evangelistic, Temperance and Publicity work receives due emphasis; the "Gujarati Sunday School Quarterly" (1,800 copies) and the "Prakash Patra," a Christian monthly of 400 copies, are published. *Secretary*: L. A. Blickenstaff, Bulsar, Surat District.

THE POONA AND INDIAN VILLAGE MISSION.—Founded in 1893. Mission Stations—Khed Shivapur, Poona District; Nasrapur (Bhor State), Poona District; Lonand, M. S. M. Ry., Satara District; Phaltan and Pandharpur, Sholapur District. The staff consists of 32 European and 43 Indian workers, with a community of about 38 Indian Christians and their families. The main work is evangelising in the villages, women's zenana work, and primary education. Medical work is conducted at each station, with a hospital at Pandharpur. *Headquarters*: Nasrapur, Poona District. *Secretary*: J. W. Stothard.

THE AMERICAN CHURCHES OF GOD MISSION.—Has two missionaries at Bogra, one at Khanjanpur, Bogra District, Bengal, and two at Uluberia, Howrah District.

Executive Secretary: Rev. Howard W. Cover, M.A., Bogra, E.B.R.

Recording Secretary: Rev. A. E. Myers, B.A., Ulubaria, Howrah.

THE INDIA CHRISTIAN MISSION.—Founded in 1897, has 41 Organised Churches, 17 Missionaries, 43 stations and out-stations, 1,759 Communicants, 45 Primary schools and one Industrial School in the Ellore District, also Bible Training Institute, Dodballapur, near Bangalore, S. India. stations also in Nuwara Eliya, Mulpotha Uva Province and Polgahawella, Ceylon; Girls' Orphanage at Nuwara Eliya; Industrial School for children of mixed parentage, Nuwara Eliya. Total Christian community 4.092. *Director*: Rev. A. S. Paynter, Nuwara Eliya, Ceylon.

THE CHURCH OF THE NAZARENE MISSION:—Has its headquarters for Western India at Buldana, Berar, where it has a Boys' Boarding School. It also has fifty girls in school. This Mission also has three stations in Thana District, namely Khardi, Vasind, and Murbad. At present there are only seven missionaries in this part of India, also 32 Indian preachers and Bible women.

President of the Council: Rev. A .D. Fritzlan' Buldana, Berar.

The headquarters for Eastern India are at Kishorganj, Mymensingh District, with an orphanage and a force of 4 missionaries: also about 11 Indian preachers and Bible women. This makes a total at present of 11 missionaries and about 43 Indian workers for The Church of The Nazarene in India.

President of the Council: Rev. G. F. Franklin Kishorganj, Mymensingh District.

THE TANAKPUR AND LOHAGHAT BIBLE AND MEDICAL MISSION—Was established in 1910. It is now carried on in Tanakpur and District only, that neighbourhood having again been attached to the Naini Tal District in Kumaon. *Address*: Tanakpur, Rohilkhand and Kumaon Railway, United Provinces.

THE HEPHZIBAH FAITH MISSIONARY ASSOCIATION—Has three missionaries in India. They are the Rev. S. V. Christenson, Adra, Mrs. S. V. Christenson, Adra, B. N. Rly., Manbhum, and Miss E. K. Landis, Raghunathpur, Manbhum.

THE TIBETAN MISSION—Has 4 Missionaries with headquarters at Darjeeling, and Tibet as its objective. *Secretary*: Miss J. Ferguson, Darjeeling.

THE INDIAN MISSIONARY SOCIETY OF TINNEVELLY (DORNAKAL MISSION)—Opened in 1904 operates in the Warangal District of the Nizam's Dominions as well as among the hill tribes called Paliars in the British and Travancore Hills. It is the missionary effort of the Tamil

Christians of Tinnevelly. There are now nearly 4,655 Telugu Christians in 109 villages and 384 Paliar Christians in the hills. *Secretary*: Rev. S. S. Moses, Palamcottah.

THE MISSION TO LEPERS—Founded in 1874, is an inter-denominational and international Society for the establishment and maintenance of Homes and Institutions for Lepers and of their untainted children working in 15 countries but largely in India, China, Korea and Japan. Its work in India is carried on through co-operation with 30 Missionary Societies. In India alone the Mission now has 37 Asylums of its own with upwards of 5,000 inmates and is aiding or has some connection with work for lepers at 23 other places in India. Altogether in India over 7,000 lepers are being helped.

The Mission also provides for the segregation of the healthy children of lepers from their diseased parents. More than 800 children are thus being saved from becoming lepers.

An important feature of the work of the Mission is the measure of successful medical treatment whereby early cases both adults and children are now benefiting.

Most of the Mission's income is received from voluntary contributions. Some funds are raised in India, but the bulk of the money expended by the Mission in India, is received from Britain, although the provincial Governments give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers, of which H. E. Lady Wilson, who represents the Bombay Presidency, is a Vice-President.

Hon. Treasurer: Henry F. Lewis, Esq., 12, Dalhousie Sq., Calcutta.

The General Secretary of the Mission is Mr. W. H. P. Anderson, 33, Henrietta St., Covent Garden, London, W. C. The Secretary for India is Mr. A. Donald Miller, Purulia, Behar.

THE REGIONS BEYOND MISSIONARY UNION.—An inter-denominational Society commenced work at Motihari, Behar, in 1900, and now occupies 6 stations and 6 out-stations in the Champaran and Saran Districts, with a staff of 17 European and 2 Indian Missionaries and 40 other Indian workers. The Mission maintains 1 Hospital, 1 Girls' Orphanage, 1 Boys' Orphanage and Boarding School with Carpentry industrial department, 1 M. E. School with 200 pupils. Communicants number 80. *Secretary*: Rev. Alex. L. Banks, Siwan, District Saran.

THE NATIONAL MISSIONARY SOCIETY OF INDIA—Established 1905, it has a staff of 25 Indian Missionaries and 86 helpers and Volunteers. Operates in Montgomery District (the Punjab), Nukkar Tahsil (U. P.), Haluaghat, Mymensingh District (Bengal), Jharsagudah (B. & O.), North Kanara, Mirajgaon and Karmala Talukas (Bombay), Parkal Taluq (Nizam's Dominions) and Tirupattur Taluk (N. Arcot). Christian community over 7,000 Thirtythree Elementary Schools and 1 High School with hostel, one printing press, one Dispensary and one Hospital. Annual expenditure Rs. 70,000. Supported by Indian Christians of all denominations and Provinces. Organs: *The National Missionary Intelligencer* (a monthly journal in English sold at Re. 1 per year post free), *Qasid* (a monthly journal in Persian Urdu) at Rs. 2-8-0, *Deepekai* (a monthly journal in Tamil and Kanarese) at 8 as. per year, post free.

Address: N. M. S. Office, Vepery, Madras.

General Secretary: Rai Bahadur A. C. Mukerji, B.A. *Offg. Secretary*: Thos. David, B.A., B.D.

THE SEVENTH DAY ADVENTISTS:—The Seventh-day Adventists commenced mission work in India in 1893, and now employ a staff of five hundred and forty-one workers European and Indian, including ninety-eight ordained and licensed ministers. Evangelistic and educational work is conducted in fifteen vernaculars, besides work for English-speaking peoples in the large cities. For administrative purposes, the work is organised into four Union Missions located as follows:—

Burma Union Mission of S.D.A. (J. Phillips, Superintendent). *Office address* 13, Franklin Road, Rangoon.

North-East India Union Mission of S.D.A. (G. G. Lowry, Superintendent). *Office address* 70, Circular Road, Ranchi.

North-West India Union Mission of S.D.A. (A. H. Williams, Superintendent), *Office address* 17, Abbott Road, Lucknow.

South India Union Mission of S. D. A. (H. Christenson, Superintendent) *Office address* 7, Cunningham Road, Bangalore,

The general headquarters for India and Burma is located at Salisbury Park, Poona. (A. W. Cormack, *President*; C. L. Torrey, *Secretary and Treasurer*. *Office address*: Post Box No. 15, Poona.) On the same estate is an up-to-date publishing house, devoted entirely to the printing of evangelical and associated literature. (Address: Oriental Watchman Publishing Association, Post Box No. 35, Poona). A large number of day and boarding vernacular and Anglo-vernacular schools are conducted in different parts of the country; and at Vincent Hill School, Mussoorie, European education is provided, a regular high-school course, with more advanced work for commercial and other special students, being available. In all the denominational boarding schools increasing emphasis is being laid on vocational work, the students being required to share in the domestic work of the institutions, and in many cases to engage in some trades or other work. Seven physicians, one maternity worker, (C.M.B.) and a number of qualified nurses are employed, regular medical work being conducted at fourteen stations. The baptised membership (adult) is 2,648, organised into 71 churches; and in addition a substantial community of enquirers is receiving systematic instruction. 213 Sabbath Schools are conducted with an enrolled membership of 5,137.

THE AMERICAN MENNONITE MISSION.—Established 1899, works in the C. Provinces. Mission staff numbers 33, Indian workers 80, Church members 1,300, 1 Industrial Training Institution, 1 High, School, 1 Vernacular Middle School and 1 Anglo-Vernacular Middle School, 1 Normal School, 1 Men's Home, 2 Homes for untainted children of lepers, 1 Bible School, 2

Orphanages 1 Widows' Home, 1 Leper Asylum; Elementary Schools, 9; Dispensaries, 6. Leper Clynics 2.

Secretary: Rev. J. N. Kaufman, Dhamtari, C. P.

THE GENERAL CONFERENCE—MENNONITE MISSION—Started in 1901 in the C. Provinces. Workers number 22; Leper, Medical, Orphan, Zenana, Evangelistic and Educational work carried on. *Secretary*: Rev. P. W. Penner, Janjgir, C. P.

THE KURKU AND CENTRAL INDIA HILL MISSION—Established 1890 in the C. P. and Berar, has a mission staff of 12, Indian workers 22, Churches 8, Communicants 163: Christian community 531; 2 Boarding schools with 88 boarders and 3 Elementary schools. *Secretary*: Rev. Carl Wyder, Ellichpur, Berar, C. P.

THE CEYLON AND INDIA GENERAL MISSION—Established 1892, occupies stations in India in Mysore State in the Coimbatore and Anantapur Districts and also stations in Panadura, Ceylon. Mission Staff 31: Indian workers 147, Churches 14, with Communicants 664, and Christian Community 2,719; Orphanages 5; Elementary schools 49, Pupils 1,566.

Secretary: A. Scott, Kadiri, S. India.

THE BOYS' CHRISTIAN HOME MISSION—Owes its existence to a period of famine, was commenced in 1899. Mission staff 17, Indian workers 125. There are elementary schools with three orphanages, two boys and one girl, and a Widows' Home, where Industrial training is given. There are four main stations—At Dhond, in the Poona District and at Bahraich, Orai and Benares in United Provinces. There are also 34 out-stations. *Director*: Rev. John E. Norton, Dhond, Poona District. *Secretary*: W. K. Norton, Benares, U. P.

Ladies' Societies.

ZENANA BIBLE AND MEDICAL MISSION.—This is an inter-denominational society, with headquarters, 33, Surrey Street, London, working among women and girls in six stations in the Bombay Presidency, 10 in United Provinces, and 3 in the Punjab. There are 89 European Missionary ladies on the staff and 29 Assistant Missionaries, 199 Indian teachers and nurses and 53 Bible women. During 1925 there were 3,442 in-patients in the five hospitals supported by the Society (Nasik, Benares, Jaunpur, Lucknow and Patna), but the Victoria Hospital, Benares, was closed. There were 24,668 out-patients, 98,494 attendances at the Dispensaries. In their 33 schools were 2,833 pupils, and there is a University Department at Lahore. The evangelistic side of the work is largely done by house to house visitations and teaching the women in Zenanas, 1,385 women were regularly taught and 1,385 houses were visited. The 57 Bible women visited 480 villages; the number of houses was 1,988; major operations 575; minor operations 977. Total expenditure £ 57,015-14-7.

Hon. Treasurer: The Lord Meston of Dunottar.

Secretaries: Rev. Dr. Carter, Rev. E. S. Carr, M.A. (Hon.), and Miss E. Marriner.

WOMEN'S CHRISTIAN MEDICAL COLLEGE, WITH WHICH IS INCORPORATED THE PUNJAB MEDICAL SCHOOL FOR WOMEN.—In 1894 the North India School of Medicine for Christian Women was opened in Ludhiana in order to give a Medical Education under Christian influences to Indian Women. Doctor Edith Brown, M.A., M.D., was its Founder and Principal. The School was Inter-denominational, and trained students for various Missionary Societies.

Clinical work was at first given at the Charlotte Hospital, which belonged to the Ludhiana Zenana and Medical Mission. The Memorial Hospital was opened in 1900, and has now 200 beds. In 1913 non-Christian Students were also admitted for training, and the name was modified to its present title given above.

In 32 years 160 medical students have qualified as doctors, besides compounders, nurses and dais. At present over 79 are in training as medical students, 21 as compounders, 50 as nurses, 59 as nurse dais and 6 indigenous dais. New laboratories have been built for clinical Pathology for Physiology and for Chemistry and Physiess and new quarters for the Sisters and Nurses. A new dispensary for out-patients has recently been opened.

THE MISSIONARY SETTLEMENT FOR UNIVERSITY WOMEN was founded in Bombay in 1895 to work among the higher class of Indian ladies. Its activities now include a hostel for woman students, in addition to educational, social, and evangelistic work, and a Holiday House for students and other ladies at Bordi-Gholvad, B. B. & C. I. Ry. *Warden*: Miss Gedge, J. P., Vacchagandhi Road, P. O. 7, Bombay.

THE RAMABAI MUKTI MISSION (affiliated with the Christian and Missionary Alliance Mission in 1925) the well known work of the late Pandita Ramabai, shelters about 600 deserted wives, widows and orphans, educating and fitting them to earn their living. The Mission is worked on Indian lines and carried on by Indian and European workers. Evangelistic work is carried on in the surrounding villages of Kedgaon, Poona District.

Miss M. Lissa Haslie, *Corresponding Secretary*.

Disciple Societies.

The India Mission Disciples of Christ, under the United Christian Missionary Society, St. Louis, U.S.A., began work in India in 1882. It works in the Central Provinces and South United Provinces. There are 86 Missionaries including missionaries' wives and 349 Indian workers. There are 14 Organised Churches with the membership of 2,385. There is a Christian community of 4,117. There are 7 Hospitals and 12 Dispensaries in which 141,264 in-patients and out-patients were treated last year. Two Orphanages and Industrial Homes show 375 inmates. A Boarding School for girls and one for boys and 3 Hostels for boys show 501 inmates. 2 Leper Asylums have 160 inmates. A Tuberculosis Sanitarium at Pendra Road admitted 95 patients during the year. An Industrial School is conducted at Damoh in connection with which a 400 acre farm is used for practical work. In the Home for women and children at Kulpahar needle work, gardening, etc., are taught in connection with which a large business is done each year. The Mission

Press at Jubbulpore printed about 3,000,000 pages of Christian Literature. There is a High School; also 8 Middle Schools, 28 Primary Schools with about 3,000 pupils.

The Australian Branch has 3 Mission Stations in the Poona District. The Great Britain and Ireland Branch in Mirzapur District of U.P. and Palamau District in Orissa. These two have no organised connection with the India Mission Disciples of Christ.

Secretary and Treasurer: W. H. Scott, Jubbulpore, C. P.

Undenominational Missions.

THE CENTRAL ASIAN MISSION. Objective: Salvation of Central Asia; from Afghanistan to Tibet (including N. E. portion of Peshawar District), North Kashmir, etc. Protestant Evangelical, Inter-denominational. Head-quarters in India, Mardan, N. W. F. P.; in London 52 Lincoln's Inn Fields. Branch Stations, Bandapur, N. Kashmir; Shigar, Baltistan. Founded and managed chiefly by officers who have served in Frontier parts.

THE FRIENDS' FOREIGN MISSION ASSOCIATION works in five stations of the Hoshangabad Division of the Central Provinces, and in two of the adjacent Bhopal State. There are 7 Churches, 9 missionaries, 173 members in full communion, 1,097 Christian adherents; 1 Boarding School for girls and 1 Industrial School for boys, 1 Anglo-Vernacular Middle School and 6 Primary Schools; and one hospital with dispensary attached and 1 village dispensary; a self-supporting weaving community at Itarsi and a Farm Colony at Makoriya, in Hoshangabad District. *Secretary*: G. W. Maw, Itarsi, C. P.

THE AMERICAN FRIENDS' MISSION with 6 Missionaries is working in Bundelkhand. *Secretary:* Miss E. E. Baird, Nowgong, C. I.

THE OLD CHURCH HEBREW MISSION was established in 1858, in Calcutta, and is said to be the only Hebrew Christian Agency in India. *Secretary:* The Chaplain, 11, Mission Row, Calcutta.

THE OPEN BRETHREN—Occupy 46 stations in the U. Provinces, Bengal, S. Mahratta, Godaveri, Delta, Kanarese, Tinnevelly, Malabar Coast, Coimbatore and Nilgiri Districts. They hold an annual Conference at Bangalore.

Lutheran Societies.

THE INDIA MISSION OF THE UNITED LUTHERAN CHURCH IN AMERICA.—Formerly American Evangelical Lutheran Mission, Guntur and Rajahmundry. Work is conducted in the East Godavari, West Godavari, Kistna, Guntur, Nellore and Vizagapatam Districts. Its Missionary staff consists of 106, including Missionaries' wives and 3,221 Indian workers. The baptised membership is 1,30,000. There are 928 Village Schools, 13 Boys' Boarding Schools, 7 Girls' Boarding Schools, 4 High Schools, a First Grade College with 600 students, 7 Bible and Secular Training Schools, a Theological Seminary, 1 Agricultural School, 5 Hospitals and 2 Mission Presses. *Chairman:* The Rev. Victor McCaulay, D.D., Tenali, Guntur District.

THE EVANGELICAL NATIONAL MISSIONARY SOCIETY OF STOCKHOLM, SWEDEN, founded in 1856, occupies the districts of Saugor, Betul, and Chindwara in the Central Provinces There are about 2,367 Church members constituted into an indigenous Church with 12 local congregations. The European and Indian staff numbers 30 and 177 respectively. One Theological Seminary for training catechists and pastors, and one Training School for training Bible Women. 23 Day Schools with 1,172 children. 48 Sunday Schools with 636 Christian and 1,223 non-Christian children. 11 Dispensaries with 27,505 patients during 1927. 3 Workshops, one of them with an aided Carpentry School. One Female Industrial School, one Widows' Home with 60 women, 8 Orphanages and one Boarding School for Christian children. At the end of 1927 there were 187 boys and 241 girls in these Institutions.

Secretary: Rev. G. A. Bjork, Chhindwara, C.P.

THE KANARESE EVANGELICAL MISSION with Headquarters at Mangalore, South Kanara, was organised on January 1st, 1919, to take over the Mission work done formerly by the Basel Evangelical Mission in two of her fields, namely, the Districts of South Kanara and South Mahratta. In 1926 a union was effected between the Home Board at Lausanne and Basel, and in July 1927, this mission handed back to the Basel Evangelical mission the two mission fields of South Kanara and South Mahratta. The last available figures are: 12 chief stations and 56 outstations with a total missionary staff of 35 and 412 Indian workers. There are 48 organised congregations with a total membership of 12,324, which gave a total contribution of Rs. 16,107-1-11 for church and mission work. Educational work embraces 72 schools, of which there are 3 High Schools. The total number of scholars is 8,626.

Medical work is done at Betgeri, South Mahratta, with a full staff and a hospital and two branch hospitals and dispensaries. A Women's and Children's Hospital was opened in June 1923 at Udipi, South Kanara, and has been enlarged of late.

The Mission maintains a Home-Industrial Department for women's work and a large Publishing Department at Mangalore with a bookshop and a printing press occupying some 150 hands and doing work in many languages.

Chairman: Rev. A. Schosser residing at Mangalore, S. K.

Secretary: Rev. E. Sikemeier, Basel Ev. Mission, Udipi, S. Kanara.

THE CHURCH OF SWEDEN MISSION was founded in 1874. Operated till 1915 in the Madura, Tanjore, Trichinopoly and Ramnad Districts. Since 1915 the Mission having taken full charge of the former Leipzig Evangelical Lutheran Mission field, working also in the Madras, Chingleput, Coimbatore, Salem, S. Arcot Districts with diaspora congregations in Rangoon, Penang, Kuala-Lumpur and Colombo.

L. E. L. M. (Leipzig Evangelical Lutheran Mission) re-entered into the work, in 1927. Hence the Church of Sweden Mission now works in the Trichinopoly, Coimbatore, Madura and Ramnad Districts with the diaspora congregations

at Colombo. The L. E. L. M. works in the Madras, Chingleput, South Arcot and Tanjore Districts with the diaspora congregations at Rangoon, Penang and Kuala-Lumpur.

The Church (Tamil Evangelical Lutheran Church) was constituted on 14th January 1919 and is working in connection with the two Missions.

CHURCH OF SWEDEN MISSION. European staff, 35; Schools, 132; Teaching staff, 233; Pupils, Boys, 4,688; Girls 1,293.

President.—Rev. J. Sandegren, M.A., B.D., "Gurukul," Kilpauk, Madras.

LEIPZIG EVANGELICAL LUTHERAN MISSION. European staff, 11; Schools, 10, Teaching Staff 96; Pupils, Boys 1,217; Girls, 669.

President. Rev. Provost Th. Meyner, Mayavaram.

INSTITUTIONS COMMON TO BOTH MISSIONS. School, 2; Teaching Staff, 29; Pupils, Boys, 72; Girls 329.

TAMIL EVANGELICAL LUTHERAN CHURCH. Organised churches, 45; Ordained Indian Ministers, 36; Other Indian workers, 107; Baptized membership, 25,938; Baptized membership Schools, 249; Teaching staff, 451; Pupils, 10,167 (boys 8,187, girls 1,980).

President: The Rt. Rev. Bishop D. Bexell, Trichinopoly.

THE INDIA MISSION OF THE EVANGELICAL LUTHERAN SYNOD OF MISSOURI, OHIO ANDO. O.S. is located in North Arcot, Salem and Tinnevelly Districts, in Travancore, in Cochin, and the Kolar Gold Fields, with 25 missionaries, 1 nurse, one deaconess-nurse (American), 1 doctor (Indian), 1 Zenana worker, 1 American teacher in charge of Missionary Home for children, and 1 Lady educationist. Besides the three Training Institutes there are one complete and one incomplete High Schools, and among the Elementary Schools three complete Higher Elementary. In addition to evangelistic and educational work, the Mission has now an up-to-date Dispensary and Lying-in Hospital with 18 beds in Ambur and a Theological Seminary (24 students, besides 4 students doing active field work). *Secretary:* Rev. R. W. Goerss, Nagercoil, S. Travancore.

THE DANISH MISSIONARY SOCIETY.—Established 1863 in South Arcot, working there and in North Arcot, on the Shevaroy Hills and in Madras, has a total staff of 367 Indian and 49 European workers, Communicants 1,826, Christian community 4,640, 1 High School, 3 Boarding Schools, 2 Industrial Schools, 1 Orphanage, 2 Hostels and 97 Elementary Schools, 1 Theological Seminary and 2 Hospitals; total scholars 4,970.

President: Rev. P. Lange, B.A., B.D., Nellikuppam.

Treasurer: Rev. C. Bundslev, B.A., B.D., Tirukoilur.

THE SANTAL MISSION OF THE NORTHERN CHURCHES (formerly known as the India Home Mission to the Santals)—Founded in 1867, works in the Santal Parganas, Goalpara (Assam), Malda and Dinajpur. Work is principally among the Santals. The mission staff numbers 27; Indian workers 480; communicants 4,000; Christian community 23,000; organised churches 36; boarding schools 4; pupils 508; elementary schools 69; pupils 1,035; industrial schools 2; Orphanage 1; children 29. *Secretary*: Rev. P. O. Bodding, Dumka, Santal Parganas.

MISSIONS AND ENEMY TRADING ACT.—In May 1918, the following notice regarding Missions was published in the "Gazette of India":—"The following missions or religious associations are declared companies under Act 2 (the Enemy Trading Act) of 1916:—The Leipzig Evangelical Lutheran Mission, Madras, the Hermansberg Evangelical Lutheran Mission, Madras, the Schleswig-Holstein Evangelical Lutheran Mission, Madras, the Gosner Evangelical Lutheran Mission of the United Provinces and Behar and Orissa, the German Evangelical Lutheran Mission of Ranchi, Behar and Orissa. The Governor-General in Council notifies that the powers conferred under Section 7 of the said Act shall extend to the property, movable and immovable, of these missions or religious associations."

In June, 1919, the Government of India stated:—"Effect is already being given to the suggestion that enemy missions in India should be taken over by British societies. The properties and undertakings of hostile missions have been vested in the Provisional Custodian of Enemy Property with a view to their transfer to boards of trustees composed partly of non-official members nominated by the National Missionary Council of India with the approval of the Government of India and partly of Government officials, and those Boards of Trustees will in due course transfer the undertakings and properties to a missionary society to be selected by them with the approval of the Governor-General in Council.

Methodist Societies.

The Methodist Episcopal Church is the organization in the United States of America which grew out of the Wesleyan revival in England and her American colonies during the latter part of the eighteenth century. This Church began its work in India in 1856, at first confining its activities to what is now the United Provinces. From that centre it spread until the outposts of its work were found in Baluchistan, Burma, Malaysia, Netherlands Indies and the Philippine Islands. In 1920 a rearrangement of the mission field of the Church separated India, Burma and Baluchistan into what is now known as the Southern Asia division. Within this present field the Church now has a total baptized Christian community of over half a million of whom approximately 20,000 were baptised the year ending 1926.

The avowed task of the Church has been the uplift of the depressed classes, and its work has been largely among that class. As a matter of fact, however, it has large numbers who came from the Mohammedans and the caste Hindus, and among such its influence is extending.

The educational work of the Church is extensive, it having in this area a total of 1,301 schools of all grades, including three colleges twenty-two high schools, and numerous normal training and the logical institutions. The registered attendants in these schools number 42,529.

Special effort is made for the instruction and development of the young people of the Church, there now being 483 chapters of the Epworth League with 20,253 enrolled members, and 5,345 organized Sunday Schools with an enrolment 159,520.

The publishing interests of the Church are represented in two presses at Madras and Lucknow, the former doing work in four vernaculars and the latter in six. The periodicals issued cover the interests of both the evangelistic and the educational field, the Indian Witness, the Junior Methodist and Methodist Education being in English, while the Kaukab-i-Hind, the Rafiq-i-Niswan, the Bal Hit Karak, and other periodicals for women and children are issued in several of the vernaculars.

The governing body of the Church is the General Conferences held quadrennially in America in which the ten conferences now existing in India are represented by twenty-eight delegates. The polity of the Church in India looks forward to complete independence under the general governing body, there at present being but about three hundred and fifty American men and women as compared to 480 ordained and 3,162 unordained Indian and Burmese workers. At present the area is divided into seventy-two districts each in charge of a superintendent and among whom are many Indians. The work is supervised by four Bishops, elected by the General Conference, and resident as follows: Bishop Frank W. Warne, Bangalore; Bishop John W. Robinson, Delhi; Bishop Frederick B. Fisher, Calcutta; and Bishop Brenton T. Badley, Bombay.

THE AMERICAN WESLEYAN METHODIST MISSION, Sanjan, Thana District Headquarters. Stations with missionaries, Danda, Maroli, *via* Nargol, Thana District. Vapi (Daman Road Station), Surat District. Pardi 6, Surat District. Six missionaries on field. Two on furlough. One under appointment. Four main stations. Two boarding schools. One industrial school. One Bible school. Six village schools. *Superintendent:* C.B. Harvey, Sanjan, Thana District.

THE REFORMED EPISCOPAL CHURCH OF AMERICA at Latipur and Lucknow, U. P., has 2 Missionaries, 4 Outstations, 1 Hospital, 2 Orphanages and a membership of nearly 100.

The Methodist Protestant Mission began work in India in 1919, has a staff of seven missionaries, and one under appointment. The work is confined to Dhulia Taluka, with one Main station, Dhulia. There two boarding schools, district evangelistic work and medical work. *Secretary:* Miss Mildred Miskimen, Dhulia, West Khandesh.

THE WESLEYAN METHODIST MISSIONARY SOCIETY commenced work in India in 1817 (Ceylon in 1814). The Mission in India, apart from Ceylon, is organised into 7 District Synods with 2 Provincial Synods. There is a large English work connected with the Society, 20 ministers giving their whole time to Military work and English churches.

The districts occupied include 68 main stations in Bengal, Madras, Mysore, Bombay, Punjab, Central Provinces, Hyderabad (Nizam's Dominions), United Provinces and Burma. The Burma Synod has recently been attached to the Ceylon Provincial Synod for purposes of administration. Its statistics are no longer included in this statement. The European staff numbers 102 with 75 Indian Ministers and 791 Indian workers; Communicants 18,513, and total Christian community 101,245. There are 7 large numbers of organised Churches many of which are self-supporting.

Educational work comprises 3 Christian Colleges, students, 2,033; 5 Theological Institutions, students, 329; 7 High Schools, pupils, 3,427; 14 Industrial schools, pupils, 400; 923 Elementary schools, with 26,180 scholars. In Medical work there are 3 hospitals, 12 dispensaries, 1,127 in-patients and 65,431 out-patients.

The Women's Auxiliary carry on an extensive work in the places occupied by the W. M. M. S. There are 93 women workers from abroad of whom 16 are qualified doctors. The Indian women workers number 382. There are 109 girls' day schools with 13,377 pupils and 28 boarding schools with 1,979 boarders. There are several philanthropic institutions for the rescue and training of women. The Women's Auxiliary manage 12 hospitals and 9 dispensaries, which had 8,041 in-patients and 97,533 out-patients. The cost of the work to the Women's Auxiliary in 1925 was nearly £ 25,000.

THE FREE METHODIST MISSION of North America—Established at Yeotmal, 1893, operates in Berar with a staff of 17 Missionaries and 45 Indian workers. Organised churches 4, 1 Theological school and 9 Elementary schools, and 2 Anglo-Vernacular schools and Dispensaries 3. *Secretary*: Rev. Elizabeth Moreland, Yeotmal, Berar.

THE SALVATION ARMY.

For many years the operations of the Salvation Army in India were under the immediate direction of eight Territorial Commanders, in part responsible to Commissioner Booth-Tucker, as Special Commissioner for India, and in part to International Headquarters. The General recently decided to divide the country into four distinct Commands, each under its own Territorial Commissioner and directly responsible to International Headquarters.

Northern India.—The area under this command is the S. A. work in the whole of the Punjab and the United Provinces with Headquarters at Lahore.

In addition to an extensive evangelistic work in the Punjab, and in several centres in the United Provinces, there are a number of Settlements for the Criminal Tribes in the United Provinces (where this important work was first introduced) and several also in the Punjab.

In the Punjab is situated an agricultural settlement consisting of a large village of 1,800 inhabitants who cultivate some 2,000 acres of land, in which they will gradually acquire proprietary rights, the Government having given it to the Salvation Army on easy terms. This is proving to be very successful.

The oversight of a large tract of country in the Punjab, comprising some two thousand acres of land, has been handed to the Salvation Army, for the purpose of establishing a Colony.

Other institutions include Weaving Schools Agricultural, and Fruit Farms, Day and Boarding Schools, a Home for stranded Europeans, and for British Military Soldiers, 2 Hospitals and 4 Dispensaries.

Village Centres occupied, 1,783 ; Officers and Employees, 586 ; Social Institutions, 23.

Territorial Headquarters : S. A., Ferozepore Road, Lahore, Punjab.

Territorial Commander : Colonel Himmat Singh (Baugh).

Chief Secretary : Lt.-Colonel Dileri Singh (Melling).

Western India.—The three Territories of Bombay, Guzerat, and Maratha now form the Territory of Western India.

Besides the distinctly evangelistic operations, there are established a large General Hospital—Thomas Emery Memorial—several Dispensaries, at which during the year about 14,300 patients are treated, over 224 Day and Boarding Schools, a Home for Juvenile Criminals, an Industrial and Rescue Home for Women, conditionally Released Prisoners' Home Weaving Schools; a Factory for Weaving, Warping, and Reeling Machines, and a Land Colony having a population of some hundreds of Salvationists.

Corps, 315 ; Outposts, 475 ; Officers, 623, of whom 552 are Indian ; employees and teachers, 91 ; Social Institutions, 15.

Territorial Headquarters : S. A., Morland, Road, Byculla, Bombay.

Territorial Commander : Lieut. Commissioner Ewens.

Madras and Telugu Territory.—This Territory comprises the city of Madras and work situated in the Nellore, Guntur, Kistna and West Godaveri Districts of the Northern Circars of the Madras Presidency, also Bangalore.

There are the following agencies at work :—257 Corps and outposts, *viz.*, places in which work is systematically done.

112 Village Primary Schools, 4 Settlements for Criminal Tribes with a total population of 3,588. 2 Industrial Schools for children of Criminal Tribes. 1 Rescue Home. 1 Silk Farm, where some 60 boys are being instructed in the various branches of sericulture, 2 institutions for the training of officers and 1 boarding schools for boys and 1 for girls.

1 Trading Department, where cloth, leather goods, furniture, carpets, silk, lace, etc. the products of Industrial Institutions, are disposed of.

Territorial Headquarters : The Salvation Army, Broadway, Madras.

Territorial Commander : Colonel N. Muthiah.

Chief Secretary : Major E. Maslin.

The South Indian Territory of the Salvation Army is operating in the Native States of Travancore and Cochin and in the Tinnevelly District of British India.

They are working amongst six castes, and calls have been received from other castes, amongst whom they have not yet been able to commence operations. Even among the six castes, there are districts from which the people are calling us which they are not able to meet yet. Work is carried on in 1,228 villages, there are 1,230 Officers and Teachers and 298 Day Schools.

There have been advances in every department of the work, in addition to the erection of a number of Village Halls and Officers' Quarters, three Central Halls have been completed and two others are in course of erection. A new Training Garrison for the Men Cadets of the Malayalam area of the Territory, is being erected in Trivandrum. A Divisional Headquarters has also been erected for Kalkulam Division in Thucklai, and a second reconstructed at Kottarakara.

Futher improvements have been made in the Medical Department, and since the return of the Senior Medical Officer, much work has been done towards the same. The new Eye Ward and Women's Block are rapidly nearing completion and a Cholera Isolation Ward and Septic tank system are also being planned, at the Catherine Booth Hospital at Nagercoil. Of the Branches, a new Inpatients' Block is being constructed at Chembanvillai, whilst the Old Hospital from Muttackadu has been removed and reconstructed at Kothanallur. There are two schemes under consideration for work among the Lepers ; one in the Cochin State and the other in North Taravancore.

There are 78 Boys and 30 Girls in the three Boarding Schools, at Nagercoil and Trivandrum.

The children attend the Vernacular and English Schools.

Industrial Departments, though the market for certain branches of the work are very slack, are maintaining their position and also doing good work amongst the women whom they employ.

Territorial Headquarters : The Salvation Army, Kuravanconam, Trivandrum.

Territorial Commander : Colonel (Mrs.) A Trounce.

Chief Secretary :—Lieut.-Colonel Yesu Dasen.

Laws and the Administration of Justice.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Mahomedan. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. At first the tendency of the English was to make their law public and territorial, and on the establishment of the Supreme Court at Calcutta in 1773 and the advent of English lawyers as judges, they proceeded to apply it to Europeans and Indians alike. This error was rectified by the Declaratory Act of 1780, by which Parliament declared that as against a Hindu the Hindu law and usage, and as against a Mahomedan the laws and customs of Islam should be applied. The rules of the Shastras and the Koran have been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829; the Indian Slavery Act, 1843; the Caste Disabilities Removal Act of 1850; the Hindu Widows' Remarriage Act, 1856; and other Acts and Codes. To quote the Imperial Gazetteer, "A certain number of the older English statutes and the English common law are to a limited extent still in force in the Presidency Towns as applicable to Europeans, while much of the old Hindu and Mahomedan law is everywhere personal to their native fellow subjects; but apart from these, and from the customary law, which is as far as possible recognised by the Courts, the law of British India is the creation of statutory enactments made for it either at Westminster or by the authorities in India to whom the necessary law-giving functions have from time to time been delegated."

Codification.

Before the transfer of India to the Crown the law was in a state of great confusion. Sir Henry Cunningham described it as "hopelessly unwieldy, entangled and confusing." The first steps toward general codification were taken in 1833, when a Commission was appointed, of which Lord Macaulay was the moving spirit, to prepare a penal code. Twenty-two years elapsed before it became law, during which period it underwent revision from his successors in the Law Membership, and especially by Sir Barnes Peacock, the last Chief Justice of the Supreme Court of Calcutta. The Penal Code, which became law in 1860, was followed in 1861 by a Code of Criminal Procedure. Substantially the whole criminal law of British India is contained in these two Codes. One of the most eminent lawyers who ever came to India, Sir James Stephen, said "The Indian penal code may be described as the criminal law of England freed from all technicalities and superfluities, systematically arranged and modified in some few particulars (they are surprisingly few) to suit the circumstances of British India. It is practically impossible to misunderstand the code." The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Indian Penal Code has from time to time been amended. The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898. These Codes are now in force.

Statute Law Revision.

In October, 1921, a committee was appointed under the presidency of the Hon. Mr. A. P. Muddiman, I.C.S., to deal with the question of statute law revision. The functions of the Committee are to prepare for the consideration of Government such measures of consolidation and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of India. In several branches of the law consolidation has long been overdue, and it is suggested that the preparation of a Bill consolidating the existing law relating to merchant shipping, with such amendments therein as are necessitated or rendered desirable by the enactment of the English statutes since 1894 on the same subject should form the first duty undertaken by the Committee. Under the conditions resulting from the establishment of the reformed Constitution, increasing importance will attach hereafter to the periodical examination and revision of the Statute Book and the Government of India hope that the Committee will take its place as a permanent feature of the legislative machinery of the country.

European British Subjects.

Whilst the substantive criminal law is the same for all classes, certain distinctions of procedure have always been maintained in regard to criminal charges against European British subjects. Until 1872 European British subjects could only be tried or punished by one of the High Courts. It was then enacted that European British subjects should be liable to be tried for any offences by magistrates of the highest class, who were also justices of the peace, and by judges of the Sessions Courts; but it was necessary in both cases that the magistrate or judge should himself be a European British subject. In 1883 the Government of India announced that they had decided "to settle the question of jurisdiction over European subjects in such a way as to remove from the code at once and completely every judicial disqualification which is based merely on race distinctions." This decision, embodied in the Ilbert Bill, aroused a storm of indignation which is still remembered. The controversy ended in a compromise which is thus summarised by Sir John Strachey ("India"). "The controversy ended with the virtual, though not avowed, abandonment of the measure proposed by the Government. Act III of 1884, by which the law previously in force was amended, cannot be said to have diminished the privileges of European British subjects charged with offences, and it left their position as exceptional as before. The general disqualification of native judges and magistrates remains; but if a native of India be appointed to the post of district magistrate or sessions judge, his powers in regard to jurisdiction over European British subjects are the same as those of an Englishman holding the same office. This provision however is subject to the condition that every European British subject brought for trial before the district magistrate or sessions judge has the right, however trivial be the charge, to claim to be tried by a jury of which

not less than half the number shall be Europeans or; Americans......Whilst this change was made in the powers of district magistrates, the law in regard to other magistrates remained unaltered." Since 1836 no distinctions of race have been recognised in the civil courts throughout India.

After a discussion on this subject in the Legislative Assembly in September 1921, the following motion was adopted:—"That in order to remove all racial distinctions between Indians and Europeans in the matter of their trial and punishment for offences, a committee be appointed to consider what amendments should be made in the provisions of the Code of Criminal Procedure, 1898, which differentiate between Indians and European British subjects and American and Europeans who are not British subjects in criminal trials and proceedings and to report on the best methods of giving effect to their proposals." As a result of the recommendations of the Racial Distinctions Committee the law on the subject was further modified, and by the Criminal Law Amendment Act XII of 1923 in place of the old Chapter XXXIII (55443-463) the new Chapter XXXIII (55443-449) with certain supplementary provisions were substituted. This has in some measure reduced the differences between the trials of Europeans and of Indians under the Code.

High Courts.

The highest legal tribunals in India are the High Courts of Judicature. These were constituted by the Indian High Courts Act of 1861 for Bengal, Bombay and Madras, and later for the United Provinces and the Punjab superseding the old supreme and Sudder Courts. More recently High Courts have been constituted for Patna and Rangoon as well. The Judges are appointed by the Crown; they hold office during the pleasure of the Sovereign; at least one-third of their number are barristers, one-third are recruited from the judicial branch of the Indian Civil Service, the remaining places being available for the appointment of Indian lawyers. Trial by jury is the rule in original criminal cases before the High Courts, but juries are never employed in civil suits in India.

For other parts of India High Courts have been formed under other names. The chief difference being that they derive their authority from the Government of India, not from Parliament. In Burma there is a Chief Court, with three or more judges; in the other provinces the chief appellate authority is an officer called the Judicial Commissioner. In Sind the Judicial Commissioner is termed Judge of the Sudder Court and has two colleagues.

The High Courts are the Courts of appeal from the superior courts in the districts, criminal and civil, and their decisions are final, except in cases in which an appeal lies to His Majesty in Council and is heard by the Judicial Committee of the Privy Council in England. The High Courts exercise supervision over all the subordinate courts. Returns are regularly sent to them at short intervals and the High Courts are able, by examining the returns, by sending for proceedings, and by calling for explanations, as well as from the cases that come before them in appeal, to keep themselves to some extent acquainted with the manner in which the courts generally are discharging their duties.

Lower Courts.

The Code of Criminal Procedure provides for the constitution of inferior criminal court-styled courts of session and courts of magistrates. Every province, outside the Presidency towns, is divided into sessions divisions consisting of one or more districts. and every sessions division has a court of session and a sessions judge, with assistance if need be. These stationary sessions courts take the place of the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the province. Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates; in the Presidency towns Presidency magistrates deal with magisterial cases and benches of Justices of the Peace or honorary magistrates dispose of the less important cases.

Trials before courts of session are either with assessors or juries. Assessors assist, but do not bind the judge by their opinions; on juries the opinion of the majority prevails if accepted by the presiding Judge. The Indian law allows considerable latitude of appeal. The prerogative of mercy is exercised by the Governor-General-in-Council and the Local Government concerned without prejudice to the superior power of the Crown.

The constitution and jurisdiction of the inferior civil courts varies. Broadly speaking one district and sessions judge is appointed for each district: as District Judge he presides in its principal civil court of original jurisdiction; his functions as Sessions Judge have been described. For these posts members of the Indian Civil Service are mainly selected though some appointments are made from the Provincial Service. Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of India. The civil courts, below the grade of District Judge, are almost invariably presided over by Indians. There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the Presidency Towns, where the Chartered High Courts have original jurisdiction, Small Cause Courts dispose of money suits up to Rs. 2,000. As Insolvency Courts the chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers were conferred on the District Courts by the Insolvency Act of 1906.

Coroners are appointed only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

Legal Practitioners.

Legal practitioners in India are divided into Barristers-at-Law, Advocates of the High Court; Vakils and Attorneys (Solicitors) of High Courts,

and Pleaders, Mukhtiars and revenue agents. Barristers and Advocates are admitted by each High Court to practise in it and its subordinate courts; and they alone are admitted to practise on the original side of some of the chartered High Courts. Vakils are persons duly qualified who are admitted to practise on the appellate side of the chartered High Courts and in the Courts subordinate to the High Courts. Attorneys are required to qualify before admission to practise in much the same way as in England. The rule that a solicitor must instruct counsel prevails only on the original side of certain of the High Courts. Pleaders practise in the subordinate courts in accordance with rules framed by the High Courts.

Organisation of the Bar.

At Calcutta, Madras, and Bombay there is a Bar Committee presided over, *ex-officio*, by the Advocate-General. This body is elected by the barristers practising in each High Court, and its functions are to watch the interests of the Bar and to regulate its etiquette. At Allahabad, Lahore, Nagpore, and Rangoon a similar Bar Committee exists, but the electorate is extended to include the vakils or native pleaders, and the president is either the senior practising member of the Bar or the Government Advocate. In the larger Districts and Sessions Courts, an organisation representing the Bar is usually to be found, and in the subordinate Courts, including the Revenue Courts similar machinery is generally in use. Pending an opportunity of detailed inquiries in India, these general descriptions must suffice. The recommendations of the Indian Bar Committee of 1923 relating to the constitution of Bar Councils for the several High Courts in India have been recently adopted by the Indian Bar Courts Act, XXXVIII of 1926.

Composition of the Bar.

A considerable change is occurring in the composition of the Indian Bar. The following extract from an informing article in the *Times* (May 25, 1914) indicates the character and incidence of this development. "During the last forty years, a striking change has taken place in the professional class. The bulk of practice has largely passed from British to Indian hands, while, at the same time, the profession has grown to an enormous extent. One typical illustration may be quoted. Attached to the Bombay High Court in 1871 there were 38 solicitors, of whom 10 were Indian and 28 English, and 24 advocates, of whom 7 were Indian and 17 English. In 1911, attached to the same High Court, there were 150 solicitors, of whom more than 130 were Indian and the remainder English, and 250 advocates, of whom 16 only were English and the remainder Indian."

Law Officers.

The Government of India has its own law colleague in the Legal Member of Council. All Government measures are drafted in this department. Outside the Council the principal law officer of the Government of India is the Advocate-General of Bengal, who is appointed by the Crown, is the leader of the local Bar, and is always nominated a member of the Provincial Legislative Council. In Calcutta he is assisted by the Standing Counsel and the Government Solicitor. There are Advocates-General and Government Solicitors for Bombay and Madras, and in Bombay there is attached to the Secretariat a Legal Remembrancer and an Assistant Legal Remembrancer, drawn from the Judicial Branch of the Indian Civil Service. The Government of Bengal consults the Bengal Advocate-General, the Standing Counsel and the Government Solicitor, and has besides a Legal Remembrancer (a Civil Servant) and a Deputy Legal Remembrancer (a practising barrister); the United Provinces are equipped with a civilian Legal Remembrancer and professional lawyers as Government Advocate and Assistant Government Advocate; the Punjab has a Legal Remembrancer, Government Advocate and a Junior Government Advocate; and Burma a Government Advocate, besides a Secretary to the Local Legislative Council.

Sheriffs are attached to the High Courts of Calcutta, Madras and Bombay. They are appointed by Government, selected from non-officials of standing, the detailed work being done by deputy sheriffs, who are officers of the Court.

Law Reports.

The Indian Law Reports are now published in seven series—Calcutta, Madras, Bombay, Allahabad, Patna, Lahore and Rangoon under the authority of the Governor-General-in-Council. They contain cases determined by the High Court and by the Judicial Committee on appeal from the particular High Court. These appeals raise questions of very great importance, and the Council of Law Reporting for England and Wales show their appreciation by printing the Indian Appeals in a separate volume, and have also compiled a digest of Indian Appeals covering the period 1874-1893. The other Provinces and States have series of reports issued under the authority either of the Judiciary or the State.

Legislative Power.

The supreme power of Parliament to legislate for the whole of India cannot be questioned in practice, however, this power is little used, there being a majority of officials on the Imperial Legislative Council—a majority deliberately reserved in the India Councils Act of 1909—the Secretary of State is able to impose his will on the Government of India and to secure the passage of any measure he may frame, regardless of the opinion of the Indian authorities. Legislative Councils have been established both for the whole of India and for the principal provinces. Their constitution and functions are fully described in detailing the powers of the Imperial and Provincial Councils (q.v.). To meet emergencies the Governor-General is vested with the power of issuing ordinances, having the same force as Acts of the Legislature, but they can remain in force for only six months. The power is very little used. The Governor-General-in-Council is also empowered to make regulations, having all the cogency of Acts, for the more backward parts of the country, the object being to bar the operation of the general law and permit the application of certain enactments only.

Davar, The Hon'ble Mr. Justice Jehangir Dinshah, Bar-at-Law.	Ditto. (Additional.)

and Pleaders, Mukhtiars and revenue agents. Barristers and Advocates are admitted by each High Court to practise in it and its subordinate courts; and they alone are admitted to practise on the original side of some of the chartered High Courts. Vakils are persons duly qualified who are admitted to practise on the appellate side of the chartered High Courts and in the Courts subordinate to the High Courts. Attorneys are required to qualify before admission to practise in much the same way as in England. The rule that a solicitor must instruct counsel prevails only on the original side of certain of the High Courts. Pleaders practise in the subordinate courts in accordance with rules framed by the High Courts.

Organisation of the Bar.

At Calcutta, Madras, and Bombay there is a Bar Committee presided over, *ex-officio*, by the Advocate-General. This body is elected by the barristers practising in each High Court, and its functions are to watch the interests of the Bar and to regulate its etiquette. At Allahabad, Lahore, Nagpore, and Rangoon a similar Bar Committee exists, but the electorate is extended to include the vakils or native pleaders, and the president is either the senior practising member of the Bar or the Government Advocate. In the larger Districts and Sessions Courts, an organisation representing the Bar is usually to be found, and in the subordinate Courts, including the Revenue Courts similar machinery is generally in use. Pending an opportunity of detailed inquiries in India, these general descriptions must suffice. The recommendations of the Indian Bar Committee of 1923 relating to the constitution of Bar Councils for the several High Courts in India have been recently adopted by the Indian Bar Courts Act, XXXVIII of 1926.

Composition of the Bar.

A considerable change is occurring in the composition of the Indian Bar. (a) Excludes 5,628 Suits against "Superior Courts."

(b) Excludes 43 cases transferred to Settlement Courts.

THE INDIAN POLICE.

Origins.—Cornwallis was the first Indian administrator to take the burden of policing the country off the zemindars and to place it on Government. He ordered the District Judges of Bengal in 1793 to open a Thana (Police Station) for every 400 square miles of their jurisdiction, and to appoint stipendiary thanadars (Police Station Officers) and subordinates.

In Madras in 1816 Sir Thomas Munro took superintendence of police out of the hands of the sedentary judges and placed it in the hands of the peripatetic Collector, who had the indigenous village police system already under his control. In this way the Revenue Department controlled the police of the districts and still to some extent does so, especially in Bombay Presidency.

In Khandesh from 1826-36 Outram of Mutiny fame showed how a whole time military commandant could turn incorrigible marauderers into excellent police; and Sir George Clerk, Governor of Bombay in 1848, applied the lesson by appointing full-time European Superintendents of Police in many Districts.

Madras had a torture scandal in 1853 which showed that 3 Collectors had no time for real police superintendence; in 1859 the principle of full-time European superintendence was introduced in a Madras Act of that year and the control of the Collector was removed.

The Mutiny led to general police overhaul and retrenchment and the Madras Act was mainly followed in India Act V of 1861, "An Act for the Regulation of Police", which still governs police working everywhere in India except Madras, and Bombay, which has its own Police Act (IV of 1890).

Working.—Strictly speaking there is no Indian Police. With the doubtful exceptions of the Delhi Imperial Area Police, and the advisory staff of the Intelligence Bureau attached to the Home Department, the Government of India has not a single police officer directly under its control. The police provided for by the 1861 Act is a provincialised police, administered by the Local Government concerned, subject only "to the general control" of the Governor General.

Within the Local Government area the police are enrolled and organised in District forces, at the head of each of which is a District Superintendent of Police with powers of enlistment and dismissal of constabulary; and Police Station Officers may also be dismissed by the D.S.P.

The D. S. P. is subject to dual control. The force he commands is placed at the disposal of the District Magistrate for the enforcement of law and the maintenance of order in the District. But the departmental working and efficiency of the force is governed by a departmental hierarchy of Deputy Inspector-General of Police, Inspector-General of Police, and Home Department. Generally speaking, the D. S. P. has to correspond with his District Magistrate on judicial and magisterial topics, and with his departmental chiefs on internal working of his force.

The C. I. D.—The Curzon Police Commission of 1902-3 modernised police working by providing for the direct enlistment and training of Educated Indians as Police Station Officers, and by creating specialised police agencies under each Local Government for the investigation of specialist and professional crime. These agencies are known as **Criminal Investigation Departments** and work under a Deputy Inspector General. They collate information about crime, edit the *Crime Gazette*, take over from the District Police crimes with ramifications into several jurisdictions, and they control the working of such scientific police developments as the Finger Print Identification Bureaux.

Headquarters and Armed Police.—At the chief town of each District the D. S. P. has his office and also his Headquarter Police Lines and parade ground. This is the main centre for accumulation and distribution to the Police Stations and Outposts of the District of clothing, arms, ammunition, and accoutrements Here are the Stores and the Armoury. Here also constabulary recruits enlisted by the D. S. P. are taught drill, deportment, and duties and are turned out to fill vacancies. The Headquarter Lines also contain the two hundred or so armed police who mount guard on Treasuries in the District, and also provide prisoner and treasure escort. Actually they form a small and mobile local army equipped with muskets (single loading) and bayonets. The most highly trained section of them go through a musketry course and are armed with 303 service rifles. At most head-quarters, but by no means all, there is also a reserve of mounted and armed police.

Thanas and Thanadars.—Almost throughout India the popular terms for Police Station and Police Station Officer are "Thana" and "Thanadar." It is at the Police Station that the public are most in touch with the police and the police with the public. Whether it be in a large city or in a mofussil hamlet the Thana is the place where people come with their troubles and their grievances against their neighbours or against a person or persons unknown. In dealing with such callers, the Thanadar, who like police of all ranks, is supposed to be always on duty, is chiefly guided by the Fourteenth Chapter of the Code of Criminal Procedure, and the Second Schedule at the end of that Code. This schedule shows nearly all penal offences and states whether or not they are "cognisable by the police." The fourteenth Chapter lays down that a cognisable complaint must then and there be recorded, visited, and investigated. A non-cognisable complaint is merely noted in a separate book and the complainant is told to go to court.

Police Prosecutors.—The complaint in a cognisable case not only has his complaint recorded and investigated without payment fee. If the thanadar succeeds in establishing a *prima facie* case against the accused, the prosecution in court is conducted free of charge by a police prosecutor, who is generally a junior pleader, engaged by Government to conduct police cases in the lower courts. Cases committed

to the Sessions are conducted by the Public Prosecutor or one of his Assistants, and the reports of these officers and the comments of the judge are a means for the D. S. P. to know whether his thanadars are doing their work properly.

Out Posts.—When the Police Commission of 1860 devised the plan of police that still holds the field, they laid down two criteria of the numbers required. One was one policeman per square mile: the other was one per thousand of population. In towns it is well enough to have the available police concentrated at the police station. But in the mofussil the thana is very often fifty miles distant from portions of its jurisdiction. It is in such cases profitable to detach a portion of the police station strength under a head constable to man an outpost where complaints can be received and investigation begun without the injured party having to undertake a long journey to the distant thana. The secret of good mofussil police working in normal times is dispersion. A single policeman, however junior, represents the rule of law and is an agent of Government.

The Chain of Promotion.—Ordinarily the constable may aspire to become a jamadar, or with ability and luck, a Police Station Officer or even Inspector. The directly recruited matriculate who comes in through the Police Training School as a Thanadar may ordinarily become an Inspector or a Deputy Superintendent, or exceptionally a Superintendent. The direct Deputy, an office reserved for Indians, has a good chance of becoming Superintendent, and perhaps Deputy-Inspector General. The direct Assistant Superintendent, whether from England, or from India, is sure of a Superintendentship, and has chances of D. I. G. after 25 years' service. The period of service for all ranks for full pension is thirty years, and if an officer dies in the process of earning full pension his pension dies with him and all his dependents get his provident fund.

Presidency Police.—In the Presidency Towns there is unified police control for the Police Commissioner is responsible for both law and order and for departmental training and efficiency.

The Commissioner of Police of a Presidency Town is not the subordinate of the Provincial Inspector-General of Police and he deals direct with Government, just as the Presidency Magistrates deal directly with the High Court. The Criminal Procedure Code of India is superseded in the Presidency Towns by special police Acts which prescribe police procedure. Justice in criminal cases in Presidency Towns is somewhat rough and ready, not only from this cause, but also because Presidency Magistrates can give upto six months or Rs. 200 fine summarily, *i.e.*, without formal record of proceedings; and if only whipping or fine up to Rs. 200 is inflicted there need be not even any statement of reasons for the conviction.

Round Figures.—The process of reorganisation and retrenchment goes on ceaselessly, annual administration reports for the ten major provinces and four minor administrations appeared tardily, and there are no unified statistics for the police of India and Burma. The following figures are therefore merely to be regarded as approximations, giving a general idea of the numbers of police and the volume of work put through yearly:—There are about 30,000 Military Police, chiefly in Burma, Assam, and Bengal, and these cost about one and a third crores. The maintenance of them is a departure from the principles laid down by the 1860 Commission and the 1861 Act.

Provincial Police including Burma total about 200,000 and cost ten and a half crores or an average of about one crore per major Province.

There are about 10,000 Thanas or Police Stations which annually investigate from five to six thousand murders, four thousand dacoities, twenty-five thousand cattle thefts, one hundred and seventy ordinary thefts, and as many burglaries. They place on trial every year about three-quarters of a million persons, of whom about half a million or more are convicted. The jail population of India, which is over a hundred thousand, consists of many habituals who on release proceed to prey on the public until such time as the police again secure their conviction and incarceration.

STATISTICS OF POLICE WORK.

The undesirability of attaching undue importance to statistical results as a test of the merits of police work was a point upon which considerable stress was laid by the Indian Police Commission, who referred to the evils likely to result from the prevalence among subordinate officers of an impression that the advancement of an officer would depend upon his being able to show a high ratio of convictions, both to cases and by persons arrested, and a low ratio of crime. The objection applies more particularly to the use of statistics for small areas; but they cannot properly be used as a basis of comparison even for larger areas without taking into account the differences in the conditions under which the police work; and, it may be added, they can at the best indicate only very imperfectly the degree of success with which the police carry out that important branch of their duties, which consists in the prevention of crime. These considerations have been emphasized in recent orders of the Government of India. Subject to these observations, the figures below may be given as some indication of the volume of work falling upon the police, and of the wide differences between the conditions and the statistical results in different provinces. They are statistics of cognizable crime:—

Administrations.	Number of Cases pending from previous Year.	Number of Offences reported.	Number of Persons Tried.	Persons whose Cases were disposed of		Persons in custody pending trial or investigation at end of the year.

JAILS.

Jail administration in India is regulated generally by the Prisons Act of 1894, and by rules issued under it by the Government of India and the local governments. The punishments authorised by the Indian Penal Code for convicted offenders include transportation, penal servitude, rigorous imprisonment (which may include short periods of solitary confinement), and simple imprisonment. Accommodation has also to be provided in the jails for civil and under-trial prisoners.

The origin of all jail improvements in India in recent years was the Jail Commission of 1889. The report of the Commission, which consisted of only two members, both officials serving under the Government of India, is extremely long, and reviews the whole question of jail organization and administration in the minutest detail. In most matters the Commission's recommendations have been accepted and adopted by Local Governments, but in various matters, mainly of a minor character, their proposals have either been rejected *ab initio* as unsuited to local conditions, abandoned as unworkable after careful experiment or accepted in principle but postponed for the present as impossible.

The most important of all the recommendations of the Commission, the one that might in fact be described as the corner stone of their report, is that there should be in each Presidency three classes of jails: in the first place, large **central jails** for convicts sentenced to more than one year's imprisonment; secondly, **district jails** at the head-quarters of districts; and, thirdly, **subsidiary jails** and "lock-ups" for under-trial prisoners and convicts sentenced to short terms of imprisonment. The jail department in each province is under the control of an Inspector-General; he is generally an officer of the Indian Medical Service with jail experience, and the Superintendents of certain jails are usually recruited from the same service. The district jail is under the charge of the civil surgeon, and is frequently inspected by the district magistrate. The staff under the Superintendent includes, in large central jails, a Deputy Superintendent to supervise the jail manufactures, and in all central and district jails one or more subordinate medical officers. The executive staff consists of jailors and warders, and convict petty officers are employed in all central and district jails, the prospect of promotion to one of these posts being a strong inducement to good behaviour. A Press Note issued by the Bombay Government in October, 1915, says:—"The cadre and emoluments of all ranks from Warder to Superintendent have been repeatedly revised and altered in recent years. But the Department is not at all attractive in its lower grades. The two weak spots in the jail administration at the moment are the insufficiency of Central Prisons and the difficulty of obtaining good and sufficient warders."

The Jails Committee.—Since the introduction of the reformed constitution the maintenance of the Indian Prisons falls within the sphere of provincial Governments, and is subject to all India legislation. The obvious advisability of proceeding along certain general lines of uniform application led lately to the appointment of a Jails Committee, which conducted the first comprehensive survey of Indian prison administration which had been made for thirty years. Stress was laid by the Committee upon the necessity of improving and increasing existing jail accommodation; of recruiting a better class of warders; of providing education for prisoners; and of developing prison industries so as to meet the needs of the consuming Departments of Government. Other important recommendations included the separation of civil from criminal offenders; the adoption of the English system of release on license in the case of adolescents; and the creation of children's courts. The Committee found that the reformative side of the Indian system needed particular attention. They recommended the segregation of habituals from ordinary prisoners; the provision of separate accommodation for prisoners under trial; the institution of the star-class system; and the abolition of certain practices which are liable to harden or degrade the prison population.

Employment of Prisoners.—The work on which convicts are employed is mostly carried on within the jail walls, but extra-mural employment on a large scale is sometimes allowed; as, for example; when a large number of convicts were employed in excavating the Jhelum Canal in the Punjab. Within the walls prisoners are employed on jail service and repairs, and in workshops. The main principle laid down with regard to jail manufactures is that the work must be penal and industrial. The industries are on a large scale, multifarious employment being condemned, while care is taken that the jail shall not compete with local traders. As far as possible industries are adapted to the requirements of the consuming public departments, and printing, tent-making, and the manufacture of clothing are among the commonest employments. Schooling is confined to juveniles; the experiment of teaching adults has been tried, but literary instruction is unsuitable for the class of persons who fill an Indian jail.

The conduct of convicts in jail is generally good, and the number of desperate characters among them is small. Failure to perform the allotted task is by far the most common offence. In a large majority of cases the punishment inflicted is one of those classed as "minor." Among the "major" punishments fetters take the first place. Corporal punishment is inflicted in relatively few cases, and the number is steadily falling. Punishments were revised as the result of the Commission of 1889. Two notable punishments then abolished were shaving the heads of female prisoners and the stocks. The latter, which was apparently much practised in Bombay, was described by the Commission as inflicting exquisite torture. Punishments are now scheduled and graded into major and minor. The most difficult of all jail problems is the internal maintenance of order among the prisoners, for which purpose paid

STATISTICS OF POLICE WORK.

The undesirability of attaching undue importance to statistical results as a test of the merits or police work was a point upon which considerable stress was laid by the Indian Police Commission, who referred to the evils likely to result from the prevalence among subordinate officers of an impression that the advancement of an officer would depend upon his being able to show a high ratio of convictions, both to cases and by persons arrested, and a low ratio of crime. The objection applies more particularly to the use of statistics for small areas; but they cannot properly be used as a basis of comparison even for larger areas without taking into account the differences in the conditions under which the police work; and, it may be added, they can at the best indicate only very imperfectly the degree of success with which the police carry out that important branch of their duties, which consists in the prevention of crime. These considerations have been emphasized in recent orders of the Government of India. Subject to these observations, the figures below may be given as some indication of the volume of work falling upon the police, and of the wide differences between the conditions and the statistical results in different provinces. They are statistics of cognizable crime:—

Administrations.	Number of Cases pending from previous Year.	Number of Offences reported.	Number of Persons Tried.	Persons whose Cases were disposed of: Discharged or Acquitted.	Persons whose Cases were disposed of: Convicted.	Persons in custody pending trial or investigation at end of the year.

JAILS.

Jail administration in India is regulated generally by the Prisons Act of 1894, and by rules issued under it by the Government of India and the local governments. The punishments authorised by the Indian Penal Code for convicted offenders include transportation, penal servitude, rigorous imprisonment (which may include short periods of solitary confinement), and simple imprisonment. Accommodation has also to be provided in the jails for civil and under-trial prisoners.

The origin of all jail improvements in India in recent years was the Jail Commission of 1889. The report of the Commission, which consisted of only two members, both officials serving under the Government of India, is extremely long, and reviews the whole question of jail organization and administration in the minutest detail. In most matters the Commission's recommendations have been accepted and adopted by Local Governments, but in various matters, mainly of a minor character, their proposals have either been rejected *ab initio* as unsuited to local conditions, abandoned as unworkable after careful experiment or accepted in principle but postponed for the present as impossible.

The most important of all the recommendations of the Commission, the one that might in fact be described as the corner stone of their report, is that there should be in each Presidency three classes of jails: in the first place, large **central jails** for convicts sentenced to more than one year's imprisonment; secondly, **district jails** at the head-quarters of districts; and, thirdly, **subsidiary jails** and "lock-ups" for under-trial prisoners and convicts sentenced to short terms of imprisonment. The jail department in each province is under the control of an Inspector-General: he is generally an officer of the Indian Medical Service with jail experience, and the Superintendents of certain jails are usually recruited from the same service. The district jail is under the charge of the civil surgeon, and is frequently inspected by the district magistrate. The staff under the Superintendent includes, in large central jails, a Deputy Superintendent to supervise the jail manufactures, and in all central and district jails one or more subordinate medical officers. The executive staff consists of jailors and warders, and convict petty officers are employed in all central and district jails, the prospect of promotion to one of these posts being a strong inducement to good behaviour. A Press Note issued by the Bombay Government in October, 1915, says:—"The cadre and emoluments of all ranks from Warder to Superintendent have been repeatedly revised and altered in recent years. But the Department is not at all attractive in its lower grades. The two weak spots in the jail administration at the moment are the insufficiency of Central Prisons and the difficulty of obtaining good and sufficient warders."

The Jails Committee.—Since the introduction of the reformed constitution the maintenance of the Indian Prisons falls within the sphere of provincial Governments, and is subject to all India legislation. The obvious advisability of proceeding along certain general lines of uniform application led lately to the appointment of a Jails Committee, which conducted the first comprehensive survey of Indian prison administration which had been made for thirty years. Stress was laid by the Committee upon the necessity of improving and increasing existing jail accommodation; of recruiting a better class of warders; of providing education for prisoners; and of developing prison industries so as to meet the needs of the consuming Departments of Government. Other important recommendations included the separation of civil from criminal offenders; the adoption of the English system of release on license in the case of adolescents; and the creation of children's courts. The Committee found that the reformative side of the Indian system needed particular attention. They recommended the segregation of habituals from ordinary prisoners; the provision of separate accommodation for prisoners under trial; the institution of the star-class system; and the abolition of certain practices which are liable to harden or degrade the prison population.

Employment of Prisoners.—The work on which convicts are employed is mostly carried on within the jail walls, but extramural employment on a large scale is sometimes allowed; as, for example; when a large number of convicts were employed in excavating the Jhelum Canal in the Punjab. Within the walls prisoners are employed on jail service and repairs, and in workshops. The main principle laid down with regard to jail manufactures is that the work must be penal and industrial. The industries are on a large scale, multifarious employment being condemned, while care is taken that the jail shall not compete with local traders. As far as possible industries are adapted to the requirements of the consuming public departments, and printing, tent-making, and the manufacture of clothing are among the commonest employments. Schooling is confined to juveniles; the experiment of teaching adults has been tried, but literary instruction is unsuitable for the class of persons who fill an Indian jail.

The conduct of convicts in jail is generally good, and the number of desperate characters among them is small. Failure to perform the allotted task is by far the most common offence. In a large majority of cases the punishment inflicted is one of those classed as "minor." Among the "major" punishments fetters take the first place. Corporal punishment is inflicted in relatively few cases, and the number is steadily falling. Punishments were revised as the result of the Commission of 1889. Two notable punishments then abolished were shaving the heads of female prisoners and the stocks. The latter, which was apparently much practised in Bombay, was described by the Commission as inflicting exquisite torture. Punishments are now scheduled and graded into major and minor. The most difficult of all jail problems is the internal maintenance of order among the prisoners, for which purpose paid

warders and convict warders are employed. With this is bound up the question of a special class of well-behaved prisoners which was tried from 1905 onwards in the Thana Jail.

Juvenile Prisoners.—As regards "youthful offenders"—*i.e.*, those below the age of 15 —the law provides alternatives to imprisonment, and it is strictly enjoined that boys shall not be sent to jail when they can be dealt with otherwise. The alternatives are detention in a reformatory school for a period of from three to seven years, but not beyond the age of 18; discharge after admonition; delivery to the parent or guardian on the latter executing a bond to be responsible for the good behaviour of the culprit; and whipping by way of school discipline.

The question of the treatment of "young adult" prisoners has in recent years received much attention. Under the Prisons Act, prisoners below the age of 18 must be kept separate from older prisoners, but the recognition of the principle that an ordinary jail is not a fitting place for adolescents (other than youthful habituals) who are over 15, and therefore ineligible for admission to the reformatory school, has led Local Governments to consider schemes for going beyond this by treating young adults on the lines followed at Borstal, and considerable progress has been made in this direction. In 1905, a special class for selected juveniles and young adults was established at the Dharwar jail in Bombay; in 1908 a special juvenile jail was opened at Alipore in Bengal; in 1909 the Meiktila jail in Burma and the Tanjore jail in Madras were set aside for adolescents, and a new jail for juvenile and "juvenile adult" convicts was opened at Bareilly in the United Provinces; and in 1910 it was decided to concentrate adolescents in the Punjab at the Lahore District jail, which is now worked on Borstal lines. Other measures had previously been taken in some cases; a special reformatory system for "juvenile adults" had, for example, been in force in two central jails in the Punjab since the early years of the decade, and "Borstal enclosures" had been established in some jails in Bengal. But the public is slow to appreciate that it has a duty towards prisoners, and but little progress has been made in the formation of Prisoners' Aid Societies except in Bombay and Calcutta, though even in those cities much remains to be done.

Reformatory Schools.—These schools have been administered since 1899 by the Education department, and the authorities are directed to improve the industrial education of the inmates, to help the boys to obtain employment on leaving school, and as far as possible to keep a watch on their careers.

Transportation.—Transportation is an old punishment of the British Indian criminal law, and a number of places were formerly appointed for the reception of Indian transported convicts. The only penal settlement at the present time is Port Blair in the Andaman Islands.

Commission of Enquiry, 1919.—A committee was appointed to investigate the whole system of prison administration in India with special reference to recent legislation and experience in Western countries. Its report, published in 1921, was summarised in the Indian Year Book, 1922 (pages 670-671). A number of reforms were advocated but, owing to financial stringency, it has not yet been possible to introduce some of the more important of them.

Fines and Short Sentences.—Those sections of the Indian Penal Code, under which imprisonment must be awarded when a conviction occurs, should be amended so as to give discretion to the court. Sentences of imprisonment for less than twenty-eight days should be prohibited.

The Indeterminate Sentences.—The sentence of every long-term prisoner should be brought under revision, as soon as the prisoner has served half the sentence in the case of the non-habitual, and two-thirds of the sentence in the case of the habitual, remission earned being counted in each case. The revision should be carried out by a Revising Board, composed of the Inspector-General of Prisons, the Sessions Judge and a non-official. In all cases, the release of a prisoner on parole should be made subject to conditions, breach of which would render him liable to be remanded to undergo the full original sentence. The duty of seeing that a prisoner fulfils the conditions on which he was released should not be imposed upon the police or upon the village headman, but special officers, to be termed parole officers, should be appointed for the purpose. These parole officers should possess a good standard of education, though not necessarily a university degree, and should both protect and advise the released prisoner and report breaches of the conditions of release.

Transportation and the Andamans.—If any fresh attempt at colonisation is made, it should be in an entirely new locality. A fresh attempt at colonisation in the Middle Andaman is not recommended. The retention of the settlement at Port Blair on the present lines is not recommended. The entire abandonment of the Andamans as a place of deportation is not recommended. Deportation to the Andamans should cease, except in regard to specially dangerous prisoners and any others whose removal from Indian jails is considered by the Government to be in the public interests. The existing restrictions as to age and physical condition of prisoners sentenced to transportation to the Andamans should, unless special medical grounds exist in any particular case, cease to apply. The Indian Penal Code should be amended by the substitution of rigorous imprisonment for transportation. In provinces where the available prison accommodation will not permit of the immediate cessation of deportation of all but selected prisoners, the Star class should be the first, and the habitual the last, to be detained in Indian jails. No female should in future be deported to the Andamans, and those now there should be brought back to India and distributed among the Provinces to which they belong. In those Provinces where the jails are insufficient to detain prisoners now deported, additional accommodation should be provided as soon as possible.

Criminal Tribes.—The first essential of success in dealing with the criminal tribes is the provision of a reasonable degree of economic

comfort for the people. It is therefore of paramount importance to locate settlements where sufficient work at remunerative rates is available. Large numbers of fresh settlers should never be sent to a settlement without first ascertaining whether there is work for them. Commitment to settlements should, as far as possible, be by gangs not by individuals. It is desirable to utilise both Government and private agency for the control of settlements.

The variations of the jail population in British India during the five years ending 1926 are shown in the following table:—

—	1926.	1925.	1924	1923.	1922.
Jail population of all classes on 1st January	129,753	128,314	126,478	134,286	126,917
Admissions during the year	555,097	536,219	536,428	535,590	639,001
Aggregate	684,850	664,533	662,906	669,876	765,918
Discharged during the year from all causes	552,624	534,779	534,455	543,398	631,628
Jail population on 31st December ..	132,226	129,754	128,451	126,478	134,290
Convict population on 1st January ..	111,395	110,310	109,230	114,817	106,117
Admissions during the year	162,772	158,139	158,466	158,336	185,092
Aggregate	274,167	268,449	267,696	273,153	291,209
Released during the year	157,568	153,997	155,219	161,166	173,313
Transported beyond seas	783	616	571	329	1,514
Casualties, &c.	2,286	2,089	2,340	2,428	3,244
Convict population on 31st December.	113,274	111,395	110,399	109,314	114,817

More than one half of the total number of convicts received in jails during 1926 came from the classes engaged in agriculture and cattle tending, about 131,000 out of 163,000 are returned as illiterate.

The percentage of previously convicted prisoners was 20·94 as against 20·28 in 1925 while the number of youthful offenders rose from 343 to 378. The following table shows the **nature and length of sentences** of convicts admitted to jails in 1924 to 1926 :—

Nature and Length of Sentence.	1926.	1925.	1924.
Not exceeding one month	30,637	32,499	30,675
Above one month and not exceeding six months.	64,147	64,286	64,933
„ six months „ „ one year ..	34,971	31,429	30,972
„ one year „ „ five years ..	25,912	23,299	24,975
„ five years „ „ ten „ ..	3,790	3,581	3,856
Exceeding ten years	524	350	514
Transportation beyond seas—			
(a) for life	1,685	1,540	1,475
(b) for a term	36	117	114
Sentenced to death	1,057	988	942

The total daily average population for 1926 was 111,892, the total offences dealt with by criminal courts was 199, and by Superintendents 117,433. The corresponding figures for 1925 were 109,227; 273 and 127,095, respectively.

The total number of corporal punishments showed a decrease, *viz.*, from 210 to 204. The total number of cases in which penal diet (with and without solitary confinement) was prescribed was 5,312 as compared with 4,988 in the preceding year.

Total expenditure increased from Rs. 1,65,58,713 to Rs. 1,71,22,795 and total cash earnings increased from Rs. 24,71,694 to Rs. 25,55,913, there was consequently an increase of Rs. 4,62,654 in the net cost to Government.

The death rate in 1925 excluding the Andamans was 14·42 and including of them 15·34, both being below those for 1923 (14·95 and 16·0) and the decennial mean (22·04 and 23·21).

The Laws of 1928

BY

RATANLAL AND DHIRAJLAL,

Editors of the "Bombay Law Reporter."

1. The Burma Salt (Amendment) Act—Under the Devolution Rules, made under Section 45A of the Government of India Act, the Salt Act has become a central subject. It was, therefore, found necessary to vest in the Governor-General in Council powers of control in respect of that subject. Amendments have been made in the Act to substitute "Central Board of Revenue" in place of "Local Government" and "Superintendent" in place of "Collector."

2. The Indian Securities (Amendment) Act.—The object of this Act is to enable a company to hold Government Securities jointly with a private individual or another corporate body and to empower Government to pay the amount of the security to the surviving joint holder in any case that may arise. It is drawn on the lines of the Bodies Corporate (Joint Tenancy) Act 1899, of England. It enacts that a body incorporated under law shall be deemed to die when it is dissolved.

3. The Indian Income-Tax (Amendment) Act.—The law relating to income-tax is in a state of perpetual flux. Sometimes lacunæ are discovered in the Act which enable persons to escape lightly: sometimes its provisions are found to operate harshly on the payers. To remedy both these defects the present Act was passed. The first amendment enables the assessee to claim exemption for the value of animals used for the purposes of the trade, which die and are not replaced. A new Section (25A) has been added. It meets with the situation when a Hindu family which was joint has been divided before the end of the year previous to assessment. In such a case income tax is assessed on the whole income of the joint family: but the amount is levied on each member *pro rata* his share on partition. Each member, however, continues to remain jointly and severally liable to the income-tax authorities for the whole amount. Section 26 of the Act has been amended to provide for two contingencies. First, when a change has occurred in the constitution of a firm or a firm has been newly constituted, it is competent to the income-tax authorities to assess the firm and its members just as if the firm had been constituted throughout the previous year and as if the members had received their due share of profits in that year. Secondly, where there is a change in the ownership of business the incoming member or members is or are liable to pay income-tax as if he or they had been carrying on the business throughout the previous year. In both cases, legislature has taken precautions to see that a new member or a new concern does not escape payment of the income-tax in the first year of his or its business. It is interesting to inquire how a defunct partnership or an outgoing member is made amenable to income tax on the profit made in the last year of its existence or his membership. Section 42 of the Act has been amended in an important particular. Where a person outside British India imports merchandise into British India and makes profits on their sales by himself or through an agency, he is liable to be assessed to income tax on the amount of such gains or profits.

4. The Inland Bonded (Warehouses) Amendment Act.—Under the law as it stood before the amendment no goods could be taken for warehousing at an inland bonded warehouse unless they had been previously deposited in a warehouse, at a customs port. In practice, however, such goods were removed direct from the wharf or ship's side. The purpose of the present amendment is to legalise the practice which has been found to be convenient.

5. The Indian Finance Act.—The purpose of the present Act is to provide for the continuance of the rates of salt duty, postage, income tax and super tax, during the year 1928, on the existing scale.

6. The Indian Merchant Shipping (Amendment) Act.—Under the Devolution Rules, the subject of shipping and navigation has been allotted to the Government of India. It used to be administered hitherto by the Local Governments as agents of the Central Government. The control is now transferred to the Government of India. To facilitate work during the period of transition, it has also been enacted that the Governor-General in Council may delegate his powers to the local Governments concerned either absolutely or subject to conditions.

7. The Indian Tariff (Amendment) Act—The import duty levied on gold and silver sheets and plates, paper money, illustrations specially made for binding in books, specimens illustrative of natural science, and stone prepared as for road metalling is taken off. The duty imposed on currents is reduced to Rs. 1-4-0 per cwt., and on silver-plated surgical instruments it is reduced from 30 to 15 per cent. The duty on white portland cement is raised from Rs. 9 per ton to 15 per cent. *ad valorem.* A fresh duty of 5 per cent. is levied on imported cotton, hair and canvas ply, belting for machinery.

8. The Steel Industry (Protection) Act—The Act aims at discrimination in the protective duty on steel industry. It removes altogether the protection duty hitherto levied on certain kinds of iron or steel nails and wire. The duty levied on iron or steel belts and nuts including hookbolts and nuts for roofing is reduced from 10 per cent. *ad valorem* to Rs. 2 per cwt.

9. The Indian Territorial Force (Amendment) Act.—This Act and the following one are the outcome of the recommendations made by the Auxiliary and Territorial Force

Committee of 1925. The Indian Territorial Force consists of three kinds of units: (1) the provincial unit: (2) the urban unit: and (3) the University training corps. The third one is left untouched. It is provided that the provincial unit, which will be recruited from all classes of men in a province, will have an extended annual period of training. It will be recognised as the main part of a second line of the regular Indian Army: and it will be liable for military service both within and without the borders of India. The urban unit will be recruited from the educated classes of the large towns. The conditions of training will be similar to those of the Auxiliary force. The status will be like that of the provincial unit: but it will not be called upon for military service beyond the limits of their province. The provisions of this Act and the Auxiliary Force Act are assimilated so far as they relate to urban units.

10. The Auxiliary Force (Amendment) Act.—As stated above, the purpose of the Act is to assimilate the substance of the Auxiliary Force Act to the provisions regarding urban units contained in the Indian Territorial Force Act.

11. The Chittagong Port (Amendment) Act.—The port of Chittagong has developed from a minor port to a major one, forming, as it does, the outlet to the sea of the Province of Assam. It is declared a major port, and the statutory control of its administration is transferred from the Government of Bengal to the Governor-General of India in Council. With a view to give more effective representation to local interests, a Board of Commissioners for the port has been reconstituted. The Board consists of the Chairman, the Collector of the Chittagong District, the Customs Collector of the Port, one Commissioner each appointed by the Governor-General in Council and by the Assam-Bengal Railway; three Commissioners elected by the Chamber of Commerce at Chittagong and three Commissioners elected by the Chittagong Indian Merchant Association; and one Commissioner elected by the Municipal Commissioner of Chittagong. The tenure of elected members is to be of two years.

12. Hindu Inheritance (Removal of Disabilities) Act.—Under the Hindu law as derived from ancient Sanskrit texts a person suffering from congenital lunacy or idiocy is excluded from the right of inheritance in a joint family. This rule had excellent reasons in its support so long as the joint family was the order of the day. The present state of society leans towards disintegration of joint families. It is inequitable, therefore, that the unfortunate lunatic or idiot should be left without any means of support. The Act provides that such a person should not be excluded from inheritance or from any right or share in joint family property by reason only of any disease, deformity or physical or mental defect.

13. The Indian Mines (Amendment) Act. The purpose of this act is to ameliorate the condition of labourers working in the mines. No mine is allowed to work for more than twelve hours out of twenty-four through the same set of workmen. If continuous work is desired for all the twenty-four hours in a day, it can be done by adopting a system of shifts of twelve hours from a batch of workmen (Section 23A). In all cases, it is obligatory on the owners of mines to put up notices outside the offices stating the hours of work and the shifts of workmen.

14. The Indian Succession (Amendment) Act.—The administrator of the property belonging to a deceased person can obtain a certificate in respect of any debt or debts due to the deceased creditor or in respect of portions thereof. He is relieved from the necessity of taking out the certificate for the whole estate.

15. The Indian Trade Unions (Amendment) Act.—Section 10 of the principal Act has been remodelled with a view to dispel doubts that existed regarding the powers of appeal under the Act. Where the Registrar refuses to register or cancels the registration of a trade union the aggrieved union if situated within the limits of a presidency town or Rangoon may appeal to the High Court, or if the head-office is situated in any other area may appeal to the Court not inferior to that of an additional or assistant Judge. In the latter case, there is a right of further appeal to the High Court.

16. The Indian Income-Tax (Amendment) Act.—The administration and control of the department for collecting income-tax have passed into the hands of the Governor-General of India under the Devolution Rules. The practice hitherto was for the Central Government to consult the local Government concerned before making an appointment to a Commissionership of income-tax. This practice is now done away with and an all-India cadre of Commissioners of Income-tax is created.

17. The Match Industry (Protection) Act.—The Government of India had levied import duty on matches and their materials. It is now converted into a protective duty on the recommendation of the Tariff Board. A duty of Rs. 1-8-0 is levied on a gross of boxes each box containing 100 matches. A duty of Rs. 0-4-6 is levied on every pound of undipped splints such as are ordinarily used for match-making; while veneers used for making boxes are subjected to a duty of Rs. 0-6-0 per pound.

18. The Repealing And Amending Act. The purpose of this Act is to remove or rectify obsolete provisions in the Acts of the Imperial Legislature. One noteworthy amendment in Section 16 of the General Clauses Act of 1917 is to make it clear that the authority empowered to make an appointment has also the power of suspending or dismissing a person appointed in the exercise of the same power by another authority. It is also made clear that the exemptions granted by the Stamp Act to combatants are extended to non-combatants enrolled under the Indian Army Act 1911. An important amendment has been made to Section 98 of the Civil Procedure Code 1908, which says:—"Nothing in this Section (98) shall be deemed to alter or otherwise affect any provision of the Letters Patent of any High Court."

19. The Madras Salt (Amendment) Act. An officer making an arrest is given the power to release an accused person on bail for his appearance before the Inspector. This will

minimise the inconvenience and hardship that an accused person may be otherwise put to, of either having to wait for some time or to go some distance before he is liberated on bail.

20. The Indian Insurance Companies Act.—A new Section (26A) has been inserted in the Indian Life Insurance Companies Act 1912, which provides that in case of liquidation of a life assurance company the surplus of any profits shall be allocated to shareholders in the proportion in which the profits were allocated during the last ten years. This is enacted with a view to protect the interests of policy-holders. A new part (Part III) has been added to the main Act, containing provisions as to insurance business. Every such insurance company has every year to deposit with the Governor-General in Council four copies of the report on the affairs of the company, balance sheet, revenue account and profit and loss account (Sec. 7). Such company is under an obligation to report to the Governor-General in Council (1) the amount of premiums derived from business effected in India; (2) the amount of claims paid to claimants in India, and (3) the amount of claims paid to claimants outside India (Sec.8). It has also to submit a statement showing the investment of the company in India in Government securities and otherwise (Sec. 9. Non-compliance with the provisions of the Act (Se.16) and falsification of accounts are penalised (Sec. 17). These offences are triable either by a Presidency Magistrate or a Magistrate of the First Class (S. 18). A company doing the work of re-insurance on contract of insurance effected by the companies is not affected by the Act (Sec. 19) A provident insurance society can be exempted from the operation of the Act (Sec.20)

21. The Indian Succession (Second Amendment) Act—In 1926 the Indian Succession Act of 1925 was so amended as to make it obligatory that all wills made by Hindus, Buddhists, Sikhs and Jains after January 1, 1927, should be reduced to writing, signed and attested. The present Act makes it clear that it is not obligatory that all such wills should compulsorily require probate or letters of administration.

Labour.

Various causes hav e combined to give added importance to the great group of human activities concentrated under the generic term of Labour. India is still a predominantly agricultural country and more than seventy per cent. of its people are dependent on the soil for their livelihood. Nevertheless a process of industrialisation has gone steadily forward. Calcutta and Bombay are great manufacturing cities. Whilst the jute mills dominate Calcutta and the cotton mills Bombay, there has grown up round these industries a substantial body of other manufactories. Another considerable manufacturing centre has developed at Cawnpore, with cotton, wool and leather factories. The textile industry of Bombay has overflowed into the mofussil, and Ahmedabad and Sholapore are considerable centres of manufacture, with a lesser one at Broach. There are also a fairly large number of cotton mills in Baroda state. In the Central Provinces the cotton mills of Nagpur are famous throughout India. The Province of Bihar and Orissa is the centre of the great coal mining trade, having absorbed the bulk of the coal mines formerly included in the Province of Bengal. It also embraces the most remarkable example of scientific industrialism in India in the works of the Tata Iron and Steel Company at Jamshedpur, where in what was jungle fifteen years ago a considerable city has sprung up, which produces over a million tons of steel a year, and houses subsidiary industries which combined with the iron and steel works will probably maintain a city of a quarter of a million in the near future. The railway works of the North-Western Railway form the core of the industrialism of the Punjab, where other manufactories are developing. The industrial expansion in India may be judged from the number of factories coming under the operation of the Indian Factories Act of 1911 as amended by the Act of 1922, which amounted to 6,926 for the whole of British India during the year 1925 and rose in 1926 to 7,251. The number of operatives in the same years were 1,494,958 and 1,518,391 respectively, the figures being of the daily average. The industrial development of the Punjab is certain in the comparatively near future to receive considerable impetus from the fruition of vocational education and the completion of the vast hydro-electric schemes.

Social Consciousness.

Side by side with this industrialization there has grown an increased social consciousness of the responsibility of the community towards Labour. The Government of India passed its first Factory Act in 1881 and amended it in 1891. But experience showed that these Acts permitted considerable abuses and largely as the result of the agitation raised by *The Times of India* in Bombay in 1905 against the excessive hours worked in the Bombay textile mills inquiries were set afoot which resulted in the passing of a new Act which limited the hours of labour in 1911. With the constitution of the League of Nations, India as a signatory thereto became a participator in the decisions of the League on Labour questions. India was represented at the International Labour Conference held in Washington in 1919 and by her ratifying various conventions it became obligatory on her to enact legislation giving effect to the decisions of the Conference. Another International Labour Conference was held at Genoa in 1920 to consider a number of questions relating to seamen, such as the hours of labour, manning scales, accommodation, the provision for finding employment and other cognate questions and the Third and Fourth Sessions of the Conference were held at Geneva in 1921 and 1922. The Fifth Session of the Conference assembled on 22nd Oct. 1923 and dealt with only one item of importance—factory inspection. The Sixth Session of the Interna-

tional Labour Conference was held in Geneva from the 16th June to the 5th July 1924. Forty countries were represented at the Conference. The agenda of the Conference comprised (1) Development of facilities for utilisation of workers' leisure, (2) equality of treatment for national and foreign workers as regards compensation for accidents, (3) weekly suspension of work for twenty-four hours in glass manufacturing processes where tank furnaces are used: and (4) night work in bakeries. The Seventh Season was held at Genoa on the 21st May 1925. The agenda consisted of three main items—(1) equality of treatment for national and foreign workers as regards compensation for accidents; (2) weekly suspension of work for 24 hours in glass manufacturing processes where tank furnaces are used; and (3) night work in bakeries. The Eighth Session of the Conference was held at Geneva on the 26th May 1926 and the Ninth Session immediately after on the 7th June. The Eighth Session dealt with the question of the simplification of the Inspection of Emigrants on Boardships. The Ninth Session was devoted entirely to the consideration of maritime problems—the main question dealt with being the International Codification of the Rules relating to Seamen's articles of agreement, and general principles for the inspection of the conditions of work of seamen. The Tenth Session of the International Labour Conference was held at Geneva from 25th May to 16th June 1927. The principal items on the Agenda of the Conference were (1) Sickness Insurance, (2) Freedom of Association, and (3) Minimum Wage Fixing Machinery. The Eleventh Session was held from the 30th May to 16th June, 1928. The Agenda included (1) Minimum Wage Fixing Machinery, and (2) Prevention of Industrial Accidents. The Conference adopted a Draft Convention concerning the creation or maintenance, of Minimum wage of fixing machinary in trades, particularly home working trades to be determined by each State. A Recommendation embodying the general guiding principles for the application of such machinery was also adopted. The second item was considered under three heads (*a*) General Prevention of Industrial Accidents, (*b*) Protection against Accidents of workers employed in loading and unloading ships, and (*c*) Prevention of coupling accidents on Railways. Draft Questionnaires on (*a*) and (*b*) were adopted and a joint committee of Governments', employers and workers was appointed to study the question of coupling accidents, with special reference to the use of automatic couplings. At the same Conference, elections for the Governing Body for the next three years were held on the basis of Article 393 of the Peace Treaty. Out of the 26 Conventions adopted by the ten sessions of the International Labour Conference, the Government of India had ratified 11 Conventions till July 1928. In three cases, legislative or other measures were in existence in India prior to the adoption of the Conventions by the Conference and in eight cases legislation was passed after ratification. The Government of India have also passed or are considering the framing of legislation in the case of four other Conventions not officially ratified by them. India was represented at all of these Conferences. In 1922 India was admitted as one of the eight countries of industrial importance after protracted examination of the grounds of her claim by experts appointed by the League of Nations. India therefore assumes responsibility for giving effect to the decisions of these Conferences if she ratifies them.

There has been a considerable extension of what is known as **Welfare Work**, and although this so far depends on the individual activities of employers of labour the work is progressing well. The Sixth International Labour Conference which dealt with the question of the utilisation of workers' spare time resolved that the International Labour Office should collect periodic information on the action taken in various countries for the development of facilities for the proper utilisation of the time during which workers are not actually employed. In May 1926. the Government of India requested all Local Governments to collect information on this subject from employers' and employees' associations and associations of social workers who conduct welfare work for the benefit of workers. The results of this enquiry which the Government of India hope to publish in due course will be of considerable interest. The results of the enquiry conducted in the Bombay Presidency which have been published in the January 1927 issue of the *Labour Gazette* show that facilities for education for employees are provided by some textile mills, Railways and the Bombay Port Trust. Very little provision is made by employers for providing reading rooms or libraries for their employees. The main factor governing this would appear to be the illiteracy of the majority of Indian workers. Employers' Associations and Associations of social workers such as the Social Service League, the Young Men's Christian Association, and the Labour Union, Ahmedabad, provide several schools, libraries and other educational facilities for the workers. The provision of facilities for medical attendance and the supply of medicines, appears to be fairly general in all the labour employing organizations in the Bombay Presidency. Either nominals or no charges are made in most cases. In certain mills '*creches*' are also conducted for the benefit of women workers and their children. The Labour Union, Ahmedabad, is the only employees' association which does pioneer work in the direction of providing medical facilities for its members. The Social Service League, Bombay, conducts a charitable dispensary for the benefit of women and children. Provisions for recreational facilities, such as games, lectures, shows, dramatic performances, etc., are provided by employers in some cases. In certain cases, the facilities are restricted to only a particular class of employees. Facilities for some sort of indoor and outdoor games and for entertainments are also provided by the Social Service League, the Young Men's Christian Association and the Labour Union, Ahmedabad, who do far more extensive work in this direction than all the other organisations put together.

With a view to carrying out some of the proposals contained in the Draft Convention regarding Maternity Benefits passed by the First International Labour Conference held at Washington in 1919, a private Bill was intro-

duced in the Bombay Legislative Council on the 19th March 1928, to regulate the employment of women in factories sometime before and some-time after confinement and to make provision for the payment of maternity benefits. The Bill provided that in any factory a woman shall not be knowingly employed during the six weeks following her confinement ; that she shall have a right to leave work on production of a medical certificate to the effect that her confinement will take place within about six weeks ; and that during the period of her absence, both before and after her confinement, she should be paid an amount of benefit by Government from a Fund to be maintained for the purpose. Any employer contravening the provisions of the Bill was liable to pay a fine which may extend to Rs. 500. The Select Committee, to whom the Bill was referred, limited the scope of the Legislation to certain principal industrial towns in the first instance, reduced the maximum period of compulsory absence to three weeks before and four weeks after confinement, made provision for the payment of benefits by the employers and suggested penalties for infringement by the woman herself of the provisions of the Bill intended for her benefit.

There is also the rapidly developing Trade Union movement in India. This movement is of comparatively recent growth and in its earlier stages, immediately after the war, it lay more on the surface than in deep roots and flared up in times of labour unrest. The majority of the Trade Unions in India are affiliated to the All-India Trade Union Congress. The year 1928 saw a recrudescence of an unparalleled number of strikes in almost all industries and in almost every province in India. The frequency of these strikes and the lack of any means to hasten a solution have given rise to the formulation by the Government of India of a Bill for the appointment of Courts of Inquiry, and Boards of Conciliation, prevention of lightning strikes in public utility services and the declaration of strikes, which may tend to coerce the Government or to intimidate any substantial portion of the community, illegal. The basis on which the Bill has been framed is on a principle of voluntary conciliation. Fuller details will be found below under the section dealing with "Trade Disputes Legislation."

The last few years have seen a remarkable change in the attitude of the State and the community towards labour which under the more democratic constitution which now obtains and owing also to the activities of the International Labour Organization is assured of a hearing in the Legislatures.

INDUSTRIAL SAFETY AND INSPECTION.

The conditions of factory labour until 1913 were regulated by the Indian Factories Act of 1881, as amended in 1891. The chief provisions of the amended Act were Local Governments were empowered to appoint inspectors of factories, and certifying surgeons to certify as to the age of children. A mid-day stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited, subject to certain exceptions. The hours of employment for women were limited to 11, with intervals of rest amounting to at least an hour and a half; their employment between 8 p.m. and 5 a.m. was prohibited, as a general rule, except in factories worked by shifts. The hours of work for children (defined as persons below the age of 14) were limited to seven, and their employment at night time was forbidden; children below the age of nine were not to be employed. Provision was made for the fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of over-crowding, etc.

Hours Fixed.

The next Factory Act was finally passed into law as Act XII of 1911.

The new Act extended the definition of "factory" so as to include seasonal factories working for less than four months in the year; shortened the hours within which children, and, as a general rule, women, may be employed, and further restricted the employment of women by night by allowing it only in the case of cotton-ginning and pressing factories. It also contained a number of new provisions for securing the health and safety of the operatives, making inspection more effective, and securing generally the better administration of the Act. The most important feature of the Act, however, was the introduction of a number of special provisions applicable only to textile factories. The report of the Factory Commission showed that excessive hours were not worked except in textile factories. The Act for the first time applied a statutory restriction to the hours of employment of adult males by laying down that, subject to certain exceptions, "no person shall be employed in any textile factory for more than twelve hours in any one day." It is also provided in the case of textile factories that no child may be employed for more than six hours in any one day, and that (subject to certain exceptions, among which are factories worked in accordance with an approved system of shifts) no person may be employed before 5-30 a.m. or after 7 p.m. (the new limits laid down generally for the employment of women and children).

The Amending Acts of 1922 and 1923.

The ratification by India of the conventions adopted by the International Labour Conference held at Washington in 1919 necessitated radical revision of the Indian Factories Act of 1911. This was undertaken during the year 1921 and the Indian Factories Amendment Act, 1922 (II of 1922) introduced a series of important reforms including the adoption of a sixty hours' week, the raising of the minimum age of children from 9 to 12, the prohibition of night work for women, the extension of the Act to a large number of small factories, drastic restriction of the exempting provisions, etc. The Act was further amended in 1923. The principal object of the

Amending Act of 1923 was the removal of a difficulty which had arisen in connexion with the law relating to the weekly holiday.

The Amending Act of 1926.

The experience gained during the three years which immediately followed the revision of the Act in 1922 indicated that the Amending Act had worked smoothly on the whole and that the main principles followed in 1922 commanded general acceptance. It was not considered necessary, therefore, to modify any of the main principles of the Act: but several administrative difficulties had arisen in connexion with some sections of the Act—one such difficulty relating to Section 21 which provided for intervals of rest. In practice it had proved difficult to enforce the provisions of this section in some industries. Local Governments were asked in June 1923 to consider a possible solution of the difficulty and to bring to the notice of the Government of India any difficulties which might have arisen in connexion with other provisions. On receipt of their replies, a Conference of Chief Inspectors of Factories was convened. The Conference recommended a number of alterations designed by allowing greater elasticity in some directions and by increasing control in others to make for smoother working. The Factories Amendment Act of 1926 was, therefore, based on the recommendations of that Conference and on the opinions received from the Local Governments. The more important alterations effected include the widening of the definition of 'Factories' so as to bring within the control of the Act such establishments as Electrical Generating Stations, Water Works, etc., the prevention of the issue of age certificates by Certifying Surgeons tochildren who are not fit for employment; the prevention of cleaning machinery in motion even by men in cases where Local Governments are of opinion that the work is attended by danger to the operatives; a clearer definition of the periods prescribed for intervals of rest; and, while still preventing the employment of children in two factories on the same day, the permitting of women to work in two factories on the same day provided that the limits for hours of work are not exceeded.

The Present Law.

In the following paragraphs it is intended to give the more important provisions of the present law on the subject by combining the Act of 1911 with the Amending Acts of 1922, 1923 and 1926. The Amending Act of 1922 came into force on the 1st July 1922 and that of 1926 on the 1st June 1926. The Act extends to the whole of British India including British Baluchistan and the Sonthal Parganas.

Hours of Employment.

Rest periods in factories.—(1) In every factory there shall be fixed,—

(*a*) for each person employed on each working day—

(*i*) at intervals not exceeding six hours, periods of rest of not less than one hour, or

(*ii*) at the request of the employees concerned, periods of rest, at intervals not exceeding five hours, of not less than half an hour each, the total duration of the periods of rest on that day not being less than one hour for each period of six hours' work done.

Provided that, in lieu of the period provided under sub-clause (*i*) or sub-clause (*ii*) there may be fixed per each male person employed for not more than eight and a half hours on each working day, at the request of the employees concerned and with the previous sanction of the local Government, a period of rest of not less than half an hour so arranged that no such person shall work for more than five hours continuously and

(*b*) for each child working more than five and a half hours in any day, a period of rest of not less than half an hour.

(2) The period of rest under clause (*b*) shall be so fixed that no such child shall be required to work continuously for more than four hours.

Weekly Holiday.—(1) No person shall be employed in any factory on a Sunday, unless—

(*a*) he has had, or will have, a holiday for a whole day on one of the three days immediately preceding or succeeding the Sunday, and

(*b*) the manager of the factory has previous to the Sunday or the substituted day, whichever is earlier, given notice to the Inspector of his intention so to employ the said person and of the day which is to be substituted and has at the same time affixed a notice to the same effect in the place mentioned in section 36.

Provided that no such substitution shall be made as will result in any person working for more than ten consecutive days without a holiday for a whole day.

(2) Where in accordance with the provisions of sub-section (1) any person is employed on a Sunday in consequence of his having had a holiday on one of the three days preceding that Sunday, that Sunday shall, for the purpose of calculating the weekly hours of work of such person, be deemed to be included in the preceding week.

Employment of Children.—With respect to the employment of children in factories the following provisions shall apply:—

(*a*) no child shall be employed in any factory unless he is in possession of a certificate granted under section 7 or section 8 showing that he is not less than twelve years of age and is fit for employment in a factory and while at work carries either the certificate itself or a token giving reference to such certificate;

(*b*) no child shall be employed in any factory before half-past five o'clock in the morning or after seven o'clock in the evening;

(*c*) no child shall be employed in any factory for more than six hours in any one day.

Employment of Women.—With respect to the employment of women in factories the following provisions shall apply:—

(*a*) no woman shall be employed in any factory before half-past five o'clock in the morning or after seven o'clock in the evening;

(*b*) no woman shall be employed in any factory for more than eleven hours in any one day.

Prohibition of Employment of Person in two Factories on Same Day.—No person shall employ, or permit to be employed, in any factory any child or, save in such circumstances as may be prescribed, any other person whom he knows, or has reason to believe, to have already been employed on the same day in any other factory.

Hours of Employment to be fixed.—The manager of a factory shall fix specified hours for the employment of each person employed in such factory, and no person shall be employed except during such hours.

Limitation of Working Hours per Week.—No person shall be employed in a factory for more than sixty hours in any one week.

Limitation of Working Hours per Day—No person shall be employed in any factory for more than eleven hours in any one day.

Exceptions.

Where it is proved to the satisfaction of the Local Government—

(*a*) that any class of work in a factory is in the nature of preparatory or complementary work which must necessarily be carried on outside the limits laid down for the general working of the factory; or

(*b*) that the work of any class of workers is essentially intermittent; or

(*c*) that there is in any class of factories any work which necessitates continuous production for technical reasons; or

(*d*) that any class of factories supplies the public with articles of prime necessity which must be made or supplied every day; or

(*e*) that in any class of factories the work performed by the exigencies of the trade or by its nature, cannot be carried on except at (*i*) stated seasons or (*ii*) at times dependent on the irregular action of natural forces;

the Local Government may, subject to the control of the Governor-General in Council, by notification in the local official Gazette, exempt on such conditions, if any, as it may impose, and in such area as may be specified in the notification—

in case (*a*) such class of work from all or any of the provisions of sections 21, 27 and 28;

in case (*b*) work of the nature described from all or any of the provisions of sections 21, 22, 26, 27 and 28.

in case (*c*) work of the nature described from the provisions of sections 21, 22 and 28.

in cases (*d*) and (*e*) such class of factories from the provisions of section 22.

in case (*e*) (*ii*) such class of factories from the provisions of section 26.

The system of inspection is being steadily improved by the appointment of more whole-time inspectors with good technical qualifications in the principal industrial centres. The principle of appointing women as factory Inspectresses has already been accepted by the Government of Bombay and a beginning was made in the year 1924 by the appointment of Dr. Tehmina I. H. Cama as a whole-time Inspectress of Factories.

The Government of India have repealed the Workmen's Breach of Contract Act of 1859 with effect from 1st April 1924.

The Indian Mines Act, 1923.—The Indian Mines Act, 1923, received the assent of the Governor-General on the 23rd February 1923. It extends to the whole of British India, including British Baluchistan and the Sonthal Parganas, and came into force on the first day of July 1924. By this Act the definition of a mine was made clear, and the weekly hours of employment were limited to 60 hours for work above ground and 54 hours for work below ground.

In order to regulate and ultimately prohibit the employment of women underground in mines the Government of India have framed Regulations for promulgation in exercise of the powers conferred by Section 29 of the Indian Mines Act, 1923. In the Regulations, mines are differentiated under two categories : 'exempted mines,' *viz.*, coal mines in Bengal, Bihar and Orissa and the Central Provinces and the salt mines in the Punjab in which women were employed in underground workings during any part of the year 1926 ; and 'unexempted mines' *viz.*, mines in the rest of the Provinces in India, The term 'underground workings' is defined as 'any part of a mine situated beneath the superjacent ground and includes vertical shafts provided for access to, or for the ventilation of such workings.' The proposed Regulations provide that 'On or after the 1st day of April 1929, no woman shall be permitted to enter or remain in the underground workings of any mine unless (*a*) she has the express permission of the Chief Inspector, or (*b*) in the case of an exempted mine, she has upon her person prominently displayed a valid token issued under Regulation No. 4 and bearing the name of that mine.' The remaining Regulations deal with the procedure to be applied by a system of issuing tokens to eliminate gradually the employment of women in the exempted mines over a period of ten years beginning with 1st April 1929.

INDUSTRIAL HOUSING.

In most industrial centres in India the question of proper and adequate housing is engaging the attention of all public bodies and governments to an increasing extent. Employers themselves are becoming increasingly alive to this burning question and whenever finances permit tenements are constructed for the housing of the workmen. In cases where housing is provided the amounts charged for rent are just sufficient to cover the interest charges on the capital outlay. In Bombay City, where the housing question was one of great difficulty a few years ago, the City Improvement Trust and the Development Directorate of the Government of Bombay have done much useful work in endeavouring to solve the problem. The scheme originally outlined by the Development Directorate for Industrial Housing aimed at a construction programme of 50,000 tenements providing accommodation for a quarter million people and to be completed within a period of eight years. This scheme was conceived in the boom period when labour conditions in Bombay were probably abnormal. By the end of December 1928 the Directorate had 207 chawls comprising 16,524 tenements completely ready for occupation out of which 7,277 were let. Out of the tenements occupied 7,157 were used for residential purposes and 120 for shops. Government have decided that until the tenements now provided are fully occupied no additional land is to be taken for Industrial Housing and that no new schemes are to be embarked upon without Government approval.

The average economic rent of the chawl works out at Rs. 16 per month per tenement. All the tenements are now provided with *nahanis*. The rents fixed for the present, per month, for each tenement, vary from Rs. 5-0-0 at Worli to Rs. 9-8-0 at DeLisle Road. The Development Department proposed to let out chawls *en bloc* at reduced rents in order to induce employers of labour, societies, etc., to lease whole chawls for their employees or other members of the public in whose welfare they are interested. The scale of rents for chawls, each containing eighty one-room tenements, (including charges for maintenance and repairs, sweeper and sanitary stores) *plus* municipal taxes extra, with effect from 1st April 1927 until further orders, were :—Rs. 3,862 at Worli, Rs. 5,478 at Naigaum, and Rs. 7,398 at DeLisle Road. At Sewri, the chawls were all occupied by individual tenants. The above rents work out at Rs. 7-11-0 per room at DeLisle Road, Rs. 5-11-0 at Naigaum, and Rs. 4-0-0 at Worli. Despite this offer it is reported that no Trade Unions took advantage of the proposals. On the basis there is an annual loss of about Rs. 20 lakhs and this is being met from the cotton cess and other sources.

The City Improvement Trust in Bombay have also made very good progress in the direction of providing industrial housing. The Trust had a total number of 9,523 tenements ready at the end of March, 1928, out of which 8,077 tenements were let for living purposes, 113 as shops, 36 as godowns and 214 for weavers' looms. 54 tenements were reserved for occupation by Muccadams, for offices and stores, and as Superintendents' Quarters. The floor area of each tenement inclusive of a small verandah varied from 120 square feet to 176 square feet but the majority of the tenements were provided with the maximum floor space allowed. The average rent for a tenement in an Improvement Trust chawl works out at Rs. 5-10-0 but the actual rents vary from Rs. 4-9-0 to Rs. 15-5-0. The maximum permissible population in adults for a total of 8,077 tenements has been fixed at 37,699. The actual population living in these tenements, at the end of the year 1927, was 29,563 or 26,907 when equalised to adults.

According to the results of the enquiry conducted by the Labour Office of the Government of Bombay into 'Welfare Work' carried on by employers, employees' associations and associations of social workers in the Bombay Presidency, private employers have taken interest in the question of industrial housing and have contributed their quota to promote better housing accommodation for their employees. Nearly fifty per cent. of the textile mills in the Presidency have made arrangements to provide sanitary dwellings for their employees. The total accommodation provided is not yet sufficient and the percentage of workers who are benefited varies from 12 to 42. The Railways provide either free quarters, or quarters at economic rent or rent allowance in lieu of quarters, to those employees who are entitled to free quarters or are required to live near their work. The Bombay Port Trust provides housing for 4,559 of its employees, the Bombay Municipality for 5,704 and the Karachi Municipality accommodates about 500 of its employees free of charge. The rents charged in all cases, are much below the economic rent

INDUSTRIAL DISPUTES.

Complete statistics in connexion with Industrial Disputes are now available for the whole of India. The importance that is being attached to the weapon of strike by the workmen in this land may be gathered from the figures published in respect of the industrial disputes in British India for which statistics have been collected.

The year 1925 was one of the worst years in the history of Industrial relations in the country. The number of disputes reported was 134 as against 133 in the preceding year. The number of workers involved in these disputes was 270,423 and the number of working days lost amounted to 12,578,129.

The corresponding figures for 1924 were 312,462 and 8,730,918. The increase was due entirely to the strike in the Bombay Cotton Mills in the last quarter of the year which accounted for the loss of about 11,000,000 working days. Of the strikes reported, only 44 or 33 per cent. were successful in whole or in part. This

Employment of Women.—With respect to the employment of women in factories the following provisions shall apply:—

(*a*) no woman shall be employed in any factory before half-past five o'clock in the morning or after seven o'clock in the evening;

(*b*) no woman shall be employed in any factory for more than eleven hours in any one day.

Prohibition of Employment of Person in two Factories on Same Day.—No person shall employ, or permit to be employed, in any factory any child or, save in such circumstances as may be prescribed, any other person whom he knows, or has reason to believe, to have already been employed on the same day in any other factory.

Hours of Employment to be fixed.—The manager of a factory shall fix specified hours for the employment of each person employed in such factory, and no person shall be employed except during such hours.

Limitation of Working Hours per Week.—No person shall be employed in a factory for more than sixty hours in any one week.

Limitation of Working Hours per Day—No person shall be employed in any factory for more than eleven hours in any one day.

Exceptions.

Where it is proved to the satisfaction of the Local Government—

(*a*) that any class of work in a factory is in the nature of preparatory or complementary work which must necessarily be carried on outside the limits laid down for the general working of the factory; or

(*b*) that the work of any class of workers is essentially intermittent; or

(*c*) that there is in any class of factories any work which necessitates continuous production for technical reasons; or

(*d*) that any class of factories supplies the public with articles of prime necessity which must be made or supplied every day; or

(*e*) that in any class of factories the work performed by the exigencies of the trade or by its nature, cannot be carried on except at (*i*) stated seasons or (*ii*) at times dependent on the irregular action of natural forces;

the Local Government may, subject to the control of the Governor-General in Council, by notification in the local official Gazette, exempt on such conditions, if any, as it may impose, and in such area as may be specified in the notification—

in case (*a*) such class of work from all or any of the provisions of sections 21, 27 and 28;

in case (*b*) work of the nature described from all or any of the provisions of sections 21, 22, 26, 27 and 28.

in case (*c*) work of the nature described from the provisions of sections 21, 22 and 28.

in cases (*d*) and (*e*) such class of factories from the provisions of section 22.

in case (*e*) (*ii*) such class of factories from the provisions of section 26.

The system of inspection is being steadily improved by the appointment of more whole-time inspectors with good technical qualifications in the principal industrial centres. The principle of appointing women as factory Inspectresses has already been accepted by the Government of Bombay and a beginning was made in the year 1924 by the appointment of Dr. Tehmina I. H. Cama as a whole-time Inspectress of Factories.

The Government of India have repealed the Workmen's Breach of Contract Act of 1859 with effect from 1st April 1924.

The Indian Mines Act, 1923.—The Indian Mines Act, 1923, received the assent of the Governor-General on the 23rd February 1923. It extends to the whole of British India, including British Baluchistan and the Sonthal Parganas, and came into force on the first day of July 1924. By this Act the definition of a mine was made clear, and the weekly hours of employment were limited to 60 hours for work above ground and 54 hours for work below ground.

In order to regulate and ultimately prohibit the employment of women underground in mines the Government of India have framed Regulations for promulgation in exercise of the powers conferred by Section 29 of the Indian Mines Act, 1923. In the Regulations, mines are differentiated under two categories : 'exempted mines,' *viz.*, coal mines in Bengal, Bihar and Orissa and the Central Provinces and the salt mines in the Punjab in which women were employed in underground workings during any part of the year 1926 ; and 'unexempted mines' *viz.*, mines in the rest of the Provinces in India, The term 'underground workings' is defined as 'any part of a mine situated beneath the superjacent ground and includes vertical shafts provided for access to, or for the ventilation of such workings.' The proposed Regulations provide that 'On or after the 1st day of April 1929, no woman shall be permitted to enter or remain in the underground workings of any mine unless (*a*) she has the express permission of the Chief Inspector, or (*b*) in the case of an exempted mine, she has upon her person prominently displayed a valid token issued under Regulation No. 4 and bearing the name of that mine.' The remaining Regulations deal with the procedure to be applied by a system of issuing tokens to eliminate gradually the employment of women in the exempted mines over a period of ten years beginning with 1st April 1929.

INDUSTRIAL HOUSING.

In most industrial centres in India the question of proper and adequate housing is engaging the attention of all public bodies and governments to an increasing extent. Employers themselves are becoming increasingly alive to this burning question and whenever finances permit tenements are constructed for the housing of the workmen. In cases where housing is provided the amounts charged for rent are just sufficient to cover the interest charges on the capital outlay. In Bombay City, where the housing question was one of great difficulty a few years ago, the City Improvement Trust and the Development Directorate of the Government of Bombay have done much useful work in endeavouring to solve the problem. The scheme originally outlined by the Development Directorate for Industrial Housing aimed at a construction programme of 50,000 tenements providing accommodation for a quarter million people and to be completed within a period of eight years. This scheme was conceived in the boom period when labour conditions in Bombay were probably abnormal. By the end of December 1928 the Directorate had 207 chawls comprising 16,524 tenements completely ready for occupation out of which 7,277 were let. Out of the tenements occupied 7,157 were used for residential purposes and 120 for shops. Government have decided that until the tenements now provided are fully occupied no additional land is to be taken for Industrial Housing and that no new schemes are to be embarked upon without Government approval.

The average economic rent of the chawl works out at Rs. 16 per month per tenement. All the tenements are now provided with *nahanis*. The rents fixed for the present, per month, for each tenement, vary from Rs. 5-0-0 at Worli to Rs. 9-8-0 at DeLisle Road. The Development Department proposed to let out chawls *en bloc* at reduced rents in order to induce employers of labour, societies, etc., to lease whole chawls for their employees or other members of the public in whose welfare they are interested. The scale of rents for chawls, each containing eighty one-room tenements, (including charges for maintenance and repairs, sweeper and sanitary stores) *plus* municipal taxes extra, with effect from 1st April 1927 until further orders, were :—Rs. 3,862 at Worli, Rs. 5,478 at Naigaum, and Rs. 7,398 at DeLisle Road. At Sewri, the chawls were all occupied by individual tenants. The above rents work out at Rs. 7-11-0 per room at DeLisle Road, Rs. 5-11-0 at Naigaum, and Rs. 4-0-0 at Worli. Despite this offer it is reported that no Trade Unions took advantage of the proposals. On the basis there is an annual loss of about Rs. 20 lakhs and this is being met from the cotton cess and other sources.

The City Improvement Trust in Bombay have also made very good progress in the direction of providing industrial housing. The Trust had a total number of 9,523 tenements ready at the end of March, 1928, out of which 8,077 tenements were let for living purposes, 113 as shops, 36 as godowns and 214 for weavers' looms. 54 tenements were reserved for occupation by Muccadams, for offices and stores, and as Superintendents' Quarters. The floor area of each tenement inclusive of a small verandah varied from 120 square feet to 176 square feet but the majority of the tenements were provided with the maximum floor space allowed. The average rent for a tenement in an Improvement Trust chawl works out at Rs. 5-10-0 but the actual rents vary from Rs. 4-9-0 to Rs. 15-5-0. The maximum permissible population in adults for a total of 8,077 tenements has been fixed at 37,699. The actual population living in these tenements, at the end of the year 1927, was 29,563 or 26,907 when equalised to adults.

According to the results of the enquiry conducted by the Labour Office of the Government of Bombay into 'Welfare Work' carried on by employers, employees' associations and associations of social workers in the Bombay Presidency, private employers have taken interest in the question of industrial housing and have contributed their quota to promote better housing accommodation for their employees. Nearly fifty per cent. of the textile mills in the Presidency have made arrangements to provide sanitary dwellings for their employees. The total accommodation provided is not yet sufficient and the percentage of workers who are benefited varies from 12 to 42. The Railways provide either free quarters, or quarters at economic rent or rent allowance in lieu of quarters, to those employees who are entitled to free quarters or are required to live near their work. The Bombay Port Trust provides housing for 4,559 of its employees, the Bombay Municipality for 5,704 and the Karachi Municipality accommodates about 500 of its employees free of charge. The rents charged in all cases, are much below the economic rent.

INDUSTRIAL DISPUTES.

Complete statistics in connexion with Industrial Disputes are now available for the whole of India. The importance that is being attached to the weapon of strike by the workmen in this land may be gathered from the figures published in respect of the industrial disputes in British India for which statistics have been collected.

The year 1925 was one of the worst years in the history of Industrial relations in the country. The number of disputes reported was 134 as against 133 in the preceding year. The number of workers involved in these disputes was 270,423 and the number of working days lost amounted to 12,578,129.

The corresponding figures for 1924 were 312,462 and 8,730,918. The increase was due entirely to the strike in the Bombay Cotton Mills in the last quarter of the year which accounted for the loss of about 11,000,000 working days. Of the strikes reported, only 44 or 33 per cent. were successful in whole or in part. This

represents a slightly higher proportion of successful strikes than in the preceding years. The corresponding figures for 1926 were much better. They indicated that there was less industrial strife in that year than in any other recent year. The number of strikes recorded was 128, which was lower than that of any year since 1920, when the collection of statistics commenced. The total number of working days lost through strikes and lock-outs was approximately 11 lakhs against an average of 74 lakhs in the preceding five years. In fewer than one-fifth of the strikes were the workmen sucessful in gaining any concession.

The statistics of industrial disputes for the year 1927 show that although the number of disputes during the year was but one more than in the previous year and the number of work-people affected was less by about a lakh, the time-loss to the industry as a whole, was nearly double that in the year 1926. The following are the detailed figures for the year 1927 :—

General Effects of Disputes by Provinces.

Province.	Number of Disputes.	Number of Workpeople involved.	Number of Working Days lost.
Bengal	34*	66,674	1,464,889
Bombay	54	28,078	165,061
Madras	19*	17,905	187,441
Central Provinces	2	1,950	79,378
United Provinces	3	1,291	8,789
Bihar and Orissa	4*	4,319	73,570
Assam	12	10,975	33,586
Burma	3	463	7,256
British India	129	131,655	2,019,970

The following table shows the data given above reclassified according to different classes of Industries :—

General Effects of Disputes by Classes of Industry.

Industry.	No. of disputes.	No. of Men involved.	Days lost.
Cotton Mills	60	36,089	350,011
Jute Mills	11	34,296	234,715
Engineering Workshops	6	4,042	27,095
Railways (including Railway Workshops).	3	32,114	1,250,421
Others	49	25,114	157,728
Total ..	129	131,655	2,019,970

The next two tables show the causes of disputes by Provinces and Classes of Industries.

Causes of Disputes by Provinces.

The year 1928, for which statistics of industrial disputes for the whole of India have not yet been published, was a period of great industrial unrest in India. Lightning strikes occurred in various Provinces and several of them were of unusually long duration. A big strike of the employees of the G. I. P. Railway was threatened but the conciliatory attitude adopted by the Railway authorities saved the situation. The strikes of the operatives of the textile mills at Sholapur and Cawnpore and the sweepers of the Calcutta Corporation were among disputes of some magnitude, but the more important major disputes were the General Strike in the Bombay Cotton Mills, the strikes and lockouts on the E. I. Railway, the S. I. Railway and the Iron and Steel Works at Jamshedpur. The causes, progress and the results of each of these four major disputes are summarised below :—

The General Strike in the Cotton Mills in Bombay City lasted from the 26th April to the 4th October 1928, and involved 147,644 workpeople. The main cause of the strike was the introduction of new systems of work in accordance with the recommendations of the Textile Tariff Board, whereby a weaver was to tend three looms instead of two and a spinner to mind double frames instead of a single frame as before. The new systems of work, which were adopted for achieving greater efficiency of labour, naturally involved retrenchment of hands. The hours of work for certain operatives were increased and additional emoluments in the form of bonus, etc., were curtailed. These reforms were begun to be gradually introduced from the middle of the year 1927 and several strikes of the operatives occurred since August 1927 as a protest. The moderate labour leaders who then completely controlled the textile labour force in Bombay City were opposed to a general strike and brought about a settlement of disputes in individual mills on the best terms possible. Subsequently, however the members of the Bombay Branch of the Workers and Peasants Party, a Communist organisation, exercised a considerable influence over the cotton mill operatives, and mainly as a result of their instigation, the operatives of the Currimbhoy group of mills struck work on the 16th April, and brought out the men of all the other cotton mills in Bombay City, with the exception of those in the Colaba Land Mill, by the 26th April. The employers were not given previous notice of the proposed strike or of the grievances of the men. The extremist leaders, mostly Communists, carried on intensive propaganda amongst the strikers by holding frequent meetings, issuing pamphlets, etc., and emphasised the need for a general strike to solve the economic ills of the operatives. In the speeches that were delivered to the strikers, constant references were made to the alleged apathy of the Millowners and the Government to the cause of the workers who were exhorted to carry on the strike till their grievances were redressed. In view of the serious situation thus created, H. E. the Governor of Bombay came down to Bombay from Mahableshwar and granted separate interviews on the 27th April to the representatives of the Millowners' Association and the Bombay Textile Labour Union and the Girni Kamgar Mahamandal. The Millowners' Association assured His Excellency that they would be prepared to open negotiations with the representatives of registered Unions of Textile mill operatives. This was the first instance in the Bombay Presidency where the special status of a Trade Union as the result of registration was publicly recognised. As a result of the visit of His Excellency, the extremists and the moderate labour leaders joined hands and formed a Joint Strike Committee on the 1st May and prepared a statement of the demands of the strikers and forwarded the same to the Millowners' Association on the 3rd May 1928. The statement contained 17 demands, which included (1) the restoration of the wage rates that prevailed in 1925 ; (2) that the hours of work of any class of workers should not be increased without the consent of the workers concerned and without granting overtime pay for the additional time put in ; (3) that the new systems of work should not be introduced or continued without the consultation and free consent of the workers expressed through their organisation ; (4) the necessity for making standard rules for all mills ; and (5) that no member of the Association should be allowed to alter the conditions of service to the disadvantage of the workers. On the 12th May the Millowners' Association issued a press communique replying to the 17 demands put forward by the Joint Strike Committee. They denied any reductions in wages and laid stress on the need for a standardised muster and a standardised schedule of rates of wages. They also stated that it was essential that disciplinary measures should be strictly enforced.

As the Millowners' Association refused to have anything to do with the Joint Strike Committee as it was composed of officials of unregistered Unions also the Mill Workers' Union, the Girni Kamgar Mahamandal and the Bombay Girni Kamgar Union got themselves registered under the Indian Trade Unions Act and every member of the Joint Strike Committee thus became connected with one or other of the registered Unions of cotton mill operatives in Bombay City. The Hon'ble the General Member of the Government of Bombay met deputations from the Millowners and the Joint Strike Committee on the 15th May with a view to smoothing the way for a Round Table Conference.

The Millowners' Association published a statement in the Press on the 16th June defining the terms on which they would be prepared to re-open the mills. The terms included the unequivocal acceptance by the strikers, of the following :—(1) Standardised rates of wages as prepared by the Millowners ; (2) Revised and standardised muster rolls ; (3) full ten hours work for all male operatives ; and (4) a revised set of Rules and Regulations with a view to enforce stricter discipline than obtained in the past. The Joint Strike Committee issued a rejoinder on the same day pointing out that the financial history of the industry did not warrant a reduction in wages and that in the preparation of the schemes of standardisation the Millowners had not consulted the workers' representatives. In reply, the Millowners stated in a Press note, that the profits made by the mills were not, after all, high, and pointed out that the cost of living for workers had gone down.

On the 7th June, two representatives of each of the four registered Trade Unions of cotton mill workers in Bombay City were invited by the Millowners' Association to meet 8 members of their Negotiation Sub-Committee. The representatives of both sides met about half a dozen times before negotiations broke down over the question of the proposed cut in the rates of wages for weavers. On the 3rd July, the Millowners' Association posted notices at the mills announcing the terms on which the strikers could resume work and also arranged for the standardisation schemes being clearly explained to the operatives at the mills. Attempts at a settlement of the disputes having failed, the Joint Strike Committee decided to start vigorous picketing at the mills. On the advice of the Commissioner of Police, only two picketers were posted at each mill. Several women workers volunteered their services as picketers. The Millowners' attempted to reopen the mills in batches with effect from the 6th August. The propaganda carried on by the Joint Strike Committee was, however, so complete that the gesture made by the Millowners met with no response from the strikers and consequently the Association gave up the programme.

The Hon'ble the General Member convened a joint conference of the representatives of the Millowners and the Joint Strike Committee on the 15th and 16th June in order to ascertain if they would agree to the dispute being referred to a Conciliation Board. The conference broke down on the question of the immediate calling off of the general strike. Subsequently Dr. G. V. Deshmukh, President of the Bombay Municipal Corporation, exerted his utmost to bring the parties to the dispute together and to arrive at terms satisfactory to both sides but with no effect. The representatives of the Joint Strike Committee again met the represenaitives of the Millowners' Association during the last few days of September, in order to explore the possibility of arriving at an amicable settlement, but no agreement could be reached on the question of a cut of 7½ per cent. proposed by the Millowners' Association in the rates of wages of weavers. At this stage, another joint conference of the representatives of the two parties was called by the Hon'ble the General Member on the 4th October at which satisfactory terms of settlement were arrived at. According to the terms, the general strike was to be called off on the 6th October 1928, pending the report of a Committee to be appointed by Government to enquire into the whole dispute. The rates of wages were to be those prevalent in March 1927 and rates of advances to be paid to the strikers during the next two months were also specified. The strikers began to resume work from the 6th October and the mills resumed normal working by the 11th October. In accordance with the agreement arrived at on the 4th October, the Government of Bombay appointed the following Committee—

Sir Charles Fawcett, Kt., I.C.S., Judge of the High Court of Judicature, Bombay, (*Chairman.*)

Mr. M. P. Kharegat, I.C.S., (Retired Judge), and M. B. S. Kamat, *Member*.

with Mr. N. A. Mehrban, Investigator, Labour Office, and Assistant to the Registrar of Trade Unions, Bombay Presidency, as Secretary.

The terms of reference to the Committee were :—(*a*) Whether the amended scheme of a standardised schedule of rates and of a standardised muster prepared by the Millowners' Association, and also the scheme prepared by the Strike Committee is fair and reasonable. (*b*) Whether the Seventeen Demands advanced by the Strike Committee are fair and reasonable and to what extent, if any, they should be met. (*c*) Whether the Standing Orders for operatives as amended and presented by the Millonwers' Association on the 4th October 1928 are fair and reasonable. The total time loss to the textile industry on account of this strike amounted to nearly 22 million working-days and the loss in wages to the labourers is calculated approximately at 3½ crores of rupees. The Bombay Strike Enquiry Committee completed the major portion of their labours by the close of the year 1928 and their Report, which is expected to be published early in 1929, will be of considerable interest.

The complete stoppage of work in the **Tata Iron and Steel Works at Jamshedpur** had its beginnings in smaller departmental strikes which tended considerably to disorganise the efficient working of the whole plant. The grievances of the men were represented by the President of the Jamshedpur Labour Association to the management who agreed to give a careful consideration to all of them . On the 12th April the Directors of the Tata Iron and Steel Company announced the introduction of a profit sharing scheme for their workers to be brought into force with effect from the beginning of April. About ten lakhs of rupees out of the profits, were proposed to be distributed to the workers by way of an annual bonus according to the monthly production. Mr. C. F. Andrews, welcomed this scheme and hoped that the announcement would do much to allay the labour unrest at Jamshedpur. The management issued a circular to all heads of departments clearly explaining their policy with regard to increments in wages, reduction of staff, standardisation of rates, introduction of grade system and labour organisation in the Works. The operatives of the Sheet Mill stopped work on the 18th April and those of the Boiler Department on the 20th April, stating that their grievances, which had been submitted to the management, remained unredressed. Some workers of the Blast Furnace Department also suspended work on the 26th April. As a result of these departmental strikes, the management, declared a lock-out with effect from the 1st May. The strikers followed the lead of Mr. Maneck Homi, an ex-employee, of the Company and a practising pleader in Jamshedpur and refused to accept the mediation of the Labour Association. The management, however, refused to negotiate with anyone who was not connected with the recognised Labour Association.

On the 3rd May, about 250 men of the permanent way section of the traffic department struck work. The strikers practised *hartals* on the 25th May and again on the 1st and the 2nd June. Consequently, the management closed the works until further notice. Essential services were however maintained with the help of loyalist workers. On the 19th June, Mr. Homi formulated the demands which should

form the basis of negotiations. The main demands were that the dismissed men should be reinstated without break of service, and that the policy of retrenchment should immediately be stopped. The Company however, propose to bring into force the bonus scheme, explained the necessity for retrenchment of staff and pointed out that no pay would be given for the strike period. Vigorous picketing was carried on and loyalist workers were assaulted. The lock-out was lifted on the 16th July but this had no effect on the strikers who still remained out. The management modified the terms of settlement formerly proposed by them and appealed to the strikers to give earnest reconsideration to the new proposals. The strikers, however, rejected the proposals and prepared to carry on still more vigorous picketing. By the end of August the situation reached a stage of complete deadlock. Mr. S. C. Bose, visited Jamshedpur and supported the cause of the strikers. He was made the President of the Labour Association in the absence of Mr. Andrews. Discussions between Mr. Bose and the Directors of the Company took place from the 2nd to 5th September and, as a result, a settlement of the dispute was arrived at. The terms of the settlement included the reinstatement of all men subject to certain exceptions, the postponement of the retrenchment scheme for twelve months, and the acceptance of the bonus scheme by the workers who should waive their claim for strike pay or lock-out wages. Seventy per cent. of the workers resumed work on the 13th September and the rest followed within the next few days.

Strike on the South Indian Railway.— The labour troubles on the S. I. Railway during the year 1928 occurred owing to a policy of retrenchment adopted by the Railway administration as the result of the recommendations made by Sir Vincent Raven's State Railways Workshops Committee, appointed in the year 1926, to enquire into matters connected with the mechanical departments of the State Railways of India. New central workshops with up-to-date machinery and labour-saving devices were built at Golden Rock, near Trichinopoly, and it was proposed to transfer the workshops at Negapatam, Podanur, and Trichinopoly to Golden Rock. Certain methods of retrenchment which were proposed did not find favour with the workers. The Government of India therefore appointed a Committee to enquire into the question generally. The Committee agreed with the proposals of the Agent, S. I. Railway for retrenchment and recommended liberal terms for those whose services would not be required. The total number of hands to be retrenched was 3,171, and the management stated that, if, as a result of voluntary resignations by employees, the necessary retrenchment was not effected, retrenchment by selection would be adopted. The selection was to be made on the basis of three Tests: Service Test, Trade Test, and Medical Test. The men were not agreeable to this proposal and several of them refused to submit to the Tests imposed. During the last three days of June 1928, the workshops staff at Golden Rock, Negapatam and Podanur observed *satyagraha*. As a result, the Agent declared a lock-out in those shops until further notice.

In order to enforce the demands of the men the Central Committee of the S. I. Railway Labour Union organised a general strike which began at mid-night on the 19th July. The total number of men affected was 17,376. The strikers obstructed the passage of trains, looted station premises, damaged signals and other property of the Railway and caused derailment of certain trains. As a result, the train service was disorganised and the Police had to escort the few trains that were running. Owing to the seriousness of the situation, District Magistrates were empowered by Government to use emergency powers and processions and meetings of strikers were prohibited. Two Communists and certain other leaders who were mainly responsible for the general strike were arrested. From the 23rd to the 27th July most of the line staff and menials resumed duty. As the chief promoters of the strike were arrested, the S. I. Railway Strike Committee called off the strike with effect from the 30th July. The workshops at Golden Rock and Podanur were reopened on the 31st July and the situation became normal by the 1st August. About 5,000 men tendered their resignations in order to avail themselves of the special benefits of double gratuity offered by the Agent to those who voluntarily resigned. Of these, many were subsequently re-engaged in addition to new hands. This strike ended by the unconditional resumption of work by the strikers. The men not only lost their pay for the period of the strike but the official recognition of their Union was also withdrawn by the Agent.

Strike on the East Indian Railway.— The dispute in the E. I. Railway Workshops at Lillooah arose over the question of reinstatement of certain dismissed men. As the management did not accede to the request of the men, about 10,000 workers struck work on the 5th March 1928 and put up additional demands regarding increases in wages, better leave rules, etc. In a communique, dated 6th March, the Agent E. I. Railway, explained to the strikers that there was no justification for any increase in their present wages. As the men did not resume work, the Agent declared a lock-out on the 8th March. The E. I. Railway Labour Union organised vigorous picketing and as a result of the intimidation by the strikers, the workers in some other departments of the Railway, and in some of the larger Engineering Workshops in Calcutta could not attend work. Efforts were also made to bring about a general strike over the whole line and demonstration marches were organised for the purpose. Some workers at Asansol and Ondal thus struck work. The strikers obstructed the passage of trains and traffic on the public roads. In view of the threatening attitude of the men, the Commissioner of Police issued orders prohibiting the taking out of processions or uttering public cries by the strikers and their leaders. The Agent tried to reopen the workshops from the 25th May but could not succeed, as the men, when once in, began to practise *satyagraha*. Negotiations for a settlement were carried on intermittently both by the Labour Union and certain members of the public but with no effect. The wreck of the E. I. Railway Express train to Gaya at Belur due to the sabotage of the strikers on the 8th July, resulted in the strikers

losing the sympathy of the public. On account of this, and owing to the promise of the Agent to consider the men's grievances if they resumed work immediately, the strike was called off on the 10th July by the E. I. Railway Labour Union and the majority of the strikers resumed work by the 13th July after the strike had lasted for a little more than four months.

CONCILIATION AND ARBITRATION.

Of recent years much attention has been paid to the settlement of industrial disputes. The baffling character of such disputes is that they are so often sporadic, breaking out without warning, grievances being formulated after striking instead of before. When such strikes occur there is no organised body of workers with whom to negotiate. The Government of Bengal took the leading part and in March 1921 appointed a committee which laid stress on the value of Works Committees and favoured the institution of Conciliation Courts to deal with disputes in public utility services. It also favoured the appointment of a panel on which the Local Government could draw when constituting a Board to enquire into any dispute. The Bombay Government, which had already explored the ground informally, appointed a similar committee in November 1921, which reported in February 1922.

TRADE DISPUTES LEGISLATION.

The history with regard to the proposals for legislation providing machinery for the prevention and settlement of industrial disputes in India covers a period of about 10 years. The considerable industrial unrest in the Bombay Presidency during the three years 1918 to 1921 led to a resolution being moved in the Bombay Legislative Council for the appointment of a committee "to consider and report on the practicability or otherwise of creating machinery for the prevention and early settlement of industrial disputes." The Government of Bombay in pursuance of their acceptance of this resolution appointed a representative committee under the chairmanship of Sir Stanley Reed. The Bombay Industrial Disputes Committee published a report during the year 1922 and recommended legislation on the lines of the British Industrial Courts Act, 1919, for the creation of Industrial Courts for the Bombay Presidency. The main difference between the British Act and the proposals of the committee was that, whereas the former provided for a permanent industrial court, the latter suggested that provision should be made for the constitution of *ad hoc* courts. No action was taken on the recommendation of the committee till the year 1924 when the Government of Bombay published their Bill to provide for enquiry into the settlement of trade disputes. This Bill provided for Courts of Enquiry and for arbitration by one or more persons. The members of the Courts of Enquiry and Boards of Arbitration were to be appointed by the Governor in Council, but in the case of the chairman of boards of arbitrators a panel was to be constituted. The Bombay Bill was a very simple measure and its main clauses were framed more or less on lines similar to those in the Industrial Courts Act, 1919.

The Government of Bombay did not proceed with their Bill in view of the fact that the Government of India circulated a draft Bill which they proposed to introduce in the Legislative Assembly for the whole of India, in August 1924. This Bill was very wide and comprehensive in scope and extent. It covered all workmen including the employees of the Government of India and of any Local Government. An important distinction was made in the general body of workmen by dividing them into employees in public utility services and other employees. In the case of public utility services and in those services to be specially notified as such by the Governor-General in Council, it was provided that it would not be lawful for any employer to declare or enforce a lock-out or for any workman to take part in a strike on account of any disputes, unless due notice of the proposed lock-out or strike was sent to the prescribed officer. Such strikes or lock-outs were not permitted until the expiry of 30 days after notice had been served in cases where no order had been made for the reference of the dispute to a board ; and until the expiry of 90 days after notice had been served, in cases where such an order had been made or until the expiry of seven days after the publication of a report by a board, whichever of the two dates might be earlier. There was no separate provision in the Bill for courts of enquiry or boards of arbitration or conciliation. The functions of these two separate institutions in the industrial disputes legislation were vested under the Government of India Bill in one body which was to be called the Board of Investigation and Conciliation. The members of a board were to be selected from permanent panels of (1) Representatives of employees ; (2) Representatives of employers ; and, (3) persons to be appointed as chairmen. Both the Government of India and each Local Government were to form their own panels. The functions of these boards were to endure to bring about a settlement of any dispute by thorough investigation of the circumstances and causes of each dispute. Nothing further was heard about this Bill till the end of 1925 when His Excellency the Viceroy in a speech at the annual meeting of the Associated Chambers of Commerce of India and Ceylon at Calcutta said: "The question of providing means of conciliation of trade dispute has been thoroughly explored but it would be premature to legislate on this question until the Trade Union Bill has become law." The Trade Unions Act was passed in the Legislative Assembly in March 1926 and was brought into operation with effect from 1st June 1927.

In August 1928, the Government of India published their second Bill making provision for the investigation and settlement of trade disputes and for certain other purposes. This bill was introduced in the Legislative Assembly for a motion for circulation on the 21st September 1928. The present Bill differs in several important respects in comparison with the Government of India's original Bill of 1924. The main part of the bill falls into three parts.

Clauses 3 to 14 relate to the establishment of tribunals for the investigation and settlement of trade disputes. This part of the Bill is based generally on the British Industrial Courts Act of 1919, and its detailed provisions are adopted for the most part from clauses in that Act. The main difference is that, whereas the British Act sets up a Standing Industrial Court, the Conciliation Boards which the Bill proposes to establish are intended to be appointed *ad hoc* like the Courts of Inquiry, in order to deal with particular disputes. The object of Courts of Inquiry which will ordinarily be composed of persons having no direct interest in the dispute will be to investigate and report on such questions connected with the dispute as may be referred to them. The objects of Boards of Conciliation, which will ordinarily include representatives of the parties to a dispute, will be to secure a settlement of the dispute. Both Courts of Inquiry and Boards of Conciliation will be able to enforce attendance of witnesses and the production of documents, and their reports are to be published. Neither party will be under any obligation to accept the finding of the Court or the advice of the Board ; and in cases where the dispute is not brought to an end during the deliberations of the tribunal that has been appointed, reliance is placed on the force of public opinion which will be enabled by the publication of the report of the tribunal to arrive at just conclusions on the merits of the dispute.

The second part of the Bill consists of clause 15 which relates to public utility services. " Public Utility Services " is defined in clause 2 (*f*), and in accordance with this definition, clause 15 is only applicable to such railway services as have been notified by the Governor General in Council. The clause makes it a penal offence for workers employed on monthly wages in public utility services to strike without previous notice, and also provides heavier penalties for persons abetting such an offence. The clause is based on the principle that persons whose work is vital to the welfare of the community generally should not be entitled to enter into a strike before sufficient time has been given to examine the merits of their grievances and to explore the possibilities of arriving at a peaceful settlement. Provisions of a somewhat similar type already exist in the Indian Post Office Act and in a number of Municipal Acts in India, and the principle is one which is widely accepted in other countries.

Clauses 16 to 20 contain certain special provisions relating to illegal strikes and lock-outs. These clauses follow closely the provisions of sections 1, 2 and 7 of the British Trade Disputes and Trade Unions Act, 1927. They are applicable only in the case of strikes and lock-outs which satisfy both of two conditions ; in the first place, the strike or lock-out must have other objects than the mere furtherance of a trade dispute within the industry to which the strikers or employers belong, and, in the second place, the strike or lock-out must be designed to cœrce Government either directly or by inflicting hardship on the community. If these conditions are satisfied, the strike or lock-out becomes illegal. Persons furthering the strike or lock-out are liable to punishment and are deprived of the protection granted to them by the Indian Trade Unions Act, while persons refusing to take part in it are protected from trade union disabilities to which they might otherwise be subjected.

The motion for circulation was adopted in the Legislative Assembly and the Bill was circulated to all Local Governments for opinion. The Government of India propose to introduce the Bill in the budget session of the Legislative Assembly early in 1929.

TRADE UNION LEGISLATION.

In March 1921, Mr. N. M. Joshi, M.L.A., moved a Resolution in the Legislative Assembly recommending that steps should be taken to provide legislation for the registration of Trade Unions and for the protection of Trade Unions. In September 1921, the Government of India addressed all Local Governments for their views, after consulting the interests concerned, on the question of the principle of such legislation and with regard to the form which it should take. On receipt of their replies, a Bill was drawn up and this was again circulated for opinion. The Bill to provide for the Registration of Trade Unions and in certain respects to define the Law Relating to Registered Trade Unions in British India was introduced in the Simla Session of the Legislative Assembly on the 31st August 1925 and was referred to a Select Committee. It was passed by the Legislative Assembly on the 8th February and by the Council of State on the 25th February and received the assent of the Governor-General on the 25th March 1926. The Trade Union Act was brought into force on 1st June 1927. Mr. N. M. Joshi introduced in the Legislative Assembly on the 9th February 1928, a Bill to amend Section 43 of the Indian Penal Code in order to extend to the officers and members of unregistered Trade Unions the protection afforded by Section 17 of the Indian Trade Unions Act, 1926, which lays down that ' no officer or member of a registered Trade Union shall be liable to punishment under sub-section (2) of section 120B of the Indian Penal Code, in respect of any agreement made between the members for the purposes of furthering any such object of the Trade Union as is specified in section 15, unless the agreement is an agreement to commit an offence.' The Assembly, however threw out the Bill.

The following paragraphs give the more important provisions of the Act :—

DEFINITIONS.

Registrar.—"Registrar" means a Registrar of Trade Unions appointed by the Local Government under section 3, and "the Registrar," in relation to any Trade Union, means the Registrar appointed for the province in which the head or registered office, as the case may be, of the Trade Union is situated.

Trade Dispute.—"Trade Dispute" means any dispute between employers and workmen or between workmen and workmen, or between employers and employers which is connected with the employment or non-employment, or the terms of employment or the conditions of labour, of any person, and 'workmen" means all persons employed in trade or industry whether or not in the employment of the employer with whom the trade dispute arises.

Trade Union.—"Trade Union" means any combination, whether temporary or permanent, formed primarily for the purpose of regulating the relations between workmen and employers or between workmen and workmen, or between employers and employers, or for imposing restrictive conditions on the conduct of any trade or business and includes any federation of two or more Trade Unions.

REGISTRATION.

Mode of Registration.—Any seven or more members of a Trade Union may, by subscribing their names to the rules of the Trade Union and by otherwise complying with the provisions of this Act with respect to registration, apply for registration of the Trade Union under this Act.

Provisions to be contained in the Rules of a Trade Union.—A Trade Union shall not be entitled to registration under this Act, unless the executive thereof is constituted in accordance with the provisions of this Act, and the rules thereof provide for the following matters, namely :—

(*a*) the name of the Trade Union ;

(*b*) the whole of the objects for which the Trade Union has been established ;

(*c*) the whole of the purposes for which the general funds of the Trade Union shall be applicable, all of which purposes shall be purposes to which such funds are lawfully applicable under this Act ;

(*d*) the maintenance of a list of the members of the Trade Union and adequate facilities for the inspection thereof by the officers and members of the Trade Union ;

(*e*) the admission of ordinary members who shall be persons actually engaged or employed in an industry with which the Trade Union is connected, and also the admission of the number of honorary or temporary members as officers required under section 22 to form the executive of the Trade Union ;

(*f*) the conditions under which any members shall be entitled to any benefit assured by the rules and under which any fine or forfeiture may be imposed on the members ;

(*g*) the manner in which the rules shall be amended, varied or rescinded ;

(*h*) the manner in which the members of the executive and the other officers of the Trade Union shall be appointed and removed ;

(*i*) the safe custody of the funds of the Trade Union, an annual audit, in such manner as may be prescribed, of the accounts thereof and adequate facilities for the inspection of the account books by the officers and members of the Trade Union ; and

(*j*) the manner in which the Trade Union may be dissolved.

Cancellation of Registration.—A certificate of registration of a Trade Union may be withdrawn or cancelled by the Registrar—

(*a*) on the application of the Trade Union to be verified in such manner as may be prescribed, or

(*b*) if the Registrar is satisfied that the certificate has been obtained by fraud or mistake, or that the Trade Union has ceased to exist or has wilfully and after notice from the Registrar contravened any provisions of this Act or allowed any rule to continue in force which is inconsistent with any such provision, or has rescinded any rule providing for any matter provision for which is required by section 6 :

Provided that not less than two months' previous notice in writing specifying the ground on which it is proposed to withdraw or cancel the certificate shall be given by the Registrar to the Trade Union before the certificate is withdrawn or cancelled otherwise than on the application of the Trade Union.

RIGHTS AND LIABILITIES OF REGISTERED TRADE UNIONS.

Objects on which General Funds may be spent.—The general funds of a Trade Union s hall not be spent on any other objects than the following, namely :—

(*a*) the payment of salaries, allowances and expenses to officers of the Trade Union ;

(*b*) the payment of expenses for the administration of the Trade Union, including audit of the accounts of the general funds of the Trade Union ;

(*c*) the prosecution or defence of any lega proceeding to which the Trade Union or any member thereof is a party, when such prosecution or defence is undertaken for the purpose of securing or protecting any rights of the Trade Union as such or any rights arising out of the relations of any member with his employer or with a person whom the member employs ;

(*d*) the conduct of trade disputes on behalf of the Trade Union or any member thereof ;

(*e*) the compensation of members for loss arising out of trade disputes ;

(*f*) allowances to members or their dependants on account of death, old age, sickness, accidents or unemployment of such members ;

(*g*) the issue of, or the undertaking of liability under policies of assurance on the lives of members, or under policies insuring members against sickness; accidents or unemployment ;

(*h*) the provision of educational, social or religious benefits for members (including the payment of the expenses of funeral or religious ceremonies for deceased members) or for the dependants of members ;

(*i*) the upkeep of a periodical published, mainly for the purpose of discussing questions affecting employers or workmen as such ;

(*j*) he payment, in furtherance of any of the objects on which the general funds of the Trade Union may be spent, of contributions to any cause intended to benefit workmen in general, provided that the expenditure in respect of such contributions in any financial year shall not at any time during that year be in excess of one-fourth of the combined total of the gross income which has up to that time accrued to the general funds of the Trade Union during that year and of the balance at the credit of these funds. at the commencement of that year ; and

(*k*) subject to any conditions contained in the notification, any other object notified by the Governor-General in Council in the *Gazette of India.*

Constitution of a separate Fund for Political purposes.—(1) A registered Trade Union may constitute a separate fund, from contributions separately levied for or made to that fund, from which payments may be made, for the promotion of civic and political interests of its members, in furtherance of any of the objects specified in sub-section (2).

(2) The objects referred to in sub-section (1) are :—

(*a*) The payment of any expenses incurred, either directly or indirectly, by a candidate or prospective candidate for election as a member of any legislative body constituted under the Government of India Act or of any local authority before, during or after the election in connection with his candidature or election ; or

(*b*) the holding of any meeting or the distribution of any literature or documents in support of any such candidature or prospective candidature ; or

(*c*) the maintenance of any person who is a member of any legislative body constituted under the Government of India Act or of any local authority ; or

(*d*) the registration of electors or the selection of a candidate for any legislative body constituted under the Government of India Act or for any local authority ; or

(*e*) the holding of political meetings of any kind, or the distribution of any political literature or political documents of any kind.

(3) No member shall be compelled to contribute to the fund constituted under sub-section (1) ; and a member who does not contribute to the said fund shall not be excluded from any benefits of the Trade Union or placed in any respect either directly or indirectly under any disability or at any disadvantage as compared with other members of the Trade Union (except in relation to the control or management of the said fund) by reason of his not contributing to the said fund ; and contribution to the said fund shall not be made a condition for admission to the Trade Union.

Criminal Conspiracy in Trade Disputes—No officer or member of a registered Trade Union shall be liable to punishment under sub-section (2) of section 120-B of the Indian Penal Code, in respect of any agreement made between the members for the purpose of furthering any such object of the Trade Union as is specified in section 15, unless the agreement is an agreement to commit an offence.

Immunity from Civil Suit in certain Cases—(1) No suit or other legal proceeding shall be maintainable in any Civil Court against any registered Trade Union or any officer or any member thereof in respect of any act done in comtemplation or furtherance of a trade dispute to which a member of the Trade Union is a party on the ground only that such act induces some other person to break a contract of employment, or that it is in interference with the trade, business or employment of some other person to dispose of his capital or of his labour as he wills

(2) A registered Trade Union shall not be liable in any suit or other legal proceeding in any civil court in respect of any tortious act done in contemplation or furtherance of a trade dispute by an agent of the Trade Union if it is proved that such person acted without the knowledge of, or contrary to express instructions given by, the executive of the Trade Union.

Proportion of Officers to be connected with the Industry.—Not less than one-half of the total number of the officers of every registered Trade Union shall be persons actually engaged or employed in an industry with which the Trade Union is connected:

Provided that the Local Government may by special or general order, declare that the provisions of this section shall not apply to any Trade Union or class of Trade Unions specified in the order.

Returns.—(1) There shall be sent annually to the Registrar, on or before such date as may be prescribed, a general statement, audited in the prescribed manner, of all receipts and expenditure of every registered Trade Union during the year ending on the 31st day of March next preceding such prescribed date, and of the assets and liabilities of the Trade Union existing on such 31st day of March. This statement shall be prepared in such form and shall comprise such particulars as may be prescribed.

(2) Together with the general statement there shall be sent to the Registrar a statement showing all changes of officers made by the Trade Union during the year to which the general statement refers, together also with a copy of the rules of the Trade Union corrected up to the date of the despatch thereof to the Registrar.

(3) A copy of every alteration made in the rules of a registered Trade Union shall be sent to the Registrar within fifteen days of the making of the alteration.

Under the powers conferred on them by Section 29 of the Indian Trade Unions Act, 1926, the Local Governments framed regulations for the purpose of carrying into effect the provisions of the Act. The Regulations prescribed various Forms for notices to be given and returns to be submitted to the Registrar. Detailed provisions were made with regard to the qualifications of the auditors who were to audit the accounts of different classes of registered Trade Unions. In addition, the fees payable for registration of Unions, of changes in rules and for inspection of documents and the Register of Trade Unions were also prescribed.

The first Annual Reports submitted by the Local Governments to the Government of India on the working of the Trade Unions Act, 1926, were for the year ending the 31st March 1928. The Report for the Bombay Presidency shows that 12 Trade Unions with a total membership of 52,559, as at 31st March 1928, were registered under the Act during the year under report. None of these Unions maintained a Political Fund. The aggregate closing balance of the Unions amounted to nearly Rs. 1½ lakhs whereas the actual assets of the Unions, *excluding* unpaid subscriptions due, amounted to about Rs. 84,000.

As a result of the recognition by the employers, of the special status of Trade Unions registered under the Act, several Unions revised their constitutions to suit the requirements of the Act and sought registration. By the end of the year 1928, altogether 31 Trade Unions in the Bombay Presidency had been registered under the Act.

WORKMEN'S COMPENSATION.

The Workmen's Compensation Act of 1923 received the assent of the Governor-General on the 5th March 1923. The Act extends to the whole of British India including British Baluchistan and the Sonthal Parganas and came into force on the first day of July 1924. The original Bill contained two distinct parts Chapter II which lay outside the general scheme for compensation, contained provisions modifying the ordinary law in respect of employers' liability and making it easier for injured workmen to sue their employers for damages in the Civil Courts. These clauses applied only to workmen, who come under the workmen's compensation provisions, so that, although they omitted the limit to damages which governs their counterpart in England, they were not likely to be much used. This Chapter II was deleted from the measure by the Legislative Assembly. Ten classes of workmen are covered by the Act. Some of these, such as members of fire brigades, telegraph and telephone linesmen, sewage workers and tramwaymen, are small, and as the definition of seaman is limited to those employed on certain inland vessels, only a very small proportion of Indian seamen will benefit by the bill. The five important classes are the workers in factories, mines, docks and on railways, practically all of whom are included, and those engaged in certain types of building work, notably the construction of industrial and commercial buildings, and any other buildings which run to more than one storey. The most important classes excluded altogether are agricultural workers and domestic servants. Non-manual labourers getting more than Rs. 300 a month are excluded, except on the railways. Power is taken to include other hazardous occupations by notification from time to time. All occupations involving blasting operations were thus proposed to be declared by the Governor-General in Council, as hazardous occupations *vide* notification by the Government of India, Department of Industry and Labour, No. L-1440 dated the 9th February 1928. Compensation is to be given, as in the English Act, for personal injury by accident arising out of and in the course of employment. It is also to be given for diseases in certain cases. The provisions for diseases have been so framed that if a certain class of workmen contracts a scheduled disease, it will usually be extremely difficult for the employer to defeat a claim for compensation. On the other hand, other workmen will find it equally difficult to get compensation for disease, as they will have to prove that the disease arises "solely and directly" from the employment. The diseases scheduled at present are anthrax, lead poisoning and phosphorus poisoning. Whether compensation can be claimed for diseases other than those scheduled is doubtful, but the list is made capable of extension. Mercury poisoning was thus added to Schedule III by notification, dated 28th September 1926.

Scales.—The scales for compensation are generous, they are based on the unanimous recommendation of a Committee which met in June. Adults (*i.e.*, persons not under the age of 15) and minors are distinguished throughout and compensation is subject to upper limits in every case. For death the relatives receive 30 months' wages of the deceased workman, subject to a maximum of Rs. 2,500 if he was an adult. For a minor who is killed, the compensation payable is the fixed sum of Rs. 200. If a workman is completely disabled for life, he gets 42 months' wages if he is an adult and 84 months' wages if he is a minor, subject in each case to a maximum of Rs. 3,500. If he sustains permanent injuries that do not completely disable him, he gets proportions of the above sums, and for certain clearly recognizable injuries, like the loss of limb, these proportions are specific. Thus a workman, who lost his right arm below the elbow would receive 60 per cent. of the sums specified above, subject to a maximum of Rs. 2,100. If his pay was Rs. 30 monthly, the sum would come to Rs. 756. All these payments are lump sums. Of much greater importance are the provisions for the minor and more common injuries. Statistics based on experience of industry generally in other countries indicate that 50 per cent. of injuries from accidents cause disablement for not more than ten days, 44 per cent. cause disablement lasting more than 10 days, but ultimately disappearing, 5 per cent. result in permanent injuries and 1 per cent. end fatally. A large proportion of cases will be excluded by the provision that no compensation is to be paid on account of the first ten days of disablement. The great majority of the remaining cases will fall under the scale for temporary disablement. The rate of payment for temporary disablement is half wages for adults and two-thirds wages for minors, subject to a maximum of five years, and for minors, two-thirds wages or whole monthly wages after they have attained the age of 15 years, subject in each case to a maximum amount of Rs. 30, and to a maximum period of 5 years. This maximum of 5 years is not of great importance, as experience shows that the number of such cases which last more than six months is insignificant. During the first six months of these payments they can only be commuted to a lump sum if both parties agree; after payments have gone on for six months, either party can apply for commutation. In its treatment of the difficult question of dependents the Indian Act allows only husbands and wives, parents and minor children to claim compensation, and it makes the compensation a fixed sum independent of the number of those relations. The administration of the Act and the settlement of disputes is entrusted to special Commissioners, with a very simple procedure wide powers and restricted opportunities for appeals.

Only two Provinces—Bengal and Bombay—have so far appointed full-time Commissioners. The full-time Commissioner in the Bombay Presidency has an immediate jurisdiction extending over Bombay City, the Bombay Suburban District, the Districts of Ahmedabad, Broach, Surat, Khandesh and Sholapur and the areas occupied by the Hydro-Electric Companies managed by Messrs. Tata Sons Ltd., and by the G. I. P. and the B. B. & C. I. Railway lines coming within the Bombay Presidency. In the Madras Presidency, the Labour Commissioner is also the Commissioner for workmen's compensation. In the other Provinces and in the Districts of Bengal and Bombay which are not under the jurisdiction of the Provincial full-time Commissioners, the District Magistrates and Subordinate Judges have been appointed ex-officio Commissioners.

The Annual Report on the working of the Workmen's Compensation Act for the whole of India during the year 1926 shows that workmen are availing themselves of the benefits of the Act to an increasing extent. The number of cases in which compensation was paid in 1926 was 14,096 as against 11,371 in 1925 and the total amount paid was Rs. 821,475-10-11 as against Rs. 644,120-6-6. In Bengal and Bombay the larger employers of labour are insuring their liabilities to an increasing extent with insurance Companies and this has facilitated to a considerable extent the settlement of claims under the Act. Labour organisations are also taking an increasingly active part in furthering the claims of their members but their activities in this direction are still inadequate for the needs of the workpeople in the country.

The total number of applications filed under section 10 (for the award of compensation) was 379 as against 284 in 1925, the increase being most marked under permanent disablement. There was also a marked increase in the number of contested cases and in the number of cases that were dismissed by the Commissioners for Workmen's Compensation. The number of applications for the registration of agreements was 610 as against 427 in 1925. Of this number only 2 were not registered on account of the inadequacy of the amount of compensation offered. It is satisfactory to note that in the majority of cases compensation was paid without the intervention of the Commissioner. Over 14,000 persons are reported to have received compensation in 1926 and the total number of applications filed for the award of compensation was only 379.

During the year there were 7 appeals (including one revision petition) to the High Court. Of these 5 were disposed of during the year and 2 were pending at its close. There was also one reference made to the High Court under section 27 of the Act.

The Workmen's Compensation Act, 1923, was amended during the year under report in order to bring the Indian law into conformity with the provisions of the Draft Convention concerning Workmen's Compensation for Occupational Diseases adopted at the Seventh International Labour Conference held at Geneva in 1925. This Convention has been ratified by India and the necessary changes were made in sub-section (2) of section 3 and in the list of occupational diseases given in Schedule III of the Act. Certain occupations in connection with operations for winning natural petroleum or natural gas and in connections with the loading, unloading and fuelling of a ship in any harbour, roadstead or navigable water were also brought within the purview of the Act by notification issued by the Governor-General in Council in exercise of the powers conferred by sub-section (3) of section 2 of the Act.

So far the administration of the Act has given rise to remarkably little difficulty, but it is still premature to say that the endeavours made to meet the peculiar conditions in India have been completely successful, as full use is not yet being made of the Act. The Workmen's Compensation Act, 1923, came into force on the 1st July 1924. Since then a number of amendments have suggested themselves or have been proposed by Commissioners for Workmen's Compensation and Local Governments. Some of the latter proposals involve the modification of the principles underlying the present Act or of its more important features. So far as these are concerned, the Government of India consider it advisable to consult Local Governments and the public generally before forming conclusions. The revision of the Act so as to amend those sections or parts of sections which are admittedly defective and the introduction of changes which are likely to raise no important controversial points and which will be generally recognised as improvements are now engaging the attention of the Government of India.

Proposed Labour Legislation.

Largely as a result of the demands of Labour in Indian Legislatures, in the Press and elsewhere, the Government of India have at present under comtemplation the provision of legislation (1) for defining the limits within which wages must be paid; and (2) for the regulation of Deductions made from Wages or Payments in respect of Fines.

The Prompt Payment of Wages.

In September 1924, the Government of India requested all Local Governments to furnish particulars regarding the periods by which wages are paid in organised industries and the delays which are associated with their payment. The results of the enquiry for the Bombay Presidency were published in the issue of the *Labour Gazette* for January 1925 and for all India in a special bulletin issued by the Department of Industries and Labour—Bulletin No. 34, 'Periods of Wage Payment.' The information collected revealed a state of affairs which could not be regarded as other than unsatisfactory. The delays which elapse between the end of the period by which wages have been earned and the date on which they are paid were found to be longer than is usual in industries in other countries, and, in a number of cases, were so great as to add appreciably to the economic difficulties of the workers.

In July 1926, the Government of India addressed all Local Governments for their views, after consulting the interests concerned, on the provisional proposals drawn up with regard to the form which the legislation for the control of this matter should take. It was pointed out that systematic delays in payment are particularly associated with payments on a monthly basis—a month being the period most commonly employed for the calculation of wages. It is no uncommon thing—in fact, it appears to be the rule in certain industries for monthly wages to be systematically withheld until a fortnight after the close of the month to which they relate, and cases have been reported where wages had been withheld for considerably longer periods. It was suggested to the Government of India that, as the evil is particularly associated with monthly payments, employers should be compelled to adopt shorter periods of wage payments. This was one of the arguments put forward in support of Diwan Chaman Lal's Weekly Payments Bill. This Bill when it was referred to Local Governments for consideration met with such general opposition that the Government of India were compelled to oppose its consideration in the Legislative Assembly. The Government of India do not think that any Bill of this kind is likely to receive the support of public opinion or to prove effective in its operation; but, whilst not accepting the view that the general system of monthly payments is a satisfactory one, they recognise that if the abuses referred to can be checked or eliminated by legislation it is the duty of Government to introduce such legislation.

The scheme outlined proposes to set statutory limits to the time within which wages must be paid. In the case of monthly workers the limit proposed is seven days, for fortnightly workers four days, for weekly workers two days and for daily workers one day. It is suggested that it should be left to the employers subject to the approval of the Local Government, to fix the date on which the month should commence. The difficulties arising out of the fact that in some cases when wages are paid at piece rates intricate valuations may be required to calculate wages are proposed to be met by prescribing that, in such cases, the payment, within the statutory limits laid down, of seventy-five per cent, (or some higher percentage) of the wages earned should constitute compliance with the law. It is further proposed that the measure, in the initial stages, should be confined only to such establishments as are covered by the Indian Factories Act and the Indian Mines Act, and that the enforcement of the measure should rest with the inspection staff of the Factories and the Mines Departments through some form of summary procedure.

Regulation of Deductions from Wages for Fines.

In June 1926, the Government of India requested all Local Governments to procure information on the extent of the practice in India by which employers in industrial concerns are empowered to inflict fines upon their workmen. Suggestions have been made in the Central Legislature, in the Press and elsewhere that the system of inflicting fines upon workmen is common in Indian industrial establishments, and that it constitutes an evil of such proportions that steps should be taken either to abolish the system altogether or to reduce it to such dimensions as to prevent abuse.

The experience of Western countries with regard to the subject has in many cases led to more or less elaborate legislation on the subject. The main provisions of the English Law are contained in the Truck Act of 1896. In several other countries the power to impose fines and make deductions from wages is regulated by law. Sometimes a limit in the shape of a maximum percentage of wages is imposed; generally, deductions can only be made in accordance with a code of regulations duly posted in the factory or other establishment; and frequently the law contains the statutory provision that sums paid as fines must be credited to funds devoted in some manner or other to the benefit of the workers.

The Government of India have not at present sufficient information at their disposal regarding the degree to which the system of imposing fines is prevalent in India, the forms which it takes, or the extent, if any, to which it is in practice abused to enable them to form any definite conclusions. The object of the enquiry is to ask Local Governments to furnish them with such information as they are able to collect on the subject, after consultation with the interests concerned, and to favour them with their views on the desirability of aking any action, legislative or otherwise, to counter any abuses which may be found to prevail.

The Labour Office of the Government of Bombay conducted an extensive enquiry into the question and the results of its enquiry have been published in the form of a special report. Over 1,300 establishments—factories, non-factories, offices, etc.,—were covered by the Labour Office enquiry. The results show that the system of fining is general in textile mills. and fairly common in the other establishments. Rules governing the infliction of fines were found to exist mostly in the case of the textile mills and in some of the larger workshops in Bombay City. In establishments under private ownership, no limits appeared to have been prescribed with regard to the extent to which fines could be inflicted. The offences for which fines are imposed includes breaches of discipline, disobedience, bad or negligent work, loss or damage of tools or machinery, etc. Fines for late attendance are fairly general in all establishments except seasonal factories such as Gins and Presses. In Textile mills fines are also imposed for spoilt or damaged cloth. The proportion of fines to the total wages bill for a period of one year amounted to 0.39 per cent. in the case of textile mills and 0.18 per cent. in the case of other factories. Deductions from wages for supply of tools or materials were practically few whereas deductions in respect of damaged or spoilt material handed over to the workers were made by 58.3 per cent. of the Textile mills covered by the enquiry . The incidence of these deductions worked out at Rs. 3-2-4 per operative. Other deductions from wages on account of medical aid, rent for lodging, provident fund, etc., were comparatively few but the Textile Mills in Bombay and Ahmedabad made deductions in respect of interest on advances granted to their employees.

The Government of India are at present considering the replies received from Local Governments on the subject but have not yet arrived at any definite decision as to whether legislation of the type of the Truck Acts should be adopted in India.

WAGES.

In Agriculture,—There is much discussion, with no very definite conclusions, as to whether wages have kept pace with the cost of living. Conditions vary so markedly between Province and Province that it is difficult to give exact figures. Different Provincial Governments publish, from time to time, the results of Quinquennial Censuses into the wages of labourers mainly in agricultures. The Labour Office of the Government of Bombay published a Report in 1924 of an Enquiry into Wages in Agriculture which gave the average daily earnings of three classes of agricultural labour, *viz.*, skilled labour, ordinary labour, and field labour, in each of the 26 districts of the Bombay Presidency, separately for urban areas and rural areas, and for each of 23 years from 1900 to 1922. The figures for each year from 1923 to 1926 have been published in the General-Administration Reports of the Bombay Presidency. The wages prevailing in other provinces for similar types of labour do not compare unfavourably with wages in the Bombay Presidency for any particular year for which a comparison is made. This statement requires an important qualification. It is not meant that the money amounts actually paid are similar. The rates of wages in different provinces vary according to the extent of their industrialisation and money wages in Provinces which are mainly agricultural are on a lower level than the money wages in Provinces which are highly industrialised, *i.e.*, in Bombay and Bengal. There is no doubt whatever that wages have risen markedly in all parts of India from 1918 to 1926 but there is a downward tendency noticeable in mofussil wage since 1926. The general condition of the Indian labourer has nevertheless improved. The construction of a real wage index number is not always indicative of the general material condition of any group of workers. The utility of such an index number is only confined to a particular comparison with any given date and provided always that the two sets of figures showing money wages and the cost of living at two particular dates are accurately complied, the real wage index number at the later date as compared with the condition of the workman at the former date gives an accurate reading of the position of his purchasing power in comparison with that date. Indian publicists constantly aver that the condition of the Indian labourer to-day is worse than ever it was before. The true fact is that since wages and prices are both variables, "real wages" being a function of two variables, could only remain at the same level, if the two factors vary proportionately. But this does not happen and wage changes always lag behind price changes. When prices rise real wages rise only slowly to the original level, and when prices fall real wages fall slowly. Consequently the labourer is sometimes better off and sometimes worse off. Comparison of conditions in India to-day with the pre-war year shows that during this particular period the condition of the Indian labourers has undoubtedly improved. This is amply proved by the figures given below showing the index numbers of daily average wages of skilled labourers, ordinary labourers and field labourers, for urban areas and for rural areas for the Bombay Presidency.

Agricultural Wages (Nominal).

Index Numbers for the Bombay Presidency (including Sind) 1913=100.

The construction of accurate real wage figures to correspond with the index numbers of nominal wages given above is not possible on account of the inapplicability of any general cost of living index number for a particular group of workers in a particular centre to the Presidency as a whole.

In the Cotton Mill Industry.—An enquiry was held by the Labour Office of the Government of Bombay into Wages and Hours of Labour in the Cotton Mill Industry for August 1923 which covered a total number of 251·219 work-people in 186 mills in the Bombay Presidency and in the States within its territorial limits. The important results of this enquiry were (1) a decline in the number of children employed owing to more rigorous factory inspection under the new Factory Act, (2) an absenteeism figure as high as 10·4 per cent. for all work-people; 9·2 per cent. for men; 14·7 per cent. for women; ·98 per cent. for time workers; and 11·2 per cent. for piece-workers; (3) the average monthly earnings per head in August 1923 as compared with May 1921 were at the same level in Bombay, slightly over in Ahmedabad and lower in Sholapur, Baroda State and other Centres in the Presidency; (4) the potential monthly earnings for all work-people in the Presidency would have amounted to Rs. 32-1-0 per head per month had all work people worked for a full working month of 27 days at the rates of average daily earnings which prevailed in August 1923—the difference between this and the actual monthly earnings amounting to Rs. 3-8-0 or 12 per cent.; (5) the total Wages Bill in the cotton mill industry in August 1923 amounted to Rs. 72,22,000 for the number of work-people covered in the enquiry; (6) the average hours of labour per day amounted to 10 hours and 5 minutes for men, 9 hours and 35 minutes for women and 5 hours for half timers or children; (7) the number of holidays recommended in the Bombay Mills by the Millowners' Association during the year 1923 amounted to 57; and (8) except in Sholapur no bonuses were paid for service in the year 1923.

The following table shows the daily average earnings, per capita, of work-people in different occupations classified according to age and sex groups :—

* By "Big Lads" is generally meant boys between the ages of 15 and 18 but the term also includes men who are not considered as sufficiently bodied to be employed as men.

† Children are workers, boys and girls, more than 12 years and under 15 years of age.

The third Labour Office Enquiry into Wages in the Cotton Mill Industry in the Cities of Bombay, Ahmedabad and Sholapur was held in 1926 on the basis of the Muster Roll. The results of this enquiry will be published in due course.

OFFICIAL ORGANISATION.

The Government of India and several Local Govenments have set up special machinery for dealing with Labour issues, and there are Labour officers with the Governments of Bengal, Madras and Burma whilst the Bombay Government, on the advice of the informal committee whose recommendations have been mentioned above, constituted a special Labour Office in the Secretariat.

In a resolution of Government in the Home Department, dated 29th April 1921, the functions of the Labour Office in Bombay were set out as follows :—

(*i*) **Labour Statistics and Intelligence**—These relate to the conditions under which labour works and include information relating to the cost of living, wages, hours of labour, family budgets, strikes and lock-outs, and similar matters;

(*ii*) **Industrial Disputes.**—As experience and knowledge are gained and the activities of the Labour Office develop, it will promote the settlement of industrial disputes when these arise; and

(*iii*) **Legislation and other matters relating to Labour.**—The Labour Office will advise Government from time to time as regards necessary new legislation or the amendment of existing laws. The Labour Office publishes a monthly journal entitled the *Labour Gazette* which is a journal for the use of all interested in obtaining prompt and accurate information on matters specially affecting labour in India and abroad. The address of the Labour Office is :—SECRETARIAT, BOMBAY.

Director of Information and Labour Intelligence, Registrar of Trade Unions and Ag. Commissioner for Workmen's Compensation—Mr. J .F. Gennings, Bar-at-Law, J. P.

Investigators.—Mr. S. R. Deshpande, B.A., B. Litt. (Oxford); Mr. N. A. Mehrban, B.A.; (also Asst. Registrar of Trade Unions.) Mr. A. S. Rajan, B.A., LL.B.

Lady Investigators.—Mrs. K. Wagh; Miss G. Pimpalkhare; Miss S. Dabholkhar.

LABOUR ASSOCIATIONS.

ALL-INDIA TRADE UNION CONGRESS.

President.—Pandit Jawahar Nehru.

Vice-Presidents.—(1) Mr. Thengdi
(2) ,, Kulkerni

General Secretary.—Mr. N. M. Joshi, M.L.A., C/o Servants of India Society, Sandhurst Road, Bombay.

Assistant Secretaries.—(1) Mr. R. R. Bakhle.
(2) ,, S. A. Dange.

Treasurer.—Mr. F. J. Ginwalla, 123, Esplanade Road, Fort, Bombay.

CENTRAL LABOUR BOARD FOR BOMBAY.

President.—Rai Saheb Chandrika Prasad.

Vice-President.—F. J. Ginwalla, M.A., LL.B., 123, Esplanade Road, Fort, Bombay.

Hon. Gen. Secretary.—S. H. Jhabvala, B.A., 123, Esplanade Road, Fort, Bombay.

The names and addresses of the officials of other trade unions in the Bombay Presidency are published regularly every quarter by the Labour Office in the *Labour Gazette.*

Domestic Servants.

The relationship of master to servant in India is a subject to which attention is frequently directed in the Press by complaints about the alleged deterioration of domestic servants and the hardships to which employers are subjected by the boycotting action of discharged servants. The remedy most commonly propounded for misbehaviour on the part of servants is registration with a view to checking the use of false testimonials, or "chits," and to enabling masters to obtain certain information as to the character of the persons they employ. This mode of procedure is of German origin, for the old Prussian Servants' Ordinances (Gesindeordnung) were supplemented in 1854 by a law, applying only to agricultural labourers and domestic servants, which punishes breach of contract, and since then various State laws dealing with domestic servants have been passed in Germany. The conditions are not, however, analogous for the servant keeping class in India is proportionately larger than in Europe, as also is the number of servants kept by each individual.

The first attempt in the East to deal with the problem by legislation was made in **Ceylon.** The act dealing with the registration of domestic servants in that Colony is comprised in Ordinance No. 28 of 1871. It extends to all classes of domestic servants, hired by the month or receiving monthly wages, and the word 'servant' means and includes head and under-servants, female servants, cooks, coachman, horsekeepers and house and garden coolies. The Act came into operation in 1871 and empowered the Governor to appoint for the whole of the Island or for any town or district, to which the Ordinance is made applicable, a registrar of domestic servants, who is to be under the general supervision and control of the Inspector-General of Police. A registry is kept by the registrar of all domestic servants employed within his town or district, and he has to enter therein the names of all the servants, the capacities in which they are employed at the time of such registration, the dates of their several engagements and such memorandum of their previous services or antecedents as they may desire to have recorded in the register. But the registrar must, previous to his entering all these details, satisfy himself as to the credibility of the statements made to him. Any person, who may not have been a domestic servant before, but who is desirous of entering domestic service, has to submit an application to the registrar, and if the registrar is satisfied that there are reasonable grounds to believe that the applicant is a fit and proper person to enter domestic service he shall enter his name in the register, recording what he has been able to learn respecting the person's antecedents together with the names of any persons who are willing to certify as to his respectability. If the applicant is unable to produce satisfactory or sufficient evidence as to his fitness for domestic service the registrar may grant him "provisional" registration, to be thereafter converted into "confirmed" registration according to the result of his subsequent service. If the registrar is satisfied that the applicant is not a fit and proper person he should withhold registration altogether, but in such a case he must report his refusal to register to the Inspector-General of Police.

Every person whose name has been registered in the general registry is given a pocket register containing the full particulars of the record made in the general registry. No person can engage a servant who fails to produce his pocket register or whose pocket register does not record the termination of his last previous service, if any. On engaging a servant the master has to enter forthwith in the pocket register the date and capacity in which such servant is engaged and cause the servant to attend personally at the registrar's office to have such entry inserted in the general registry. Similarly, in case the master discharges a servant he must insert in the pocket register the date and cause of his discharge and the character of the servant. Provided that if for any reason he be unwilling to give the servant a character or to state the cause of his discharge he may decline to do so. But in such a case he must furnish to the registrar in writing his reasons for so refusing. If the servant on dismissal fails to produce his pocket register the master must notify that fact to the registrar. Whenever any fresh entry is made in the pocket register the servant is bound to attend the registrar's office to have such an entry recorded in the general registry. Every servant whose name is registered shall, if he subsequently enters service in any place not under the operation of the Ordinance, attend personally at the nearest police station on his entering or leaving such service and produce his pocket register to the principal officer of police at such station in order to enable the police officer to record the commencement or termination of the service. The police officer has then to communicate it to the registrar of the town or district in which such servant was originally registered.

Various **penalties of fine** as well as of imprisonment are imposed for violation of any of the acts required to be done or duties imposed by the Act on the various persons mentioned below. As respects masters if they fail to fulfil any of the duties imposed on them by the Act they expose themselves to a liability of their being fined to the extent of Rs. 20. Similarly a servant, who fails to fulfil any of the duties imposed on him by the Act is liable to pay a fine not exceeding Rs. 20. But in case he gives any false information to the registrar or to any other person on matters in which he is required by this Ordinance to give information, he is liable to a fine not exceeding Rs. 50 or to imprisonment, with or without hard labour, not exceeding 3 months. A fee of 25 cents is charged to the master on engaging a new servant, a like fee of 25 cents is charged to the servant on his provisional registration, or on registration being confirmed, or for registration of previous service or antecedents. But in case of loss or destruction of the pocket register the servant has to pay one rupee for the issue of a duplicate pocket register.

A similar Ordinance (No. 17 of 1914) has been introduced in the **Straits Settlements,** where its operation has been limited to such local areas as may be declared by the Governor in Council, and its application within such areas has been restricted to the class of householders who are expected to desire the benefit of the provisions.

Sea Routes between India and Europe.

The Indian port for the direct journey to and from Europe is Bombay. There are ordinarily five lines of steamers by which the journey to and from the West *via* Bombay can be performed, either by sea all the way, or—and in some cases only—by sea part of the way and by rail across Europe. They are the P. &. O., the Anchor Line, the City and Hall Line, the Lloyd Triestino and the British India line. The Natal line steamers are available for Western passages only, the steamers sailing round the Cape on their Eastward voyages. There are ordinarily other services between Calcutta and the West, by steamers sailing round Ceylon, and several lines connect Colombo with Europe. Of the latter the Orient, the Messageries Maritimes, the Bibby Lines, N. Y. K., Australian Commonwealth, and Royal Dutch Lines are the chief besides the P. & O. The Bibby and Henderson services extend to Rangoon. The new railway between India and Ceylon greatly increases the importance of the Colombo route for Southern India. The shortest time between London and Bombay is 15 days *via* Marseilles. The following are the fares which are convertible at approximately current rates of exchange:—

Peninsular and Oriental S. N. Co.

Fares from Bombay or Karachi.	1st Saloon.			2nd Saloon.

THE SUEZ CANAL.

At the General Meeting of the Suez Canal Company, held in Paris in 1928, the Chairman said that the traffic of the Suez Canal had experienced unprecedented activity during 1927. The receipts, amounting to 208,000,000 gold francs, were greater by 11 per cent. than those of 1925, which were the previous highest. The conversion into French francs of the sums thus collected had been made on the basis of the rate of exchange of 124 f., at which the pound sterling had remained since the beginning of 1927. It was proposed to fix **gross dividend** per capital share at 577.52 f., an increase of 33.50 f., as compared with 1926. The growth in the traffic which permitted this increase in dividend was evidence that after the confusion brought about by the War the economic development of the world was continuing. Apart from inevitable fluctuations, due to local and ephemeral disturbances, international trade was ever tending to increase, and their undertaking continued, as in the past, to share fully in this growth.

Transit Tariff.—In view of such brilliant results they had considered it to be their duty to continue the traditional policy of lowering the transit tariff. The Board put in force on April 1st last a reduction of 25 centimes, thus bringing down to 7f. the transit due, which, since April 1st 1925, had been 7.25f. This step should not compromise the future maintenance of the dividend at the figure which was proposed this year. The increase in the current year was, moreover, such that it would go a long way towards making good the diminution involved by the reduction for the nine months of its operation in 1928.

Receipts.—The total receipts for the year amounted to 784,595,099f., an increase of 38,047,293f., as compared with 1926. Expenditure amounted to 65,637,589f., a decrease of 4,089,587f. The directors proposed to transfer 25,000,000f. to the amortization fund for improvement works and 25,000,000f. to the fund for amortization and renewal of material. The dividend would absorb 636,642,253f., and it was proposed that, after carrying 20,000,000f. to special reserve, the balance of 3,152,147f., should be carried forward.

Improvement Schemes.—It was announced in 1914 that from and after January 1st, 1915, **the maximum draught of water** allowed to ships going through the **Suez Canal** would be increased by 1ft., making it 30ft. English.

The maximum permissible draught of ships using the Canal was 24·4 feet in 1870; in 1890 ships drawing 25·4 feet could make the passage; and during the following 24 years the increase has been at the average rate of about 1 foot every six years, thus bringing the maximum draught authorized to 29 feet.

The scheme of improvement adopted by the Company on the recommendation of the International Consultative Committee of Works, the British representatives on which are Sir William Matthews and Mr. Anthony Lister, is a comprehensive one, and the details suggest that it will meet the needs of the big ship.

A 40 Feet Channel.—The declared policy of the Canal Company in regard to the deepening of the Canal is to offer a slightly greater depth of water than that available in ports east of Suez. It is claimed that, with the exception of Sydney, there is no eastern port which at low tide has a greater depth of water than that now provided in the Canal throughout the full length of nearly 105 miles. In any case the work in hand should meet the needs of any ship likely to be built for the eastern trade during the next few years.

When the Canal was opened in 1869, the width was 72 feet and the depth about 26 feet 2 inches. In June, 1913, the width at a depth of 32 feet 8 inches had been increased to a minimum of 147 feet 6 inches over a length of about 85 miles, and to a width of 328 feet over a distance of about 20 miles. The latest scheme makes provision for a depth of 40 feet throughout and for a widening up to 196 feet 8 inches in the south section, and the cutting of an appropriate number of sidings in the north and central sections, where a minimum width of 147 feet 6 inches is believed to be sufficient for the requirements of the immediate future.

The work of enlarging the capacity of the Canal presents no special difficulty on the engineering side. A good deal of sand is occasionally driven into the channel at Port Said during storms, but a remedy for this will be found in extension of the west breakwater by about 2,700 yards at a cost of over £6,000,000. The construction of this extension, which has been in hand for the past two years, is making satisfactory progress. The Suez Roads are being adequately dredged in accordance with an agreement between the Egyptian Government and the Company.

Almost up to the end of 1915 the works for extending the jetty to the west of Port Said, works of capital importance for the **protection of the entry** to the Canal, were pushed on uninterruptedly. In November, however, for want of hydraulic lime, the manufacture of artificial rocks for this jetty was interrupted. The submarine foundations in stone and rubble of the new jetty were, as a matter of fact, completed to a length of 2,500 metres; the protective blocks were laid for 1,040 metres, and cemented for over 800 metres. The protection of the Channel is thus secured, and there is no need for any apprehension as to its future.

Travel in India.

Thirty years ago, a tour in India was possible only to the wealthy, the leisured and those who had friends in the country. The cost of the journey was very high, the methods of transportation were very slow; and the facilities for travel were so indifferent that he was a bold man who consigned himself to the mercies of the country without a sheet of letters of introduction. Now the mail which is posted in London on Thursday night, reaches Bombay in 14 days, and the passenger can travel by the same route and with the same speed as the mail. A dozen lines have covered the sea route between Europe and India and Ceylon with a plexus of regular services. The Indian Railways provide facilities on the trunk lines unsurpassed by the *trains-de-luxe* of Europe, and the Indian hotel has grown into a really comfortable caravanserai.

In the touring season, which extends from November to March, there is the attraction of a perfect climate. It is never very hot; in the North indeed it is really cool, it is always fine and fresh and bracing. If there is one country in the world to which that elusive term applies, here we have at the season when the tourist arrives the real "Indian summer." Then there is its infinite variety. India is in no sense a nation and never will be. Its peoples are wide as the Poles as under, each has its own art, its own architecture, its own customs and its own civilisation. A certain superficial resemblance runs through each; beneath lies a never-ending variety which age cannot wither nor custom stale.

The Grand Tour.—People coming to India for the first time so often ask:—"Where shall I go?" Well, wherever else the tourist may go whatever else he should leave out, he should omit nothing on the Grand Tour. It is the foolish custom nowadays to sneer at those who follow the beaten tracks, but the visitor who shuns any part of the orthodox journey across India misses what nothing else can repay. **Bombay** is by far the most convenient point of departure, for here "the world end steamers wait," here is one of the finest cities in the British Empire, and here the traveller can best complete his outfit and arrangements. From Bombay stretch northwards the two great trunk lines of India. One the **Bombay, Baroda & Central India Railway,** leads through the pleasant garden of Gujarat to Ahmedabad, the ancient Moslem capital of the Province containing fine examples of Mahomedans and Jain architecture; thence to Abu for the famous Jain temples of Dilwara, and on to Ajmere, Jaipur and Agra. The other by the **Great Indian Peninsula Railway** carries the tourist over the Western Ghats by a superb mountain railway to Gwalior, whose rock fortress rises like a giant battleship from the plain, and so on to Agra. Of the glories of the Taj Mahal, Agra Fort, and the deserted city of Fatehpur Sikri it were supererogatory to speak. Another easy stage leads to **Delhi** that amazing collection of cities, dominated by the little Ridge where British valour kept the mutinous hordes at bay, and finally drove them from the city by a feat of arms unsurpassed in history. Then from Delhi the East Indian line leads comfortably to Benares, Lucknow and Calcutta with the opportunity of an excursion to Cawnpore, if the spirit moves. The great charm of the Grand Tour is that it reveals the best that India can show. This route has the additional advantage that it fits in with any digressions which the time and purse of the traveller may permit. No one who can spare the time should fail to push northwards from Delhi to Peshawar, where the flower of the army keeps watch and ward over the Khyber, and up the dread Pass to the eyrie where the fort of Ali Masjid bars the way to all invaders. **Calcutta** is the best starting point for Darjeeling, though unfortunately the magnificent mountain panorama visible from there is often obscured at this season by mists. Then from Calcutta two alternatives open. A fine service of mail steamers leads to **Burma**, and one of the unforgettable memories of the East is a voyage down the Irrawaddy from Bhamo or Mandalay to Prome. Again, either direct from Calcutta, or *via* Burma, is an easy route to **Madras** and by way of Madura and Trichinopoly, with their peerless Hindu temples, back to Bombay, or on through Tuticorin to **Colombo**. But indeed the possibilities of expanding this tour are endless. Bombay is the best centre for the rock temples of Elephanta, Kenheri, Karli, Ellora and Ajanta. Calcutta is only a short distance from Puri the one Indian temple where there is no caste, and perhaps the most remarkable Hindu temple in the country. From Calcutta also start the river steamers which thread the steamy plains of Bengal and run to the tea gardens of Assam.

SPECIMEN TOURS.

A number of specimen tours in India are given below. They are taken from one of Messrs. Thos. Cook & Sons, Ltd.'s publications, from which firm further information may be obtained. The traveller will also find he can obtain assistance from the principal Shipping Agents and Railway Companies, or from Messrs. Cox & Co., Messrs. Grindlay & Co., and Lloyds Bank:

The New Capital.

The transfer of the capital of India from Calcutta to **Delhi** was announced at the Delhi Durbar on December 12, 1911. It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was unattainable as long as the Government of India were located in one Province, and in the capital of that Province—the seat of the Bengal Government—for several months in every year. It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province. To achieve these two objects the removal of the capital from Calcutta was essential: its disadvantages had been recognised as long ago as 1868, when Sir Henry Maine advocated the change. Various places had been discussed as possible capitals, but Delhi was by common consent the best of them all. Its central position and situation as a railway junction, added to its historical associations, told in its favour; and, as Lord Crewe said in his despatch on the subject, "to the races of India, for whom the legends and records of the past are charged with so intense a meaning, this resumption by the Paramount Power of the seat of venerable Empire should at once enforce the continuity and promise the permanency of British sovereign rule over the length and breadth of the country."

The foundation stone of the new capital were laid by the King Emperor on December 15, 1911, the finally selected site being on the eastern slopes of the hills to the south of Delhi, on the fringe of the tract occupied by the Delhis of the past. The land chosen is free from liability to flood, has a natural drainage, and is not manworn. It is not cumbered with monuments and tombs needing reverent treatment, and the site is near the present centre of the town of Delhi. A Committee consisting of Surgn.-General Sir C. P. Lukis, Mr. H. T. Keeling, C.S.I., A.M.I.C.E., and Major J. C. Robertson, I.M.S., was appointed to consider the comparative healthiness of the site and of an alternative one to the North of the existing city. Their report, dated 4th March, 1913, states that "the Committee, after giving full consideration to the various points discussed in the above note, is bound to advise the Government of India that no doubt can exist as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site."

The Town Plan and Architecture.—A report by a Town-Planning Committee, with a plan of the lay-out, was dated 20th March, 1913. Work was begun in accordance with it and its main lines have been followed throughout. The central point of interest in the lay-out, which gives the motif of the whole, is Government House, and two large blocks of Secretariats. This Government centre has been given a position at Raisina hill near the centre of the new city. Sir Edwin Lutyens is the architect for Government House and Mr. Edward Baker for the Secretariats. The former building is estimated to cost approximately Rs. 140 lakhs and the latter groups were originally estimated to some Rs. 124 lakhs. To the east of the forum, and below it, is a spacious forecourt defined by an ornamental wall and linked on to the great main avenue or parkway which leads to Indrapat. Across this main axis runs an avenue to the Shopping centre. Other roads run in different directions from the entrance to the forum. The axis running north-east towards the Juma Masjid forms the principal business approach to the present city. The railway station for the new city also finds its place beside this road. The main roads or avenues range from 76 feet to 150 feet in width with the exception of the main avenue east of the Secretariat buildings where a parkway width of 1,175 feet has been allowed. The principal avenues in addition to the main avenues are those running at right angles to the main east to west axis.

For a temporary capital, for the use of the Government of India during the period of the building of the new capital an area was selected along the Alipur Road, between the existing civil station of Delhi and the Ridge. The architecture and method of construction were similar to those adopted in the exhibition buildings at Allahabad in 1910; but the buildings have outlasted the transitional period for which they are intended. Army Headquarters are still housed in them in the winter and others are occupied for various purposes, including the temporary accommodation of Delhi University.

In October, 1912, by proclamation, there was constituted an administrative **enclave of Delhi** under a Chief Commissioner. This enclave was entirely taken from the Delhi district of the Punjab and its total area is 573 square miles. On the basis of the Census of 1911, the population of the area originally included in the Province was 398,269 and of the new area 14,552, or a total of 412,821. The population of the Municipal town of Delhi was 2,29,144. The plans of the New Capital allow for a population within it of 70,000, Its present population is approximately 40,000. Sites have been allotted for forty Ruling Princes and Chiefs to build houses for their own occupation during their visits to the New City, and several of these habitations have been erected.

There was, as regards architecture, a prolonged "battle of the styles" over Delhi. Finally, to use the language of the architect, it has been the aim "to express, within the limit of the medium and of the powers of its users, the ideal and the fact of British rule in India, of which the New Delhi must ever be the monument." The inspiration of the designs is manifestly Western, as is that of British rule, but they combine with it distinctive Indian features without abandoning the architects' aim to avoid doing violence to the principles of structural fitness and artistic unity.

Cost of the Scheme.—It was at first tentatively estimated that the cost of the new capital would be four million sterling and that sum was given in the original despatch of the Gov-

ernment of India on the subject. Various factors have since then increased the cost, the chief of these being the immense rise in prices since the war, and the Legislative Assembly were informed by Government on 23rd March 1921, that the revised estimates then amounted to 1,307 lakhs of rupees. This amount includes allowances for building new Legislative Chambers and Hostels for Members of the Indian Legislature, which were not allowed for in the earlier estimates. The New Capital Enquiry Committee, in its report published in January 1923 estimated the total expenditure at Rs. 1,292 lakhs including Rs. 42 lakhs for loss by Exchange. This figure still stands. Actual expenditure up to January 1927, the latest date for which figures have been published, was Rs. 12,43 lakhs, of which Rs. 1,69,12,000 was spent upon the Secretariats.

The Project Estimate contains certain items such as land, residences, water supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes will, in addition to meeting current expenditure, partially at any rate cover the interest on the capital outlay whilst there are other items on which some return on account of the sale of leases, general taxes and indirect receipts may be expected.

Progress of the work.—The construction of New Delhi has made satisfactory progress, having regard to the curtailment of the Budget allotment, in consequence of the war and the return of officers and other establishments to their civil work made possible a considerable speeding up of constructional operations provided money can be provided to pay for them. The Secretariats were so far advanced that there were transferred to them from Calcutta in October, 1924, the offices of the Accountant-General, Central Revenues, and the headquarters of the Royal Air Force in India were also housed in them in the winters of 1924-25 and 1925-26. The residential buildings for Government officers and staff of various grades were then nearly completed. The whole of the civil side of Government moved from old Delhi into their quarters in the new Secretariats on coming down from Simla in November, 1926. The present position is that all Government Departments including the Army Departments, and R. A. F. Headquarters, have their offices in the new City buildings, on which the builders are completing the final details, but that Army Headquarters continue in the old "Temporary Secretariat," in Old Delhi. The Members of H. E. the Viceroy's Executive Council, except H. E. the Commander-in-Chief, live in their new official residences in the new capital. H. E. the Viceroy is expected to take up his residence in the new Government House there in the winter of 1929. His Excellency for the present resides at Viceregal Lodge in Old Delhi. The Commander-in-Chief continues at his old residence, Flagstaff House, Old Delhi, and will similarly transfer to New Delhi at the end of 1929. The house originally built for him in New Delhi was in 1928 bought by H. H. The Maharajah of Kashmir and the erection of another residence for him was commenced soon afterwards. The Government have recently devoted special consideration to the question whether their ordinary annual months residence in Delhi should be extended each year to 7 months, and early in 1928 decided in consultation with the India Office to endeavour to stay in Delhi for half of each year, the new order being introduced in 1928 by keeping the Secretariat in New Delhi till mid—April and bringing it down from Simla again in mid—October.

Art Decorations.—The Government of India in 1927 approved a scheme for the encouragement of Indian artists by providing facilities for the decoration of certain buildings in New Delhi. The outlines of the scheme are briefly as follows. A certain number of domes and ceilings in the New Secretariat Buildings at Delhi suitable for decoration were selected. The various schools of art in India, as well as individual artists, were invited through local Governments, to send in by the beginning of March 1928 small scale designs for approval by a Committee. After approval by the Committee both as regards the design and colour the pictures were to be drawn out and painted to full size on canvas, and, if finally approved by the Committee, fixed according to the marouflage process *in situ*. Other techniques, such as fresco or tempera, were optional. Artists or schools of art, who sent in small scale drawings, had to bear the initial expense of preparing them. When these were approved by the Committee, the out-of pocket expenses, paid in addition to a suitable honorarium Government undertook to pay for the finished pictures done from approved sketches but give no guarantee that the finished paintings will permanently be preserved. The Committee consisted of Sir John Marshall, Kt., C.I.E., Director-General of Archaeology in India, as Chairman and one or more experts to be nominated by him as members. Government intimated that historical or allegorical subjects would be given preference over religious ones, and English artists living in India were barred from competition, the work being strictly reserved to Indian artists. Numerous artists submitted designs, especially those of Western India, and with such satisfactory results that Sir John Marshall and his fellow Committeemen approved of nearly all.

Opinion of the Legislature.—Considerable discussion regarding the new works took place in the Assembly in 1921. The following unofficial resolution was carried:—"This Assembly recommends to the Governor-General in Council that in the interests of economy and of general convenience alike the execution of the programme of New Delhi works may be expedited and the necessary funds provided or raised so that the Secretariat and Legislative buildings and connected works including residences may be completed as early as practicable."

A non-official Member in the Legislative Assembly on 28th September, 1921, at Simla, moved a recommendation to Government "to appoint a Committee to inquire into the possibility of establishing a permanent Capital of India in a place possessing salubrious and temperate climate throughout the year." This proposal was ridiculed by several of his non-official colleagues and was eventually rejected without a division.

H.R.H. the Duke of Connaught, on 12th February, 1921, laid the foundation stone of a large group of parliamentary buildings on a site close to the south-east of the Secretariats. The building is an imposing pile circular in shape, consisting in the main of three horse shoe-shaped Chambers for the Chamber of Princes, Council of State and Legislative Assembly respectively and surmounted by a large dome over a Central Library connecting all three Chambers.

H.E. the Viceroy (Baron Irwin) proceeded in state to the new Legislative buildings, henceforward to be known as the Council Buildings and formally declared them open on 18th February 1927. The India legislature began its sessions in them next day.

During 1928, official and public attention became focussed on the need to effect drastic improvements in some of the crowded areas of the old city and to provide for its expansion and for suburban developments. This led to the examination of the possibilities of the area lying between the old and new cities and of the desirability of driving connecting roads through the City walls in order to give access outwards in this direction. Plans of this character are at the time of writing still under consideration.

All-India War Memorial.—H. R. H. the Duke of Connaught on 10th February, 1921, laid the foundation-stone of an All-India War Memorial at the southern end of the Central Vista. The place chosen is a fine position in the centre of the circular Princes' Park and the construction of the building is well forward but for economy's sake is being proceeded with comparatively slowly.

The Memorial takes the form of a triumphal arch spanning Kingsway, the avenue running down the centre of the Vista. It is generally similar to the Arc de Triomphe in Paris but is simpler in a way which will probably increase its grandeur and dignity. The monument reaches a height of 160 feet and the inner height of the arch is 87 feet 6 inches and its breadth 70 feet. Over the arch on both fronts appears in capital letters the single word INDIA and this is flanked on each side by the initials MCM (*i.e.*, 1900) whilst immediately below them on the left hand are the initials XIV (*i.e.*, 14) and on the opposite side the figures XIX (*i.e* 19) above the Arch is a circular stone bowl 11½ feet in diameter. This is intended to be filled with burning oil on great anniversaries and other occasions so that there will be shining fire by night and a column of smoke by day. The memorial is solely Indian in purpose and will bear the names of Indian regiments only.

Educational Institutions.—It was proposed during 1914 that a higher college for Chiefs should be established at Delhi and in this connexion a conference of Chiefs and Political Officers was held at Delhi at which the Viceroy presided. The proposal is still under consideration. To implement it would require an estimated capital outlay of Rs. 12½ lakhs.

The Government of India further in the Spring session of their Legislature in 1922 introduced and carried a Bill for the establishment of a unitary, teaching and residential university of Delhi, the buildings for which would be erected in the new capital. The plan was to provide a local university on the model recommended for Dacca University by the Calcutta University Commission. The provision of funds for the complete realisation of the university must be a matter of time and it was, therefore, decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify, their organisation. The initial work of organisation was quickly effected by the Executive Council. Unfortunately the inability of the Government of India to allot considerable funds was a servere handicap. It was hoped that H. E. the Viceroy would be able to lay the foundation-stone of the university buildings in November, 1922, but this proved impracticable. The site for the new buildings required has not yet been settled. Government and the University Authorities are examining this point in consultation, particularly with reference to the question whether to build in the new capital or to utilise buildings that may become available elsewhere. The general question of the finances of the University was in 1927 the subject of inquiry by a special Committee appointed by Government. For the present the University is housed in the temporary buildings in old Delhi occupied by the Civil Secretariat until last year.

Freemasonry in India.

In 1728 a dispensation was granted by the Grand Lodge of England to Geo. Pomfrett, Esq., authorising him to "open a new Lodge in Bengal." Of this personage nothing further is known but under Capt Farwinter, who in the following year succeeded him as Provincial Grand Master of India, Lodge was established in 1730, which in the Engraved Lists is distinguished by the arms of the East India Company, and is described as "No. 72 at Bengal in the East Indies." The next Provincial Grand Masters were James Dawson and Zech. Gee, who held office in 1740; after whom came the Hon. Roger Drake, appointed 10th April 1755. The last named was Governor of Calcutta at the time of the attack made on the settlement by Surajah Dowlah in 1756. Drake missed the horrors of the Black Hole by escaping and was accused of deserting his post, but, though present at the retaking of Calcutta by Admiral Watson and Clive, it is improbable that he resumed the duties of his masonic office after the calamity that befell the settlement.

The minutes of the Grand Lodge inform us that William Mackett, Provincial Grand Master of Calcutta, was present at the meeting of that body, November 17th, 1760, and we learn on the same authority that at the request of the "Lodges in the East Indies" Mr. Cullin Smith was appointed P. G. M. in 1762. At this period it was the custom in Bengal "to elect the Provincial Grand Master annually by the majority of the votes of the members present, from amongst those who passed through the different offices of the (Prov.) Grand Lodge and who had served as Dep. Prov. Grand Master." This annual election as soon as notified to the Grand Lodge of England was confirmed by the Grand Master without its being thought an infringement of his prerogative. In accordance with this practice, Samuel Middleton was elected (P. G. M. circa) in 1767; but in passing it may be briefly observed that a few years previously a kind of roving commission was granted by Earl Ferrars in 1762-64 to John Bluvitt, Commander of the "Admiral Watson," Indiaman "for East India where no other Provincial Lodge is to be found." Middleton's election was confirmed October 31st, 1768, and, as the dispensation forwarded by the Grand Secretary was looked upon as abrogating the practice of annual elections, he accordingly held the office of D. G. M. Unfortunately the records of the P. G. L. date back only to 1774, and thus much valuable information is lost to us. This Grand Lodge continued working until 1792 when it ceased to meet. It seems that the officers were selected from only two Lodges much to the dissatisfaction of the other Lodges, and resulted in most of the dissatisfied bodies seceding and attaching themselves to the Athol of Ancient Grand Lodge. In 1813 at the Union both the Ancients and Moderns in Calcutta combined and gave their allegiance to the **United Grand Lodge of England** and have since been working peaceably under the Provincial Grand Lodge of Bengal which was revived in that year and in 1840 created a District Grand Lodge.

Madras.—The earliest Lodge in Southern India (No. 222) was established in Madras in 1752. Three others were also established about 1766 In the same year Capt. Edmund Pascal was appointed P. G. M. for Madras and its Dependencies and in the following year another Lodge was established at Fort St. George. In 1768 the Athol (or Ancients) invaded this District and in 1782 established a Provincial Grand Lodge and both these Provincial Grand Bodies continued working peaceably side by side until the union. Indeed, though not generally known, these two Grand Bodies made an attempt at coalition long before any such movement was made by their parent bodies, the Grand Lodge of England, and the Ancient Grand Lodge, and Malden in his History of Freemasonry in Madras states that in a great measure they succeeded. At the Union in 1813 all the bodies in Madras gave their allegiance to the United Grand Lodge. One event worthy of note was the initiation in 1776 at Trichinopoly of the eldest son of the Nawab of Arcot, Undat-ul-Amari, who in his reply to the congratulations of the Grand Lodge of England stated "he considered the title of English Mason as one of the most honourable that he possessed." This document is now stored in the archives of the United Grand Lodge.

Bombay.—Two Lodges were established in this Presidency during the 17th century, Nos. 234 at Bombay in 1758 and 569 in Surat in 1798, both of which were carried on the lists until the union when they disappeared. A Provincial Grand Master, James Todd, was appointed but there is no record that he exercised his functions and his name drops out of the Freemasons' Calendar in 1799. In 1801 an Athol Warrant was granted (No. 322) to the 78th foot which was engaged in the Maratha War under Sir Arthur Wellesley. In 1818 Lord Moria was asked to constitute a Lodge to be known by the name of St. Andrew by eight Masons residing there and also to grant a dispensation for holding a Provincial Grand Lodge for the purpose of making the Hon. Mountstuart a Mason, he having expressed a wish to that effect. The Petitioners further requested "that his name might be inserted in the body of the warrant, authorising them to instal him after being duly passed and raised a Deputy Grand Master of the Deccan." Of the reply to this application no copy has been preserved. Lodge Benevolence was established in Bombay in 1822.

In 1823 a Military Lodge "Orion-in-the-West" was formed in the Bombay Artillery and installed at Poona as No. 15 of the Coast of Coromandel. It seems from Lane's records that in 1830 it was discovered that this Lodge was not on the records of the United Grand Lodge of England. A Warrant was subsequently issued bearing date 19th July 1833. According to the early proceedings of this Lodge, members were examined in the Third Degree and passed to the chair in the Fourth Degree for which a fee of three gold mohurs was charged. In the following year a second Lodge was established at Poona by the Provincial Grand Lodge of Bengal which however left no trace of its existence. In 1825 the civilian element of "Orion" seceded and formed the "Lodge of Hope" also at Poona No. 802.

Here "Orion" unrecognized at home, aided in the secession of some of its members, who

obtained a warrant, on the recommendation of the parent Lodge, from the Grand Lodge of England. Two years later it was discovered that no notification of the existence of "Orion-in-the-West" had reached England, nor had any fees been received, although these including quarterages had been paid into the Provincial Grand Lodge, Coast of Coromandel. It was further ascertained that in granting a warrant for a Bombay Lodge the Provincial Grand Master of Coromandel had exceeded his powers. Ultimately a new warrant No. 598 was granted as already stated in 1833. Lodge "Perseverance" was started in Bombay No. 818 in 1828. Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded; but in 1836 Dr. James Burnes was appointed by the Grand Lodge of Scotland, P. G. M. of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1838. A second Scottish Province of Eastern India was started which on the retirement of the Marquis of Tweedale was absorbed within the jurisdiction of Dr. Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but with the proviso, that this appointment was not to act in restraint of any future sub-division of the Presidencies. Burnes may be best described as being in 1836, in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge in Bombay and the Chevalier Burnes, whom nature had endowed with all the qualities requisite for Masonic Administration, soon got to work and presented such attractions to **Scottish Freemasonry** that the strange sight was witnessed of English Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland. In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels, furniture, and belongings, and the charge was accepted by Scotland. This Lodge still exists in Bombay and now bears No. 338 on the Register of Scotland. From this period, therefore, Scottish Masonry flourished, and English Masonry declined until the year 1848 when a Lodge St. George No. 807 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province. In 1844 Burns established a Lodge "Rising Star" at Bombay for the **admission of Indian gentlemen** the result of which is seen at the present day. Thus the seed planted at Trichinopoly in 1776 by the initiation of Andat-ul-Amari has borne fruit, resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and East, a distinguishing characteristic of Speculative Freemasonry. A Provincial Grand Lodge was re-established in Bombay in 1860, and converted into a District Grand Lodge in 1871.

The Grand Lodge of England.—All three Constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of Ireland and the Grand Lodge of Scotland hold jurisdiction in India. By far the largest is the first; the next largest is the third and the number of Lodges under Ireland is as yet small. The Grand Lodge of England divides its rule under Five District Grand Masters independent of each other and directly subordinate to the Grand Master of England by whom they are appointed.

Bengal.

82 Lodges. Rt. Wor. Bro. H. R. Nevill, C.I.E., O.B.E., Dis G. Master. I.C.S., P.G.D.; Dy. D. G. M. Eric Studd, P.G.D.; Assist. D. G. M. W. C. N. Dundas.

Madras.

33 Lodges. Dis. G. M.. Rt. Wor. Bro. A. Y. G. Campbell, C.S.I., C.I.E., C.B.E., V. D., I.C.S. P. G. D.; Dy. D. G. M. P. M., Sivangnam Mudliar, P. G. D.

Bombay.

48 D.G.M. Rt.-Wor.-Bro. Sir Reginald A. Spence, Kt., P.G.D.; Dy. D.G.M., R. H. A. Delves.

Punjab.

34 Lodges. Rt. W. Bro. C. A. Barron, C.S.I., C.I.E., C.V.O., I.C.S., District Grand Master. D. E. Johnstone. P.G., St. B., Dy. D.G.M.

Burma.

17 Lodges. Rt. W. Bro. The Hon'ble Sir Guy Rutledge, Kt., K. C., District Grand Master. W. Kendall, P.A.G.D. of C., Dy. Dis. G. Master.

The Grand Lodge of Scotland exercises its rule through a Grand Master of all Scottish Freemasonry in India, who is elected by the Brethren subject to confirmation by the Grand Master Mason of Scotland. Mr. H. P. Gibbs, A.M.I.E.E., etc., J.P., is the present incumbent of the office, and controls 73 Lodges. Under him the several districts are in charge of the following Grand Superintendents:—

Lt.-Col. J. C. Colenso, G.Supdt.,		Northern India.
Col. A. A. Meaden .. ,,	,,	Central ,,
Lt.-Col. R.F.D. Burnett	,,	Southern ,,
A. Barr. Pollock .. ,,	,,	Eastern ,,

The Grand Secretary is R. W. Bro. Arthur W. S. Wise, J.P., 17, Murzban Road, Fort, Bombay.

The Grand Lodge of Ireland granted a warrant to establish a Lodge at Kurnal in 1837, but it was short lived. An attempt was made in 1869 to establish a Lodge in Bombay, but on the representation of the Grand Secretary of England, to the Deputy Grand Secretary of Ireland that it would be objectionable to create a third masonic jurisdiction in the Province, there being two already, *viz.*, English and Scottish, the Grand Lodge of Ireland declined to grant the warrant. In 1911, however, a warrant was sanctioned for the establishment of Lodge "St. Patrick" and since that year two other Lodges have sprung into being.

The Grand Lodge of Ireland has no District Grand Master in India at present, the Lodges corresponding direct with the Grand Lodge in Dublin. There are ten Lodges, 4 in Calcutta, 3 in Ceylon and 3 in Bombay.

Royal Arch Masonry.—Under England, the District Grand Master in any District is nearly always created also Grand Superintendent, his Deputy as Second and another Companion as Third Principal.

Under Ireland there is no local jurisdiction and under Scotland the office is elective subject to confirmation.

The five English Districts are constituted as under:—

Bengal.

28 Chapters. Grand Supdt. H. R. Nevill, C.I.E., O.B.E., I.C.S.

Madras.

17 Chapters. A. Y. G. Campbell, C.I.E., C.B.E., V.D., I.C.S.

Bombay.

25 Chapters. M. Ex. Comp. Sir Reginald A. Spence, Kt., Grand Superintendent.

Punjab.

21 Chapters. Most Ex. Compn. C. A. Barron, C.S.I., C.I.E., C.V.O., I.C.S., Grand Superintendent.

Burma.

6 Chapters. The Hon'ble Sir Guy Rutledge, Kt., K.C., Grand Superintendent.

Royal Arch Masonry under Scotland has a separate constitution to Craft Freemasonry. The District Grand Chapter of India is at present ruled by M. E. Camp. A. M. Kajiji under whom there are about 30 Chapters in India. The Grand Secretary of all Scottish Freemasonry in India is also District Grand Scribe E. of Scottish R. A. Masonry.

There is one Irish Chapter in Calcutta.

Mark Masonry.—Under England, Mark Masonry is worked under the Grand Mark Lodge of England and Wales, and divided into separate Districts; but in most cases the District Grand Master is also District Grand Mark Master.

Bengal.

30 Lodges. C. D. Stewart, D.G.M.

Bombay.

18 Lodges. Rt. W. Bro. Sir Reginald Spence, District Grand Master.

Madras.

13 Lodges. A. Y. G. Campbell, C.I.E., C.B.E., V.D., I.C.S., District Grand Master.

Punjab.

15 Lodges. Rt. W. Bro. Lt.-Col. G. T. Davyst, O.B.E., District Grand Master.

Burma.

6 Lodges. Rt. W. Bro. Arthur Blake, District Grand Master.

The Mark degree is incorporated with the Royal arch degree in Irish Chapters. Mark degree is worked in some S. C. Lodges, but mostly in R. A. Chapters, in which the Excellent R.A.M. and other degrees can be obtained. S. C. Chapters insist upon candidates being Mark Master Masons before exaltation. Mark degree in Craft Lodges is conferred by the Rt. Wor. Master in S. C. Craft does not recognise the ceremony of Rt. W. Mark Master. This is confined strictly to Chapters. Each Chapter has a Lodge of M. M. M. working under its charter. Separate charters for Mark Lodges are only issued by the G. Chapter of Scotland.

Other Degrees.—There are many side degrees worked in India, of the Ancient and Accepted Rite, no degree higher than the 18° is worked in India under England, but under Scotland the 30° is worked. The Knight Templar Degree is also worked in several places under both English and Scottish jurisdiction. There are fourteen 18th Degree Chapters working in India.

Roman Eagle Conclave No. 43, Bombay.

St. Mary's Commandery No. 43, Bombay.

R. A. Mariner, 72, 514 and 662, Bombay.

R. A. Mariner, 61, 81, 82 and 106, Madras.

R. A. Mariner, 98, 193, 219, 279 and 429, Punjab.

Secret Monitor, 14, 21, 36, 37, 40 and 42, Madras.

Benevolent Associations.—Each District works its own benevolent arrangements which include the Relief of Distressed Masons, educational provision for the children of Masons and maintenance provision for widows in poor circumstances.

All information will be given to persons entitled by the District Grand Secretary in each District. The names and addresses of **District Grand Secretaries** are given below:—

D. G. S., Bengal.

G. H. Davis, 19, Park Street, Calcutta.

D. G. S., Bombay.

Khan Bahadur Palanji N. Davar, P.A.G.R., P.D.G.W, Freemasons' Hall, Ravelin Street, Fort, Bombay.

D. G. S., Burma.

E. Meyer, D.G.S., E.C., Rangoon.

D. G. S., Madras.

S. T. Srinivasa Gopala Chari, Freemasons' Hall, Egmore, Madras.

D. G. S., Punjab.

Mathra Das, Freemasons' Hall, Lahore.

Scottish Constitution.—For information regarding the Benevolent Funds application should be made to Arthur W. S. Wise, J.P., 17, Murzban Road, Bombay.

Scientific Surveys.

Botanical Survey.—The Botanical Survey Department of the Government of India is under the control of a Director, who is assisted by three other officers. They are engaged in the examination and identification of plants and the study of floras. The Director is also in charge of the cinchona plantations in Burma.

In connection with the general question of post-war industrial policy, the Government of India decided in 1916 that every effort should be made to extend the area under cinchona in India, and deputed Colonel A. T. Gage, late Director of Botanical Survey of India, to explore land suitable for cinchona cultivation. As a result of his recommendations made in 1918 large areas in the Tavoy District of Burma were reserved for cinchona cultivation, and the first plantations were started there in 1920. A programme was adopted for planting 500 acres annually which would produce 90,000 lbs. per annum from 1928 onwards. Owing unfortunately to excessive rainfall in 1921-22 this plantation was entirely washed away, and the Tavoy scheme had to be abandoned. A fresh area was selected, however, in the Mergui District of Burma, and plantations were started there in 1922. The cultivation of cinchona here is still in the experimental stage.

At the instance of the Retrenchment Committee the area to be planted during the first four years has been limited to 250 acres per annum, The Governments of Bengal and Madras are also at the instance of the Government of India extending their cinchona plantations, and it is proposed that Bengal should continue its sequence of planting 200 acres every year with cinchona, Madras 230 acres and the Government of India 250 acres annually.

The actual demand for the drug in India is difficult to estimate. Eight million cases of malaria fever go to the hospitals and dispensaries every year. If each of these is treated with 110 grains of quinine, which may be taken as the minimum for the cure of a paroxism, the demand for hospital and dispensary treatments alone would be 125,000 pounds a year. Patients do not get as much of the drug as they ought, because the cost of quinine is prohibitive. It is estimated that there are 100,000,000 sufferers from malaria who do not attend the hospitals. The potential demand is therefore somewhere between 125,000 pounds and 1,500,000 pounds. When the Italian Government, in 1903, made quinine a State industry and cheapened its retail price consumption in that country enormously increased and malaria mortality was reduced from 15,000 to 3,000 a year. The Public Health Commissioner with the Government of India says in a recent report that "it may be said that there is no question of the effective treatment of malaria in India until consumption of quinine approximates 500,000 pounds."

Geological Survey.—The ultimate aim for the Geological Survey of India is the preparation of a geological map of India upon the accuracy of which the solution of most geological problems ultimately depends. Maps accompany the reports on the various areas in the publications of the Department and a large amount of information is made available to the public. Such maps represent pioneer work which enables prospectors and mining engineers to cut short their preliminary investigations and to start where the Geological Survey has left off. During the preparation of the geological map and the general survey of the country mineral deposits of importance are frequently discovered. Such discoveries are published without delay and every endeavour is made to induce private firms to take up the exploitation of the mineral discovered. Collections of minerals, rocks and fossils are accumulated and exhibited in the public galleries of the Indian Museum, situated in the capital of Bengal. Some of the most interesting and scientifically valuable additions to the collections in recent years have been the remains of anthropoid apes of great age discovered at different places in the Siwalik Mountain chain. These mountains are a comparatively low range running parallel with the Himalayas for a great distance and at a short distance from them. They are in fact a huge bank of detritus washed down during the ages from the Himalayas. They are believed to have covered up in the course of their formation such a quantity of palæolithic remains as exists nowhere else in the world. The discoveries of skeletons and fossils hitherto made have been the result of washaways after heavy rains or of other accidental circumstances and there exists no organisation or systematised method for either prosecuting discovery or collecting what chance brings to light. The Geological Survey also undertakes the examination and identification, without fee, of any minerals, rocks and fossils sent in by private observers. The publications of the Survey include the Memoirs, Records and Palæontologia Indica.

Zoological Survey.—A scheme for the formation of a Zoological Survey on the basis of the Zoological and Anthropological Section of the Indian Museum, Calcutta, came into force in July, 1916. The proposals as sanctioned by the Secretary of State mainly are as follows:—"The headquarters of the Survey will be the Indian Museum. The scheme regarding the Zoological Survey entails the breaking up of the organisation now known as the Zoological and Anthropological Section of the Indian Museum into two parts, one of which will become a Government department under the title of the Zoological Survey of India, and will be primarily concerned with zoological investigation and exercise such advisory functions as may be assigned to it by Government, while the other part will remain as the office of the Trustees of

the Indian Museum and will be organised for the present on the lines laid down in the existing by-laws of the Museum. It will be the duty of the Zoological Survey to act as guardians of the standard zoological collection of the Indian Empire, and as such to give every assistance in their power both to officials and to others, in the identification of zoological specimens submitted to them, arranging, if requested to do so, to send collections to specialists abroad for identification in cases in which no specialist is available in India". The Zoological Survey is also responsible for the Anthropological collections in the Indian Museum and in 1927 the additional appointment on the Staff of an anthropologist was created. The Director of the Survey was Dr. Anandale until April, 1924, when he died—within a month of receiving the honour of Fellowship of the Royal Society. Dr. Baini Prasad was appointed Acting Director in his place and continued in that capacity until July, 1925, when Lt.-Col. R. B. Sewell, I.M.S., M.A., F.A.S.B., F.L.S., F.Z.S., was made Director.

Mammal Survey.—The Survey was instituted in the year 1912 with the object of making as complete a study as possible of the occurrence and distribution of Mammals in India, Burma and Ceylon, and with the further object of supplementing the collection of Indian Mammals at the Bombay Natural History Society's Museum and at the British Museum as well as at the Natural History Museums in India, the primary object of the Survey being the furtherance of our knowledge of Indian Mammalian Fauna. Up to 1891 Naturalists in India had to rely for information on Dr. Jerdon's "Mammals of India" published in 1874. In 1884 R. A. Sterndale published his Natural History of Indian Mammals a purely popular work which did not add much to Jerdon's book. In 1881 a memorial prepared by Dr. Slater, Hon. Secretary to the Zoological Society and signed by Darwin, Hooker, Huxley, and other well known scientists, was presented to the Secretary of State for India. The memorial recommended that a series of Volumes dealing with the Fauna of India should be prepared and Dr. Blanford should be appointed its Editor. The memorial resulted in the publication in 1888-1890 of the Volume on Mammals in the "Fauna of British India" Series and since 1891 this volume has been the standard work on *Indian Mammals.* Blanford's book was however based on the information then available and the shortcomings of the book have been revealed in the light of more recent research. Further knowledge in regard to distribution and classification and the discoveries of new species have rendered Blanford practically obsolete.

To remedy this defect, at the instigation of the authorities of the British Museum, the Bombay Natural History Society decided to institute what is now known as the Mammal Survey, Mr. W. S. Millard, then Hon. Secretary of that Society, issued in an appeal to its members to enable the Society to engage the services of trained European collectors so as to make a systematic collection of the mammals of India, Burma and Ceylon. The response to the appeal resulted in over a lakh of rupees being raised between 1911 and 1920, partly by subscriptions from the Society's members, contributions from Indian Princes, and grants from the Indian Government, the Government of Burma, Ceylon. Malay States, and the Provincial Governments, Subscriptions were also received from a few Learned Societies and Institutions in England and America. By the outbreak of the war the Survey had been carried on over large areas of the country, the districts covered being—In Western India a portion of Sind, the whole of Gujarat, Kutch and Kathiawar; the Southern Maharatta country and Kanara in Southern India; in Coorg and Mysore; in the centre large tracts of the Central Provinces and some districts of Bengal and Behar; in Northern India the Society's collectors had worked over Kumaun, Darjeeling and Sikkim and the Bhutan Duars. In Burma, collections were made along the Chindwin river, in Central Burma and in the Shan States, Pegu and a portion of Tennaserim. The whole of Ceylon was also systematically surveyed.

The material, which up to the outbreak of War comprised some 17,000 specimens, was forwarded to the British Museum where the collections were scientifically worked out by the late Mr. R. C. Wroughton, formerly Inspector General of Forests, Mr. Oldfield Thomas, F.R.S., Curator of Mammals at the British Museum, Mr. Martin C. Hinton and others. The results of their researches were published in a series of scientific papers in the journal of the Bombay Natural History Society. The enormous mass of material then collected resulted in the discovery of large numbers of new forms and species and by increasing our knowledge of the distribution of Indian Mammalia has enabled the revision of Blanford's Mammalia to be undertaken and early in 1921 the Secretary of State for India commissioned Mr. R. C. Wroughton, since deceased, and Mr. M. C. Hinton to undertake the work.

When demobilization rendered it possible the work of the Survey which had been in abeyance during the war was resumed and a collector, Mr. C. Primrose, was sent to Assam and the Mergui Archipelago and Mr. Oldfield Thomas has written very appreciatively of his work among those islands. Mr. Primrose then began working inland but owing to the impracticability of continuing his work in Burma during the monsoon, he was transferred to Gwalior where H. H. the Maharaja kindly accorded permission to work in his territories.

After working a portion of the Eastern Ghats the next move was to the Kangra District in the North-West Himalayas and then on to the Punjab Salt Range. Two other collectors worked in Southern India. Permission was once more obtained from the Nepal Government for a collector to resume the Survey work in that country The work in Nepal was brought to a successful close early in 1928 with a representative collection of interesting mammals and birds.

The Survey now has only one collector who is collecting in the foot hills of Himalayas and the Pindari Valley.

The Board of Scientific Advice.—This Board in accordance with a recommendation of the Inchcape Retrenchment Committee is in abeyance. It consisted of the heads of the Meteorological, Geological, Botanical, Forest, Survey, Agricultural and Civil Veterinary

Departments, together with such other scientific authorities as might from time to time be invited by the Government of India to serve upon it. It was established in 1902 to co-ordinate official scientific inquiry, to ensure that research work is distributed to the best advantage, and to advise the Government of India in prosecuting practical research into those questions of economic or applied science on the solution of which the agricultural and industrial development of the country so largely depends. The programme of investigation of the various departments were annually submitted to the Board for discussion and arrangement, and an annual report was published on the work done.

The Secretary to the Government of India (Department of Education, Health and Lands, was *ex-officio* President of the Board, which included the Director-General of Observatories, the Director of the Zoological Survey, the Surveyor-General of India, the Director Imperial Institute of Veterinary Research, Muktesar, the Inspector-General of Forests, the Agricultural Adviser to the Government of India, the Director of the Geological Survey, the Director-General, Indian Medical Service, the consulting Engineer to the Government of India, the Librarian, Imperial Library and the Director of the Botanical Survey of India who was Secretary to the Board of Scientific Advice.

The Universities Conference, representing all Indian Universities, which met in Simla in 1925, recommended the revival of the Board, but the technical officers of the Government of India were of a different opinion and the Board continues in abeyance.

The Indian Research Fund.—The progress of this Fund and its Association like the Board of Scientific Advice, was seriously affected by the policy of retrenchment enforced in pursuance of the recommendations of the Inchcape Committee. Scientific research work is rapidly developing in India. In 1911 the sum of 5 lakhs (£33,000) out of the surplus opium revenue was set aside as an endowment for research into epidemic diseases in connection with the Central Research Institute at Kasauli. It was hoped that this sum might be largely augmented by private subscriptions. An Indian Research Fund Association was constituted, and a good deal of work was undertaken. Its objects were defined as "the prosecution and assistance of research, the propagation of knowledge and experimental measures generally in connection with the causation mode of spread and prevention of communicable diseases." Fresh investigations into kala azar and cholera were inaugurated, and an officer was deputed at the expense of the Fund to study yellow fever in the regions where it is endemic, with a view to taking steps to prevent its introduction into India. A further grant of 6 lakhs (£40,000) was made to the Central Research Fund from the opium surplus of 1911-12. It was decided to devote to research and anti-malarial projects 5 lakhs (£33,000) a year from Imperial revenue commencing in 1913-14. A new periodical "The Indian Journal of Medical Research," was instituted in 1913 for publication four times annually, as the official organ of the Research Fund. The journal was designed to deal with every branch of research directly or indirectly connected with medical and sanitary science, and form a record of what was being done in India for the advance of this work. In 1922 it was decided to devote the capital funds at the disposal of the Association to the erection of an Imperial Medical Research Institute and to the formation of a fund for its endowments. In the same year valuable results were achieved by Dr. Nishi Kanta De, working in Calcutta on the chemistry of drugs used in treatment of leprosy and on the chemistry of the blood of lepers and resistent animals. The treatment of cancer, of influenza, of pneumonia, the histology and pathology of deficiency diseases and special problems concerning Indian calucidæ, kala azar, the action of quinine in malaria treatment were among the particular subjects of investigations specially dealt with by various research experts in 1922. Further substantial grants to the Research Fund have recently been made by Government.

Survey of India.—The work of the Survey of India Department falls under various heads, namely, the trigonometrical survey, topographical and forest surveys, special surveys and explorations, and map production. Cadastral surveys are now carried out by the Provincial Land Records and Settlement Departments.

In 1904 attention was drawn to the defective state of the **topographical survey maps,** and a Committee was appointed to report on the subject. To overtake the arrears of revisional survey and to secure that the map of India should be brought up-to-date and revised at proper intervals, they recommended a considerable increase of establishment and an increased expenditure of Rs. 2,10,000 a year for the next 25 years. They also made recommendations for altering the size and improving the quality of the maps. After further inquiry the Government of India decided that a scale of 1 inch to the mile would ordinarily be sufficient, reserved forests and special areas being surveyed on the scale of 2 inches to the mile, and the ½-inch scale employed for waste and barren tracts. The work of the Department has in recent years greatly been hampered by the general need for retrenchment in expenditure. On the other hand, its organisation has lately been improved by the creation of a new North-West Frontier Circle, under a separate Director, this being the addition of a fifth Circle to the four already existing for all India and Burma. A recent valuable development has been the employment of aviators for survey work from the air in some parts of the country.

The department is responsible for all topographical survey; for explorations and the maintenance of geographical maps of the greater part of Southern Asia; for geodetic work, including the main trigonometrical framework which extends in some cases far beyond the frontiers of India, and control networks of precise levelling based on tidal observatories, tidal predictions and the publication of Tide Tables for nearly 40 ports between Suez and Singapore, the Magnetic Survey, astronomical observatories with seismographic and meteorological records at Dehra Dun, and geodetic investigations of an international character, in regard to which India enjoys a unique position between the greatest highlands

of the world and a deep ocean extending to the Antarctic. Indian geodesy has thus disclosed by far the largest known anomalies of gravitational attraction in the earth's crust, which have led to some of the most important developments of modern geodetic research.

While expending on topographical and geodetic work all funds allotted by Imperial Revenues, the department is steadily developing the policy of aiding local surveys in various ways, on payment by those concerned. These miscellaneous operations include: all forest and Cantonment surveys and work for Boundary Commissions; many riverain, irrigation, railway and city surveys, and surveys of tea gardens, mining areas, &c., with a great deal of control levelling for them; miscellaneous administrative assistance and officers are given to the revenue surveys of various Provinces and States. The Printing offices do much work for other Government departments, such as printing special maps, illustrations for Archeological Reports, all diagrams for Patents, &c. The Mathematical Instruments Office gives valuable aid to all Government departments by ensuring a high standard of instrumental equipment, especially in connection with optical work, and by the manufacture and repair of high-class instruments, which would otherwise have to be imported from abroad.

The department is also responsible for all survey operations required by the Army, and has been rapidly developing measures to meet the greatly increased complexity of modern military requirements, especially in connection with air survey. The development of air surveys for various civil purposes is also receiving all possible encouragement and assistance, while the latest methods of stereo-photography are being studied experimentally.

Administration is by the Surveyor General under the Education, Health and Lands Department of the Government of India. Headquarter offices are at Calcutta under the Assistant Surveyor General, and there are seven Directors, one for each of the five Survey Circles into which the country is divided, one for the Geodetic Branch at Dehra Dun, and one for the Map Publication and other technical offices at Calcutta.

Indian Science Congress.—The Indian Science Congress was founded largely owing to the efforts of Prof. P. S. Macmahon and Dr. J. L. Simonsen. These two gentlemen worked jointly as Honorary General Secretaries of the Congress till 1921. The Asiatic Society of Bengal undertakes the management of the Congress finances and publishes annually the proceedings of the Congress. The objects are (1) to encourage research and to make the results generally known among science workers in India, (2) to give opportunities for personal intercourse and scientific companionship and thus to overcome to some extent one of the chief drawbacks in the life of workers in science in India, (3) to promote public interest in science; for this end the Congress is held at different centres annually, and evening lectures open to the public to from an important part of the proceedings of each Congress.

The Congress, which is progressive and vigorous, meets in January each year, the proceedings last for six days. The Head of the Local Government is Patron of the Congress; the Congress session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different sections being represented in turn. The sections are (1) Agriculture, (2) Physics and Mathematics, (3) Chemistry and Applied Botany, (4) Zoology and Ethnography, (5) Botany, (6) Geology, (7) Medical Research; when the sections meet separately each section is presided over by its own President also chosen annually. The mornings are devoted to the reading and discussion of the papers, the afternoons to social functions and visits to places of interests, in the evenings public lectures are delivered.

Posts and Telegraphs.

POST OFFICE.

The control of the Posts and Telegraphs of India is vested in an officer designated Director-General of Posts and Telegraphs who works in subordination to the Government of India in the Department of Industries and Labour. The superior staff of the Direction, in addition to the Director-General himself consists on the postal side of three Deputy Directors-General (who are officers of the rank of Postmaster-General), and six Assistant Directors-General (whose status is similar to that of Deputy Postmasters-General).

For postal purposes, the Indian Empire is divided into nine circles as shown below, each of the first eight is in charge of a Postmaster-General and the Sind and Baluchistan Circle is controlled by a Director, Posts & Telegraphs. Bengal and Assam, Bihar and Orissa, Bombay, Burma, Central, Madras, Punjab and North-West Frontier, United Provinces and Sind and Baluchistan. The Central Circle comprises roughly the Central Provinces and the Central India and Rajputana Agencies.

The Postmasters-General are responsible to the Director-General for the whole of the postal arrangements in their respective circles, with the exception of those connected with the conveyance of mails by railways and inland steamers which are entrusted to two officers bearing the designation of Deputy Postmaster-General, Railway Mail Service. All the Postmasters-General are provided with Assistant Postmasters-General while those in charge of the largest circles are also assisted by Deputy Postmasters- General. The nine Postal Circles and the jurisdictions of the two Deputy Postmasters-General, Railway Mail Service, are divided into Divisions, each in charge of a Superintendent of Post Offices or Railway Mail Service as the case may be and each Superintendent is assisted by a certain number of officials styled Inspectors.

Generally there is a head post office at the head-quarters of each revenue district and other post offices in the same district are usually subordinate to the head Office for purposes of accounts. The Postmasters of the Calcutta, Bombay, and Madras General Post Offices and of the larger of the other head post offices are directly under the Postmaster-General, The Presidency Postmasters, indeed, have one or more Superintendents subordinate to them. When the duties of the Postmaster of a head office become so onerous that he is unable to perform them fully himself a Deputy Postmaster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are employed. The more important of the offices subordinate to the head office are designated sub-offices and are usually established only in towns of some importance. Sub-offices transact all classes of postal business with the public, submit accounts to the head offices to which they are subordinate incorporating therein the accounts of their branch offices, and frequently have direct dealings with Government local sub-treasuries. The officer in charge of such an office works it either single-handed or with the assistance of one or more clerks according to the amount of business.

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental officers on small pay or of extraneous agents, such as school-masters, shopkeepers, landholders or cultivators who perform their postal duties in return for a small remuneration.

The audit work of the Post Office is entrusted to the Accountant-General, Posts and Telegraphs, who is an officer of the Finance Department of the Government of India and is not subordinate to the Director-General. The Accountant-General is assisted by Deputy Accountants-General, all of whom, with the necessary staff of clerks, perform at separate headquarters the actual audit work of a certain number of postal circles.

In accordance with an arrangement which has been in force since 1883, a large number of sub-post offices and a few head offices perform telegraph work in addition to their postal work and are known by the name of combined offices. The policy is to increase telegraph facilities everywhere and especially in towns by opening a number of cheap telegraph offices working under the control of the Post Office.

The **Inland Tariff** (which is applicable to Ceylon and Portuguese India except as indicated below) is as follows :—

——	When the postage is prepaid.	When the postage is wholly unpaid.	When the postage is insufficiently prepaid.
Letters.	Anna.		
Not exceeding two and a half tolas ..	1	Double the prepaid rate (chargeable on delivery).	Double the deficiency (chargeable on delivery).
Every additional two and a half tolas or part of that weight	1		
Book and pattern packets.			
Every 5 tolas or part of that weight ..	½		

Postcards.

Single	½ anna.
Reply	1 „

(The postage on cards of private manufacture must be prepaid in full.)

Parcels (prepayment compulsory).

(*a*) Parcels not exceeding 440 tolas in weight:—

	Rs.	a.
Not exceeding 20 tolas	0	2
Exceeding 20 tolas but not exceeding 40 tolas	0	3
For every additional 40 tolas or part of that weight	3 annas.	

(*b*) Parcels exceeding 440 tolas in weight:—
Exceeding 440 tolas but not exceeding 480 tolas .. .. Rs. 3 0
4 annas for every additional 40 tolas or fraction thereof up to 800 tolas.

Registration is compulsory in the case of parcels weighing over 440 tolas.

These rates are not applicable to parcels for Portuguese India.

In the case of parcels for Ceylon a registration fee of 2 annas is chargeable on each parcel in addition to the rates shown above.

Registration fee.	Rs.	a.
For each letter, postcard, book or pattern packet, or parcel to be registered	0	2

Ordinary Money Order fees.

On any sum not exceeding Rs. 10 ..	0	2
On any sum exceeding Rs. 10 but not exceeding Rs. 25	0	4
On any sum exceeding Rs. 25 up to Rs. 600	0	4

for each complete sum of Rs. 25, and 4 annas for the remainder; provided that, if the remainder does not exceed Rs. 10, the charge for it shall be only 2 annas.

Telegraphic money order fees.—The same as the fees for ordinary money orders *plus* a telegraph charge calculated at the rates for inland telegrams for the actual number of words used in the telegram advising the remittance, according as the telegram is to be sent as an "Express" or as an "Ordinary" message.

In the case of Ceylon the telegraph charge is calculated at the rates shown below:—

Express—Rs. 2 for the first 12 words and 3 annas for each additional word.

Ordinary.—Re. 1 for the first 12 words and 2 annas for each additional word. Telegraphic money orders cannot be sent to Portuguese India.

Value-payable fees.—These are calculated on the amount specified for remittance to the sender and are the same as the fees for ordinary money orders.

Insurance fees.—For every Rs. 100 of insured value 2 annas.

As regards Portuguese India see Foreign Tariff.

Acknowledgment fee.—For each registered article 1 anna.

The Foreign Tariff (which is not applicable to Ceylon or to Portuguese India except in respect of insurance fees for parcels and parcel postage) is as follows:—

Letters.

To Great Britain and Northern Ireland other British Possessions and Egypt, including the Sudan.	2 annas for the first ounce and 1½ annas for each additional ounce or part of that weight.
To other countries, colonies or places.	3 annas for the first ounce and 1½ annas for every additional ounce or part of that weight.

Postcards, Single	1½ annas.
„ Reply	3 annas.

Printed Papers.—½ anna for every 2 ounces or part of that weight.

Business Papers.—For a packet not exceeding 12 ounces in weight .. 3 annas.

For every additional 2 ounces or part of that weight .. .. ½ anna.

Samples.—1 anna for first 4 ounces and ½ anna per 2 ounces thereafter.

Parcels.

(*i*) Parcels not exceeding 20 lbs. in weight and addressed to Great Britain and Northern Ireland are forwarded as mails to the British Post Office, the rates of postage applicable to such parcels being as follows:—

For a parcel—	Via Gibraltar Rs. a. p.
Not over 3 lbs.	1 8 0
Over 3 lbs., but not over 7 lbs. ..	2 12 0
„ 7 „ „ 11 „ ..	3 15 0
„ 11 „ „ 20 „ ..	6 6 0

These parcels are delivered by the post office and the postage paid carries them to destination.

(*ii*) Parcels which exceed 11 lbs. but which do not exceed 50 lbs. (the maximum allowed) in weight are forwarded from India through the medium of the P. & O.S.N. Co., and are delivered at destination under arrangements made by that Company. The postage charge applicable to such parcels is twelve annas for each pound, or fraction of a pound. The parcels are delivered free of charge *within a radius of one mile from the Company's Head Office in London*; if addressed to any place beyond that radius, carrier's charges are levied from the addressees on delivery. Parcels thus forwarded through the P. & O. S. N. Co. cannot be insured during transit *beyond* India, but must, if they contain coin, etc., be insured *during transit in India.* No acknowledgment of delivery can be obtained in respect of these parcels, nor can such parcels be transmitted to Great Britain and Northern Ireland under the value-payable system.

Limits of Weight.

Letters.—4 lbs. 6 oz.

Printed Papers and Business Papers—To Great Britain and Northern Ireland, and the Irish Free State, British Australasian Colonies, Hong-kong, the Straits Settlements, Togo (British), the Union of South Africa, Rhodesia, and the Bechuanaland Protectorate—5 lbs.

To Ceylon—No limit.

To all other destinations—4 lbs. 6 oz.

Samples—To Great Britain and Northern Ireland, and the Irish Free State, Hong-kong, the Straits Settlements, Togo (British), the Union of South Africa, Rhodesia, and the Bechuanaland Protectorate—5 lbs.

To Ceylon—200 tolas.

To all other destinations—1 lb. 2 oz.

Parcels.—11 lbs.

Limits of Size.

Letters—1½ feet length by 1½ feet in width or depth. If in form of roll, 2½ feet in length and 4 inches in diameter.

Printed Papers and Business Papers—To Ceylon—2 feet in length by 1 foot in width or depth.

To all other destinations—1½ feet in length by 1½ feet in width or depth.

If in form of roll, dimensions in all cases are 30 inches in length and 4 inches in diameter.

Samples.—To Great Britain and Northern Ireland, and the Irish Free State, Ceylon, Hong-kong, the Straits Settlements, the Union of South Africa, Rhodesia and the Bechuanaland Protectorate—2 feet in length by 1 foot in width or depth.

To all other destination—1½ feet in length by 8 inches in width and 4 inches in depth.

If in form of roll, dimensions in all cases are 1½ feet in length and 6 inches in diameter.

Money Orders.—To countries on which money orders have to be drawn in rupee currency, the rates of commission are the same as in the case of inland money orders.

To countries on which money orders have to be drawn in sterling, the rates are as follows :—

	Rs.	a.
On any sum not exceeding £1 ..	0	3
,, ,, exceeding £1 but not exceeding £2	0	5
,, ,, ,, £2 ,, ,, £3	0	8
On any sum exceeding £2 but not exceeding £4	0	10
,, ,, ,, £4 ,, ,, £5	0	12
,, ... £5	0	12

for each complete sum of £5 and 12 annas for the remainder, provided that if the remainde does not exceed £1, the charge for it shall be 3 annas; if it does not exceed £2, the charge for it shall be 5 annas; if it does not exceed £3, the charge for it shall be 8 annas; and if it does not exceed £4, the charge for it shall be 10 annas.

Insurance fees (for registered letters and parcels only)

For insurance of letters and parcels to Mauritius, Iraq and British Somaliland and of parcels to Portuguese India, the Seychelles and Zanzibar—

	Annas.
Where the value insured does not exceed Rs. 200	5
For every additional Rs. 200 or fraction thereof	5

For insurance of letters and parcels to Great Britain and Northern Ireland and to British Possessions and Foreign countries other than those mentioned above and for insurance of letters to the Seychelles and Zanzibar.—

	Annas
Where the value insured does not exceed £12	5
For every additional £12 or fraction thereof	5

Acknowledgment fee.—3 annas for each registered article.

Magnitude of business in Post Office.—At the close of 1927-28 there were 107,721 postal officials, 21,604 post offices, and 166,624½ miles of mail lines. During the year, 1,293 million articles, including 51 million registered articles were posted; stamps worth Rs. 60 millions were sold for postal purposes: over 38½ million money orders of the total value of Rs. 920 millions were issued, a sum of Rs. 273 millions was collected from tradesmen and others on V. P. articles; over 5·7 million insured articles valued at 1,632 millions of rupees were handled. Customs duty, aggregating over 8·3 million rupees was realised on parcels and letters from abroad, pensions amounting to Rs. 15·8 millions were paid to Indian Military pensioners and 13,600 lbs. of quinine were sold to the public. On the 31st March 1927, there were 2,606,701 Savings Bank accounts with a total balance of Rs. 327 millions and 58,586 Postal Life Insurance policies with an aggregate assurance of Rs. 113 millions.

TELEGRAPH DEPARTMENT.

Telegraphs.—Up to 1912 the telegraph system in India was administered as a separate department by an officer designated Director-General of Telegraphs who worked in subordination to the Government of India in the Department of Commerce and Industry. In that year it was decided to vest the control of Posts and Telegraphs in a single officer as an experimental measure with a view to the eventual amalgamation of the two Departments.

In pursuance of this policy an experimental amalgamation of the two services was introduced in the Bombay and Central Circles from the 1st July 1912. The fundamental principles of this scheme which followed closely the system in force in the United Kingdom and several other European countries were that the traffic and engineering work of the Telegraph Department should be separated, the former branch of work in each Circle being transferred to the

Postmaster-General assisted by a Deputy Postmaster-General and a suitable number of attached officers and the engineering branch being controlled by a Director of Telegraphs in charge of the two Circles. Subordinate to this officer there were several Divisional Superintendents who were assisted by a number of attached officers.

In 1914 the complete amalgamation of the two Departments was sanctioned by the Secretary of State and introduced from 1st April. The superior staff of the Direction, in addition to the Director-General himself, consists on the engineering side of a Chief Engineer, Telegraphs, with two Dy. Chief Engineers. For traffic work there is a Deputy Director-General, with an Assistant and an Assistant Director-General. On the 27th March 1920 a Controller of Telegraph Traffic was appointed to assist the Deputy Director-General in the inspection of offices and in controlling telegraph traffic. In the Circles the scheme which has been introduced follows closely on the lines of the experimental one referred to above. For telegraph engineering purposes India is divided up into five Circles, each in charge of a Director. For Burma special arrangements were considered necessary and the engineering work is in charge of the Postmaster-General who is a Telegraph officer specially selected for the purpose. These six Circles are divided into twenty-one Divisions each of which is in charge of a Divisional Engineer. On the 1st July 1922 Sind and Baluchistan circle was formed with its headquarters at Karachi. This circle is in charge of a Director Posts and Telegraphs. On the 31st March 1924 there were 7 Circles and 20 Divisions.

The telegraph traffic work is under the control of the Postmasters-General, each of whom is assisted by a Deputy Postmaster-General and a suitable staff of attached officers.

The audit work of the Telegraph Department is, like that of the Post Office, entrusted to the Accountant-General, Posts and Telegraphs, assisted by a staff of Deputy and Assistant Accountants-General.

Inland Telegrams and Tariff.—Telegrams sent to or received from places in India or Ceylon are classed as Inland telegrams. The tariff for inland telegrams is as follows:—

	For delivery in India. Private and State.		For delivery in Ceylon. Private and State.	
	Ex-press. Rs. a.	Ordi-nary. Rs. a.	Ex-press. Rs. a.	Ordi-nary. Rs. a.
Minimum charge.	1 8	0 12	2 0	1 0
Each additional word over 12..	0 2	0 1	0 3	0 2

The address is charged for.

Additional charges.

Minimum for reply-paid telegram .. .. / Notification of delivery	Minimum charge for an ordinary telegram.
Multiple telegrams, each 100 words or less	4 annas.
Collation	One half of the charge for an ordinary telegram of same length.

		Rs.
For acceptance of an Express telegram during the hours when an office is closed.	If both the offices of origin and destination are closed ..	2
	If only one of the offices is closed.	1
	If the telegram has to pass through any closed intermediate office an additional fee in respect of each such office	1

Signalling by flag or semaphore to or from ships—per telegram	The usual inland charge *plus* a fixed fee of 8 ans.
Boat hire	Amount actually necessary.
Copies of telegrams each 100 words or less	4 annas.

	For delivery in India. *Press.*		For delivery in Ceylon. *Press.*
	Ex-press. Rs. a.	Ordi-nary. Rs. a.	Ex-press. Rs. a.
Minimum charge ..	1 0	0 8	1 0
Each additional 6 words over 48 in respect of India, each additional four words over 32 in respect of Ceylon..	0 2	0 1	0 2

The address is free.

Foreign Tariff.—The charges for foreign telegrams vary with the countries to which they are addressed. The rates per word for private and state telegrams to countries in Europe are as follows:—

	Urgent Rs. a.	Ordi-nary. Rs. a.	Defer-red. Rs. a.	State (British. Govt.) Rs. a.
All countries in Europe (except France, *via* Eastern ..	3 0	1 0	0 8	0 8
Do. *via* Indo ..	3 0	1 0	0 8	—
Great Britain and Northern Ireland *via* I.R.T... ..	—	0 12	0 6	0 6
Most other countries in Europe *via* I.R.T.	—	1 0	0 8	0 8

Radio-Telegrams.—For radio-telegrams addressed to ships at sea from offices in India or Burma and transmitted *via* the coast stations at Bombay, Calcutta, Karachi, Madras, Port Blair or Rangoon the charge is ten annas per word in nearly all cases.

The following are the charges excluding supplementary charges for radiotelegrams from Offices in India or Burma transmitted *to ships at sea* from the coast stations mentioned in the preceding paragraph:—

	Total charge per word. Rs. a.
(1) All Government or Private Radio-telegrams, excepting those mentioned in (2) to (5) below ..	0 10
(2) British, Indian or Colonial Government Radio-telegrams to His Britannic Majesty's Ships of War or Royal Indian Marine Ships	0 6
(3) Private Radio-telegrams to His Britannic Majesty's Ships of War ..	0 6

(4) Radio-telegrams to Argentine, Belgian, Chilian, Danish, Dutch, Greek, Norwegian, Portuguese, Roumanian, Uruguayan and Yugo-Slav Ships:—

(*a*) *For ten words or less,* six annas per word, plus a fixed charge of Rs. 2-8-0.

(*b*) *For more than ten words,* ten annas per word.

(5) Radio-telegrams to Spanish and Swedish ships:—

(*a*) *For ten words or less,* six annas per word, *plus* a fixed charge of Rs. 1-14-0.

(*b*) *For more than ten words,* nine annas per word.

The sender of a radio-telegram may prepay a reply. He must insert before the address, the instruction "R. P." followed by mention in Rupees and annas of the amount prepaid *e.g.,* R.P. 7-8. This expression counts as one word.

DAILY LETTER-TELEGRAMS.

Daily Letter-Telegrams in plain language, which are dealt with telegraphically throughout are accepted on any day of the week, excluding Sundays and telegraph holidays, and are ordinarily delivered to the addressee after forty-eight hours. They are subject to the conditions prescribed for Deferred Foreign telegrams with certain exceptions as stated below.

The charge for a Daily Letter-Telegram is ordinarily a quarter of the charge for a full rate telegram of the same length and by the same route subject to a minimum charge equal to the charge for 20 words at such reduced rate including the indication DLT.

The late fee system does not apply to Daily Letter-Telegrams and such telegrams are not accepted during the closed hours of an office.

On Indian lines Daily Letter-Telegrams are transmitted after Deferred Foreign telegrams.

In the Daily Letter-Telegram service the special instructions relating to prepayment of replies are admitted other special services are inadmissible in DLT Telegrams.

Packed messages, *i.e.,* messages intended to be communicated to different persons, are not accepted in the text of Daily Letter-Telegrams. The charge for a week-end letter telegram to Great Britain and Northern Ireland is 3 annas a word *via* Eastern or Indo and 2½ annas a word *via* I.R.T. subject to a minimum of 20 words per telegram including the indication WLT.

† No deferred rate to Bulgaria, Russia, Yugoslavia and Turkey.

Week-end Letter Telegrams accepted on Saturday or any previous day of the week for delivery on the following Monday—2½ annas per word for Great-Britain and Northern Ireland.

Daily and Week-end Letter Telegrams—Minimum charge for 20 words.

Ordinary rate telegrams may be written in Code.

Telegrams are accepted at all Government Telegraph Offices.

Usual rules apply regarding Registration, Reply Paid, etc.

Full lists published in Post and Telegraph Guide.

Growth of Telegraphs.—At the end of 1897-98 there were 50,305 miles of line and 155,088 miles of wire and cable, as compared with 101,017 miles of line including cable and 532,859 miles of wire including conductors respectively, on the 31st March 1928. The numbers of departmental telegraph offices were 257 and 142 (including 6 Coast Radio offices, respectively) while the number of telegraph offices worked by the Post Office rose from 1,634 to 4,011.

The increase in the number of paid telegrams dealt with is shown by the following figures :—

		1897-98.	1927-28.
Inland ..	Private ..	4,107,270	15,206,370
	State ..	860,382	1,102,452
	Press ..	35,910	466,487
Foreign ..	Private ..	735,679	3,110,489
	State ..	9,896	32,379
	Press ..	5,278	55,857
		5,754,415	19,974,034

The outturn of the workshops during 1927-28 represented a total value of Rs. 25,69,109.

Wireless.—The total number of Departmental wireless stations open at the end of 1927-28 was twenty-four, *viz.*, Allahabad, Bombay, Calcutta, Delhi, Diamond Island, Jutogh, Karachi, Lahore, Madras (3 stations), Mhow, Nagpur, Peshawar, Poona, Port Blair, Quetta, Rangoon (3 stations), Sandheads (two pilot-vessels), Secunderabad, and Victoria Point of which only Port Blair and Victoria Point booked telegrams direct from the public.

The new Duplex high-speed service between Rangoon and Madras continued to work satisfactorily, the Baudot system being employed generally for this circuit. The Wheatstone system was also used for several months.

Telephones.—On the 31st March 1928 the number of telephone exchanges established by the Department was 280 with 17,564 straight line connections and 1,988 extension telephones. Of these exchanges, 138 were worked departmentally. The number of telephone exchanges established by Telephone Companies was 18 with 30,598 connections.

The total staff employed on telegraphs, telephones and wireless on the 31st March 1928 was 14,290.

Posts and Telegraphs.—The capital outlay of the Indian Posts and Telegraphs Deptt. during and to the end of the year ended 31st March 1928 was Rs. 65,30,651 and Rs. 13,25,91,266, respectively. The receipts for the year ended 31st March 1928 amounted to Rs. 10,82,71,046 and charges (including interest on capital outlay) to Rs. 11,08,86,184, the result being a net loss Rs. 26,15,138.

Sanitation.

The history of the sanitary departments in India goes back for about fifty years. During that period great improvements have been effected in the sanitary condition of the towns, though much remains to be done; but the progress of rural sanitation which involves the health of the great bulk of the population has been slow, and incommensurate with the thought and labour bestowed on the subject. "The reason lies in the apathy of the people and the tenacity with which they cling to domestic customs injurious to health. While the inhabitants of the plains of India are on the whole distinguished for personal cleanliness, the sense of public cleanliness has ever been wanting. Great improvements have been effected in many places; but the village house is still often ill-ventilated and over-populated; the village site dirty, crowded with cattle, choked with rank vegetation, and poisoned by stagnant pools; and the village tanks polluted, and used indiscriminately for bathing, cooking and drinking. That the way to improvement lies through the education of the people has always been recognised."

Of recent years the pace has been speeded up as education progressed, education developed, and funds were available. In a resolution issued in May 23rd, 1914, the Government of India summarised the position at that time, and laid down the general lines of advance. This resolution (*Gazette of India*, May 25th, 1914) should be studied by all who wish to understand the attitude of the Government of India towards sanitation prior to the passing of the Reform Act of 1919. It will be found

summarised in the Indian Year Book of 1922 (page 475 *et seq.*) and earlier editions. One of the greatest changes effected by the Reform Act of 1919 was the transfer of sanitation to the provinces making it a subject directly responsible to local control through Ministers. It is yet full early to attempt to indicate the effects of this change.

The Public Health Commissioner with the Government of India in a general review of health organisation in British India which he laid in January, 1928, before the Interchange Study Tour organised for Medical Officers of Health from the Far Eastern Countries by the Health Organisation of the League of Nations, concluded "that the State effort in regard to Health Organisation in British India is one of no mean importance, that it has evolved over a couple of centuries during which many mistakes in policy must be admitted, that it has provided the Officers and the stimulus necessary for laying the foundations of medical education, that it has tried to uphold the ethical standards of western medicine and that in whichever way it is regarded it is an effort of which no Government need be ashamed." He quoted, the remark of the Government of India in their Resolution of 1914, that "in the land of the ox cart one must not expect the pace of the motor car."

The Public Health Commissioner in his annual report for the year 1925 noted the introduction of the political element into health matters as a result of the Reforms and said that the improvements being introduced before the Reforms were in some provinces now in a fair way to maturing but that in other provinces "with less appreciation of the actual needs so far from adding to the organisation as they have found it have shown a desire to scrap even some of what they originally possessed." But, he says, "though the picture is neither bright nor the future rosy it is becoming increasingly evident that a considerable section of the Indian community is thinking seriously on these public health problems: amid much futile and destructive criticisms of State and municipal efforts here and there valuable and suggestive criticism can be met with which goes to prove my contention."

India's birth rate in 1925 was nearly twice that of England and Wales, her death rate was twice that of England and Wales and nearly three times that of New Zealand and her infantile mortality rate was nearly 2½ times that of England and Wales and nearly 4½ times that of New Zealand. "The information furnished for the great group of infectious diseases of world import, *i.e.*, plague, cholera, small-pox, yellow fever, typhus, malaria, and dysentery shows (says the Public Health Report already cited) that if we except typhus and yellow fever, India is one of the world's reservoirs of infection for the others and the main reservoir of infection for plague and cholera." The significance of these facts must, adds the Commissioner, be obvious to all who think: "Briefly their implication is that India's house, from the public health point of view, is sadly out of order and that this disorder requires to be attended to. It is not for India to say that so far as she is concerned prevention is impossible. If we think of the effect of sunlight on tubercle ridden children; of the effect of feeding on rickets, scurvy and beri-beri; of the way in which malaria, cholera, yellow fever, dangue, ankylostomiasis and filariasis can be and have been overcome we need have no fear in regard to India provided the necessary measures are put into operation."

The Public Health Commissioner in an address before the annual congress of the Far Eastern Association of Tropical Medicine, held in Calcutta in December, 1927, urged the importance of instituting a Central Ministry of Health which should be charged with the functions of co-ordinating the policies and activities of the departments concerned in the several provinces and with keeping them abreast of scientific progress. There is at present no Public Health Act for the whole of India, nor under existing administrative arrangements is one immediately possible, but the desirability of the Central Ministry of Health and of such an Act is likely to be urged in the course of the revision of the Constitutional Reforms now in progress.

The Public Health Commissioner in his annual review shows that the outstanding data concerning public health in the year 1926 are briefly as follows :—

(1) The birth rate rose from 33 .65 per mille in 1925 to 34 .77 in 1926.

(2) The death rate rose from 24 .72 in 1925 to 26 .76 in 1926.

(3) The infantile death rate rose from 174 in 1925 to 189 in 1926.

The death rates of other countries in 1926 were: England and Wales 70, Canada (ex- Quebec) 102, U.S.A. 73, Japan (1922) 166.

He shows that taking the year as a whole, the rainfall averaged 6 per cent. above normal, while the cold weather rainfall of January and February was in large defect in N-W India, which is ordinarily the chief region of winter rains. The chief features of the S-W monsoon season were the weakness of both the currents in June and their more than usual activity in the other three months.

Births in British India numbered 8,395,679, or 270,271 more than in 1925, the increase being shared by all provinces except Delhi, Bengal and Ajmer Merwara. All provinces except Bengal, Coorg, Burma and Ajmer Merwara showed an increased birth-rate as compared

with the quinquennial mean. The proportion of male births to female throughout British India was 108, against 110 in 1925, 108 in 1924 and 1923 and 109 in 1922.

Birth ratios exceeded death ratios in all provinces except Delhi, Coorg and Ajmer Merwara. Bombay (8 .50), the N. W. F. P. (8 .4) and Assam (7 .80) were among the big birth increases.

Deaths numbered 6,460,610, compared with 5,967,918 in the preceding year, an increase of 492,692. The death rate was 26 .76 against 24 .72 in 1925 and a quinquennial mean of 26 .53. The urban death rate was 32 .49 against 29 .65 and the rural rate 26 .21 against 24 .30.

Of the total mortality, 1,587,091 deaths or 24 .6 per cent. occurred within the first year of life against 1,416,983, or 23 .7 per cent in 1925. (Corresponding figure for England and Wales 11 .3 per cent. in 1925 and 10 .7 in 1926). The infantile death rate calculated on the births recorded was 189 per mille against 174 in 1925 and 189 in 1924. Every province provided an increase except Coorg. In all British India 47 .2 per cent. of the infantile births occurred during the first month of life, against 49 .58 per cent. in 1925. This equals 89 per mille live births (total infantile mortality in England and Wales, 70 per mille). The total number of deaths under one week was 334,390, or 55 .43 per mille of live births. Compared with 1925, this figure shows an increse of 23,799 deaths under one week. The ratio per thousand of live births has increased everywhere except in the United Provinces and Coorg.

The Public Health Commissioner publishes what he terms an interesting table compiled by the Executive Health Officer, Bombay city, which shows that of 8,200 infantile deaths there during 1926 "infantile debility and malformations, including premature births" accounted for 3,703 and respiratory diseases for 2,644. He expresses agreement with a report by the Director of Public Health in Bengal, which states, "The callous indifference and ignorance to laws of hygiene and sanitation, the ingrained conservatism and the woeful fatalism of the masses can only be removed byan extensive and intensive propaganda. The effects of public health legislation would amount to very little if the ground work is not completed by propaganda: people must understand before they can be made to adopt any health legislation." He also quotes the following from the report of the Director of Public Health in the Madras Presidency, "The decrease (in the number of maternity and child welfare centres from 58 to 53) is most disappointing in view of the great necessity for a wide expansion of the activities carried on by these centres. It is a matter of great regret that little has been done by local authorities in organising measures for relief of mothers and infants......"

THE HEALTH OF THE ARMY.

British.—The average strength of British Troops, R. N. and R.A.F. 59,372 on the strength in India during 1925 was 60,097 as compared with 60,097 in 1925. There were also on the strength 5,341 women and 7,257 children. The statistics of sickness also take account of pensioners and others not on the strength. The following table shows the main facts as regards the health :—

—	Average Strength.	Admissions to Hospital.		Deaths.		Invalids sent Home.		Invalids Discharged in India.		Average Constantly. sick.	
		No.	Ratio per 1,000.	No.	Ratio per 1,000.	No.	Ratio per 1,000.	No.	Ratio per 1,000.	No.	Ratio per 1,000.

The health statistics of Officers and other ranks for the quinquennial periods 1910-14, 1915-19 and 1920-24 are given, with those for 1925 and 1926 separately for purposes of comparison:—

	Admissions.		Invalids.		Deaths.	
	Officers.	Other Ranks.	Officers.	Other Ranks.	Officers.	Other Ranks.
1910-14	567.5	567.2	16.30	7.03	5.14	4.5
1915-19	1,053.0	881.7	60.98	29.91	10.54	8.8
1920-24	676.7	791.9	20.99	18.91	6.71	5.9
1925	607.6	628.6	18.02	17.38	5.15	2.8
1926	675.2	649.5	19.81	16.02	6.22	3.0

The principal causes of invaliding to the United Kingdom were:—

Inflammation of middle ear	347
Mental diseases	39
Pulmonary tuberculosis	34
Valvular disease of the heart	53
Disordered action of the heart ..	36
Epilepsy	22
Multiple neuritis	20

Nineteen cases of multiple neuritis were taken from Aden.

The average number constantly in hospital was 1,758.60, or 30.96 per 1000 of the strength, compared with 31.41 in 1925, 32.69 in 1924 and 29.68 in 1913.

The average sick time to each soldier was 11.30 days and the average duration of each case 17.40 days. The corresponding figures were 11.46 and 18.24 in 1925, 11.97 and 18.18 in 1924 and 10.83 and 18.66 in 1913.

Men numbering 78,708, or 1,385.8 per mille of the strength, were treated as out patients, with an average daily number under treatment of 1,093.59, or 19.26 per 1,000.

The combined ratio constantly sick in hospital and under treatment as out-patients was 50.22 per 1000 of the strength, compared with 50.32 in 1925 and 54.55 in 1924.

As in former years the preponderance of disease due to the bites of mosquitoes and sand-flies shows the importance of preventive measures directed against them. So runs the report of the Public Health Commissioner with the Government of India. He adds that a large number of the admissions for inflammation of areolar tissue are also attributable to the same cause.

The fall in the incidence of malaria in the Northern Command which the statistics reflect was from 306.3 per 1000 in 1925 to 268.6 in 1926 but was more than counterbalanced by an increase in the Western Command from 155.4 per 1000 in 1925 to 314 in 1926. "The civil population in the Western Command area suffered heavily from malaria in the autumn of 1926 and the troops on manoeuvres were heavily infected."

Indian.—The outstanding feature of the statistics for 1925 in regard to the Indian Army was that the ratios per 1,000 for admissions, deaths and average constantly sick were in each case a record low figure in the annals of the Indian Army. The following table shows the main health statistics of officers and other ranks for the quinquennial periods 1915-19 to 1920-24 and those for 1925 and 1926:—

Period.	Admissions		Invalids.		Deaths.	
	Officers.	Other Ranks.	Officers sent Home.	Other Ranks Discharged.	Officers.	Other Ranks.
1915-19 ..	882.4	788.2	**	23.6*	8.29	16.81
1920-24 ..	698.3	593.2	3.65	18.25*	6.67	8.01
1925 ..	480.1	336.8	5.70	12.5*	5.22	4.01
1926 ..	607.7	388.6	4.49	11.6*	4.99	3.75

* Figures not available.

The number admitted to hospital was 52,517, or 388.6 per 1000 of the strength, compared with 356.8 in 1925 and 531.7 in 1913. The increase in the admission rate over 1925 was due in part to an order that all cases of malaria were to be admitted to hospital. (In previous years a certain number of light cases were treated in barracks). Malaria was the chief cause of admission to hospital, being responsible for 15,542 cases, against the next highest figure of 4,944, which was of cases admitted on account of local injuries. Deaths were 507, or 3.75 per 1000 of the strength, compared with 4.01 per 1000 in 1925 and 4.01 in 1913. It is the lowest death-rate ever recorded.

The average number constantly sick was in hospital 2,082.52, or 15.41 per 1000 of the strength, compared with 15.04 in 1925, 18.05 in 1924 and 21.4 in 1913. The average sick time to each soldier was 5.62 days and the average duration of each case 14.47 days. The number of men treated as out-patients was 151,918 or 1,124.1 per 100 of strength. The number constantly sick in hospital and under treatment as outpatients was in the ratio of 29.61 per 1000 of strength, compared with 26.54 in 1925 and 33.35 on 1924.

CHILD WELFARE MOVEMENT.

Amongst the most pressing problems of India's health is that presented by the appalling infant mortality. It has been calculated that every year no fewer than 2 million Indian babies die, while many others survive only to grow weak and feeble from unhygienic surroundings during infancy. A noteworthy feature has been the further progress of the infant welfare movement, which owes much to the All-India Maternity and Child Welfare League initiated by Lady Chelmsford and also to the Indian Red Cross Society, which aims at gradually establishing a network of child welfare centres in most of the larger towns in India. The institution of an all India Baby Week, an undertaking to which Her Excellency the Countess of Reading has devoted great and successful enthusiasm has also given a stimulus to the work and promises to be an important perennial aid to its progress. In all the great centres of population, work is now being done for the training of midwives, for the instruction of mothers and for the care of babies. Training centres for Indian and Anglo-Indian women have been opened in order to spread the elements of infantile hygiene to other parts of India. Most hopeful sign of all, Indian ladies are beginning to interest themselves in this work in large numbers. But such is the magnitude of the field, that a consistent widespread effort on a scale hitherto impossible must be undertaken, if any appreciable reduction is to be made in the appalling mortality of young children. The admirable work done year by year by the National Association for supplying Female Medical Aid to the Women of India is recognised by the Government of India, which subsidises this organisation with a grant of Rs. 3,70,000 a year for the maintenance of the Women's Medical Service of Indian.

Centres of Activity.—The Child Welfare Directory gives the following list of places where the movement is already at work:

Bombay.—The centre of much active and enthusiastic welfare work; the Lady Willingdon Maternity Homes near the people's chawls being unique of their kind in India. The Bombay Infant Welfare Society founded by Lady Lloyd has already established 8 Infant Welfare Centres where prenatal, maternity and child welfare work is being carried on.

Poona.—The work carried out by the Seva Sadan Society of Poona deserves special mention in this connection. Child welfare centres have been established in several places throughout the Presidency and are in charge of Public Health Nurses trained by the Seva Sadan Society. Certain of these Child Welfare centres are subsidized by the Bombay Branch of the Red Cross.

Surat.—The Henderson Ophthalmic Scheme for treating Ophthalmia Neonatorum and stemming "the enormous amount of preventible and curable blindness that is laying its shadow over the health, happiness and usefulness of this great portion of our Empire."

Bijapur.—Mr. Henderson, I.C.S., has now started the same beneficent work for blind babies as in Surat.

Delhi.—Work was started in 1914 by two lady health visitors brought out from England by the Government of India. Their salaries are now met by the Delhi Municipality, a substantial grant being paid towards them by Government; three infant welfare centres have been established and a comprehensive scheme for the training and supervision of indigenous *dais* is carried on. A training school for health visitors and midwife supervisors has been established in connection with this scheme and is financed by the Lady Chelmsford League. All particulars may be obtained from the Secretary Lady Reading Health School, Viceregal Estates, Simla (and Imperial Secretariat, Delhi).

Madras.—Under the Provincial Branch of the Lady Chelmsford League and of the Red Cross Society a number of Infant Welfare Centres have been opened in the City, also a school for training health visitors under Mrs. Chinappi, M.B., the Medical Superintendent of the Co-operative Midwives Scheme, by means of which trained midwives are provided for the City and much antenatal, maternity and infant welfare work is carried on. There are also local centres of both the Red Cross and the Lady Chelmsford League in the Madras mofussil.

Punjab.—The Punjab Branch of the Lady Chelmsford League was founded in 1921 and has established an Infant Welfare Centre and a school for training health visitors in Lahore under two health visitors brought from England. Its object is to establish child welfare centres with a trained health visitor in charge of each district.

United Provinces.—Infant Welfare centres exist in the following places :—Agra, Allahabad, Bareilly, Cawnpore, Dehra Dun, Gonda, Ghazipur, Lucknow. Other places are also taking up the work, and decrease in Infant mortality is noted as a result of the work in many places.

Bengal.—Work is undertaken by the Corporation of *Calcutta*, and by the Indian Red Cross Society in that town. The latter body is now also financing a Health School for the training of workers. A centre at *Titaghur* financed by Thos. Duff & Co., Ltd., cares for the infants of the operatives in the Jute Mills. A flourishing centre exists at *Dacca* where excellent work is being done.

Sind.—Karachi has two trained Health Visitors as well as 8 nurses, and there is a large amount of maternity work. Hyderabad is noted specially for its work among indigenous midwives.

Central Provinces.—In Nagpur city the work is being carried on by the Municipality very successfully. The Red Cross has also opened a centre in Civil Lines.

Rajputana.—Ajmer is the only centre at present.

N. W. F. P.—Dera Ismail Khan has a flourishing work, much appreciated by the people. Peshawar centre has had to be closed for want of a suitable worker.

Baluchistan.—A centre was established in Quetta in 1922, and has done steady work.

The health statistics of Officers and other ranks for the quinquennial periods 1910-14, 1915-19, and 1920-24 are given, with those for 1925 and 1926 separately for purposes of comparison :—

	Admissions.		Invalids.		Deaths.	
	Officers.	Other Ranks.	Officers.	Other Ranks.	Officers.	Other Ranks.
1910-14	567.5	567.2	16.30	7.03	5.14	4.36
1915-19	1,053.0	881.7	60.98	29.91	10.54	8.81
1920-24	676.7	791.9	20.99	18.91	6.71	5.24
1925	607.6	628.6	18.02	17.38	5.15	2.89
1926	675.2	649.5	19.81	16.02	6.22	3.01

The principal causes of invaliding to the United Kingdom were :—

- Inflammation of middle ear 347
- Mental diseases 39
- Pulmonary tuberculosis 34
- Valvular disease of the heart .. 53
- Disordered action of the heart .. 36
- Epilepsy 22
- Multiple neuritis 20

Nineteen cases of multiple neuritis were taken from Aden.

The average number constantly in hospital was 1,758.60, or 30.96 per 1000 of the strength, compared with 31.41 in 1925, 32.69 in 1924 and 29.68 in 1913.

The average sick time to each soldier was 11.30 days and the average duration of each case 17.40 days. The corresponding figures were 11.46 and 18.24 in 1925, 11.97 and 18.18 in 1924 and 10.83 and 18.66 in 1913.

Men numbering 78,708, or 1,385.8 per mille of the strength, were treated as out patients, with an average daily number under treatment of 1,093.59, or 19.26 per 1,000.

The combined ratio constantly sick in hospital and under treatment as out-patients was 50.22 per 1000 of the strength, compared with 50.32 in 1925 and 54.55 in 1924.

As in former years the preponderance of disease due to the bites of mosquitoes and sand-flies shows the importance of preventive measures directed against them. So runs the report of the Public Health Commissioner with the Government of India. He adds that a large number of the admissions for inflammation of areolar tissue are also attributable to the same cause.

The fall in the incidence of malaria in the Northern Command which the statistics reflect was from 306.3 per 1000 in 1925 to 268.6 in 1926 but was more than counterbalanced by an increase in the Western Command from 155.4 per 1000 in 1925 to 314 in 1926. "The civil population in the Western Command area suffered heavily from malaria in the autumn of 1926 and the troops on manoeuvres were heavily infected."

Indian.—The outstanding feature of the statistics for 1925 in regard to the Indian Army was that the ratios per 1,000 for admissions, deaths and average constantly sick were in each case a record low figure in the annals of the Indian Army. The following table shows the main health statistics of officers and other ranks for the quinquennial periods 1915-19 to 1920-24 and those for 1925 and 1926 :—

Period.	ADMISSIONS		INVALIDS.		DEATHS.	
	Officers.	Other Ranks.	Officers sent Home.	Other Ranks Discharged.	Officers.	Other Ranks.
1915–19 ..	882.4	788.2	**	23.6*	8.29	16.81
1920–24 ..	698.3	593.2	3.65	18.25*	6.67	8.01
1925 ...	480.1	336.8	5.70	12.5*	5.22	4.01
1926 ..	607.7	388.6	4.49	11.6*	4.99	3.75

* Figures not available.

The number admitted to hospital was 52,517, or 388.6 per 1000 of the strength, compared with 356.8 in 1925 and 531.7 in 1913 The increase in the admission rate over 1925 was due in part to an order that all cases of malaria were to be admitted to hospital. (In previous years a certain number of light cases were treated in barracks). Malaria was the chief cause of admission to hospital, being responsible for .5,542 cases, against the next highest figure of .,944, which was of cases admitted on account of local injuries. Deaths were 507, or 3.75 per 1000 of the strength, compared with 4.01 per 1000 in 1925 and 4.01 in 1913. It is the lowest death-rate ever recorded.

The average number constantly sick was in hospital 2,082.52, or 15.41 per 1000 of the strength, compared with 15.04 in 1925, 18.05 in 1924 and 21.4 in 1913. The average sick time to each soldier was 5.62 days and the average duration of each case 14.47 days. The number of men treated as out-patients was 151,918 or 1,124.1 per 100 of strength. The number constantly sick in hospital and under treatment as outpatients was in the ratio of 29.61 per 1000 of strength, compared with 26.54 in 1925 and 33.35 on 1924.

The public Health Commission makes the same report in regard to sand—flies and mosquitoes as causing disease by their bites as he does in his report about British troops.

The annual returns for Followers are not compiled in the same way as those concerning troops and comparisons between the two categories are therefore impossible.

MORTALITY FROM WILD ANIMALS.

The total number of people killed by wild animals in British India during 1926 amounted to 1987 against 1972 in 1925 and 2578 in 1924.

Tigers were responsible for 875 deaths, leopards for 183, wolves for 367, bears for 96, elephants for 56 and hyenas for 15. Deaths by tigers continued to be highest in Madras, from leopards in the C. P. and Berar, from wolves in the U. P. from bears in B. and O. and from elephants in Assam. Of the 393 deaths from "other animals" about 41 are ascribed to wild pig and 151 to crocodiles and alligators. The highest number of deaths from wild animals cocurred in the U. P. The mortaility from elephants showed a marked decrease. The mortality was less than in the previous year in most provinces.

Deaths from snakebite increased from 19,258 to 19,718.

Wild animals to the number of 23,689 were reported destroyed during 1926 and of these 128 were tigers, 4,247 leopards, 2,633 bears and 3,025 wolves . A sum of Rs. 1,40,061 was paid in rewards against Rs 1,55,667 in 1925. The number of snakes destroyed in India proper increased from 41,004 to 46,012 and the rewards paid for their destruction were Rs. 1,615 against Rs. 1,579 in 1925.

MEDICAL INSTITUTIONS.

There were in existence in British India at the end of 1926 4,189 State, public, local fund and private aided civil hospitals and dispensaries as compared with 3,956 in 1925, an increase of 233.

The number of patients treated was 44,610,196 (including 766,855 in-patients) against 41,135,578 (including 732,975 in-patients) in 1925. The increase was noticeable in all provinces except the U. P. and Calcutta city, the increase in some provinces apparently being due to the opening of additional dispensaries. The number of operations rose from 1,711,695 in 1925 to 1,871,495 in 1926.

There are in British India 8 medical colleges and 23 medical schools.

LEPROSY IN INDIA.

It is exceedingly difficult to give anything approaching an accurate estimate of the total number of lepers in the Indian Empire to-day. The census figures of 1921 give the total as 102,513, as against 109,094 in 1911. But it is doubtful if this figure represents anything more than the more advanced cases and possibly a majority of this number are the begging and pauper lepers who are seen all over the country. Dr. E. Muir, M.D.,F.R.C.S., the Leprosy Research Worker at the Calcutta School of Tropical Medicine, says that "we think that it would not be an over estimate to put down the number of lepers in India somewhere between a half and one million."

Early in the year 1924, the British Empire Leprosy Relief Association was constituted in England with H. R. H. The Prince of Wales as Patron, the Viscount Chelmsford as Chairman of the General Committee and H. E. the Viceroy of India as one of the Vice-Presidents. Following its formation and in view of the good results being obtained from the newest treatment of leprosy, H. E. the Viceroy felt that the time was auspicious for the inauguration and carrying on of an earnest campaign with the object of ultimately stamping out leprosy from India.

His Excellency invited certain gentlemen representing various interests to form an Indian Council of the Association, which he formally inaugurated at a public meeting in Delhi on the 27th January 1925.

His Excellency is its President and Sardar Saheb Balwant Singh Puri, Honorary Secretary of the Association.

A special research worker on a Salary of Rs. 1,200-75-1,500 has been appointed for five years who is working under Dr. E. Muir, M.D., F.R.C.S., in the School of Tropical Medicine and Hygiene, Calcutta, where doctors are trained in the special treatment of leprosy.

The whole of the first year of the Indian Council was occupied with preliminary organising work and very early, in its second year, 1926, it began to put its work into operation. The Central Committee is under the finally adopted scheme vested with the task of promoting research, preparing and publishing propaganda material and arranging for the training of doctors in the diagnosis and treatment of leprosy. Measures for the accommodation and treatment of leprous patients and other schemes of pure local interest are the concern of Provincial Committees working as agents of the Indian Council. One of the early decisions of the Council therefore related to the apportionment of the revenue of the Fund as between the Central and Provincial Governments. It was decided that the total revenue, less the income of contributions received from Ruling Princess which according to their wishes, has been ear-marked for the promotion of research under the direction of the Central Committee, should so be allocated that the amount distributed to Provincial Committees should not be less than 50 per cent. of the total.

Two circulars were early in 1926 issued to the Provinces setting forth in detail the approved plan of action for the Central and Provincial Committees. In pursuance of the proposals made in it permanent local Committees to administer the funds to be allotted to them from

the head quarters and to direct and control the anti-leprosy campaign in their respective provinces were formed and by the close of the year all the Provinces had constituted branches. In order to secure uniformity in certain broad principles relating to the anti-leprosy campaign to be undertaken by the Provincial Committees and with a view to its conformity with the latest scientific information about the nature of the disease, the Indian Council issued in the early part of 1926 a "Memorandum on the method of conducting the anti-leprosy campaign in India." This document sought to bring out the following main points which according to the latest scientific researches should be the bases upon which all efforts ultimately to eradicate leprosy must rest:—

(1) Pauper lepers form only a small fraction of the leper population, and the disease is common among all classes of the community.

(2) Segregations is not the most appropriate method of dealing with lepers, for

(*a*) financially it would be impossible;

(*b*) any attempt to impose forcible segregation would drive patients, particularly those who are suffering from the earlier stages of the disease, to conceal their misfortune, and, as has been the case where such means have been adopted, only the more advanced and obvious lepers would be segregated.

(3) The majority of the advanced cases are not highly infectious and are less amenable to treatment, while the early cases in which the disease has made but little outward manifestation, can be controlled by treatment.

(4) The strongest hope of stamping out the disease lies in providing facilities for the treatment of early cases.

The Indian Council, therefore, while it did not desire to minimise the usefulness of homes and asylums for the care of lepers, strongly recommended that the efforts of the Provincial Committees should, for the present at least, be concentrated upon the establishment of dispensaries to serve the following objects:—

(*a*) to induce patients to come forward at an early stage in the hope of recovery instead of hiding their malady till it becomes more advanced, more infectious and less remediable; and so

(*b*) to shut off the sources of infection as the number of infectious cases will continually tend to diminish and the opportunities for infecting the next generation will become fewer.

The Provincial Committees have all placed the question of the training of doctors and the starting of treatment centres where facilities will be available for the proper diagnosis and treatment of the disease, in the forefront of their programmes and their resources have in many cases been supplemented by local Governments by the grant of substantial financial assistance.

A general appeal for funds was made on the formation of the Indian Council and closed in January 1926. Realisations produced Rs. 20,00,000. This was invested and forms the capital of the Association, to which it yields an annual revenue of Rs. 1,21,000.

The latest report of the Indian Council shows that its work is vigorously being prosecuted, that scientific research is continually illuminating the general problem and that the beginnings of genuine progress towards the eradication of leprosy in India are being made. One of the first particular tasks to which the Council has directed itself is the discovery of the extent of prevalence of the disease in India. The method of inquiry adopted is to establish a treatment centre in a leprous district and to approach the census problems there through the offer of free treatment. The survey was experimentally begun in Manbhum district of Bihar and Orissa, then in the Bankura district of Bengal and thereafter in three areas in the Sonthal Parganas in the same part of India and later still in the Chin Hills, in Burma.

"In the first three districts the incidence of leprosy was found to be between four and five times that given by the census figures but it cannot be claimed that even this survey has revealed the total incidence, as second visits to certain villages generally resulted in the discovery of even more cases . . . . In the one high school 11 cases of leprosy were found among 300 boys." The Council deduce that there are at least half a million people in India suffering from leprosy." It was discovered in one area of the Sonthal Parganas surveyed that: "Hiranpur has 1,197 lepers per 100,000 of population: out of 163 villages 106 are affected with leprosy." And it is to this hot, bed of leprosy that people from most of the districts of Bengal come to buy their cattle for cultivation and the Sonthals and Pariahs find a ready market for their lac to spend money on liquor."

"It was observed that if a village consists of people of one caste the number of lepers is very small; where two or more castes are gathered in one village, but each caste occupies a separate quarter, the amount of leprosy is greater, but the highest incidence is in villages where different castes live side by side. In the wild uplands of Singhbhum, Ranchi, Hazaribagh and the north west of the Sonthal Parganas, the aboriginals, who live a free and natural life, are found to be almost free from leprosy but as one passes down from these uplands and jungle tracts towards the plains and the aboriginal comes in contact with more advanced civilisation and mixes with the semi-aboriginal a veritable hotbed of leprosy is found. In such areas as Bankura, Manbhum and the southern part of the Sonthal Parganas sexual promiscuousness and venereal disease, famine and bad food become important factors ...."

Considerable progress was made during 1926 in the treatment of leprosy and four courses of lectures for medical men were held at the School of Tropical Medicine in Calcutta. They were attended by 104 doctors, who came from different provinces in the following proportions:—Punjab 2, Madras 8, Bihar and Orisa 14, Central Provinces 30, Bengal 17. Burma 6, Bombay 1, Assam 6, United Provinces 3, Western India States 14, Central India 10. The total was made up by one doctor from Egypt, 2 from West Africa and 1 from Greece, these students from overseas having been sent by their respective Governments for special study before acting as leprosy experts in their own countries. The Calcutta school has during the past three years thus trained 184 doctors.

CHILD WELFARE MOVEMENT.

Amongst the most pressing problems of India's health is that presented by the appalling infant mortality. It has been calculated that every year no fewer than 2 million Indian babies die, while many others survive only to grow weak and feeble from unhygienic surroundings during infancy. A noteworthy feature has been the further progress of the infant welfare movement, which owes much to the All-India Maternity and Child Welfare League initiated by Lady Chelmsford and also to the Indian Red Cross Society, which aims at gradually establishing a network of child welfare centres in most of the larger towns in India. The institution of an all India Baby Week, an undertaking to which Her Excellency the Countess of Reading has devoted great and successful enthusiasm has also given a stimulus to the work and promises to be an important perennial aid to its progress. In all the great centres of population, work is now being done for the training of midwives, for the instruction of mothers and for the care of babies. Training centres for Indian and Anglo-Indian women have been opened in order to spread the elements of infantile hygiene to other parts of India. Most hopeful sign of all, Indian ladies are beginning to interest themselves in this work in large numbers. But such is the magnitude of the field, that a consistent widespread effort on a scale hitherto impossible must be undertaken, if any appreciable reduction is to be made in the appalling mortality of young children. The admirable work done year by year by the National Association for supplying Female Medical Aid to the Women of India is recognised by the Government of India, which subsidises this organisation with a grant of Rs. 3,70,000 a year for the maintenance of the Women's Medical Service of Indian.

Centres of Activity.—The Child Welfare Directory gives the following list of places where the movement is already at work:

Bombay.—The centre of much active and enthusiastic welfare work; the Lady Willingdon Maternity Homes near the people's chawls being unique of their kind in India. The Bombay Infant Welfare Society founded by Lady Lloyd has already established 8 Infant Welfare Centres where prenatal, maternity and child welfare work is being carried on.

Poona.—The work carried out by the Seva Sadan Society of Poona deserves special mention in this connection. Child welfare centres have been established in several places throughout the Presidency and are in charge of Public Health Nurses trained by the Seva Sadan Society. Certain of these Child Welfare centres are subsidized by the Bombay Branch of the Red Cross.

Surat.—The Henderson Ophthalmic Scheme for treating Ophthalmia Neonatorum and stemming "the enormous amount of preventible and curable blindness that is laying its shadow over the health, happiness and usefulness of this great portion of our Empire."

Bijapur.—Mr. Henderson, I.C.S., has now started the same beneficent work for blind babies as in Surat.

Delhi.—Work was started in 1914 by two lady health visitors brought out from England by the Government of India. Their salaries are now met by the Delhi Municipality, a substantial grant being paid towards them by Government; three infant welfare centres have been established and a comprehensive scheme for the training and supervision of indigenous *dais* is carried on. A training school for health visitors and midwife supervisors has been established in connection with this scheme and is financed by the Lady Chelmsford League. All particulars may be obtained from the Secretary Lady Reading Health School, Viceregal Estates, Simla (and Imperial Secretariat, Delhi).

Madras.—Under the Provincial Branch of the Lady Chelmsford League and of the Red Cross Society a number of Infant Welfare Centres have been opened in the City, also a school for training health visitors under Mrs. Chinappi, M.B., the Medical Superintendent of the Co-operative Midwives Scheme, by means of which trained midwives are provided for the City and much antenatal, maternity and infant welfare work is carried on. There are also local centres of both the Red Cross and the Lady Chelmsford League in the Madras mofussil.

Punjab.—The Punjab Branch of the Lady Chelmsford League was founded in 1921 and has established an Infant Welfare Centre and a school for training health visitors in Lahore under two health visitors brought from England. Its object is to establish child welfare centres with a trained health visitor in charge of each district.

United Provinces.—Infant Welfare centres exist in the following places:—Agra, Allahabad, Bareilly, Cawnpore, Dehra Dun, Gonda, Ghazipur, Lucknow. Other places are also taking up the work, and decrease in Infant mortality is noted as a result of the work in many places.

Bengal.—Work is undertaken by the Corporation of *Calcutta*, and by the Indian Red Cross Society in that town. The latter body is now also financing a Health School for the training of workers. A centre at *Titaghur* financed by Thos. Duff & Co., Ltd., cares for the infants of the operatives in the Jute Mills. A flourishing centre exists at *Dacca* where excellent work is being done.

Sind.—Karachi has two trained Health Visitors as well as 8 nurses, and there is a large amount of maternity work. Hyderabad is noted specially for its work among indigenous midwives.

Central Provinces.—In Nagpur city the work is being carried on by the Municipality very successfully. The Red Cross has also opened a centre in Civil Lines.

Rajputana.—Ajmer is the only centre at present.

N. W. F. P.—Dera Ismail Khan has a flourishing work, much appreciated by the people. Peshawar centre has had to be closed for want of a suitable worker.

Baluchistan.—A centre was established in Quetta in 1922, and has done steady work.

Central India.—Indore has a centre financed by the Red Cross Society.

Bangalore.—Has an enthusiastic Committee with two Health Centres.

Indian States.—Kolhapur, Baroda and Jaipur have undertaken definite Child Welfare work, while trained midwives are employed in a number of others.

So far all the schemes have devoted their attention to combating the prejudices of the mothers in respect of new-born children. In a land of so many languages and superstitions progress will necessarily be slow and India has yet to decide whether she will work intensively and try to rear a few well developed children as far as adolescence or extensively attempt to bring a large number of infants through the first critical months, only to have them perish at a later stage from the many ills that childhood is heir to in a land of great poverty, under-nourishment, epidemics and famine. In Western lands the Child Welfare Movement has no more marked characteristic than its inability to stop expanding. Its ramifications know no bounds. Its inevitable corollaries are endless, and like the banyan tree it will no doubt in India also develop innumerable fresh roots, medical supervision, dental clinics, better housing, open air playgrounds, etc., etc. But these are not yet. Its preliminary task is to educate the mothers of India to the enormity of allowing two million babies to perish every year and to convince them of the equally important fact that a high death rate always spells also a high damage rate of sickly, under-developed, incompetent citizens.

INDIAN RED CROSS SOCIETY.

When the war first broke out, what is generally termed Red Cross work was undertaken in India and Mesopotamia by the St. John Ambulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the Joint War Committee of the Order of St. John of Jerusalem and the British Red Cross Society. The final report of that Committee shows that up to June 1920 its total receipts amounted to Rs. 1,77,85,716 of which some 17 lakhs had been contributed by the British Red Cross Society. It had spent about 67 lakhs in Mesopotamia, nine lakhs on the Afghan War and Waziristan Expedition; in Mesopotamia and India combined it had spent on Red Cross objects in all about 117 lakhs.

It closed its career in June 1920 under the following circumstances. In the summer of 1919, an invitation had been received to join the International League of Red Cross Societies, having for its object the extension of Red Cross work in the sphere of purely civil activity. Though there was then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world wide League of humanitarian societies. A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This Act handed over the balance of the Joint War Committee to the new Society, and authorised it not only to direct the utilization for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civil purposes. As contemplated in the Act of Constitution of the Society, its activities are completely decentralized, and are being carried on through twenty-two Provincial and State Branches under which there are numerous sub-branches.

The **objects** on which the funds of the Society may be spent are—

1. The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised.
2. The care of those suffering from Tuberculosis, having regard in the first place to soldiers and sailors, whether they have contracted the disease on active service or not.
3. Child welfare.
4. Work parties to provide the necessary garments, etc., for hospitals and health institutions in need of them.
5. Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society.
6. Home Service Ambulance Work.
7. Provision of comforts and assistance to members of His Majesty's Forces, whether on the active list or demobilised.

The Society has five grades of subscribing Members, namely, Honorary Vice-Presidents, Patrons, Vice-Patrons, Members and Associate Members. Their respective subscriptions are Rs. 10,000, Rs. 5,000, Rs. 1,000, Rs. 12 annually or a consolidated payment of Rs. 150 and anything between Re. 1 and Rs. 5 annually or consolidated payment of Rs. 50. In the end of 1927 there were 9,943 members of these various grades.

To stimulate interest for the aims and objects of the Society amongst the future generation of people, a Junior Red Cross movement has been instituted which embraces the Student population. The Punjab Provincial Branch has taken the lead in furthering this movement and has during the last two years enrolled no less than 29,956 members.

Constitution.—His Excellency the Viceroy is President of the Society. The Managing Body ordinarily consists of a Chairman to be nominated by the President and 25 members of the Society of whom 12 are the Vice-Presidents nominated by Provincial or State Branches;

8 elected by the Society at the Annual General Meeting from among the members of the Society and 5 nominated by the President.

The present Chairman of the Managing Body is the Hon'ble Sir Henry Moncrieff Smith, Kt., C.I.E., I.C.S., and the Organising Secretary Colonel Bhola Nauth, C.I.E., I.M.S. (Retd.).

Finances.—The operations of the Joint War Committee were brought to a close in June 1926 with a capital investment of the face value of Rs. 56,33,000 and Rs. 8,01,500-8-6 in floating and fixed deposit accounts. The Society has since invested further funds in various securities and its finances in the end of December 1927, stood at a capital investment of the face value of Rs. 67,53,000-0-0. The income derived from the capital of the Society, (which is 3¼ lakhs at present) after providing for certain liabilities of the Central Society, is distributable under the Act to the Provincial Branches in proportion to their contributions to the Central "Our Day" Fund. A sum of Rs. 2,70,000-0-0 was so distributed to the Provincial Branches under this arrangement during the year 1927.

St. JOHN AMBULANCE ASSOCIATION,

(Indian Council.)

The St. John Ambulance Association was founded in 1877, by the Order of the Hospital of St. John of Jerusalem in England, and has for its objects:—

(*a*) The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured;

(*b*) The instruction of persons in the elementary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room;

(*c*) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories, and other centres of industry and traffic;

(*d*) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps;

(*e*) And generally the promotion of instruction and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class, nationality, or denomination.

An Indian Council of the Association was constituted in 1910. It has since issued 1,45,572 certificates of proficiency in First Aid, Home Nursing, Home Hygiene and Sanitation and 6,610 tokens such as Vouchers, Medallions, Labels and Pendants for special proficiency in those subjects. The object of the Association is not to rival, but to aid, the medical man, and the subject matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals between his visits.

In 1927 the Indian Council spent Rs. 52,160-0-0 in furthering its objects and closed the year with Govt. securities of the face value of Rs. 70,000. The Association has five grades of members, namely, Patrons, Honorary Councillors, Life Members, Annual Members and Annual Associates. Their respective subscriptions are Rs. 1,000, Rs. 500, Rs. 100, Rs. 5, and Rs. 2.

Their Excellencies Lord and Lady Irwin and Field-Marshal Sir William Birdwood as President, Lady President and Chairman, respectively, with 17 members form the Indian Council. The general business of the Indian Council is conducted by an Executive Committee of which the Hon'ble Sir Henry Moncrieff Smith, Kt., C.I.E., I.C.S., is the Chairman, and Colonel Bhola Nauth, C.I.E., I.M.S. (Retd.), the General Secretary.

INSANITY AND MENTAL HOSPITALS IN INDIA.

The accommodation for the treatment in British India of persons who suffer from mental disorders is still very inadequate. In the Indian States, the condition of affairs is even worse, for, with the sole exception of Mysore State which has a small and highly archaic "mental hospital" at Bangalore, there are no mental hospitals in existence so that persons suffering from all forms of mental disease are confined in the Jails where, of course, no provision exists for any kind of treatment. According to the last Census (1921) out of a total population of 318,942,480 (India and Burma) there are 88,305 persons insane, making a proportion of insane to sane of 3 per every 10,000. In the United Kingdom the proportion of insane to sane is roughly 40 per 10,000, while in New Zealand it is as much as 45 per 10,000. In reviewing these figures it must be borne in mind that those of the United Kingdom and New Zealand include the "feeble-minded" an item that is not included in the figures for British India.

INDIA.

Provinces, States and Agencies.	General population.			Insane population.		
	Male.	Female.	Total.	Male.	Female.	Total.
Provinces under British Administration.	139,243,123	131,707,310	270,950,433	44,673	28,234	72,907
States and Agencies ..	24,752,431	23,239,616	47,992,047	9,478	5,920	15,398
Total for all India ..	163,995,554	154,946,926	318,942,480	54,151	34,154	88,305

For the care of the 88,305 insanes of India and Burma there exists accommodation in mental hospitals for 6,750 hence only one person in ten out of the total insane population can obtain accommodation in institutions which exist especially for their care and treatment.

The following table gives the number of mental hospitals in each province during 1927, the total population of each institution and the number discharged cured and died :—

Province.	No. of Mental Hospitals.	Admitted and readmitted during the year	Total Population of Mental Hospitals.			Discharged cured.	Died.	Daily average.		Criminal Lunatics.
			Males.	Fe-males.	Total.			Strength.	Sick.	
Asam	1	66	410	95	505	21	47	438·47	59·35	246
Bihar and Orissa ..	2	364	1,535	398	1,933	206	53	1,604·49	74·68	614
United Provinces ..	3	779	1,561	412	1,973	174	106	1,274·83	155·03	425
Punjab	1	397	982	262	1,244	132	102	889·88	73·63	207
Central Provinces ..	1	87	389	95	484	33	19	410·96	20·37	135
Bombay	5	608	..	..	2,109	237	171	1,534·20	93·7	226
Madras	3	469	1,155	357	1,512	143	80	1,105·29	135·89	194
Burma	2	276	1,111	169	1,280	88	58	1,052·55	44·06	564
Total ..	18	3,046	..	..	11,040	..	636	8,305·67	656·71	2,601

It will be observed that there is now no mental hospital in Bengal. Insanes from this province are treated in one or other of the two mental hospitals at Ranchi. All Mental hospitals are under the direct control of the Provincial administrative medical officers except the European Mental Hospital at Ranchi which is controlled by a Board of Trustees presided over by the Commissioner of Chota-Nagpur. The so-called "Central" Mental Hospitals, that is to say, the Mental Hospital at Madras, North Yeravda (Bombay), Lahore (Punjab), Agra (United Provinces of Agra and Oudh) and Rangoon (Burma), as well as the two Mental Hospitals at Ranchi (one for Europeans and Americans and one for Asiatics and Africans) are administered by whole-time medical officers who are usually trained alienists. The Administration of the remaining Mental Hospitals in British India and Burma, lies with the Civil Surgeon of the locality in which they happen to be situated. It is probably true to state that only one Mental Hospital in the whole of India can claim any pretension to be up-to-date as regards organisation, staffing and equipment and that is the Mental Hospital for Europeans at Ranchi. All the others are for the most part over-crowded and under-staffed, thus rendering anything approaching treatment on modern lines out of the question. The only province in India which has so far displayed some appreciation of the importance of bringing the prevention and treatment of mental disorders into line with conditions in civilised countries is Madras. The local Government of this province has achieved a notable advance in its attitude towards mental disorders by providing, in the construction of the new General Hospital at Madras, accommodation for the treatment of early cases of mental diseases.

As regards the incidence of insanity among the various races of India as well as the incidence of insanity in relation to occupation, no reliable information is available in view of the comparative paucity of cases in proportion to the general population that come under observation. On the other hand the incidence by age is shown fairly well in the Census Report of 1921 which is as follows :—

INDIA

AGE.	Insane.		Distribution of the insane by age per 10,000 of each sex.	
	Male.	Female.	Male.	Female.
YEARS				
0– 5	651	484	121	142
5–10	2,905	1,882	539	553
10–15	4,098	2,733	761	803
15–20	4,366	3,076	810	904
20–25	5,518	3,379	1,024	993
25–30	6,861	3,582	1,273	1,053
30–35	7,231	3,849	1,342	1,131
35–40	5,651	2,949	1,049	867

50–55	3,132	2,492	581	733
55–60	1,465	1,036	272	305
60–65	1,683	1,471	....	....
65–70	602	439	....	....
70 and over	1,070	1,006	....	....
Unspecified	270	133	....	....
Total for all India	54,151	34,154	623	857

A further result of the widespread ignorance and apathy both official and non-official, towards psychiatry and its cognate interests, is the lack of any provision for the care and treatment of mentally defective children. In 1925, the Hon'ble Haroon Jaffer moved the Council of State to recommend to the Governor-General in Council that the Provincial Governments be asked to investigate the best means of dealing quickly and adequately with cases of mental defectives. A discussion followed which was remarkable only for the ignorance of the subject displayed by all who took part in it. The motion was eventually withdrawn.

Finally there is still a lamentable failure everywhere to appreciate the intimate association of crime with mental disorder and the extreme paucity of medical men throughout the whole of India with any real knowledge of mental diseases leave the decision of questions involving what the law terms "responsibility" in crime in the hands of medical men who are in no sort of sense "experts". In other words the current ideas both as regards the theory and practice of dealing with insanity and crime in India can only be described as archaic.

(See also "Insanity in India" by Colonel G. F. W. Ewens, I.M.S., and "Lunacy in India" by Colonel A. W. Overbeck-Wright, M.D., D.P.E., I.M.S., and Colonel H. P. Jago Shaw's book.)

It is probably true to state that only one Mental Hospital in the whole of India can claim any pretension to be up-to-date as regards organisation, staffing and equipment and that is the Mental Hospital for Europeans at Ranchi. All the others are for the most part over-crowded and under-staffed, thus rendering anything approaching treatment on modern lines out of the question. The only province in India which has so far displayed some appreciation of the importance of bringing the prevention and treatment of mental disorders into line with conditions in civilised countries is Madras. The local Government of this province has achieved a notable advance in its attitude towards mental disorders by providing, in the construction of the new General Hospital at Madras, accommodation for the treatment of early cases of mental diseases.

As regards the incidence of insanity among the various races of India as well as the incidence of insanity in relation to occupation, no reliable information is available in view of the comparative paucity of cases in proportion to the general population that come under observation. On the other hand the incidence by age is shown fairly well in the Census Report of 1921 which is as follows :—

INDIA

AGE.	Insane.		Distribution of the insane by age per 10,000 of each sex.	
	Male.	Female.	Male.	Female.
YEARS				
0– 5	651	484	121	142
5–10	2,905	1,882	539	553
10–15	4,098	2,733	761	803
15–20	4,366	3,076	810	904
20–25	5,518	3,379	1,024	993
25–30	6,861	3,582	1,273	1,053
30–35	7,231	3,849	1,342	1,131

65–70	602	439	....	....
70 and over	1,070	1,006	....	....
Unspecified	270	133	....	....
Total for all India	54,151	34,154	623	857

A further result of the widespread ignorance and apathy both official and non-official, towards psychiatry and its cognate interests, is the lack of any provision for the care and treatment of mentally defective children. In 1925, the Hon'ble Haroon Jaffer moved the Council of State to recommend to the Governor-General in Council that the Provincial Governments be asked to investigate the best means of dealing quickly and adequately with cases of mental defectives. A discussion followed which was remarkable only for the ignorance of the subject displayed by all who took part in it. The motion was eventually withdrawn.

Finally there is still a lamentable failure everywhere to appreciate the intimate association of crime with mental disorder and the extreme paucity of medical men throughout the whole of India with any real knowledge of mental diseases leave the decision of questions involving what the law terms "responsibility" in crime in the hands of medical men who are in no sort of sense "experts". In other words the current ideas both as regards the theory and practice of dealing with insanity and crime in India can only be described as archaic.

(See also "Insanity in India" by Colonel G. F. W. Ewens, I.M.S., and "Lunacy in India" by Colonel A. W. Overbeck-Wright, M.D., D.P.E., I.M.S., and Colonel H. P. Jago Shaw's book.)

National Association for Supplying Medical Aid by Women to the Women of India.

The National Association for Supplying Medical Aid by Women to the women of India was founded by the Countess of Dufferin in 1886, the object being to open women's hospitals and women's wards in existing hospitals; to train women doctors, nurses and midwives in India; and to bring these out when necessary from Europe. An endowment fund of about 6 lakhs was obtained by public subscription. In addition Branches were formed in each Province, each Branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The Central Fund gives grants-in-aid to several Provincial Branches; it gives scholarships to a number of women students at the Medical schools of Bombay, Calcutta, Madras and Delhi; it gives post-graduate scholarships for study in the United Kingdom. It has in the past brought from England a certain number of European medical women. It has assisted by grants-in-aid the building of a number of zenana hospitals in different parts of India. It has affiliated to it 13 Provincial Branches and a number cf Local Committees.

The Government of India subsidize the Countess of Dufferin's Fund to the extent of Rs. 3,70,000 per annum to maintain a Women's Medical Service for India—this service consists of 44 officers, with a training reserve of 8 doctors and a Junior service of 7 assistant surgeons. Medical women either British or Indian holding registrable British qualifications are eligible for the senior service.

The President is H. E. Lady Irwin, C.I., The Hon. Secretary is the Surgeon to H.E. the Viceroy, and the Secretary Dr. A. C. Scott, C.M.O., W.M.S.

THE WOMEN'S MEDICAL SERVICE FOR INDIA.

This Service is included in the National Association for supplying medical aid by women to the women of India, generally known as the Countess of Dufferin's Fund and is administered by the Executive Committee and Council of that Fund. The Government of India has so far allotted the sum of £25,000 per annum towards its maintenance. The present sanctioned cadre is forty-four first class medical women, with a training reserve of 8 women graduates in medicine of Indian Universities. Recruitment of the service is made (*a*) in India by a medical sub-committee of the Council which includes the Director-General, Indian Medical Service, the Honorary Secretary to the Council and the Chief Medical Officer, Women's Medical Service; (*b*) in England, by a sub-committee, including a medical man and two medical women conversant with conditions in India. These sub-committees perform the duties of a medical board examining candidates for physical fitness, and for return to duty after invaliding.

The Council determines what proportions of the members of the Service is to be recruited in England and in India respectively. In the original constitution of the Service, duly qualified medical women who are in the service of, or who have rendered approved service to, the Countess of Dufferin's Fund, are to have the first claim to appointment, and thereafter special consideration is to be paid to the claims of candidates who have qualified in local institutions and of those who are natives of India.

Qualifications.—The qualifications are that the candidate must be (*a*) a British subject resident in the United Kingdom or in a British Colony or in British India, or a person resident in any territory of any Native Prince or Chief under the suzerainty of His Majesty exercised through the Governor-General of India or through any Governor or other officer subordinate to the Governor-General of India. (*b*) Must be between the ages of twenty-four and thirty at entry. (*c*) She must be a first-class medical woman, *i.e.*, she must possess a medical qualification registrable in the United Kingdom under the Medical Act, or an Indian or Colonial qualification registrable in the United Kingdom under that Act: but this condition does not apply at the original constitution of the Service to medical women in charge of hospitals who, in the opinion of the Council, are of proved experience and ability. (*d*) The candidate must produce a certificate of health and character. But the Council reserves the power to promote to the service ladies not possessing the above qualifications, but who have shown marked capacity. Members of the Service are required to engage for duty anywhere in India. After one year of probation has been satisfactorily passed their appointments are confirmed. The services of officers may be lent to Local or Municipal bodies, or to special institutions, which may be responsible for whole or part of the pay.

Pay.—The rates of pay are as follows:—

1st	to	3rd	year	Rs.	450	per month.
4th	to	6th	,,	,,	500	,,
7th	to	9th	year	Rs.	550	per month.
10th	to	12th	,,	,,	600	,,
13th	to	15th	,,	,,	650	,,
16th	to	18th	,,	,,	700	,,
19th	to	21st	,,	,,	750	,,
22nd	to	24th	,,	,,	800	,,
25th	and	after	,,	,,	850	,,

also an overseas allowance of Rs. 100 per month to those below 12 years' service and Rs. 150 per month to those of 12 years' service and over. Every officer of the Service shall pass an examination in such vernacular as the Executive Committee shall appoint within the first three years of her service, and shall receive no increment after that period until such examination has been passed. In addition

furnished quarters are provided free of rent or a house rent allowance to be determined by the Provincial Committee may be granted in lieu of it.

Officers of the Service are permitted to engage in private practice provided it does not interfere with their official duties, and the Provincial Committee has the power to determine whether such duties are thus interfered with. Except in very special cases retirement is compulsory at the age of fifty-five. An officer recruited in England, whose appointment is not confirmed, or who is dismissed, is granted an allowance sufficient to pay her passage to England.

Leave Rules.—(*a*) Casual Leave, which is occasional leave on full pay for a few days, and is not supposed to interrupt duty. (*b*) Leave on average pay is granted up to 2-11 of an officer's period on duty, according to Fundamental Rules. More than eight months' leave on average pay is not granted at one time. (*c*) Study leave may also be granted up to twelve months during the whole service. An allowance of 12 sh. per day is granted in addition to ½ average pay during study leave. (*d*) Extraordinary leave at any time at the discretion of the Executive Committee. (*e*) Leave not due may be granted subject to the following conditions:—(*i*) on medical certificate, without limit of amount; and (*ii*) otherwise than on medical certificate, for not more than three months at any one time and six months in all, reckoned in terms of leave on average pay. (*f*) The maximum period of continuous absence from duty on leave granted otherwise than on medical certificate is 18 months. (*g*) When an officer returns from leave which was not due and which was debited against her leave account, no leave will become due to her until the expiration of a fresh period spent on duty, sufficient to earn a credit of leave equal to the period of leave which she took before it was due. There are no allowances during extraordinary leave. A doctor appointed in England receives a sum of £100 to cover her passage and incidental expenses. There are also allowances to cover the cost of journeys by rail and road.

There is also a Provident Fund, each member contributing monthly thereto ten per cent. of her salary, the Association contributing an equal amount, and each subscriber's account being granted interest on the amount standing to credit at the rate of 4 per cent. per annum, "or at such rate as the Council can invest without risk to the funds of the Association."

An officer loses the contributions made to her account by the Association with the interest thereon if she resign (except on account of ill-health) before completing five years' service or in the event of dismissal. On retirement after approved service the sum which has accumulated to the credit of the subscriber is handed over to her.

Free Passages.—Officers of the Women's Medical Service are granted free return passages corresponding to those granted under the Lee Concessions to officers of all-India services. The maximum number of return passages granted during an officer's entire term of service must not exceed four, the first falling due after 4 years service.

Victoria Memorial Scholarships.

The Victoria Memorial Scholarships Fund was organised by Lady Curzon in 1903, in order to secure a certain amount of improvement in the practising dais of India. A sum of about 6½ lakhs was obtained by public subscription, and centres were organised in each Province to carry out the objects of the Fund. Over 2,000 midwives have been trained in addition to large numbers who have been partially trained. Of late years the Fund has done much to pave the way for the registration and supervision of indigenous dais. It has also done much propaganda work.

LADY CHELMSFORD ALL-INDIA LEAGUE FOR MATERNITY AND CHILD WELFARE.

By 1920 it had come to be realised that the Dufferin organization was not wide enough in that it did not include what may be called the field of preventive medicine. Lady Chelmsford decided to face this problem. Accordingly, with the aid of a public subscription she founded a separate All-India League for maternity and child-welfare, called after her name, and registered it as a separate organization under Act XXI of 1860. The objects of the Association, as described in the Memorandum of Association, are "the promotion of maternity and child welfare generally in India." It is also laid down that the funds of the League may be applied to the following, among other purposes:—

(1) The training of Health Visitors and Maternity Supervisors and the rendering of financial assistance in the employment of trained personel where necessary.

(2) Propaganda in connection with the objects of the League.

(3) The formation and establishment of Branches of the League and the affiliation with the League of other bodies having similar objects, without unduly interfering with the organization and administration of affiliated institutions or with their powers of raising money.

(4) The doing of all such things as are incidental or conducive to the attainment of the above kindred objects.

Branches of the League have been formed in Rajputana, Madras, the United Provinces, and the Punjab.

The original corpus of the League fund amounted to Rs. 8,18,657. To prevent overlapping with other activities, financial aid is not given to branches of the League in Governor's provinces, except for the purposes of Health Schools. In areas, other than Governor's provinces, financial help is given to child welfare activities generally. The bulk of the income of the League is thus devoted to Health Schools and propaganda, which latter includes National Baby Week.

The Lady Reading Health School which was formerly known as the Delhi Health School is the chief activity of the Lady Chelmsford League by whom it is entirely financed.

The Health School was started in 1919, and has trained over 100 students, who are now engaged in health work in all parts of India.

Amalgamation of Administration.—At a general meeting held in Simla in July 1923 it was decided that the administration of the Funds for the physical welfare of Indian women under the Presidency of the Viceroy's wife should be administered by a single committee and with identical rules. These funds are the Countess of Dufferin's Fund, Women's Medical Service for India, Victoria Memorial Scholarship Fund and Lady Chelmsford All-India Maternity League. The President of the Amalgamated Committee is H. E. the Lady Irwin and the Hon. and Joint Secretaries are respectively, the Surgeon to the Viceroy and Dr. A. C. Scott W.M.S. The Hon. Treasurer is Sir Frederic Gauntlett.

Lady Hardinge Medical College and Hospital.—The Lady Hardinge Medical College was opened by Lord Hardinge on the 17th February 1916. It is a residential Medical College staffed entirely by women, and was founded to commemorate the visit to Delhi, in 1911, of the Queen Empress. Lady Hardinge took the initiative in raising funds by public subscription to meet the cost of buildings and equipment. Thirty lakhs of rupees, in all, have been given for these purposes, mostly by the Ruling Princes and Chiefs of India. After Lady Hardinge's death in 1914, it was suggested by Her Imperial Majesty Queen Mary that the institution should serve as a memorial to its founder, and be called by her name.

The Governing Body includes the Director-General, Indian Medical Service, the Chief Commissioner of Delhi, the Chief Engineer, Delhi Province, the Educational Commissioner with the Government of India, the Chief Medical Officer, Women's Medical Service, a representative elected by the All-India Association of Medical Women, the Surgeon to H.E. the Viceroy, an Indian member of the Council of State 2 Indian members of the Legislative Assembly, a private Indian citizen of Delhi, a private lady resident of Delhi, the Civil Surgeon of New Delhi and the Agent, Imperial Bank of India, Delhi. The Honorary Secretary, who is also a member of the Governing Body, is the Deputy Director General, Indian Medical Service. The Deputy Accountant-General, Central Revenues, acts as Honorary Treasurer.

The College and Hospital, together with separate hostels for 100 Medical students and 70 nurses and residences for the medical and teaching staff, occupy a site of 55 acres in New Delhi (Raisina) within easy reach of the old city. The grounds are enclosed and adequate provision is made for the seclusion of both students and patients from outside observation. Strict observance of purdah cannot, however, be guaranteed in the case of students. As the hospital patients are all women or children, it is for example, necessary that students should, in their final year, attend a brief course of instruction on men patients at the Civil Hospital, Delhi. The College buildings contain a Library, Museum, Lecture Rooms, Laboratories and offices. Hostels are provided for Hindu, Moslem, Sikh and Christian students. The hospital is a fine modern building with accommodation for 200 in-patients and a commodious out-patients' department. The College and Hospital are supported by a grant of Rs. 3,11,000 from the Government of India, supplemented by grants from Provincial Governments and Indian States. Students are prepared for the Intermediate Science Examination, and the M.B., B.S. degree of the Punjab University, with which the College is affiliated.

SENIOR STAFF.

Principal and Professor of Midwifery and Gynæcology—Miss G. J. Campbell, M.D., Ch. B. (Glas.), Women's Medical Service.

Vice-Principal and Professor of Surgery—Miss E. Pfeil, M.B., B.S. (Lond.), W.M.S.

Professor of Medicine—Miss N. E. Trouton, M.B., B.S. (Lond.), M.R.C.S., L.R.C.P.. D.T.M. Calcutta.

Professor of Ophthalmology—Miss R. Roulston, M.B., Ch. B. (Glas.), D.O. (Oxon.), W.M.S.

Professor of Pathology—Miss L. S. Chatterji, M.B., Ch. B. (Aberdeen), D.P.H., Cambridge, W.M.S.

Professor of Anatomy—Miss K. J. McDermott, M.B., B.S. (Punjab), W.M.S.

Professor of Physiology—Miss A. M, Pichamuthu, M.B.,B.S. (Madras), M.R.C.S. L.R.C.P., (London).

Professor of Radiology—Miss E. Pilley M.B. (London), W.M.S.

Lecturer in Physics and Mathematics, and Superintendent of the Science Department—Miss J. H. Ross, M.A., B.Sc. (Glas.)

Lecturer in Chemistry—Miss Sosheila Ram, M.A. (Cantab.)

Lecturer in Biology—Miss C. C. Burt, B.Sc. (Edin.)

Lecturer in English—Mrs. Coatman, M.A., Manchester.

Bursar and Warden—Miss M. W. Jesson, M.A. (Cantab.)

Attached to the Hospital there are: (1) a Training School for Nurses, and (2) a Training School for Dispensers. All particulars as to admission and training may be obtained in the case of (1) from the Nursing Superintendents, Lady Hardinge Medical College Hospital, Delhi, and in the case of (2) from the Lecturer on Pharmacy, at the same address.

NURSING.

Whilst India cannot show the complete chain of efficiently-nursed hospitals which exists in England, there has been a great development of skilled nursing of recent years. This activity is principally centred in the Bengal, Madras, and Bombay Presidencies, where the chief hospitals in the Presidency towns are well nursed, and where large private staffs are maintained, available to the general public on payment of a prescribed scale of fees. These hospitals also act as training institutions, and turn out a yearly supply of fully trained nurses, both to meet their own demands and those of outside institutions

and private agencies. In this way the supply of trained nurses, English, Anglo-Indian and Indian, is being steadily increased. In Bombay the organisation has gone a step farther, through the establishment of the Bombay Presidency Nursing Association, c/o St. George's Hospital, Bombay. This is composed of representatives of the various Nursing Associations in charge of individual hospitals, and works under the Government. The principle on which the relations of this Association with the Local Associations is governed is that there shall be central examination and control combined with complete individual autonomy in administration.

State Registration of Nurses for all India is much required. A meeting was held in Bombay in 1923 when Nurses from the Presidency met to discuss the question. It is desired that India should have its own State Register as in the United Kingdom, South Africa, New Zealand, Australia, Canada and Burma, and that the curricula and examinations should be brought into line with these countries. Government has proposed to establish a Provincial Register preparatory to an All-India Register.

Nursing Bodies.—The Secretary of the Calcutta Hospital Nurses' Institution is Mr. A. R. Nicholson, Allahabad Bank Buildings, Calcutta. The names and addresses of the other Nursing bodies in Calcutta are Lady Minto's Indian Nursing Association (Bengal Branch), 4, Hungerford Street, Lady Rogers' Hostel for Indian Nurses, 144, Russa Road. South; Nurses' Academy, 6, Suburban Hospital Road; and Nurses' Bureau, 37, McLeod Street. In **Madras** there is the General Hospital, with a staff of 62 nurses, the Government Maternity Hospital, the Caste and Gosha Hospital at Kilpauk, the Royapetta Hospital and the Ophthalmic Hospital, also the Lady Ampthill Nurses' Institute and the South Indian Nursing Association (now amalgamated) President, Her Excellency Lady Goschen. The Association has under its management—*The Lady Ampthill Nurses' Institute*, Western Castle, Mount Road, Madras. Fully trained and experienced nurses for all cases of illness both among Europeans and Indians, always available. *The Lady Willingaon Nursing Home*, Western Castle, Mount Road, Madras, and *Nilgiri Nursing and Convalescent Home*, Ootacamund, for Medical, Surgical and Maternity cases. The Nilgiri Nursing Home affords admirable facilities for convalescents.

Bombay Presidency.—The Bombay Presidency was amongst the first in India to realise the value of nursing in connection with hospital work. The first steps were taken on the initiative of Mr. L. R. W. Forrest at St. George's Hospital, Bombay, where a regular nursing cadre for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar movement at the J. J. and Allied Hospitals and afterwards spread to other hospitals in the Presidency. Ultimately, the Government laid down a definite principle with regard to the financial aid which they would give to such institutions, agreeing to contribute a sum equal to that raised from private sources. Afterwards, as the work grew, it was decided by Government that each nursing association attached to a hospital should have a definite constitution and consequently these bodies have all been registered as Associations under Act 21 of 1860. By degrees substantial endowments have been built up, although the Associations are still largely dependent upon annual subscriptions towards the maintenance of their work. The Associations are as follows :—

St. George's Hospital Nursing Association. Hon. Secretary: F. B. Thornely, Esq., Bombay.

Jamsetji Jijibhoy Hospital Nursing Association, Bombay. Hon. Secretary: Dr. M. V. Mehta, F.R.C.P.

Goculdas Tejpal Hospital Nursing Association. Secretary: G. A. Thomas, Esq., I.C.S., Old Custom House, Bombay.

Cama Hospital Nursing Association, Bombay. Hon. Secretary: H. C. B. Mitchell, Esq.

Sassoon Hospital Nursing Association. Poona. Hon. Secretary: A. C. Wild, Esq., I.C.S.

Karachi Civil Hospital Nursing Association, Karachi. Hon. Secretary: H. H. Hood, Esq.

Nasik Civil Hospital Nursing Association, Hon. Secretary: Civil Surgeon, Nasik.

Ahmedabad and Lely Memorial Nursing Association, Ahmedabad. Hon. Secretary: Civil Surgeon, Ahmedabad.

Bijapur Civil Hospital Nursing Association. Hon. Secretary: Civil Surgeon, Bijapur.

Dharwar Civil Hospital Nursing Association. Hon. Secretary: Civil Surgeon, Dharwar.

Prince of Wales Nursing Association, Aden. Hon. Secretary: E. Somerville Murray, Esq., Aden.

Kanara Nursing Association, Karwar. Hon. Secretary: D. S. Dhave, Esq., Karwar.

Victory Nursing Association, Sholapur. Hon. Secretary: Civil Surgeon, Sholapur.

Byramjee Jeejibhoy Hospital Nursing Association, Matheran. Hon. Secretary: Lt.-Col. B. B. Paymaster, I.M.S.

Ahmednagar Civil Hospital Nursing Association, Ahmednagar. Hon. Secretary: Civil Surgeon.

Panch Mahals Nursing Association, Godhra. Honorary Secretary: Civil Surgeon.

After further experience it was felt that it is undesirable to have a considerable number of detached and independent nursing associations, training and certifying nurses, without any common standard of entrance examination, or certification. It was therefore decided to establish the Bombay Presidency Nursing Association which came into existence in the year 1910.

The principle on which the Bombay Presidency Nursing Association works is a central system of examination, certification, registration and control. It is now the only nursing, examining, registering and certifying body in the Bombay Presidency. At the same time, the local associations retain entire charge of their local funds excepting Provident funds which have been transferred to the Central fund, and also entire control of the nurses when they are in their

employment. Proposals are now before Government for absorbing the personnel of the local associations into a Presidency Nursing Association. This will not however affect the individuality of local associations which will continue to control their own funds and to exercise control over local establishments, subject in the latter case to such limitations as a revision of the nature in question will require.

The Association commenced its operations on the 1st April 1911. The institutions recognized under the by-laws for the training of nurses at present are—St. George's Hospital, J.J. Hospital, Cama and Albless Hospitals, Bai Motlabai Hospital, Bombay; Huttesing and Premabai Civil Hospital, Ahmedabad; Civil Hospital, Belgaum; Morarbhai Vrijbhukhandas Hospital, Surat; Karachi Civil Hospital, Karachi; Sassoon Hospital, Poona; State General Hospital, Baroda; King Edward Memorial Hospital, Sholapur; V. J. Hospital, Ahmedabad; Civil Hospital, Nasik; Dufferin Hospital, Karachi; King Edward Memorial Hospital, Parel, Bombay; Zenana Mission Hospital, Broach; Bai Yamunabai L. Nair Hospital, Lamington Road, Bombay; Bomanji Dinshaw Petit Parsi General Hospital, Cumbala Hill, Bombay; West Hospital, Rajkot; Civil Hospital, Jalgaon; and the following for the training of Midwives; M. V. Hospital, Civil Hospital, Surat; Victoria Jubilee and King Edward VII Hospital, Ahmedabad; Bai Motleebai Hospital, (J. J. Hospital) Cama and Albless Hospitals, Bombay; Dufferin Hospital, Karachi; Sassoon Hospital, St. Margaret's Hospital, King Edward Memorial Hospital, Poona; Civil Hospital, Belgaum; Dufferin Hospital, Sholapur; Wadia Maternity Hospitals, Parel, Bombay; Civil Hospital, Ahmedabad; Civil Hospital, Nasik; King Edward Memorial Hospital, Sholapur: Achartlal Girdharlal Maternity Home. Ahmedabad; Zenana Mission Hospital, Broach,

Provision for retiring allowances is made for all members on the basis of a Provident Fund, and a Nursing Reserve has been established for employment in emergencies such as war, pestilence or public danger or calamity.

Address:—The Secretary, Bombay Presidency Nursing Association, Secretariat, Bombay.

Lady Minto's Indian Nursing Association.—In 1906 this Association was inaugurated, replacing the Punjab and Up-country Nursing Association for Europeans in India, which Society, established in 1892, had accomplished much useful work in this country. Owing, however, to lack of funds it was found impossible to continue its administration and to carry out the expansion of the work so urgently called for. The name of the helpers identified with the premier Association to whom the public must ever be indebted are the Hon. Lady Lyttleton, Lady Helen Munro Ferguson and Mrs. Cottrell, while Mrs. Shepherd, by her indefatigable efforts, is truly entitled to be regarded as the pioneer of a trained nursing system throughout the greater part of India. The late Lady Curzon worked energetically to provide an enlarged Nursing organisation, but mainly owing to financial reasons, she was unable before she left India to bring the scheme to fruition. The Home Committee of the existing Association, recognising the need for expansion, consented to take over the present Association and approached Lady Minto before she left England in 1905 for co-operation towards this project, and after much consideration and discussion with the Government of India, Lieut.-Governors and Commissioners of Provinces, the present Association was established. An appeal by Lady Minto, addressed to the public both in England and India, was responded to most generously, and sufficient funds were collected to form an endowment fund, which has in spite of fluctuations increased a little with time. The assistance of a Government grant is much valued, as it enables Homes for the Sisters to be kept up in six Provinces in India and in Burma. At the request of the Home Committee the enlarged Association was renamed the "Lady Minto's Indian Nursing Association."

The duties of the Home Committee are, as before, largely concerned in dispatching—as required—suitably trained and carefully selected Nurses for service on the staff of the Association in India. Thus, Europeans who are members of this Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient. The boon of obtaining good nursing at moderate terms is much appreciated, the rates of subscriptions being really an insurance against illness.

Her Majesty the Queen is a Patron of the Association. Her Excellency The Lady Irwin is President of the Central Committee in India.

Hon. Secretary: Lt.-Colonel Hay Thorburn, I.M.S.

Hon Treasurer: W. J. Litster, Esq., O.B.E., C.I.E.

Chief Lady Superintendent: Miss G. Beckett. Address—Central Committee, L.M.I. N.A., Viceregal Lodge, Simla, or Delhi.

Hon. Secretary, Home Committee: Lt.-Col. Sir Warren R. Crooke-Lawless, C.B., C.I.E., O.B.E., LL.D., House Governor, Osborne, Isle of Wight.

Secretary, Home Committee: Miss M. E. Ray, R.R.C., 54, Ashburnham Mansions, Chelsea.

Nurses' Organizations.—The Association of Nursing Superintendents of India is now amalgamated with the Trained Nurses' Association of India, and has the one set of officers. The Trained Nurses' Association of India and the Association of Nursing Superintendents of India are not Associations to employ or to supply nurses, but are organizations with a membership wholly of nurses with the avowed objects of improving and unifying nursing education, promoting *esprit de corps* among nurses, and upholding the dignity and honour of the nursing profession. The Associations have a membership of 472, including nurses trained in ten or more different countries, Europeans, Americans, New Zealanders, Australians and Indians. The Association of Superintendents was started in 1905 as the Association of Nursing Superintendents of the United Provinces and the Punjab, but by the next year its membership had spread

over the country to such an extent that the name was changed to include the whole of India. The Trained Nurses' Association was started in 1908, and a monthly Journal of Nursing began to be published by the two Associations in February, 1910. The Associations are affiliated with the international Council of Nurses.

President: Mrs. G. D. Franklin, 33, Rajpur Road, Delhi.

Hon. Secretary and Treasurer: Miss Gadsden, General Hospital, Madras.

THE WOMAN SUFFRAGE MOVEMENT.

Within the abnormally short period of nine years the Woman Suffrage movement has risen in India, swept through the country sympathetically and achieved the political enfranchisement of women in six of its most progressive Provinces and in four Indian States.

Three fundamental causes have led to this remarkable success: first, the deep veneration that is given by the Hindu and Muhammadan religions to the feminine aspect of life equally with the masculine as shown by the importance of goddesses, by the necessity for the presence of the wife at all ceremonies performed by a Brahman, by the idea of the sacred mystery of womanhood implied by the purdah, and by the general veneration of motherhood. Secondly, the time was psychological, for a new era was beginning for the Indian people by the introduction of a Scheme of Reforms in Indian government which was planned to give a basis of representative government on a much extended scale. The door was being opened to complete Self-government but only men were being invited to enter through it, although women compose half the people of the country and it had been by the joint efforts of men and women that the agitation for reform in the government had been made. The men and women of India were too awakened and too just to allow this injustice to remain unredressed. Thirdly, the long and strenuous agitation for the vote by women in Britain and America and their recent victories had brought vividly to the consciousness of all educated Indian men and women the whole question of the inclusion of women in public life, and it was also a national and international necessity that Indian women should be given as high a status as women in other parts of the Empire.

Though the **Municipal franchise** had been granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so limited in numbers that it did not make a large impact on women's consciousness and indeed no protest was made when it was suddenly withdrawn from Madras women some years later. Over 1,700 women are qualified to vote for the Bombay Corporation and a fair percentage of these have polled at each election, and similarly in other Municipalities in that Presidency women have exercised their vote responsibly and intelligently. Since 1922 twenty-two women have become Municipal Councillors and members of Local Government Boards, four of whom were *elected* by Bombay City voters, the others having been nominated.

It was owing to the rise of the political agitation for Home Rule between 1914 and 1917 that women began to wake up to their position of exclusion by British law from any share in representative government. The internment of one of their own sex, Dr. Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The moment for the ripe public expression of their feelings came when the Secretary of State for India came to India to investigate and study Indian affairs at first hand in 1917.

During the Hon. E. S. Montagu's visit only one Women's Deputation waited on him but it was representative of womanhood in all parts of India, and it brought to his notice the various reforms which women were specially desirous of recommending the Government to carry out.

The first claim for women suffrage for Indian women was made in the address presented to Mr. Montagu at this historic **All-India Women's Deputation** which waited upon him in Madras on the 18th December 1917. The section referring to enfranchisement merits full quotation:

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (I. 3) that 'the Members of the Council should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the abovementioned Memorandum that 'a full measure of Local Self-Government should be immediately granted,' we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire. The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which since its inception women have voted and been delegates and speakers, and which this year finds its climax in the election of a woman as its President. Thus the voice of India approves of its women being considered responsible and acknowledged citizens; and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1919 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this proved a more difficult matter. It was a disappointment first that though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the

Scheme of Reforms, drawn up by him and Lord Chelmsford as the outcome of his visit to India, was published no mention of women was made, though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of the inclusion of women in the new franchise.

After the introduction of the **Government of India Bill** into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs. Annie Besant, Mrs. Sarojini Naidu and Mrs. and Miss Herabai Tata were the women who were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should decide by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election as Legislative Councillors.

Travancore, a very progressive Indian State, was the first to grant the Legislative vote to women at the close of 1920, and it was promptly followed by the Indian State of Jhalawar. In the first session of the Legislative Councils in 1921 it is gratifying to record that a motion was tabled by Dewan Bahadur Krishnan Nair of Malabar that he would bring forward a Resolution in the **Madras** Legislative Council to remove the disqualification of sex existing in regard to the Legislative Council franchise. During the month that must legally intervene between the tabling of a Woman Suffrage motion and its introduction for Debate the Madras women under the leadership of the Women's Indian Association carried on all forms of public propaganda and canvassed the important members of the Council. The Debate took place on April 1st and after a short discussion, in which it was evident that opposition came only from the Muhammadan members, the debate itself became only an accumulation of appreciation of womanhood and an expression of faith in its future. When the division was taken, it resulted in the resolution being carried by a majority of 34. Madras has thus the honour of being the first Province in British India to enfranchise its women, and it has done ungrudgingly and unhesitatingly in the broad spirit of the equality of the sexes, as it grants the vote to women on the same terms as it has been granted to men.

Mr. Trivedi brought forward a Woman Suffrage Resolution in the **Bombay** Legislative Council during the same session, but some irregularity in its wording caused it to be pronounced out of order. In June that subject was tabled again and championed by Rao Saheb Harilal Desaibhai Desai of Ahmedabad, Deputy President of the Council. As in Madras, the intervening month was filled with suffrage activity by the women of the Presidency and was remarkable for a large joint meeting of Bombay city women at which 19 Women's Societies took part, and for a suffrage meeting of Marathi and Gujerati women in Poona when over 800 women showed the greatest enthusiasm for the movement.

The **Bombay** Council Debate on Woman Suffrage took three days and the subject was very fully discussed by over 40 members. The result was satisfactory to the suffragists, the voting being 52 in favour, 25 against and 12 neutral. Thus Madras and Bombay Presidencies gave the lead to the other Provinces. In September, 1922, Mr. S. M. Bose, in the **Bengal** Council, moved a Woman Suffrage Resolution, which was debated for three days but finally defeated by 56 to 37 votes, a *bloc* of 40 Muhammadan members voting solidly against it. In September 1925 the Bengal Council passed the Suffrage Resolution by a vote of 54 to 38.

Mr. Devaki Prasad Sinha's similar Resolution in the **Behar and Orissa** Legislative Council was defeated by only a 10 votes' majority.

These Debates proved so educational to their respective Provinces that the Bengal and Behar Provinces have since granted qualified women the Municipal vote.

In February, 1923, a world suffrage record was made by the *unanimous* vote of the **United Provinces** Legislative Council in favour of Woman Suffrage.

In 1926 the **Punjab** granted woman suffrage without a division, and in 1926 the Central Provinces, thus there now remain in India only Behar where women are still unenfranchised.

The new Reform Bill for **Burma** has included the grant of woman suffrage to the qualified Burmese women, and further made provision for their election as Councillors if the Council passes a Resolution desiring their admission and if that Resolution is approved of by the Governor.

In April, 1922, the **Mysore** Legislative Council unanimously passed the Woman Suffrage Resolution. The vote for the Representative Assembly of Mysore was granted to women in October, 1922. The vote for Mysore Legislative Franchise was granted to the Mysore women by H. H. The Maharaja and His Privy Council in June 1923. In October, 1924, **Assam** Provincial Council granted Woman Suffrage for its Province by 26 to 8. It also has been the first Province to pass a Resolution in favour of allowing women to enter the Council as members.

There is little doubt that it will be only a few years at most before all the provinces of India will have granted woman suffrage, and the right to vote will advance the interests of women immensely along the lines of education, health, housing, morality and social customs.

The Indian Native States of **Travancore, Cochin and Rajkot** are the only places in India where the sex disqualification has been completely removed from the statute book. These have allowed women the right to stand for election for the Legislative Council as well as the right to vote for it, and two women have been elected to the newly formed Representative Council of Rajkot. The year 1925 has been noteworthy for the appointment of the first woman Minister to Government. Mrs. Poonem Lukhose became a member of the Travancore Legislative Council on taking the position of State Darbar Physician. She is Minister for Health to the State. Cochin State has nominated Mr. Madhavi Amma as a member of its first Legislative Council.

In British India by the terms of the Reform Bill the Councils had no power to alter the disqualification of sex which remains against the right to stand as candidates for election to the Councils. This could only be changed by the vote of the British Parliament; and the gainine of this right remained as a further objective of the women suffragists. Many large, influential meetings were held claiming the right of women to entry of the Legislatures. A deputation of women about this subject waited on the Madras Governor and their claims were supported by him and by his Government. The Imperial Legislative Assembly and the Council of State had been accorded the power to grant women the franchise for their assemblies also by resolution, but only for those provinces which had already granted women the Legislative franchise. The Legislative Assembly has passed by a large majority a Resolution granting the Assembly franchise to the women of such Provinces. Accordingly in November 1923, women in India voted for the first time for the elections of both Provincial Legislative Councillors and members of the Legislative Assembly. The number of women who voted in the large cities was surprisingly large in Bombay and Madras Presidencies and comprised women of all castes and communities.

In April, 1926, as a result of a favourable recommendation of the Muddiman Committee on Franchise Reforms, the Rule was changed in the Reform Bill which disqualified women from entering the Legislatures. Power was granted to the Councils and the Assembly to pass Resolutions allowing qualified women to be elected or nominated as members of these bodies. Again Madras Council, on the 17th July, was the first to pass a Resolution admitting women to its membership. Bombay and the Punjab have followed its lead in August and October respectively. This has enabled women to become members of the new Councils which will function for the next three years. But the permission came too late for women to stand for election with any great chance of success, so the Women's Indian Association is asking that women be nominated by Government for the new Councils in those Provinces which have voted to admit them, and that women also be nominated to the Assembly and the Council of State. Thus this year marks another milestone passed on the road to the complete political emancipation of Indian womanhood.

In 1926 the Central Provinces, the Punjab and Bengal, all granted the Franchise to women, so that at the end of 1927 the only unenfranchised Province is Behar and Orissa. The year 1927 was notable for the nomination of the first woman member to a Legislative Council in British India the recipient of the honour being Dr. Muthulakshmi Ammal, and she was further honoured by being elected unanimously by her colleagues in the Madras Legislative Council, to the Office of Deputy-President of the Council.

The number of women enfranchised by the grant of the vote throughout India will not be more than a million under the present qualifications. Property and not literacy is the basis of the franchise, though the grant of the vote to every graduate of seven years' standing ensures that the best educated women of the country as well as those who have to shoulder the largest property responsibilities will be those who rightly will be the legislating influence on behalf of womanhood. As regards the custom of purdah prevailing in parts of India special provisions have been made in Municipal voting for purdah recording stations for purdah women in which a woman is returning officer and this has been found quite satisfactory and will be adopted also where desired in connection with Legislative Council elections.

Though the Women's Indian Association is the only defined Suffrage Society almost all other women's organisations have combined in special efforts for the gaining of municipal and legislative rights and the following ladies have identified themselves specially with the movement: Lady D. Tata, Lady A. Bose, Lady T. Sadasivaier, the Begum of Cambay, Mrs. Sarojini Naidu, Mrs. Jaiji Jehangir Petit, Mrs. Tata, Mrs. Wadia, Mrs. Jinarajadasa, Mrs. A. Besant, Mrs. M. E. Cousins, Mrs. Srirangamma Mrs. Chandrasekhara Iyer, Miss S. Sorabji, Mrs. Khedkar, Dr. Mistry, Dr. Muthulakshmi Ammal, Mrs. Palmer, Mrs. Saraladevi Choudhuri, Mrs. Kumudini Basu, Mrs. K. N. Roy Lady Shafi, Mrs. Hassan Imam, Miss S. B. Das, Mrs. Rustomji Faridoonji, Mrs. B. Rama Rao, Mrs. Deep Narain Singh, Mrs. Raschid, Mrs. van Gildemeester, etc.

Scheme of Reforms, drawn up by him and Lord Chelmsford as the outcome of his visit to India, was published no mention of women was made, though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of the inclusion of women in the new franchise.

After the introduction of the **Government of India Bill** into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs. Annie Besant, Mrs. Sarojini Naidu and Mrs. and Miss Herabai Tata were the women who were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should decide by a resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women were ineligible for election as Legislative Councillors.

Travancore, a very progressive Indian State, was the first to grant the Legislative vote to women at the close of 1920, and it was promptly followed by the Indian State of Jhalawar. In the first session of the Legislative Councils in 1921 it is gratifying to record that a motion was tabled by Dewan Bahadur Krishnan Nair of Malabar that he would bring forward a Resolution in the **Madras** Legislative Council to remove the disqualification of sex existing in regard to the Legislative Council franchise. During the month that must legally intervene between the tabling of a Woman Suffrage motion and its introduction for Debate the Madras women under the leadership of the Women's Indian Association carried on all forms of public propaganda and canvassed the important members of the Council. The Debate took place on April 1st and after a short discussion, in which it was evident that opposition came only from the Muhammadan members, the debate itself became only an accumulation of appreciation of womanhood and an expression of faith in its future. Roy Lady Shafi, Mrs. Hassan Imam, Miss S. B. Das, Mrs. Rustomji Faridoonji, Mrs. B. Rama Rao, Mrs. Deep Narain Singh, Mrs. Raschid, Mrs. van Gildemeester, etc.

Warrant of Precedence.

A new Warrant of Precedence for India in supersession of the notification published on February 10, 1899, which has been approved by His Majesty the King Emperor of India, was published in 1922. Henceforth the following table will be observed with respect to the rank and precedence of persons named, as under :—

1. Governor-General and Viceroy of India.
2. Governors of Provinces within their respective charges.
3. Governors of Madras, Bombay and Bengal.
4. Commander-in-Chief in India.
5. Governors of the United Provinces, Punjab, Behar and Burma.
6. Governors of the Central Provinces and Assam.
7. Chief Justice of Bengal.
8. Bishop of Calcutta, Metropolitan of India.
9. Members of the Governor-General's Executive Council.
10. Commander-in-Chief of His Majesty's Naval Forces in the East Indies.
11. President of the Council of State.
12. President of the Legislative Assembly.
13. Chief Justice of a High Court other than that of Bengal.
14. Bishops of Madras and Bombay.
15. Agents to the Governor-General in Rajputana, Central India and Baluchistan, Chief Commissioner of the North-West Frontier Province, Members of Executive Councils and Ministers of Governors and Lieutenant-Governors, Political Resident in the Persian Gulf, Residents at Hyderabad and in Mysore, and Commissioner in Sind,—within their respective charges.
16. Chief of the General Staff; Chief Commissioner of Railways; General Officer Commanding Northern, Southern, Eastern and Western Commands, and Officers of the rank of General.
17. Members of the Executive Councils and Ministers in Madras, Bombay and Bengal.
18. Members of the Executive Councils and Ministers, United Provinces, Punjab, Burma and Behar.
19. Agents to the Governor-General in Rajputana, Central India and Baluchistan; Chief Commissioner of the North-West Frontier Province; Political Resident in the Persian Gulf; and Residents at Hyderabad and in Mysore.
20. Members of the Executive Councils and Ministers, Central Provinces and Assam.
21. Presidents of Legislative Councils within their respective Provinces.
22. Chief Judges of Chief Courts; and Puisne Judges of High Courts.
23. Lieutenant-Generals.
24. Comptroller and Auditor-General; President of the Public Service Commission and President of the Railway Board.
25. Bishops of Lahore, Rangoon, Lucknow and Nagpur.
26. Members of the Railway Board, Railway Financial Commissioner; and Secretaries to the Government of India.
27. Additional Secretaries and Joint Secretaries to the Government of India; Commissioner in Sind; Financial Adviser, Military Finance; Judges of Chief Courts; and Members of the Central Board of Revenue.
28. Chief Commissioner of the Andamans and Chief Commissioner of Delhi,—within their respective charges; Chief Secretaries to the Governments of Madras, Bombay and Bengal. Agent to the Governor-General, Punjab States when within the Punjab.
29. Commissioner of Revenue and Customs, Bombay; Consulting Engineer to the Government of India; Development Commissioner, Burma; Director of Development, Bombay; Director-General, Indian Medical Service; Director-General of Posts and Telegraphs; Financial Commissioners; Judicial Commissioners of Oudh, Central Provinces, Sind and Upper Burma; Major-Generals; members of a Board of Revenue; Surgeon-Generals.
30. Vice-Chancellors of the Indian Universities.
31. Agents of State Railways; Controller of the Currency; Additional Judicial Commissioners; Agency Commissioner, Madras; Commissioners of Divisions, and Residents of the 2nd Class,—within their respective charges.
32. Members of the Indian Civil Service of 30 years' standing (not holding any other appointment mentioned in this Warrant).
33. Advocate-General, Calcutta.
34. Advocates-General, Madras and Bombay.
35. Chief Secretaries to Governments other than those of Madras, Bombay, Bengal and Assam.
36. Bishops (not territorial) under license from the Crown.
37. Accountants-General, Class I; Agricultural Adviser to the Government of India; Archdeacons of Calcutta, Madras and Bombay; Census Commissioner for India; Chief Controller of Stores, Indian Stores Department, Colonels Commandant and Colonels on the Staff; Commissioner, Northern India Salt Revenue; Director, Intelligence Bureau; Director-General of Archæology in India; Director of the Geological Survey; Director, Royal Indian Marine, when an officer of the Royal Navy of rank lower than Rear-Admiral or an officer of the Royal Indian Marine; Educational Commissioner with the Government of India; His Majesty's Senior Trade Commissioner, Calcutta; Inspector General of Forests; Military Accountant-General; Opium Agent, Benares; Sanitary Commissioner with the Government of India; and Surveyor General of India.
38. Additional Judicial Commissioners; Agency Commissioner, Madras; Chief Commissioner of the Andamans; Chief Commissioner of Delhi, Chief Secretary to the Government of Assam; Commissioners of Divisions; and Residents of the 2nd Class.
39. Private Secretary to the Viceroy; Secretaries; Additional Secretaries and Joint Secretaries to Local Governments.
40. Accountants-General other than Class I; Chief Auditors, Eastern Bengal Railway and North-Western Railway; Chief Conservators of Forests; Chief Engineers; Chief Engineer, Telegraphs; Colonels; Command Controllers of Military Accounts; Deputy Controller of the Currency at Bombay; Director of the Botanical Survey of India; Directors, Civil Engineering, Mechanical Engineering, Traffic and Establishment and Railway Board; Director-General of

Commercial Intelligence; Director-General of Observatories; Directors of Public Instruction under Local Governments; Director, Zoological Survey; Financial Adviser, Posts and Telegraphs; His Majesty's Trade Commissioners, Bombay and Calcutta; Inspectors-General, Civil Hospitals; Inspectors-General of Police under Local Governments and in the North-West Frontier Province; Inspectors-General of Prisons under Local Governments; Members of the Indian Civil Service and of the Indian Political Department of 23 years' Civil service, if not holding any other appointment mentioned in this Warrant; Mint Masters, Calcutta and Bombay; President of the Forest College and Research Institute; Provincial Sanitary Commissioners; Superintendents of the Imperial Survey of India; and Traffic Managers and Locomotive Superintendents of State Railways.

41. Military Secretary to the Viceroy.

42. Solicitor to the Government of India; and Standing Counsel to the Government of India.

43. Archdeacons of Lahore, Lucknow, Rangoon and Nagpur; and Presidency Senior Chaplains of the Church of Scotland.

44. Chairmen of Port Trusts and of Improvement Trusts of the Presidency towns, Rangoon and Karachi; Members of the Public Service Commission; Non-official Presidents of Municipal Corporations in Presidency towns and Rangoon within their respective municipal jurisdictions; Settlement Commissioners; Chief Executive Officers of the Municipalities of the Presidency towns and Rangoon within their charges; and Chief Inspector of Mines.

45. Collectors of Customs; Collectors and Magistrates of Districts; Collector of Stamp Revenue and Deputy Collector of Land Revenue, Calcutta; Commissioner of Ajmer-Merwara; Deputy Commissioners of Districts, and Deputy Commissioner, Port Blair; Divisional and District and Sessions Judges (including the Judicial Commissioner of Chota Nagpur); Political Agents and Superintendents, and Residents (other than those of the 1st and 2nd Class),—within their respective charges; Commissioners of Income Tax; Remembrancers of Legal Affairs and Government Advocates under Local Governments.

46. Deputy Financial Adviser, Military Finance; Deputy Secretaries to the Government of India; Director, Central Bureau of Information, Government of India; Director of Inspection, Indian Stores Department; Director of Purchases and Intelligence, Indian Stores Department; Establishment Officer in the Army Department and to the Railway Board.

47. Director, Central Research Institute, Kasauli; Director of the Indian Institute of Science; and Principal of the Thomason Civil Engineering College, Roorki.

48. Assistant to the Inspector-General of Forests; Commandant, Frontier Constabulary, North-West Frontier Province; Commissioners of Police in the Presidency towns and Rangoon; Comptroller, Assam; Conservators of Forests; Controller of Army Factory Accounts; Controller of Marine Accounts Controller, Royal Air Force Accounts; Deputy Chief Engineer, Telegraphs; Deputy Director General Indian Medical Service; Deputy Director-General of Post Office; Deputy Director-General, Telegraph Traffic; Deputy Director, Intelligence Bureau Deputy Military Accountant-General; Director, Medical Research; Director of Wireless, Directors of Telegraph Engineering; District Controllers of Military Accounts; Lieutenant-Colonels; Members of the Indian Civil Service and of the Political Department of 18 years' Civil Service, if not holding any other appointment mentioned in this Warrant; Mining Engineer to the Railway Board; Postmasters-General; and Superintending Engineers.

49. Assay Master, Bombay; Chief Auditor, Oudh and Rohilkhand Railway; Deputy Controllers of the Currency, Calcutta and Northern India; and Deputy Controller General.

50. Actuary to the Government of India; Chief Inspector of Explosives; Chief Judges of Small Cause Courts, Presidency towns and Rangoon; Controller of Printing, Stationery and Stamps; Director, Imperial Bacteriological Laboratory, Muktesar; Directors of major Laboratories; Director of Public Instruction, North-West Frontier Province.

51. Private Secretaries to Governors, and Secretaries and First Assistants in 1st Class Residencies.

52. Administrators-General; Chief Presidency Magistrates; Deputy Agents, Deputy Traffic Managers and Officers of similar status of State Railways; Deputy Directors, Railway Board; Metallurgical Inspector, Jamshedpur; and Officers in Class I of the General of the Public Works List of the Indian Finance Department.

53. Commissioner of Labour, Madras; Controller of Patents; Deputy Inspectors-General of Police; Directors of Agriculture; Directors of Fisheries in Bengal and Madras; Directors of Industries; Directors of Land Records; Excise Commissioners; Inspector-General of Railway Police and Police Assistant to the Agent to the Governor-General, Rajputana; Inspectors-General of Registration; Principal, Research Institute, Cawnpore, and Registrars of Co-operative Societies.

54. District Judges not being Sessions Judges within their own districts.

55. First Assistant to the Residents at Aden Baroda and in Kashmir; Judicial Assistant Kathiawar; and Chairman of Port Trust, Aden

56. Military Secretaries to Governors.

57. Senior Chaplains other than those already specified.

58. Sheriffs within their own charges.

59. Bombay, and Income-tax Officers drawing the maximum pay of the time-scale; and Sub-Deputy Opium Agents.

1. The entries in the above table apply exclusively to the persons entered therein, and while regulating their relative precedence with each other, do not give them any precedence over members of the non-official community resident in India who shall take their place according to usage.

2. Officers in the above table will take precedence in order of the numbers of the entries. Those included in one number will take precedence *inter se* according to the date of entry into that number.

3. When an officer holds more than one position in the table he will be entitled to the highest position accorded to him.

4. Officers who are temporarily officiating in any number in the table will rank in that number below permanent incumbents.

5. All officers not mentioned in the above table, whose rank is regulated by comparison with rank in the army, to have the same rank with reference to civil servants as is enjoyed by military officers of equal grades.

6. All other persons who may not be mentioned in this table to take rank according to general usage, which is to be explained and determined by the Governor-General in Council in case any question shall arise. When the position of any such person is so determined and notified, it shall be entered in the table in italics, provided he holds an appointment in India.

7. Nothing in the foregoing rules to disturb the existing practice relating to precedence at the Courts of Indian States or on occasions of intercourse with Indians, and the Governor-General in Council to be empowered to make rules for such occasions in case any dispute shall arise.

8. The following will take courtesy rank as shown:—

Consuls-General, Immediately after article 37, which includes Colonels Commandant; Consuls, immediately after article 40, which includes Colonels; Vice-Consuls, Immediately after article 63, which includes Majors.

Consular officers de carriere will in their respective grades take precedence of consular officers who are not de carriere.

9. The following may be given, by courtesy, precedence as shown below, provided that they do not hold appointments in India:—

Peers according to their precedence in England; Knights of the Garter, the Thistle and St. Patrick; Privy Councillors; Members of the Council of the Secretary of State for India.—Immediately after Members of the Governor-General's Executive Council, article 9.

Baronets of England, Scotland, Ireland and the United Kingdom, according to date of Patents Knights Grand Cross of the Bath; Knights Grand Commander of the Star of India; Knights Grand Cross of St. Michael and St. George; Knights Grand Commander of the Indian Empire; Knights Grand Cross of the Royal Victorian Order; Knights Grand Cross of the Order of the British Empire. Immediately after the Commissioner in Sind (Article 15); Knights Commander of the Bath; Knights Commander of the Star of India; Knights Commander of St. Michael and St. George; Knights Commander of the Indian Empire; Knights Commander of the Royal Victorian Order; Knights Commander of the Order of the British Empire; and Knights Bachelor.—Immediately after the Residents of the Second Class, Article 31.

10. All ladies, unless by virtue of holding an appointment themselves they are entitled to a higher position in the table, to take place according for the rank herein assigned to their respective husbands, with the exception of wives of Peers and of ladies having precedence in England independently of their husbands, and who are not in rank below the daughters of Barons such ladies to take place according to their several ranks, with reference to such precedence in England, immediately after the wives of Members of the Governor-General's Executive Council.

Indian Orders.

The Star of India.

The Order of the Star of India was instituted by Queen Victoria in 1861, and enlarged in 1866, 1876, 1897, 1902 and 1911, and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India, or upon British subjects for important and loyal service rendered to the Indian Empire; the second and third classes for services in the Indian Empire of not less than thirty years in the department of the Secretary of State for India. It consists of the Sovereign; a Grand Master (the Viceroy of India), the first class of forty-five Knights Grand Commanders (23 British and 22 Indian), the second class of one hundred Knights Commanders, and the third class of two hundred and twenty-five Companions, exclusive of Extra and Honorary Members, as well as certain additional Knights and Companions.

The Insignia are (i) the Collar of gold, composed of the lotus of India, of palm branches tied together in satire, of the united red and white rose, and in the centre an Imperial Crown; all enamelled in their proper colours and linked together by gold chains. (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre, having thereon a star of five points in diamonds resting upon a light blue enamelled circular riband, tied at the ends and inscribed with the motto of the Order, *Heaven's Light our Guide*, also in diamonds. That of a Knight Commander is somewhat different, and is described below. (iii) The Badge, an onyx cameo having Her Majesty Queen Victoria's Royal Effigy thereon, set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points, all in diamonds. (iv) The Mantle of light blue satin lined with white, and fastened with a cordon of white silk with blue and silver tassels. On the left side a representation of the Star of the Order.

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky-blue, having a narrow white stripe towards either edge, and is worn from the right shoulder to the left side. A Knight Commander wears (a) around his neck a ribbon two inches in width of the same colours and pattern as a Knight Grand Commander, and pendent therefrom a badge of a smaller size, (b) on his left breast a Star composed of rays of silver issuing from a gold centre, having thereon a silver star of five points resting upon a light blue enamelled circular ribbon, tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears from his left breast a badge of the same form as appointed for a Knight Commander, but of a smaller size pendent to a like ribbon of the breadth of one and a half inches. All Insignia are returnable at death to the Central Chancery, or if the recipient was resident in India, to the Secretary of the Order at Calcutta.

Sovereign of the Order:—His Most Gracious Majesty The King-Emperor of India.

Grand Master of the Order:—His Excellency the Viceroy and Governor-General of India, the Right Honourable Lord Irwin, P.C., G.M.S.I., G.M.I.E.

Officers of the Order:—*Registrar*: Col. the Hon. Sir George Arthur Charles Crichton, K.C.V.O., Secretary of the Central Chancery of the Orders of Knighthood, St. James' Palace, London, W. 1.

Secretary: The Hon'ble Mr. B. J. Glancy, C.I.E., Secretary to the Government of India in the Foreign and Political Department.

Extra Knights Grand Commanders (G. C. S. I.)

H. I. M. the Queen-Empress
H. R. H. The Duke of Connaught
H. R. H. The Prince of Wales

The Most Eminent Order of the Indian Empire.

This Order, instituted by H. M. Queen Victoria, Empress of India, Jan. 1st, 1878, and extended and enlarged in 1886, 1887, 1892, 1897, and 1902 is conferred for services rendered to the Indian Empire, and consists of the Sovereign, a Grand Master, forty Knights Grand Commanders (of whom the Grand Master is first and principal), one hundred and forty Knights Commanders, and an indefinite number of Companions (not exceeding, without special statute, 20 nominations in any one year); also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order, as well as certain Additional Knights and Companions appointed by special statute Jan. 1st, 1909, commemorative of the 50th Anniversary of the assumption of Crown Govt. in India.

The Insignia are: (*i*) The COLLAR of gold formed of elephants, lotus flowers, peacocks in their pride, and Indian roses, in the centre the Imperial Crown, the whole linked together with chains; (*ii*) The STAR of the Knight Grand Commander, comprised of five rays of silver, having a small ray of gold between each of them, the whole alternately plain and scaled, issuing from a gold centre, having thereon Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatricis Auspiciis*, and surmounted by an Imperial Crown gold; (*iii*) The BADGE consisting of a rose, enamelled gules, barbed vert, and having in the centre Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatricis Auspiciis*, surmounted by an Imperial Crown, also gold; (*iv*) The MANTLE is of Imperial purple satin, lined with and fastened by a cordon of white silk, with purple silk and gold tassels attached. On the left side a representation of the Star of the Order.

A Knight Commander wears: (*a*) around his neck a ribbon two inches in width, of the same colour (purple) and pattern as a Knight Grand Commander, pendent therefrom a badge of smaller size: (*b*) on his left breast a star, similar to that of the first class, but the rays of which are all of silver.

The above mentioned Insignia are returned at death to the Central Chancery, or if the Knight was resident in India to the Secretary of the Order at Calcutta.

A Companion wears from the left breast a badge (not returnable at death) of the same form as appointed for a Knight Commander, but of smaller size, pendent to a like ribbon of the breadth of one and a half inches.

Sovereign of the Order:—His Most Gracious Majesty The King-Emperor of India.

Grand Master of the Order:—H. E. the Viceroy Lord Irwin.

Officers of the Order:—The same as for the Order of the Star of India.

The Imperial Order of the Crown of India.

This Order was instituted Jan. 1, 1878 and for a like purpose with the simultaneously created Order of the Indian Empire. It consists of the Queen and Queen Mother with some Royal Princesses, and the female relatives of Indian Princes or of persons who have held conspicuous offices in connection with India. Badge, the Royal Cypher in jewels within an oval surmounted by an Heraldic Crown and attached to a bow of light blue watered ribbon, edged white. Designation, the letters C. I.

Sovereign of the Order.

THE KING-EMPEROR OF INDIA.

Ladies of the Order (C. I.)

Her Majesty The Queen
H. M. the Queen of Norway
H. R. H. the Princess Royal
H. R. H. the Princess Victoria
H. M. The Queen of Roumania
H. R. H. Princess Beatrice
The Ex-Duchess of Cumberland
H. R. H. The Princess of Hohenlohe-Langenburg
H. R. H. the Princess Louise (Duchess of Argyll)
H. I. & R. H. the Grand Duchess Ayril of Russia

Lady Patricia Ramsay
H. H. the Princess Marie-Louise
Baroness Kinloss
Lady Jane Emma Crichton
Dowager Countess of Lytton
Dowager Baroness Napier of Magdala
Dowager Marchioness of Dufferin and Ava
H. H. Maharani of Cooch-Behar
Marchioness of Lansdowne
Baroness Harris
Constance Mary Baroness Wenlock
H. H. Maharani Sahib Chimna Bai Gaekwar
H. H. Rani Sahib of Gondal
H. H. the Dowager Maharani of Mysore
Lady George Hamilton
H. H. the Maharani Sahiba of Udaipur
Alice, Baroness Northcote
Amelia Maria, Lady White
Mary Katherine, Lady Lockhar
Baroness Ampthill
The Lady Willingdon
Countess of Minto
Marchioness of Crewe
H. H. Begum of Bhopal
France Charlote, Lady Chelmsford
Countess of Reading
H. H. Maharani Sakhiya Raja Sahiba Scindia Alijah Bahadur of Gwalior
H. E. The Lady Irwin.

Distinctive Badges.—An announcement was made at the Coronation Durbar in 1911, that a distinctive badge should be granted to present holders and future recipients of the titles of 'Diwan Bahadur', 'Sardar Bahadur', 'Khan Bahadur', 'Rai Bahadur', 'Rao Bahadur', 'Khan Sahib', Rai Sahib' and 'Rao Sahib'. Subsequently the following regulations in respect of these decorations were issued:—(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy crowned and the name of the title, both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown, the plaque or shield being of silver gilt for the titles of Diwan, Sardar, Khan, Rai and Rao Bahadur, and of silver for the titles of Khan, Rai, and Rao Sahib. (2) The badge shall be worn suspended round the neck by a ribbon of one inch and a half in width, which for the titles of Diwan and Sardar Bahadur shall be light blue with a dark blue border, for the titles of Khan, Rai and Rao Bahadur light red with a dark red border, and for the titles of Khan, Rai and Rao Sahib dark blue with light blue border.

A Press Note issued in November, 1914, states:—The Government of India have recently had under consideration the question of the position in which **miniatures** of Indian titles should be worn, and have decided that they should be worn on the left breast fastened by a brooch, and not suspended round the neck by a ribbon as prescribed in the case of the badge itself. When the miniatures are worn in conjunction with other decorations, they should be placed immediately after the Kaiser-i-Hind Medal.

Indian Distinguished Service Medal.—This medal was instituted on June 28th, 1907, by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII and on the reverse a laurel wreath encircling the words For Distinguished Service. The medal, 1⅜ inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon 1¼ in. wide, with blue edges ⅜ in. wide. This medal may be conferred by the Viceroy of India.

Indian Order of Merit.—This reward of valour was instituted by the H. E. I. Co. in 1837, to reward personal bravery without any reference to length of service or good conduct. It is divided into three classes and is awarded to native officers and men for distinguished conduct in the field. On the advancement from one class to another the star is surrendered to the Government, and the superior class substituted, but in the event of the death of the recipient his relatives retain the decoration The order carries with it an increase of one-third in the pay of the recipient, and in the event of his death the allowance is continued to his widow for three years. The First Class consists of a star of eight points, 1⅜ in. in diameter, having in the centre a ground of dark blue enamel bearing crossed swords in gold, within a gold circle, and the inscription Reward of Valour, the whole being surmounted by two wreaths of laurel in gold. The Second Class star is of silver, with the wreaths of laurel in gold; and the Third Class entirely of silver. The decoration is suspended from a simple loop and bar from a dark-blue ribbon 1½ in. in width with red edges, bearing a gold or silver buckle according to class.

Order of British India.—This order was instituted at the same time as the Order of Merit, to reward native commissioned officers for long and faithful service in the Indian Army Since 1878, however, any person European or native, holding a commission in a native regiment, became eligible for admission to the Order without reference to creed or colour. The First Class consists of a gold eight-pointed radiated star 1½ in. in diameter. The centre is occupied by a lion statant gardant upon a ground of light-blue enamel, within a dark-blue band inscribed Order of British India, and encircled by two laurel wreaths of gold. A gold loop and ring are attached to the crown for suspension from a broad ornamental band $\frac{7}{10}$ in. in diameter, through which the ribbon, once blue, now red, is passed for suspension from the neck. The Second Class is $1\frac{7}{10}$ in. in diameter with dark-blue enamelled centre: there is no crown on this class, and the suspender is formed of an ornamental gold loop. The reverse is plain in both classes. The First Class carries with it the title Sirdar Bahadur, and an additional allowance of two rupees a day and the Second the title of Bahadur, and an extra allowance of one rupee per day.

Indian Meritorious Service Medal.—This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medal": but on being promoted to a commission he may retain the M. S. medal, but the annuity attached to it will cease. On the obverse is the diademed

bust of Queen Victoria facing left, with a veil falling over the crown behind, encircled by the legend Victoria Kaisar-i-Hind. On the reverse is a wreath of lotus leaves enclosing a wreath of palm tied at the base, having a star beneath; between the two wreaths is the inscription for meritorious service Within the palm wreath is the word India. The medal, 1⅗ in. in diameter, is suspended from a scroll by means of a red ribbon 1¼ in. wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to EDWARDVS or GEORGIVS.

THE KAISAR-I-HIND MEDAL.

This decoration was instituted in 1900, the preamble to the Royal Warrant—which was amended in 1901 and 1912—being as follows:—"Whereas We, taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire, and taking also into consideration the expediency of distinguishing such services by some mark of Our Royal favour: Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid, We have instituted and created, and by these presents for Us, Our Heirs and Successors, do institute and create a new Decoration." The decoration is styled "The Kaisar-i-Hind Medal for Public Service in India" and consists of two classes. The Medal is an oval shaped Badge or Decoration—in gold for the First Class and in silver for the Second Class—with the Royal Cypher on one side and on the reverse the words "Kaisar-i-Hind for Public Service in India;" it is suspended on the left breast by a dark blue ribbon.

Zahur-ul-Husain Muhammad,

THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar in 1911, that in future Indians would be eligible for the Victoria Cross, gave satisfaction which was increased during the War and afterwards by the award of that decoration to the following :—

Subadar (then Sepoy) Khudadad Khan, 129th Baluchis.—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naick Darwan Sing Negi, 1-39th Garhwal Rifles.—For great gallantry on the night of the 23rd-24th November 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches, and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range.

Subadar (then Jamadar) Mir Dast, 55th Coke's Rifles.—For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and kept them under his command until the retirement was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

Rifleman Kulbir Thapa, 2-3rd Gurkha Rifles.—For most conspicuous bravery during operations against the German trenches south of Mauquissart. When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy's fire.

Havildar (then Lance-Naick) Lala, 41st Dogras.—Finding a British Officer of another regiment lying close to the enemy he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The enemy were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance-Naik Lala insisted on going out to his Adjutant, and offered to crawl back with him on his back at once. When this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magnificent example of courage and devotion to his officers.

Sepoy Chatta Singh, 9th Bhopal Infantry.—For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into safety.

Naick Shahamad Khan, 89th Punjabis.—For most conspicuous bravery. He was in charge of a machine-gun section in an exposed position in front of and covering a gap in our new line within 150 yards of the enemy's entrenched position. He beat off three counter-attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he then brought back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all remaining arms and equipment except two shovels. But for his great gallantry and determination our line must have been penetrated by the enemy.

Lance-Dafedar Govind Singh, 28th Cavalry—For most conspicuous bravery and devotion to duty in thrice volunteering to carry messages between the regiment and brigade headquarters, a distance of 1½ miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in delivering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

Rifleman Karan Bahadur Rana, 23rd Gurkha Rifles.—For conspicuous bravery and resource in action under adverse conditions, and utter contempt of danger during an attack. He with a few other men succeeded, under intense fire, in creeping forward with a Lewis gun in order to engage an enemy machine gun which had caused severe casualties to officers and other ranks who had attempted to put it out of action. No. 1 of the Lewis gun party opened fire and was shot immediately. Without a moment's hesitation Karan Bahadur pushed the dead man off the gun, and in spite of bombs thrown at him and heavy fire from both flanks, he opened fire and knocked out the enemy machine gun crew. Then switching his fire on the enemy bombers

and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

Ressaldar Badlu Singh, 14th Lancers attached 29th Lancers.—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan, between the river and Kh. es Samariveh Village. On nearing the position Ressaldar Badlu Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine guns and 200 infantry. Without the slightest hesitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties to the squadron. He was mortally wounded on the very top of the hill when capturing one of the machine guns single-handed, but all the machine guns and infantry had surrendered to him before he died. His valour and initiative were of the highest order.

Rifleman Gobar Sing Negi, 2nd Battalion, 39th Garhwal Rifles.—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

Sepoy Ishaw Singh, 28th Punjabis.—For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921. He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the havildars had been killed or disabled he struggled to his feet, called to his assistance two men, and charged and recovered the gun, restoring it to action. He refused medical attention, insisting first on pointing out where the other wounded were and on carrying water to them. While the medical man was attending to these wounded he shielded him with his body and he submitted to medical attention himself only after he was exhausted through three hours' continual effort and by loss of blood.

PASSPORT REGULATIONS.

A.—British Subjects.

1. British Indian passports are issued only to :—(1) British subjects by birth, (2) wives and widows of such persons, (3) British subjects by naturalization and (4) British-protected persons.

2. The Indian Passport Regulations do not require persons to be in possession of passports for leaving India, but as practically every other country requires travellers to be in possession of passports before they are allowed to land at the port of such country, travellers are advised to obtain passports before embarkation. Members of His Majesty's Naval, Military or Air Forces or of the Indian Marine Service travelling on duty and members of the families of such persons when travelling to the United Kingdom on military entitled passages need not have passports.

3. Passports are not required for journeys by sea from Bombay to ports in India or to Burma or Ceylon ; nor do natives of India travelling to the Federated Malay States or the Strait Settlements require passports unless they propose to continue their journey onward.

4. In order to obtain a passport, an application form (showing, among other things, the reasons for the proposed journey) should be filled in by the applicant and the applicant's declaration certified by a Political Officer, Magistrate, Justice of the Peace, Police Officer not below the rank of Superintendent, or Notary Public resident in India. Copies of the form can be obtained from any District Magistrate, from the Commissioner of Police, Bombay, by post from the Passport Officer to the Government of Bombay, by personal application at the Passport Office, or from any of the leading Banking and Shipping Agents in Bombay. Small duplicate unmounted copies of the photograph of the applicant and a fee of Rs. 3 should be forwarded with the application form. Fees are not accepted in stamps or by cheque.

5. The application form when filled in should either be posted with the photographs and fee to the Passport Officer to the Government of Bombay, or should be presented at the Passport Office, Bombay.

6. The Passport Office in Bombay is situated in the Civil Secretariat. The office is open from 11 a.m. to 4 p.m. daily, except on Saturdays when it closes at 1 p.m. and on Sundays and public holidays.

7. As a passport is valid for five years, there is no objection to anyone applying for a passport weeks or even months in advance of the date of sailing and much inconvenience will be avoided by early application. A notice of at least four days should be given for the preparation of a new passport and at least two days for an endorsement, renewal or visa. The Passport Officer cannot issue passports outside office hours and as the preprations of a passport takes time, applicants who postpone application to the last moment do so at their risk.

Iraq.

8. Members of His Majesty's Naval, Military or Air Forces or of the Indian Marine Service in uniform and *bona fide* Muhammadan pilgrims (Haj or Zair) holding individual pilgrim passes (do not require passports for their journey to Iraq. All other travellers must be in possession of national passports and visas for Iraq. In the absence of Iraq Consular Officers in India, visas for Iraq are granted by Passport Issuing Authorities in India on behalf of the

Iraq Government subject to the conditions stated below. The Iraq visas are of two kinds—Ordinary, valid for all entries into Iraq during a period of twelve months; and Transit, valid for a single journey only, allowing for stay of not more than fifteen days in Iraq, The fee for these visas is the same as for British visas—*vide* paragraph 17 below. Iraq national passports are valid for return to that country without any further visa or endorsement.

Except in the case of *bona fide* tourists, business representatives and employees of well established firms and persons with definite guarantee of employment in Iraq, visas for Iraq will not be granted without the previous permission of the Iraq Government. The Passport Offices will on request, ask for this permission by post or, if the applicant is prepared to defray the cost by cable. Applicants must state clearly the nature of their business and give one or more references in Iraq to enable the local authorities to make inquiries regardig the purpose of their journey.

With the exception of tourists who may remain for three months in Iraq without registratiom, all persons are required to obtain a "permis de sejour" from the police within fifteen days of their arrival in Iraq. Travellers are also warned that before departure from Iraq even on a transit visa they must obtain a passport endorsement of departure.

Egypt.

9. In the absence of Egyptian Consular Officers in India visas for Egypt are granted by Passport Issuing Authorities in India on behalf of the Egyptian Government. The fee for these visas is the same as for British visas—*vide* paragraph 17 below. Applicants for non-transit visas for Egypt should be able to produce evidence to show that they are in possession of ample and independent means or are the agents of houses of business of good standing or have secured permanent employment in Egypt. In all other cases the previous permission of the Ministry of Foreign Affairs in Egypt is necessary for the visit. Holders of the new-form Egyptian passports do not require visas to return to Egypt.

10. Restrictions also exist on travel to various parts of the British Empire, and to certain foreign countries. Among these may be mentioned Australia, Canada, Mexico, Mahommerah and Abadan, New Zealand, Palestine, Southern Rhodesia, Union of South Africa, South West Africa and the United States of America. The restrictions apply particularly to Indians. Detailed particulars with respect to each country will be supplied on application.

Foreign Countries.

11 Passports for journeys to or through foreign countries require, after issue, the visa of the Consul concerned. The addresses of the foreign consulates in Bombay will be found in the appendix below. Visas are, however, not necessary for Austria, Belgium, Denmark, France, Germany, Holland, Iceland, Italy, Liechtenstein, Luxemberg, Norway, Portugal, Sarro, Spain, Sweden and Switzerland, provided the names of these countries are entered on the passport by a British Passport-issuing authority.

Renewal.

12. A passport is valid for five years from the date of issue and is renewable for a further period of from one to five years at the option of the holder; but in no case can a passport be extended beyond ten years from the original date of issue. On expiration of this period, or, if at any time the space provided for visas is covered and the holder wishes to travel to countries for which fresh visas are required a new passport must be obtained. Application for renewal must be made in the prescribed form, copies of which may be had from any of the officers mentioned in paragraph 4 above. The fee for renewals is Re. 1 for each year, or portion of a year, for which the passport is renewed.

Endorsements

13. A passport is valid only for the country or countries endorsed on it and fresh endorsements from a British Passport authority are not needed during the validity of the passport for subsequent journeys to these countries. Fresh endorsements may, however, be obtained on the passport for additional countries. Passports endorsed as valid for the British Empire are also available for travelling to territories under British protection or mandate, not however including Palestine and Iraq, for which countries the passport must be specifically endorsed.

Marriage.

14. A lady on marriage or re-marriage requires a fresh passport.

15. In the case of a joint passport issued in favour of a husband and wife, the latter cannot travel alone on it, but should take out a fresh passport, surrendering the joint passport for cancellation of her name from it.

B.—Foreigners.

16. Foreigners proceeding direct to their own country, or to, or through, any other foreign country or countries do not require a British visa on their passports. The nationals of the following countries do not require a British visa for travelling to the United Kingdom. The concession also applies to certain nationals proceeding to certain British Dominions and Colonies and information on this point can be obtained from the Passport Officer. The concession does not apply to India.

Austria, Belgium, Denmark, France, Germany, Holland, Iceland, Italy, Liechtenstein, Luxemburg, Norway, Portugal, Sarro, Spain, Sweden and Switzerland.

17. Foreigners who are subjects of the countries shown in the appendix below and who are travelling to British territories for which a British visa is necessary should first obtain passports from their consular representatives and should then present them to the Passport Officer for visa, together with a written statement of the reasons for the journey. British visas are of two kinds, *viz.*, the Non-transit and Transit. The fees for these are Rs. 5-8-0 and Re. 0-9-0, respectively, except in the case of nationals of state which levy higher fees, when the retaliatory scale of fees will be applied.

18. Other foreigners should apply for Identity certificates through the Commissioner of Police, Bombay, or, where such foreigners reside in the mofussil, through the District Magistrate of the district in which they are residing. Small duplicate copies of the applicant's photograph should accompany the application. The fee for an Identity Certificate is Rs. 1-8-0.

19. The holder of a foreign passport who has obtained a visa granted by a British Passport Authority outside India for a destination which involves landing in, or passing through, India does not need a further visa from the authorities in India.

20. Copies of this notice can be had free of charge on application.

ADDRESSES OF FOREIGN CONSULATES IN BOMBAY.

Afghanistan.—Amir's Bungalow, Walkeshwar Road, Malabar Hill.
Austria.—C/o E. Stella and Co., Taj Building, Wallace Street, Fort.
Belgium.—Central Bank Building, Medows Street, Fort.
Brazil.—Asian Building, Nicol Road, Ballard Estate.
Cuba.—Jer Mahal, Dhobi Talao.
Czecho-Slovakia.—18, Rampart Row, Fort.

Portugal.—21, Cuffe Parade, Colaba.
Siam.—C/o Wallace and Company, Wallace Street, Fort.
Spain.—Morarji Gokuldas Cloth Market, Kalbadevi Road.
Sweden.—Volkart Building, Graham Road, Ballard Estate.
Switzerland.—Volkart Building, Graham Road, Ballard Estate.
United States of America.—Jehangir Wadia Building, Esplanade Road, Fort.

States having Consulates in Calcutta and Simla but not in Bombay.

Argentine Republic :—5, Fairlie Place, Calcutta.
Bolivia.—27, Park Road, Calcutta.
Chiel.—17, Stephen's Court, Park Street, Calcutta.
Costa Rica.—10, Prasunno Kumar, Tagore Street, Calcutta.
Greece.—7, Mission Row, Calcutta.
Guatemala.—19, Prasunno Kumar, Tagore Street, Calcutta.
Mexico.—6, Rose Villa, Simla.
Panama.—12, Gaulstan Mansions, Calcutta.
Peru.—11-2, Lansdowne Road, Calcutta.
Russia.—Esplanade Mansions, Calcutta.
Salvador.—10, Prasunno Kumar, Tagore Street, Calcutta
Venezuela :—Tagore House, 27, Park Lane, Calcutta.

The School of Oriental Studies.

This School was established by Royal Charter in June 1916. The purposes of the School (as set out in the Charter) are to be a School of Oriental Studies in the University of London to give instruction in the Languages of Eastern and African peoples, Ancient and Modern, and in the Literature, History, Religion, and Customs of those peoples, especially with a view to the needs of persons about to proceed to the East or to Africa for the pursuit of study and research, commerce or a profession, and to do all or any of such other things as the Governing Body of the School consider conducive or incidental thereto, having regard to the provision for those purposes which already exists elsewhere and in particular to the co-ordination of the work of the School with that of similar institutions both in Great Britain and in its Eastern and African Dominions and with the work of the University of London and its other Schools.

The School possesses noble and adequate buildings, in Finsbury Circus, provided by the British Government under the London Institution (Transfer) Act of 1912. The sum of £25,000 required for the alteration and extension of the buildings of the London Institution for the purposes of the School was voted by Parliament. The School buildings are quiet, although they are in the heart of the City. The School provides teaching in more than sixty subjects In a considerable proportion of the spoken languages instruction is given by teachers belonging to the countries where the languages are spoken, as it is the aim of the School to provide as far as possible both European and

Oriental Lecturers in the principal languages included in the curriculum.

Courses on the History, Religions, and Customs of Oriental and African countries form a special feature in the teaching of the School. There is now a whole time lecturer in Phonetics, the classes for which are numerically larger than in any other subject. It is intended to record fully in phonetic symbols all the languages taught at the School.

Courses are also provided in Indian Law and the History of India, and arrangements are made from time to time for special courses of lectures to be given by distinguished orientalists not on the staff. Various Scholarships are given.

Patron, H. M. the King. *Chairman of the Governing Body,* Sir Harry L. Stephen, LL.M. *Director,* Professor Sir E. Denison Ross, C.I.E. PH.D.

Teaching Staff.

	Name.	*Subjects.*	*Status.*

6. Ahad Ha'am Lectureship in Modern Hebrew.
7. University Professor of Persian and Appointed Teacher. (Director).
9. University Professor of Sanskrit and Appointed Teacher.
1 University Professor of Swahili and other Bantu languages and Appointed Teacher.

The Fisheries of India.

The fisheries of India, potentially rich, as yet yield a mere fraction of what they could were they exploited in a fashion comparable with those of Europe, North America or Japan. The fishing industry, particularly the marine section, has certainly expanded considerably within the last 50 years concurrently with improvement in the methods of transport and increase in demand for fish, cured as well as fresh, from the growing populations of the great cities within reach of the seaboard. The caste system, however, exerts a blighting influence on progress; fishing and the fish trade are universally relegated to low caste men who alike from their want of education, the isolation caused by their work and caste, and their extreme conservatism, are among the most ignorant, suspicious and prejudiced of the population, extremely averse from amending the methods of their forefathers and almost universally without the financial resources requisite to the adoption of new methods, even when convinced of their value. Higher caste capitalists have hitherto fought shy of association with the low caste fishermen, and, except in the case of joint stock companies to engage in large operations on new lines, these capitalists cannot be counted upon to assist in the development of Indian fisheries. As in Japan, it appears that the general conditions of the industry are such that the initiative must necessarily be taken by Government in the uplift and education of the fishing community and in the introduction and testing of new and improved apparatus and methods.

The first local Government to lead the way was that of Madras, which in 1905 initiated an investigation of the industry, both marine and fresh-water, appointing Sir F. A. Nicholson to supervise operations. Bengal followed suit in 1906, and from these beginnings have sprung the local Fisheries Departments of Madras, Bengal and Behar and Orissa. Bombay, the remaining seaboard province, has comparatively small fresh-water interests compared with Madras and Bengal, and as it happens that her marine fisheries are favoured with good harbours and the most enterprising race of sea-fishermen in India, there was less urgent need for State help in the industry. Fisheries there were a subject of Government solicitude for five years after the war but they finally ceased to receive any attention after the abolition in 1924 of the short lived Department of Industries to which this subject was allotted.

Madras.

The Madras coast line of 1,750 miles is margined by a shallow-water area within the 100 fathom line of 40,000 sq. miles; outside of a mere fringe inshore, this vast expanse of fish-surf-swept East Coast is singularly deficient in harbours whereon fishing fleets can be based, and so from Ganjam to Negapatam, the unsinkable catamaran, composed of logs tied side by side, is the only possible seagoing fishing craft. Its limitations circumscribe the fishing power of its owners and consequently these men are poor, and the produce of their best efforts meagre compared with what it would be if better and larger boats were available and possible. The West coast is more favoured. From September till April weather conditions are good enough to permit even dugout canoes to fish daily. The people of this coast are found of fish and no difficulty is found in beaching canoes and boats throughout this season. The fishing population is a large one. The 1921 census gave 66,684 adults as subsisting on fishing industries in Malabar and South Kanara, a small number after all considering the immense wealth of these seas. The chief fishes are sardines, mackerel, catfishes and jewfishes (kora or gol): the two first overshadow all others. So greatly in excess of food requirements are the catches of sardines that every year large quantities are turned into oil and manure. Fishing outside the 5 fathom line is little in evidence save by Bombay boats (Ratnagiri) which are engaged in drift netting for bonito, seer and other medium-sized fishes. These strangers are enterprising fishers and bring large catches into Malpe and Mangalore and other convenient centres; the material is largely cured export.

Fish Curing.—Fish curing is practised extensively everywhere on the Madras coasts: its present success is due primarily to Dr. Francis Day who, after an investigation during 1869-71 of the fisheries of the whole of India, pressed for the grant to fishermen of duty-free salt for curing purposes within fenced enclosures. He advocated much else, but the time was not ripe and the salt concession was the sole tangible result of his long and honourable efforts. His salt suggestions were accepted by the Madras Government, and from 1882 a gradually increassing number of yards or bounded enclosures were opened at which salt is issued free of duty and often at rates below the local cost of the salt to Government. At present about 110 of such yards are scattered along the coast and over 55,000 tons of wet fish are annually cured therein. The total receipts on the administration of these yards for the year 1927-28 was Rs. 4,40,393 and expenditure Rs. 4,36,500. The credit balance on the year's working was therefore Rs. 3,893.

Pearl and Chank Fisheries.—There were two pearl fisheries held during the year, being the last of a series of fisheries held at Tuticorin since 1926. Though both were held in a small scale, they covered over the longest pearl-fishery period in a single fishery year, *viz.*, 97 fishing days and brought in a net revenue of Rs. 3,38,930-10-11 the highest on record, since the pearl fishery came under the British Rule the next in rank being in 1806-1807, *viz.*, Rs. 3,14,454. The total number of oysters fished amounted to nearly a crore. A cursory examination of the banks this year so far as weather permitted reveals that the oysters still remaining in the beds might not survive long and there is little prospect of another fishery during the next year.

Though the best season (February and March) could not be fully utilised for chank fishery, as is usually the case when pearl fishery occurs, chank fisheries were conducted both at the Ramnad Dt. as well as Tuticorin in the intervals between the Pearl Fisheries yielding a net revenue of Rs. 31,775.

The Inland Fisheries.—The Inland Fisheries of Madras compare unfavourably with those of Bengal. Many of the rivers dry up in the hot season and few of the many thousands of irrigation tanks throughout the province hold water for more than 6 to 9 months. As a consequence inland fisheries are badly organized and few men devote themselves to fishing as their sole, or even main, occupation. The custom is to neglect or ignore the fishery value of these streams and tanks so long as they are full of water: only when the streams shrink to pools and the tanks to puddles do the owners or lessees of the fishing rights turn out to catch fish. The result is a dearth of fish throughout the greater part of the year, a glut for a few days, and often much waste in consequence. The chief fresh-water fishes of economic importance are the murrel, notable for its virtue of living for considerable period out of water, various carps, and catfishes, the hilsa (in East Coast Rivers only), and the catla. In the Nilgiris, the rainbow trout has been acclimatised and thrives well. The Government working in conjunction with the Nilgiri Game Association maintain a hatchery at Avalanche, where quantities of fry are hatched and reared for the replenishment of the streams of the plateau.

The Madras Department of Fisheries.—As Government attention has been given in Madras over a longer period to the improvement of fisheries, and a larger staff concentrated upon the problems involved than elsewhere, this Presidency has now the proud position of knowing that her fisheries and collateral industries are better organized and more progressive than those in other provinces. The credit for the wonderful success which has been achieved and the still greater promise of the future, is due in large measure to the wise and cautious plans of Sir F. A. Nicholson, who from 1905 to 1918 had the guidance of affairs entrusted to him. In 1905 he was appointed on special duty to investigate existing conditions and future potentialities; in 1907, a permanent status was given by the creation of a fisheries bureau and this in turn has developed into a separate Department of Government which till August 1923 was being administered by Mr. James Hornell, F.L.S., as Director, and is now controlled by his successor Dr. B. Sundara Raj, M.A., Ph. D. The Higher staff consists of a Superintendent of Pearl and Chank Fisheries, and three Assistant Directors. These are respectively in charge of (*a*) the departmental fisheries (pearling, chanks, beche-de-mer, etc.); (*b*) the co-operative and socio-economic side of the Department's operations; (*c*) inland pisciculture; (*d*) deep-sea fishing and salt-transport. Other officers have charged respectively of sections dealing with education and industrial work, which include a Training Institute for village teachers, fish-curing yards, and oil and guano factories. All the public fish curing yards till now under the control of the Salt and Abkari Department have passed into the charge of the Fisheries Department. It is now possible to introduce the better methods of cure and improved hygiene which the Department has been straining to popularise, in all the yards. Due to the transfer of the yards the Fisheries Department has a large ramified staff of yard officers (Salt Sub-Inspectors, Petty Yard Officers and peons) in almost every large fishing village on the coast. Besides the direct work of issuing salt for curing, the Department will now set itself to train these officers into expert advisers in curing methods and marketing fish, social workers for the inculcation of thrift, co-operative and progressive ideas and new industries and lastly as trained observers for recording and reporting on various biological questions connected with fish and fisheries and collecting statistics regarding the value and quantity of sea fish caught and landed.

The activities of the Department are so varied and far-reaching that it is difficult even to enumerate them in the space available much less to give details. So far its most notable industrial successes have been the reform of manufacturing processes in the fish-oil trade the creation of a fishguano industry, and the opening of an oyster farm conducted under hygienic conditions (For details see the Bulletins of the Department issued from the Government Press, Madras) Twenty-two volumes have been issued to date and the twenty-third volume is in press. All this work has been carried on under serious handicap for want of suitable accommodation for the research staff.

Marine Aquarium.—Perhaps a word is necessary about this institution at Madras. The building was constructed under the auspices of the Superintendent, Government Museum, Madras, and was thrown open to the public on 21st October 1909. The Superintendent, Government Museum, had charge of the Aquarium for ten years till 1919 when it was transferred to the Department of Fisheries.

Ever since its opening, being the first of its kind in Asia, it has been immensely popular with the public. The number of visitors during the year was 1,04,401. Two rates of admissions are charged, *viz.*, one anna and four annas. The fatter rate is charged on Fridays for the benefit of those who would like to see the Aquarium under less-crowded conditions. The net profit realized last year was Rs. 3,111-7-7

Fishing rights in the large irrigation tanks were transferred from Government to local authorities many years ago; these tanks are now being reacquired by Government in order that they may be stocked periodically by the Department; the results so far have shown a profit on the operations. To breed the necessary fry, three fish farms are in operation, and the construction of three more is in progress. In these the chief fish bred are the Gourami, obtained from Java, the Murrel and Etroplus suratensis, which has the excellent attribute of thriving and breeding as well in brackish as in fresh water; all three protect their eggs while developing, a useful habit; both the Gouram and Etroplus are largely vegetarian in diet. A further activity is represented by the breeding of small fishes specially addicted to feed upon the aquatic larvae of mosquitoes. These are supplied in thousands to municipalities and other local authorities at a nominal price, for introduction into mosquito-haunted sheets of water; these anti-malarial operations have proved most successful in these places where the local authorities have given proper attention to the direction given. The educational work of the Department is becoming one of its most

important branches whether it be specially training teachers for schools in fishing villages or training men in the technology of curing, canning and oil manufacture; in co-operative propaganda and in the supply of zoological specimens for the use of college classes and museums. The last named has filled a long-felt want and is contributing materially to the advancement of the study of zoology throughout India; there is now no need to obtain specimens from Europe.

Deep Sea Fishing and Research.—The Trawler *Lady Goschen* purchased in 1926 for conducting deep sea fishing experiments and research, economic salt transport and other requirements of the department, in spite of various difficulties as regards equipment and crew, was able to accomplish a considerable amount of preliminary work before the monsoon set in. She did half a dozen cruises off Madras, and a couple of trawls off Calicut, before she was engaged in a detailed survey of the fishing banks, and an exploration of the trawling grounds from off Tuticorin to Cape Comorin in the South. The sea bottom off Madras was found rocky in the places explored causing damages to net. Further trawling experiments will have to be conducted in this area to determine whether suitable trawling grounds exist anywhere in the neighbourhood.

The fishing experiments off the Cape Comorin plateau were confined to an area between 20 fathoms and 100 fathoms line. 60 hauls were made in this area in 31 days between 30th October 1927 to 30th May 1928, catching 27,683 lbs. of fish, of which 2,036 lbs. were sold as fresh, while the rest were gutted and salted on board the trawler, and subsequently cured at the Church Island fish curing yard near Tuticorin. Average catch per haul per hour was 145 lbs. Valuable biological datas were obtained and recorded daily. Samples of sea water were preserved and analysed for chlorine contents. A chart for the whole area so far surveyed showing the nature of the sea bottom, the kind of fish and other marine organisms obtainable, at particular periods at which trawls were made has been got ready. Certain hydrographical and meteorological data were obtained and also recorded. They, however, have not yet progressed far enough for utilization. Other lines of biological research on food fishes, and conditions on which their abundance depends await the provision of a laboratory on board the vessel.

During the intervals between fishing cruises, the trawler did 5 trips from Tuticorin to West Coast with a total quantity of 231,080 Mds. of salt. She was also engaged in dredging of pearl banks off the Tinnevelly coast with a view to ascertain the possibility of finding mother-of-pearl oyster beds in deeper waters than the 9-11-fathoms at present fished by naked divers.

The trawler was at Bombay from July to October 1928 for preparation of estimates for alterations and additions such as a laboratory, and a refrigeration chambers by the Royal Indian Marine Dockyard. The estimates are under consideration of Government. While at Bombay, the Dockyard undertook and completed certain repairs to the engines, etc., that were considered necessary

Welfare Work.—A remarkable feature in the work of the Madras Fisheries Department is the energy which it devotes to the improvement of the condition of the fisherfolk. On Sir Frederick Nicholson's initiative, the department has always recognized the duty of spreading among them education and the habits of thrift, temperance and co-operation. The work has been specially successful on the west coast. The number of fishermen's co-operative societies in 1927-28 was 120. These societies it is reported worked satisfactorily, allowance being made for the inexperience and illiteracy of the members. But the formation and working of co-operative societies are not the only social activity among these fishermen. There is a vigorous temperance society at Mangalore The Collector of South Kanara has granted sites for the construction of village halls for the fishermen in two villages and the fishermen have themselves collected Rs. 3,000 for the building. In another village, Kizhur, the fishermen have already completed a building in which they hold meetings while one elementary school carries on its work in the same building. In Madras itself at Nadukuppam, a temperance organisation has got to work with the assistance of the Fisheries Department. To promote the education of fishermen a training institution was opened in the middle of 1918 at Calicut to train teachers to work in elementary schools for the fisherfolk. The pupil teachers under training are familiarized with the work carried on in the fishery stations at Tanur and Chaliyam. They are given practical instructions in fishing, a boat having been purchased for the purpose. By the end of June 1928, 37 schools for the fisherfolk were being maintained by the department on the west coast with a total of 3,000 pupils. In some places the villagers themselves started the schools and then handed them over to the department. In other places schools were opened by the department at the request of the fishermen. Local men are appointed as honorary managers of schools.

Bengal & Bihar & Orissa.

The fishing value of this extensive deltaic region lies primarily in the enormous area occupied by inland waters—rivers, creeks, jheels, and swamps,—to say nothing of paddy fields and tanks. These swarm with fish and, as the Hindu population are free to a large extent from the aversion to a fish-diet which is widely prevalent among the better castes in the south, the demand for fish is enormous. Rice and fish are indeed the principal mainstays of the population and not less than 80 per cent. of the people consume fish as a regular item of diet. It is calculated that 1·6 per cent. of the population is engaged in fishing and its connected trades, a percentage that rises to 2·6 in the Presidency, Raj Shahi, and Dacca Divisions. 644,000 persons in Bengal subsist by fishing with 324,000 maintained by the sale of fish, and this in spite of the fact that fishing is not considered an honourable profession. As a fresh-water fisherman the Bengali is most ingenious, his traps and other devices exceedingly clever and effective—in many cases too effective—so eager is he for immediate profit, however meagre this may be. The greatest inland fishery is that o fthe hilsa (*Clupea ilisha*) which

annually migrates from the sea in innumerable multitudes to seek spawning grounds far up the branches of the Ganges and the other great rivers. Other valued and abundant fishes are the rohu (*Labeo rohita*) and the katla (*Catla catla*), mrigela (*Cirrit uan nelgeta*); prawns and shrimps abound everywhere. Of important fishes taken in the lower reaches of the rivers and in the great network of creeks spread throughout the Sunderbans, the bekti (*Late calcrifer*) and the mullets are the most esteemed ; apart from these estuarine fish the most valuable sea-fishes are the mango-fishes (*Polynemus*,) pomfrets. The sea-fisheries are as yet little exploited, the fishermen of Orissa, where alone coastal fishing is of any local importance, having no sea craft save catamarans of inferior design and construction.

Following the inquiry begun in 1906 by Sir K. G. Gupta, an investigation of the steam trawl potentialities of the head of the Bay of Bengal was undertaken, the trawler *Golden Crown* being employed for the purpose. The results showed that there are extensive areas suitable for trawling and capable of yielding large quantities of high class fish. Much attention was devoted during these trawl cruises to the acquisition of increased knowledge of the marine fauna, the results being published in the Records and Memoirs of the Indian Museum. For various reasons, the chief perhaps being the hostility of vested interests, the lack of cold storage facilities and the loss of time involved by the trawler having to bring her catches to Calcutta instead of sending them by a swift tender, the experiment was financially a failure and was dropped. With ever-increasing demand for fish in Calcutta and the concurrent rise in prices, the prospects of remunerative steam-trawling are now much more steam trawling companies being floated in the immediate future. The trade is a difficult one to organize and without a rare combination of technical fishery knowledge and far-sighted and comprehensive organization the danger run by the investing public will be considerable. Originally one Fisheries Department served the needs of the two provinces of Bengal and Bihar and Orissa. Separation was effected in after which fisheries in Bengal were administered by the Director of Agriculture. The Bengal Fishery Department was abolished under retrenchment in 1923. In Bihar and Orissa, Fisheries form a section of the Department of Industries.

Government has ordered that the Bengal Fisheries Department be reconstituted on an improved basis as soon as funds permit. A Bengal Fisheries Department has of necessity a more limited scope for its activities than in the case of Madras. Practically no coastal minor industries exist, neither do the natural conditions lead us to suppose that any can be created without extreme difficulty, and in the absence of a great trawl industry which alone might be able to call into existence factories devoted to the uplift of the general utilization of fish byeproducts. Apart from this, much can be done by its officers for the uplift of the general fishing population with a view to free them from the tyranny of the mahajans (fish contractors and middle-men) and enable them to put more capital into their business and to conduct it co-operatively. This is necessarily extremely slow work, but the old Department made a beginning and once a few societies can be made successful, the news of the benefits conferred on the members will constitute the best possible form of propaganda. The temporary abolition of the Bengal Fisheries Department was regretted by many and it is hoped that it will soon be revived. The fishery wealth of Bengal is enormous and nothing but good can come of intensive investigation and propaganda.

Fresh-water mussels are used extensively at Dacca in the manufacture of cheap pearl buttons and in many cases pearls also are found in the mussels which the pearl dealers gather and sell in the various parts of India. The Dacca bangle factories carry on an important local industry of very ancient standing; their material is almost entirely obtained from the South Indian and Ceylon chank fisheries already alluded to.

Bombay.

Whereas Bengal's fisheries are at present confined principally to inland waters, those of Bombay are concerned, save in Sind, almost entirely with the exploitation of the wealth of the sea. Bombay is favoured with a coast line abounding with excellent harbours for fishing craft, a fair-weather season lasting for some seven months, and a fishing population more alive to their opportunities and more daring than those of the sister Presidencies. Bombay sea-fisheries are of very great importance financially as well as economically and, though there is less necessity for a special department to develop marine industries, there is ample scope for most useful work in improving curing methods, in introducing canning, and in the development of minor marine industries particularly those connected with the utilization of bye-products. With this end in view the Director of Industries administered the subject of "Fisheries" from 1918 and had for a time two officers in the Department engaged upon fishery investigation and development. A steam trawler was bought for work in Bombay waters in 1920 and began work in May 1921 off Bombay. The experiment continued until February 1922, and the trawler was subsequently sold to the Government of Burma. At the outset the results seemed promising, but the experiment as a whole showed that the cost of maintaining a trawler of the type used could not be met by sales of fish at current market rates. Cold storage has since been installed at the principal fish market in Bombay, but for a trawler special facilities are needed also for rapid coaling, supplying ice and stores, and for unloading catches. More than this a change is needed in the mediæval conditions under which the local fish market is conducted and there is much to be done in popularising little known species of edible fish, such as karel, palu, tambusa, and particularly the ray or skate which formed on the average 25 per cent. of the total catch but which is so little esteemed locally that it sold on the average at the rate of 100 lbs. for a rupee.

Owing to retrenchment the appointments of Fisheries officers have been abolished.

The more important sea-fish are pomfrets, soles and sea-perches among which are included the valuable Jew-fishes (*Sciœna* spp.) often attaining a very large size and notable as the chief source of "fish-maws" or "sounds." largely exported from Bombay for eventual manufacture into isinglass. The finest of Bombay fishing boats hail from the coast between Bassein and Surat. These boats are beautifully constructed, attain a considerable size, and are capable of keeping the sea for weeks together. In the season they fish principally off the Kutch and Kathiawar coasts and in the mouth of the Gulf of Cambay. Their main method of fishing is by means of huge anchored stow nets, which are left down for several hours and hauled at the turn of the tide. The chief catches are bombil (Bombay ducks), pomfrets and jew-fishes. The first named are dried in the sun after being strung through the mouth upon lines stretched between upright posts. South of Bombay the fishermen of Ratnagiri and Rajapur make use of another and lighter class of fishing boat, specially designed for use in drift-net fishing. Fine hauls of bonito seer (a large form of mackerel) and allied fishes are often made during the season from September to January and later of shark and rayfish. For the latter specially large and powerful nets are employed. For part of the fair season, when fishing is not usually remunerative, many of the larger Bombay fishing boats are employed as small coasters, a fact which show hows large they run in size.

In **Sind** considerable sea-fishing is carried on in the neighbourhood of Karachi chiefly for large and coarse fish, as shark, rays and jew-fishes. The edible oyster trade of Karachi was once extensive, the creeks of the Indus producing a species of oyster superior to that found in Bombay and Madras backwaters and estuaries. Unrestricted exploitation of beds of limited extent inflicted great harm, and now, when various salutary restrictions are imposed, the beds are slow to respond. Occasionally large deposits of the window pane oyster (*Placuna placenta*) are found in the Indus creeks and as these produce seed pearls in abundance, Government leased the beds to the highest bidder. The pearls are largely exported to China for use in medicine. Considerable fisheries exist in the River Indus, chiefly for the fish known as palla, which are annually leased out by Government for about Rs. 20,000.

In the Gulf of Kutch two pearl fisheries exist, one for the true pearl oyster, the other for the window-pane oyster. The former is carried on by His Highness the Maharaja of Jamnagar, the other partly by this Prince and partly by the administration of His Highness the Maharaja Gaekwar of Baroda. The latter industry owes its local existence to the enterprise of the Baroda Government which in 1905 obtained the services on deputation of Mr. J. Hornell, formerly Director of Fisheries in Madras, for the purpose of examining the Marine potentialities of the Baroda territory in Kathiawar. One of the consequences was the discovery of large deposits of pearl-bearing window-pane oysters until then unknown; of late years these beds have produced annually from Rs. 15,000 to Rs. 25,000 in revenue perhaps the best example we have in India of the profitable nature of well-directed scientific enquiry into fishery problems. The Baroda Government, continuing their enlightened interest in the fishery developments, have had two officers trained in the Madras Fisheries Department and now employ them in development work on the Baroda coast.

Experiments in canning are now in progress at one of the chief fishing centres on the Southern Kathiawar coast and already promise considerable success particularly with regard to pomfrets

Burma.

The exclusive right of fishing throughout the province of Burma belongs by custom of the country to Government, and the Burma Fisheries Act provides for the protection of this right and for conceding the enjoyment of it to the people subject to certain restrictions for the conservation of the fish. The work of the fisherfolk, involving as it does the taking of life, is generally viewed with disfavour by the Burman Buddhists. In certain tracts this attitude is intensified where the proportion of the fisherfolk is not only small but their economic conditions are more or less demoralised. Though fishing is generally denounced by Burman Buddhists, yet they consume the fish. The usual argument of the consumers is that they have not taken the life of the fish and therefore have committed no sin. Where fishing is the principal means of livelihood of the majority as in the Delta Districts, religious scruples tend to disappear.

Revenue.—The economic value of any industry or tract of country can, to some extent, be gauged by the revenue it yields. The fisheries yield a substantial revenue (about one-eighth of the total land revenue), and therefore they are one of the most important sources of national wealth. There are two methods of catching fish, namely by nets in the rivers and seas and by traps in leased fisheries. The fishery revenue demand from net licenses amounts to over four lakhs while that from the leased fisheries amounts to more than 46½ lakhs. Of the net licenses the greatest revenue comes from Mergui District where not only is the Pearling industry carried on, but leases for collecting green snails and sea slugs are issued. Open lakes, pools of water and small rivers are classed as leased fisheries and are leased by Government to the highest and best bidders at public auction. Here the Irrawaddy Division equals in importance the rest of the province, and of the five districts in the Irrawaddy Division, Maubin District alone yields as much as half of the whole division. Maubin District therefore stands easily first in respect of fishery revenue, and out of the total collected in any year from the whole province, this district alone contributes about a quarter.

The Delta consists of a series of saucer-shaped islands, many of which have embankments round the greater part of them along the north, east and west; in the hollows of these islands most of the fish come into spawn, and with the floods which overflow the embankment during October the young fry come down-country from Upper Burma.

The principal kinds of fish caught in nets on the sea-coast are (1) Kakkuyan, (2) Kathabaung, and (3) Kathahmyin. These are generally

made into salt fish which fetch Rs. 2 to Rs. 3 per viss. The creek and fresh water fish from fisheries are generally ngakhu, ngayan and ngagyi. Most of them are sold fresh, but some are converted into salt fish. The fish caught in the rivers are generally ngathalauk, gagying, and ngamyinyin, the predaceous fish.

Fees for net licenses are charged according to the size of the nets. Fisheries which consist of lakes, pools and streams are put up to auction, but as no Burman fisherman has ever been known to keep a proper system of accounts, he seldom or never can gauge the real worth of the fisheries; this coupled with his impulsive nature frequently results in his bids at auction exceeding the value of the fisheries; several fishermen have thus not only brought ruin on themselves but also on their sureties who have not infrequently been sold up. Until these fisheries are brought under some settlement system for revenue assessment, bona fide fisherman must suffer from time to time. Moreover, the local authorities demand adequate securities and the furnishing as well as the verifying of these securities invariably mean much expenditure of time and money both to the fisherfolk and to the Government staff. With a view to ameliorate uneconomic conditions by rendering the provisions of security easier, as well as to facilitate collection Government recently introduced what is known as the group system whereby the value of the fisheries is fixed at a reasonable rental, and, intead of an individual system of furnishing security, the groups hold themselves severally responsible. In order to enable the poorest of the actul workers to reap the benefit of their labours, nothing short of a co-operative system would be of any avail; this co-operative system has been tried in Tharrawaddy District with some success, by this system every fisherman employed in a fishery becomes a partner in the business and no non-fisherman can ever sweat the bona fide fisherman, poor though he be. The group system, though an improvement on the individual system of bidding and furnishing securities does not do away with the sweating system. It is reported to be attended by quarreling on the one hand and to condition to reduce the Government rent on the other hand. With the gradual introduction of the co-operative system, which is an urgent necessity in the Delta District, the poorest fisherman of every fishing village and hamlet, after gradual and systematic training will, in course of time, be able, not only to reap the full benefit of their labours, but also by mutual control and aid to develop into a more useful and contented peasantry. Fishery leases for three to five years, are now being granted instead of leases for only one year and fisherman obtaining the long-term leases have begun to realise the need of improving the fisheries by clearing the streams and pools of that Burma pest—the water hyacinth—and other weeds.

The members of a group live too far away from one another to watch one another and their co-operation aimed at by the system is not usually obtained. Another system known Fair Rent and premium system is under consideration and has actually been introduced in Maubin as an experimental measure. Under this system, the lease is fixed at a fair rent and tenders called for and premia invited and the lease is given on a consideration of the premium offered plus the character of the person tendering and his previous connection with the fishing industry. To work this successfully a good deal of information is required about the actual working of the fishery and it is to be hoped that the Fishery Settlement Enquiry which has been set on foot in 1928 will lead to improvement of the Fishery Revenue Administration and increase of Government's information about the fisheries.

The principal articles of manufacture are ngapi (fish-paste) and salt-fish; the manufacturing methods are primitive and with more industrial education and capital, these could be considerably improved.

The Punjab.

There are now 18 districts of the Punjab under the Licensing Rules, and in six districts, in which leases have been in vogue for many years past, special rules have been issued to place the leases on a definite legal basis. This should go far to raise the revenue in these districts, and save the contractors from much petty litigation.

The number of licenses issued during the year shows a steady increase over previous years, thus:—In 1925-26 the total number of licenses issued was 7,277, in 1926-27 they increased to 7,909 and in the year ending 31st March 1928 to 8,197.

The Angler's Association and the Fishing Club at Rawalpindi continue to make steady progress. Trout Culture in the hills is also steadily progressing. Excellent sport was enjoyed thoughout the year in Kulu and in the Mandi State, and the small streams which have been stocked with trout in the Kangra Valley proper now show every indication that the trout are being firmly established. For the first time since experiments were started the Department achieved some success in Carp breeding at Chhanawan and Carp experiments will be carried out in various places in the future. The tanks at Mahopur have now been converted into Mahasir Hatcheries and this experiment will be watched with great interest. A very good sign this year was the very small number of disputes between professional fishermen and zamindars. Friendly relations between them are essential and these have been sadly strained in the past. The total income of the Department during the year ending 31st March 1928 was Rs. 55,363 as against an expenditure of Rs. 55,316.

Travancore.

This State has affiliated fisheries to the Department of Agriculture and with the help of two officers trained in Madras and another officer trained in Japan, the Department has already accomplished a notable amount of development work. Special attention has been given to the regulation of fisheries in backwaters, to the establishment of co-operative societies among the fishing community and to the introduction of improved methods of sardine oil and guano production. Useful work has been done by one of the officers in elucidating the life-histories of the more valuable food fishes and prawns.

The Forests

Even in the earliest days of the British occupation the destruction of the forests in many parts of India indicated the necessity for a strong forest policy, but whether or not our earlier administrators realized the importance of the forests to the physical and economic welfare of the country, the fact remains that little or nothing was done. The year 1855 marked the commencement of a new era in the history of forestry in India, for it was then that Lord Dalhousie laid down a definite and far-sighted forest policy. Further progress was delayed for a time by the Mutiny, but from 1860 onwards forest organization was rapidly extended to the other provinces. The earlier years of forest administration were beset with difficulties, which is not surprising considering that the Department was charged with the unpopular duty of protecting the heritage of Nature from the rapacity of mankind a duty which naturally roused the antagonism of the agricultural population of India. Exploration, demarcation and settlement, followed by efforts to introduce protection and some form of regular management, were the first duties of the Forest Department. Work on these lines, which is not yet completed in the more backward parts of the country, has been pursued steadily from the commencement, and in consequence large tracts of forest have been saved from ruin and are gradually being brought under efficient management. Whatever may have been the opinions held in some quarters half a century ago as to the need for a policy such as that expressed in Lord Dalhousie's memorable enunciation of 1855, there is no longer any doubt that results have amply justified the steps taken, and that in her forests India now possesses a property of constantly increasing value, the future importance of which it is hardly possible to overestimate.

Types of Forest.—More than one-fifth of the total area of British India (including the Shan States) is under the control of the Forest Department. These areas are classified as reserved, protected or unclassed State forests. In the reserved forests rights of user in favour of individuals and the public are carefully recorded and limited at settlement while the boundaries are defined and demarcated; in the protected forests the record of rights is not so complete, the accrual of rights after settlement not being prohibited, and the boundaries are not always demarcated; while in the unclassed forests no systematic management is attempted, and as a rule the control amounts to nothing more than the collection of revenue until the areas are taken up for cultivation or are converted into reserved or protected forests. The total forest area of British India (including the Shan States) on 31st March 1927 was 251,755 square miles or 22·8 of the total area. This was classed as follows : Reserved 105,285 ; Protected 8,626 ; Unclassed State, 137,844.

Throughout this vast forest area, scattered over the length and breadth of India from the Himalayan snows to Cape Comorin and from the arid juniper tracts of Baluchistan to the eastern limits of the Shan States, there is, as may be imagined, an infinite variety in the types of forest vegetation, depending on variations of climate and soil and on other local factors. Broadly speaking, the following main types of forest may be distinguished:—

(1) Arid-country forests, extending over Sind, a considerable portion of Rajputana, part of Baluchistan and the south of the Punjab, in dry tracts where the rainfall is less than 20 inches. The number of species is few, the most important tree being the babul or kika- (*Acacia arabica*), which however in the driest regions exists only by the aid of river inundations.

(2) Deciduous forests, in which most of the trees are leafless for a portion of the year. These forests, which extend over large areas in the sub-Himalayan tract, the Peninsula of India and Burma, are among the most important, comprising as they do the greater part of the teak and sal forests.

(3) Evergreen forests.—These occur in regions of very heavy rainfall, such as the west coast of the Peninsula, the eastern sub-Himalayan tract, and the moister parts of Burma and are characterized by the great variety and luxuriance of their vegetation.

(4) Hill forests.—In these the vegetation varies considerably according to elevation and rainfall. In the Eastern Himalaya, Assam and Burma, the hill forests are characterized by various oaks, magnolias and laurels, while in Assam and Burma the Khasia pine (*Pinus khasya*) grows gregariously at elevations of 3,000 to 7,000 feet. In the North-Western Himalaya the chief timber tree is the deodar (*Cedrus deodara*), which occurs most commonly at elevations of 6,000 to 8,000 feet, and in association with oaks or blue pine (*Pinus excelsa*); towards its upper limit the deodar merges into very large areas of spruce and silver fir, while below it are found extensive forests of the long-needled pine (*Pinus longifolia*) which is tapped for resin.

(5) Littoral forests.—These occur on the sea coast and along tidal creeks. The most characteristic trees belong to the mangrove family (*Rhizophoreae*). Behind the mangrove belt is an important type of forest occasionally inundated by high tides, in which the most valuable species is the "sundri" (*Heritiera fomes*).

Forest Policy.—The general policy of the Government of India in relation to forests was definitely laid down in 1904 by the classification of the areas under the control of the Department into four broad classes, namely:—

(*a*) Forests the preservation of which is essential on climatic or physical grounds. These are usually situated in hilly country where the

retention of forest growth is of vital importance on account of its influence on the storage of the rainfall and on the prevention of erosions and sudden floods.

(c) Forests which afford a supply of valuable timbers for commercial purposes, such, for example, as the teak forests of Burma, the sail forests of Northern, Central, and North-Eastern India, and the deodar and pine forests of the North-Western Himalaya.

(c) Minor forests, containing somewhat inferior kinds of timber, and managed for the production of wood, fodder, grazing and other produce for local consumption; these forests are of great importance in agricultural districts.

(d) Pasture lands.—These are not "forests" in the generally understood sense of the term, but grazing grounds managed by the Forest Department merely as a matter of convenience.

These four classes of forest are not always sharply divided from each other, and one and the same tract may to a certain extent be managed with more than one object.

Administration.—The forest business of the Government of India is carried out in the Department of Education, Health and Lands. The Inspector-General of Forests is also President of the Forest Research Institute at Dehra Dun and is the technical adviser to the Government of India in forest matters. Under the Constitution of 1919 Forests were made a transferred subject in Bombay and Burma, where they had long been administered by the Provincial Governments, and in 1924 the Reforms Inquiry Committee presided over by the Hon. Sir Alexander Muddiman, Home Member of the Government of India, recommended that they be transferred in other provinces now unless any local Government on examination of the position can make out a convincing case against the transfer in its own province.

Territorial charges.—The various provinces are divided into one or more Forest Circles; each in charge of a Conservator of Forests; provinces containing three or more circles also have a Chief Conservator who is the head of the Department for his province. Circles are divided into a number of Forest Divisions, in charge of members of the Imperial or Provincial Forest Service; these Divisions in most cases correspond to civil districts. Each Division contains a number of Ranges in charge of junior members of the Provincial Service or of Forest Rangers or Deputy Rangers; heavy Divisions are also sometimes divided into Subdivisions. The Ranges are further subdivided into a number of beats or protective charges held by Forest Guards or in some cases by Foresters.

Non-territorial charges.—Apart from territorial charges there are various important posts of a non-territorial nature connected with Forest Research and Education, the preparation of Forest Working Plans, and other special duties.

The Forest Service.—The Forest Service comprises three branches:—

(1) The Indian (Imperial) Forest Service with a sanctioned total personnel of 399 officers consisting of the Inspector-General of Forests, Chief Conservators, Conservators, Deputy and Assistant Conservators. Of these 353 are to be recruited direct to the service and the balance obtained by promotion from the Provincial Forest Service. The officers of this service are recruited as probationers subject to the following methods prescribed in the Indian Forest Service (Recruitment) Rules, 1928:—

(a) by nomination in England in accordance with ...... these rules and such supplementary regulations as may be prescribed by the Secretary of State in Council:

(b) by competitive examination in India in accordance with ....these rules and such supplementary regulations as may be prescribed by the Governor-General in Council;

(c) by direct appointment in accordance with...... these rules of persons selected in India otherwise than by competitive examination;

(d) by the promotion in accordance with ......these rules on the recommendation of local Governments of members of the Provincial Forest Services;

(e) by the transfer of promotion in accordance with......these rules of an officer belonging to a branch of Government Service in India other than a Provincial Forest Service.

The Rules provide that all appointment to the Indian Forests Service shall be made by the Secretary of State for India in Council; that no appointment shall be made to the Indian Forest Service by any method other than the five just quoted and that, subject to this last mentioned condition, the method or methods of recruitment to be employed for the purpose of filling any particular vacancies in the Indian Forest Service or such vacancies therein as may be required to be filled during any particular period and the number of candidates to be recruited by each method, shall be determined by the Secretary of State in Council.

(2) **The Indian Forest Engineering Service.**—This service was created in 1919 and at present consists of 17 Forest Engineers.

(3) **The Provincial Service.**—Formerly it consisted of Extra Deputy and Extra Assistant Conservators of Forests. All Extra Deputy Conservators who were considered to be fully qualified to hold a major charge were transferred to the Imperial Forest Service in 1920. Except for five unpromoted officers the class of Extra Deputy Conservators has been abolished and the service now consists of Extra Assistant Conservators only. The fixation of the strength of the personnel of the service rests with the local Governments.

Officers of this service are eligible for promotion to 12½ per cent. of the posts in the Indian Forest Service, such promotion being made by the Secretary of State for India. These officers are recruited and trained in India, their recruitment being a matter for the local Governments. A certain number of posts in the

service are filled by the promotion of specially promising Rangers. Owing to the establishment of a course for the training of probationers for the Indian Forests Service at Dehra Dun since 1926, the Provincial Service course ceased to exist from 1928.

(4) The Subordinate Service, consist of Forest Rangers (about 840), Deputy Rangers (about 900), Foresters (about 2,000) and Forest Guards (about 11,500). The Rangers are at present trained at three different centres—the Forest College at Dehra Dun (for provinces other than Burma, the Central Provinces, Bihar and Orissa, Bombay and Madras), the Burma Forest School at Pyinmana (for Burma), and the Madras Forest College at Coimbatore (for Madras, Bihar and Orissa, Bombay and the Central Provinces). These three institutions were established in 1878, 1898 and 1912 respectively. The training of subordinates below the rank of Ranger is carried out in various local forest schools and training classes.

Research.—For the first fifty years of the existence of the Forest Department in India no attempt was made to organize the conduct of forest research, and thus to co-ordinate and elaborate the scientific knowledge so necessary to successful economic working. A commencement in organized forest research was at last made in 1906 by the establishment, at the instance of Sir Sainthill Eardley-Wilmot, then Inspector-General of Forests, of a Forest Research Institute at Dehra Dun. The Forest Research Institute, which is under the administrative control of the Inspector-General of Forests, is in the charge of a President. There are five main branches of research, namely Sylviculture, Forest Botany, Forest Economic Products, Entomology and Chemistry, each branch being in charge of a research officer. In addition specialists are appointed temporarily when necessary and are attached to the Institute to carry out investigations in subjects of particular economic importance. Thus a paper pulp expert has been employed for some time to investigate possible new sources of paper-making materials of which the forests of India contain abundant supplies. Besides this, there are the Seasoning, the Timber Testing, and the Wood Preservation experts engaged temporarily on short term contracts. Indian Assistants have been appointed under them to receive the necessary technical training and experience in these subjects, with the object of eventually taking the place of experts if and when properly qualified.

Since 1906 research work has been prosecuted energetically so much so that in 1920 a new scheme was sanctioned for the expansion of the staff and site of the Institute. Since then new land has been acquired, on which new buildings are being built for accommodating the various expanded branches and the new machinery obtained from the United Kingdom. As a result of this and the employment of specialists in Seasoning, Timber Testing and Wood Preservation steady progress is being made in the investigations which should ultimately lead to the fuller and better utilization of the raw products produced by Indian forests.

Forest Products.—Forest produce is divided into two main heads—(1) Major produce, that is timber and firewood, and (2) Minor produce, comprising all other products such as bamboos, leaves, fruits, fibres, grass, gums, resins, barks, animal and mineral products, etc. The average annual outturn of timber and fuel from all sources during the quinquennium ended 31st March 1924, the latest date for which statistics are available, was 36,06,40,000 cubic feet against an average of 30,72,00,000 cubic feet per annum attained in the preceding quinquennium. The highest figure ever attained under this head occurred in 1921-22, when a total of 36,13,83,000 c.ft. was reached, the year 1923-24 coming next with 35,36,90,000 c.ft. The figures for 1921-22 and 1923-24 represent respectively 2·3 and 2·4 c.ft. per acre of all classes of forests. For reserved forests only the yield in 1923-24 was 3·7 c.ft. per acre as compared with 3·3 c.ft. per acre in 1918-19, the last year of the last preceding quinquennium. The year 1921-22 was marked by a phenomenal output of teak in Burma, *viz.*, 600,000 tons (30,000,000 cubic feet), which was more than 74 per cent. above the average annual output of the preceding quinquennium. With the output of teak for the year the revenue in Burma soared to Rs. 2,21,16,786 and the surplus to Rs. 1,30,33,692. The total outturn for the five years amounted to 2,476,849 tons, an increase of 751,000 tons, or 44 per cent. over the output in the preceding quinquennium.

The figures for the last quinquennium for which a report has been issued show that in 1923-24 the ratio of timber extracted by Government agency to that removed by purchasers was 5 to 29 compared with a ratio of 5 to 27 in 1919-20. During the period the outturn removed by Government agency rose by 41 per cent. whilst that removed by purchasers increased by 19 per cent. Timber and fuel to the value of Rs. 11,140 lakhs and minor products, including bamboos and grass, valued at Rs. 375 lakhs were removed by purchasers during the period. For the quinquennium 1918-19 the figures were Rs. 10,190 lakhs and Rs. 355 lakhs respectively.

Reviewing the figures of outturn, Government in a report issued in October 1925, says: "The results on the whole, considering the general trade depression, are most satisfactory and point to more intensive working of the forests and to better exploitation."

Forest Industries.—The important role which the forests of a country play in its general commercial welfare and in providing employment for its population is not always fully recognized. Fifteen years ago it was estimated that in Germany work in the forests provided employment for 1,000,000 persons while 3,000,000 persons, earning £30,000,000 a year, were employed in working up the raw material yielded by the forests. If accurate estimates were available for India, they would no doubt show that apart from the jungle population which is directly dependent on the forests and the large numbers of wood-cutters, sawyers, carters, carriers, raftsmen and others working in and near them, employment on an excessive scale is provided to persons engaged in working up the raw products. Among these latter may be mentioned carpenters, wheelwrights, coopers, boat-builders, tanners, rope-makers, lac-manufacturers, basket-makers, and

many other classes of skilled labourers. The Indian census shows over a million people and their dependents so employed in British India and nearly a further half million in Native States, but these are probably below the actuals, as much forest labour is not whole-time labour, devoting seven or eight months in the year to forest work and the rest to agriculture. With the opening up of the forests, the extension of systematic working, the wider use of known products, and the possible discovery of new products, a steady and extensive development of industries dependent on the forests of India may be confidently anticipated in the future.

Financial Results.—The steady growth of forest revenue, expenditure and surplus during the past 50 years is shown in the following statement, which gives annual averages for quinquennial periods:—

Financial Results of Forest Administration in British India from 1864-65 *to* 1923-24 (*in lakhs of rupees*).

Quinquennial period.	Gross revenue average per annum).	(Expenditure average per annum)	Surplus (average per annum).	Percentage of surplus to gross revenue.
	Lakhs.	Lakhs.	Lakhs.	Lakhs.
1864-65 to 1868-69	27·4	23·8	13·6	36·4
1869-70 to 1873-74	56·3	39·3	17·0	30·2
1874-75 to 1878-79	66·6	45·8	20·8	31·2
1879-80 to 1883-84	88·2	56·1	32·1	36·4
1884-85 to 1888-89	116·7	74·3	42·4	36·2
1889-90 to 1893-94	159·5	86·0	73·5	46·1
1894-95 to 1898-99	177·2	93·0	79·2	44·7
1899-1900 to 1903-04	196·6	112·7	83·9	42 7
1904-05 to 1908-09	257·0	141·0	116·0	45·1
1909-10 to 1913-14	296·0	163·7	132·3	44·7
1914-15 to 1918-19	371·3	211·1	160·2	43·1
1919-20 to 1923-24	551·7	367·1	184·6	33·5

The gross revenue and surplus were Rs. 468·2 lakhs and Rs. 179·4 lakhs in 1918-19 and Rs. 544·9 lakhs and Rs. 195·6 lakhs in 1923-24 respectively. The surplus rose from Rs. 1,79,42,726 in 1918-19 to Rs. 2,19,12,540 in 1919-20, but during the next three years it steadily decreased, rising again to Rs. 1,84,60,547 during the last year of the quinquennium. The surplus in 1923-24 represents an average of 2·1 annas per acre of all classes of forest against 1·8 annas in 1918-19. The total surplus rose from Rs. 1,79,42,726 in 1918-19 to Rs. 1,95,60,943 in 1923-24. Government, reviewing the figures, state: " Financially, the Forest Department has had during the quinquennium to undergo a severe strain, even since the slump set in following on the short lived post-war boom in trade. But development solely with a view to increase the resources and earning capacity of the forests has never been lost sight of. Judging by the perceptible improvement in the general financial results all round, it is confidentally expected that the improvements initiated in this quinquennial period will produce much better results when the slump ends."

Prospects.—The past work of the Forest Department has already borne fruit, not only in a steady rise of revenue but also in the improved condition of the forests resulting from careful protection and tending. Much has been done in the way of opening up the forests to regular exploitation; but there is still room for enormous development in this respect, for there are extensive areas of valuable forest as yet almost untouched, and these represent a vast capital locked up and not only lying idle but even deteriorating. Perhaps the two most pressing needs at present are the introduction of improved sylvicultural systems and the extension of roads and other export works to facilitate and cheapen extraction. These two must proceed simultaneously, since they are inter-dependent, for it is obvious that timber and other produce can be extracted far more economically if it is available in large quantities within a limited radius than if it is scattered in small quantities over large tracts of country; indeed this question must often decide whether extraction is possible or not. Sylviculture teaches us how to effect this concentration and is therefore the bed-rock on which future results, financial and otherwise, must rest; it is of little avail to seek and develop new markets for timbers and other products if these cannot be produced in regular and sufficient quantities and extracted at a reasonable cost.

Forest Products: Exploitation.—The exploitation by the Forest Department, as a Commercial Department on business lines, of the great timber forests which are among the most valuable natural assets of the country, continues to attract the special attention of the various local Governments. In Madras, for instance, the working of the Forest panchayat system, whereby the increased knowledge of the difficulties of forest administration which the villager obtains when he has a voice in forest management is bringing home to him an understanding of the necessity for that administration. A further important step taken in regard to forest exploitation was the recruitment of a Chief Forest Engineer and a Logging

* Excludes Delhi Province and the British Pargana of Manpur (Central India).

† Unclassed state forests or 'public forest lands,' as they are often called, include in many provinces all unoccupied waste, often entirely devoid of trees. So the statistics do not necessarily represent the wooded area.

(a) Includes 60,593 square miles for Federated Shan States. (b) Excluding figures for Shan States and Karenni.

(c) Including Rs 2,74,025 on account of receipts under the head Imperial Forest College.

(d) Including expenditure under the following heads of the sums stated against them—Imperial (Rs. 1,23,858), Imperial Forest College Rs. 8,96,566).

(e) After taking into account deficits under the following heads of the sums stated against them—Imperial (Rs.—1,23,858), Imperial Forest College (Rs.—6,22,541)

Engineer from America. In Burma the work under way in the Government Timber Depot at Rangoon proves to be of great value to Government from the point of view of revenue and of considerable importance to the public from the point of view of industrial development. Research work on the seasoning of timbers has been started and results which promise to be of great value have already been obtained. Experimental work on the manufacture of furniture and in other similar directions are expected to give a value to a number of different timbers which are at present more or less unknown. The Myitmaka River Training Works started in 1905, which have since then been continued for the sale of Government teak timber, are of more than departmental interest. These works have also proved of great value to local people inasmuch as they have led to the reclamation of a very considerable amount of land which was previously too low lying and swampy to be fit for cultivation. In the United Provinces, the institution of the Government Sawmill and Turnery, the Government Central Wood Working Institute and the Resin Distillery have led to important results. These, and many other examples which could be quoted, go to show that local Governments are fully alive to the importance of exploiting their forest resources to the fullest possible extent for the benefit of the country

Agencies.—An agency has been established in India by the Government of India for the sale of Government timber and it is at present held by Messrs. Martin & Co., Calcutta. The agency held in England by Messrs. W. W. Howard Brothers terminated in December 1926 and the work of marketing Indian timbers in England (especially Andaman timbers) is now done under the direction of a Timber Adviser who is attached to the Office of the High Commissioner for India.

Bibliography.—A large number of bulletins and other publications has been issued by the Forest Research Institute, and of these a list can be obtained from the Superintendent, Government Printing, India, Calcutta.

PAPER MAKING.

There are five large paper mills in the country working on up-to-date Western lines, *viz.*, at Titagarh, Kankinara and Raniganj in Bengal, the Upper India Couper Mills at Lucknow and the Reay Mill at Poona. There are also two smaller mills at Bombay and Surat which make only country paper, and there are one or two other mills which recently were not working. The five large mills have a large Government connection, as the greater part of Government orders for paper is placed in India.

During the past year an interesting experimental paper-making plant has been installed at the Government of India Forest Research Institute at Dehra Dun. Specially designed to incorporate a new system patented by Mr. Raitt, Cellulose Expert to the Government of India, the object of this plant is to test the various paper-making fibres which are available over vast forest and hill areas in India and Burma, and thus encourage the establishment of pulp and paper mills on a commercial scale.

After many delays the Carnatic Paper Mills Company commenced operations at Rajahmundry, on the Godavari river, during the year, and it is estimated that the daily output will be ten tons of pulp and five tons of paper made from bamboos and paddy straw. In Southern India the Sri Minakshi Paper Mills, established many years ago as a small concern in Travancore State, appears to have taken a new lease of life and has ordered a new plant capable of turning out fifteen tons of paper per day, whilst in Assam a new company has been formed and is said to be waiting for the arrival of its plant. At Chittagong a new plant for manufacturing paper pulp from bamboos has commenced operations whilst another company has obtained a comprehensive concession for Bhabbar grass in the Punjab and is erecting a factory are the headworks of the Western Jumna Canna about 200 miles from Lahore.

The possibility of utilising the dense growths of bamboo in the hinterland of Cuttack has again been under consideration during the year, and the project has been investigated afresh by Mr. Raitt on behalf of the Government of Bihar and Orissa. Mr. Raitt estimates that in this area alone there is sufficient raw material for an output of 10,000 tons of paper pulp per annum.

Raw Materials.—The existence of the local industry depends chiefly on the supply of Sabai grass which on account of unfavourable seasons sometimes yields short crops. It is of great importance, therefore, to look for materials according a constant outturn, and various reports have been published on the available paper-making materials. Considerable attention has been devoted to **Bamboo**, since 1875 when it was found that this plant—of which there are four chief varieties in India—yielded a fibrous paper stock which made a quality of paper superior to esparto grass and at a considerably less cost. It was at that time estimated that one acre of bamboo would yield 10 tons of dried stems equivalent to 6 tons of merchantable cellulose. In 1905 Mr. R. W. Sindall was invited by Government to visit Burma with a view of enquiring into the possibility of manufacturing paper pulp. His report on the subject appeared in March 1906. He made numerous experiments with bamboo and woods of Burma and laid down lines along which further enquiry should be made. Subsequently Mr. W. Raitt, a pulp expert, was engaged at the Forest Research Institute in conducting tests on the treatment of bamboos by the soda and sulphate processes, the treatment of bamboo before

boiling, with remarks on the utilisation of nodes and internodes. His results were embodied in the "Report on the investigation of Bamboo or Production of Paper-pulp," published in 1911. Mr. R. S. Pearson of the Forest Service, Dehra Dun, as the outcome of enquiries made throughout India published in 1912 a note on the Utilization of Bamboo for the manufacture of Paper-pulp. The yield per acre from bamboo is larger than that of grasses usually used for paper. The cost of working into pulp has been estimated to yield a product cheaper than imported unbleached spruce sulphite and unbleached sabai grass pulp. In 1915 Mr. Dhruva Sumanas published a pamphlet, Dendrocalamus Strictus Bamboo of the Dangs, as the result of investigations carried on in Bansda State.

In a paper read before the Royal Society of Arts in 1921 Mr. Raitt gave an answer to the question: "**What India can do** to fill the gap in the world's shortage of paper?" He said that he thought it was "a modest estimate to say that from bamboo, taking only that which is available under 'possible' manufacturing conditions, Burma, Bengal and South West India could produce ten million tons of pulp per annum, and Assam from Savannah grasses three million. India could therefore produce pulp for the whole world."

The leading Indian **paper grass** for the ast thirty years has been the bhaib, bhabar, or sabai grass of Northern India. It is a perennial grass plentiful in drier tracts from Chota Nagpur and Rajmahal to Nepal and Garhwal. The Calcutta mills draw their supplies from Sahibganj, Chota Nagpur and the Nepal Terai. The quantity annually exported from Sahibganj is between three to four lakhs of maunds. The cutting in these districts is said to commence in October when the plants are six or seven feet high. Sabai grass yields from 36·6 to 45·5 per cent. of bleached cellulose. A report by Mr. R. S. Pearson, Forest Economist, Dehra Dun, on the use of **elephant grasses** in Assam was issued in 1919. The most important species of grass found in the areas in which investigation has been made are Khagra (*Saccharum spontaneum*) and Batta (*Saccharum narenga*), with patches of Nal (*Phragmites karka*) on the more swampy ground. Hand samples of the above grasses were sent to England to be tested on a laboratory scale, while several tons were sent to an Indian paper mill to be made into paper. The results were satisfactory and proved that a very fair quality of paper can be produced from these grasses at a relatively low price. Small samples of such paper can be obtained by persons interested in these grasses from the Forest Economist, Forest Research Institute, Dehra Dun, who can also supply further details.

Indian paper manufacture is protected by special provisions in the import tariff.

WIRELESS TELEGRAPHY AND TELEPHONY.

Beam Stations.—The year 1927 saw the commencement of Beam wireless services on the Marconi system between India and the United Kingdom. Powerful transmitting and receiving stations erected at Poona and Dhond respectively by the Indian Radio Telegraph Company are connected by land lines with the Central Telegraph Office in Bombay, whilst stations at Skegness and Grimsby are similarly connected with the General Post Office in London, and the circuits are so arranged that messages are exchanged between Bombay and London without intermediate handling at the Beam stations at either end. The huge aerial systems at Poona and Dhond, each supported on five steel towers 287 feet in height, are landmarks over a distance of many miles. The service was inaugurated by His Excellency the Viceroy on 23rd July 1927 at the Central Telegraph Office, Bombay, when His Excellency transmitted a message to the King and His Majesty's reply was received a few minutes later.

It is noteworthy that the opening of the Beam wireless service coincided with a reduction in rates by the Cable companies.

For reasons of economy, most of the inland wireless stations in India have been practically closed down and placed in charge of "Care and Maintenance" parties which carry out tests twice a month, the exceptions being Peshawar Radio, which maintains official communication with Kabul in Afghanistan and Kashgar in China, and Jotogh Radio which receives British Official Wireless sent out from Oxford and Rugby and passes the messages to Reuter's Agency for distribution to subscribing newspapers.

The coast stations, however, have been maintained in a state of high efficiency and many improvements effected. The application of the Baudot system to the high-speed continuous-wave wireless stations at Madras Fort and Mingaladon (Rangoon) has proved extremely satisfactory, and a large portion of the traffic between Southern India and Burma is regularly worked by this direct route instead of the circuitous route *via* Calcutta. The traffic is interrupted occasionally by atmospheric interference, particullary during the hot weather, but the difficulties have been largely overcome by handspeed working during the worst periods.

For many years the Bombay stations known as Bombay Radio was located on Butcher Island in the Harbour, but during 1927 a fine new station equipped with modern apparatus was erected and taken into service at Santa Cruz, just outside the limits of Bombay Municipality.

Radio telegrams exchanged with ships at sea by coast stations in India and Burma continue to increase in number, and now total about 20,000 per annum. Official telegrams are exchanged with the British Naval station at Matara (Ceylon) *via* Bombay Radio. Regular services are also maintained between Burma and the Malay Peninsula *via* Rangoon and Penang and between Burma and Sumatra, whilst radio traffic is passed between Madras and Colombo when the normal route is interrupted.

Wireless telephonic communication between pilot vessels, lighthouses and shore stations are maintained by the Port Trusts at Bombay and Rangoon.

Safety at Sea.—A noticeable feature of wireless development during the past two years has been the provision of direction-finding apparatus at Bombay and Karachi and facilities at other coast stations whereby ships at sea equipped with direction-finding apparatus can obtain bearings on coast stations and thus determine their position with a remarkable degree of accuracy. Improved arrangements for broadcasting time signals, weather reports and navigational warnings from coast stations have also proved of value to ships at sea.

Broadcasting.—For several years, limited broadcasting services were maintained by Radio Clubs in Calcutta, Bombay, Madras, Karachi and Rangoon, and although the transmitting sets employed by them were of very low power, the broadcasts were tuned-in over practically the whole of India. The clubs were assisted financially by a Government contribution based upon the revenue from license fees, but this did not nearly suffice to cover the cost of the transmissions, and the greatest credit is due to the members of those clubs for the sporting manner in which they provided additional funds and undertook the entire responsibility for the programmes. Credit is also due to the Indian States and Eastern Agency for the loan of transmitting apparatus, without which the broadcasts would have been impossible.

After negotiations extending over several years, an Indian Broadcasting Company was granted a license to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and transmitting stations were erected in Bombay and Calcutta, the services at the former being inaugurated by His Excellency the Viceroy in July 1927 and the latter by the Governor of Bengal a month later. These stations have each an aerial imput of three kilowatts, the same as that of the 2LO stations in London, of which they are practically duplicates. The programmes are so arranged that both Indian and European music are broadcast daily and the news bulletins and market and weather reports are read in two languages.

Bombay broadcasts normally on a wavelength of 357 metres, and Calcutta on 370 metres, Reception in either of these cities, and for a distance of twenty or thirty miles around, is possible on crystal sets, of which a very large number have been sold. Valve sets are necessary for those living further afield, but although there has been a considerable demand for these, the sales have not reached expectation. One of the greatest difficulties in India is the maintenance of batteries, which is no inconsiderable item when sets containing five or six valves are employed and it is partly with a view to overcoming this problem and to render broadcasting available on two-valve sets in any part of India, that the Broadcasting Company is investigating the possibility of transmitting simultaneously no long and short waves.

Reports of the reception of foreign short-waves stations have been received from all parts of the country, and upon several occasions the Bombay station of the I. B. C. has relayed the programmes from the Dutch station PCJJ., but the results have not been entirely satisfactory.

The Indian Broadcasting Company has sprung a bombshell on the public by announcing that its revenue from license fees is insufficient to meet expenses and hinting that there are in the country a very large number of people who come within the radio category of "pirates." *i.e.*, those who have neglected, wilfully or otherwise to purchase the licence from which the Company derives the major portion of its income. The position has improved, however, since the institution of a number of prosecutions.

In addition to the Radio Clubs mentioned earlier, new ones have been formed recently at Lahore and Bhusaval.

Licenses.—Broadcast receiving licenses are issued at Head Post Offices at a fee of ten rupees per year, and cover the use of receiving sets throughout British India except Baluchistan and the North-West Frontier Province. Up till the end of October 1927 1,962 such licenses had been issued, 1,103 of them in Bombay. It is believed, however, that the number has since increased very substantially. Licenses for fixed stations for transmitting and experimental purposes are much sought after, and despite a careful scrutiny of the applicants, more than 300 have been issued. The number of traders in wireless apparatus who are required to take out special Import licenses has increased considerably during the past year. This improvement must be ascribed primarily to the commencement of broadcasting (*q.v.*)

Prospects.—The Government of India has always encouraged the development of wireless in India by private enterprise and it is to this source that India must look in the immediate future for internal radio communication. There are two most promising lines of development *viz.*:—

(*a*) Erection of small sets either for speech or morse in districts where no land lines exist, and to link such districts with the existing landlines. In this connection it may be remarked that modern small radio sets are capable of using either morse or speech at will and if used for speech can be operated by the ordinary desk telephone instrument in daily use all over India.

(*b*) The use of radio as a substitute for landline to form the trunk telephone route between two cities which already have telephone facilities.

These will open up a new industry which if properly fostered would vary soon extend its sales outside the limits of India. There is no doubt that the majority of parts for small radio sets could be more cheaply manufactured in this country than they can be imported and further such an industry would find the right kind of skilled labour already in India.

The Press.

The newspaper Press in India is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor-Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785; but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much behind. In 1789 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the island much later than was the case in Calcutta. In Calcutta the English were on sufferance before Plassey, but in Bombay they were absolute masters after 1665, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of *The Herald*.

The first newspaper was called *The Bengal Gazette* which is better known from the name of its founder as *Hicky's Gazette* or *Journal*. Hicky like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hicky's, though they did not fortunately copy its bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Harkaru*, which came into existence only a little later, and both are now represented by *The Indian Daily News* with which they were amalgamated in 1866. No fewer than five papers followed in as many years, the *Bengal Gazette* of 1780, and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stocqueler in 1836.

From its commencement the press was jealously watched by the authorities, who put serious restraints upon its independence and pursued a policy of discouragement and rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Silk Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the *Times of India*. *The Bombay Gazette*, founded in 1791, ceased publication in 1914.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of the Native or Indian Press. The first newspaper in any Indian language was the *Samachar Durpan* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a purely native paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Native Indian Press which at the present day is by far th largest part of the press in India, numbering over 650 papers.

From 1835 to the Mutiny the press spread to other cities like Delhi, Agra, Gwalior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During

the Mutiny its freedom had to be temporarily controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free.

On India passing to the Crown in 1858, an era of prosperity and progress opened for the whole country in which the press participated. There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small. The number of the former did not show a great rise in the next generation, but the rise in influence and also circulation was satisfactory. Famous journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation. The *Civil and Military Gazette* was originally published in Simla as a weekly paper, the first issue being dated June 22nd, 1872. Prior to and in the days of the Mutiny the most famous paper in Northern India was the *Mofussilite*, originally published at Meerut, but afterwards at Agra and then at Ambala. After a lively existence for a few years in Simla the *Civil and Military Gazette* acquired and incorporated the *Mofussilite*, and in 1876 the office of the paper was transferred from Simla to Lahore, and the *Gazette* began to be published daily.

INDIAN PRESS LAW.

Before 1835 all printing of books and papers was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108. There were a certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued. In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discussion.

The Act deals, not only with incitements to murder and acts of violence, but also with other specified classes of published matter, including any words or signs tending to seduce soldiers or sailors from their allegiance or duty, to bring into hatred or contempt the British Government, any Native Prince, or any section of His Majesty's subjects in India, or to intimidate public servants or private individuals.

The different sections of the Act have in view (i) Control over presses and means of publication; (ii) control over publishers of newspapers; (iii) control over the importation into British India and the transmission by the post of objectionable matter; (iv) the suppression of seditious or objectionable newspapers, books, or other documents wherever found.

Repeal of Press Legislation.—By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than once consulting Local Government, a Committee was appointed in February 1921 after a debate in the Legislative Assembly, to examine the Press and Registration of Books Act, 1867, and the Indian Press Act, 1910, and report what modifications were required in the existing law. That Committee made an unanimous report in July 1921, recommending:—

(1) The Press Act should be repealed.

(2) The Newspapers Incitements to Offences Act should be repealed.

(3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below: (*a*) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, as regards criminal and civil responsibilities; (*b*) any person registering under the Press and Registration of Books Act should be a major as defined by the Indian Majority Act; (*c*) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in which case the local Government ordering the confiscation should be called upon to prove the seditious character of the documents. The powers conferred by Sections 13 to 15 of the Press Act should be retained. Customs and Postal officers being empowered to seize seditious literature within the meaning of Section 124A of the I. P. C. subject to review on the part of the local Government and challenge by any persons interested in the courts; (*e*) any person challenging the orders of Government should do so in the local High Court; (*f*) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months; (*g*) the provisions of Section 16 of the Press Act should be reproduced in the Press and Registration of Books Act.

Effect was given to these recommendations during the year 1922

Press Association of India.—At the end of 1915 this Association was formed in Bombay. According to the articles of constitution "Its objects shall be to protect the press of the country by all lawful means from arbitrary laws and their administration, from all attempts of the Legislature to encroach on its liberty or of the executive authorities to interfere with the free exercise of their calling by journalists and press proprietors, and for all other purposes of mutual help and protection which may be deemed advisable from time to time." Members pay a minimum subscription of Rs. 10 annually. The affairs of the Association are managed by a Council.

Banking.

An event of great importance in the history of Indian banking was the formation on the 27th January 1921 of the Imperial Bank of India by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras.

The idea of a Central Banking establishment for British India was mooted as early as 1836, and was the subject of a minute by Mr. James Wilson, when Finance Member, in 1859. Again, in 1867 Mr. Dickson, the well-known Secretary of the Bank of Bengal, submitted detailed proposals for an amalgamation of the three Presidency Banks. On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913. The present scheme which has come to fruition was however the result of a *rapprochement* on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening and extending the Banking system in India.

The Presidency Banks:—The history of the Presidency Banks in their relationship with Government falls into three well-defined stages. Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862 the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government. As compensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches. The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unchanged. In 1866 the agreements were revised and the paper currency business was removed from their control and placed under the direct management of Government. The third period dates from the Presidency Banks Act of 1876 by which nearly all the most important limitations of the earlier period were reimposed. Put very briefly, the principal restrictions imposed by this Act prohibited the Banks from conducting foreign exchange business, from borrowing or receiving deposits payable out of India, and from lending for a longer period than six months, or upon mortgage or on the security of immovable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank as security. At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks. The Banks no longer enjoyed the full use of the Government balances. Reserve Treasuries were constituted at the Presidency towns into which the surplus revenues were drawn and the balances left at the disposal of the Banks were strictly limited.

This system continued with only minor modifications until 1920. During the war, however, the policy was deliberately adopted of reducing the amount of the balances held in the Reserve Treasuries and leaving much larger balances with the Headquarters of the Presidency Banks in order to assist the money market.

The Imperial Bank:—Under the Imperial Bank of India Act (XLVII of 1920), the control of the Bank is entrusted to a Central Board of Governors with Local Boards at Calcutta, Bombay and Madras and such other places as the Central Board, with the previous sanction of the Governor-General in Council may determine. The Central Board of Governors consists of—

(*a*) Managing Governors not exceeding two in number, appointed by the Governor-General in Council on recommendation by the Central Board;

(*b*) the Presidents, Vice-Presidents and Secretaries of the Local Boards;

(*c*) the Controller of the Currency, or other officer nominated by the Governor-General in Council; and

(*d*) not more than four non-officials, nominated by the Governor-General in Council.

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board.

The Controller of the Currency and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not to vote under the agreement with Government. The Governor-General in Council is entitled to issue instructions to the Bank in respect of any matter which in his opinion vitally affects his financial policy or the safety of the Government balances, and if the Controller of the Currency or such other officer of Government as may be nominated by the Governor-General in Council to be a Governor of the Central Board shall give notice in writing to the Managing Governors that he considers that any action proposed to be taken by the Bank will be detrimental to the Government as affecting the matters aforesaid, such action shall not be taken without the approval in writing of the Governor-General in Council. Under the Imperial Bank of India Act provision was made for the increase of the capital of the Bank. The capital of the three Presidency Banks consisted of 3¾ crores of rupees in shares of Rs. 500 each, fully subscribed. The additional capital authorised was 7½ crores in shares of Rs. 500 each, of which Rs. 125 has been called up, making the present capital of the Bank Rs. 11¼ crores, of which Rs. 5,62,50,000 has been paid up. The Reerve Fund of the Bank is Rs. 5,17,50,000 and the Balance Sheet of 30th June 1928 showed the Government Balance at Rs. 7,96,57,353, other deposits at Rs. 73,31,10,612 and Cash Rs. 13,77,67,212, with a percentage of Cash to liabilities of 16,858.

Class of Business:—The Imperial Bank of India Act follows the Presidency Banks Act of 1876 in defining absolutely the class of business

in which the Bank may engage, though the older limitations are modified in some minor points. It permits for the first time the constitution of a London Office and the borrowing of money in England for the purpose of the Bank's business upon the security of assets of the Bank, but not the opening of cash credits, keeping cash accounts or receiving deposits in London except from former customers of the Presidency Banks. The Act provides for an agreement between the Bank and the Secretary of State, and this agreement, which was signed on the 27th January 1921 and is for a period of ten years determinable thereafter by either party with one year's notice, provides, *inter alia*, for the ollowing important matters:—

(1) All the general banking business of the Government of India is to be carried out by the Imperial Bank.

(2) The Bank will hold all the Treasury Balances at Headquarters and at its branches. This involves the abolition of the Reserve Treasury system.

(3) Within five years the Bank undertakes to open 100 new branches of which the Government of India may determine the location of one in four. The branches and agencies of the three Presidency Banks prior to the date of amalgamation numbered 69, including the Colombo branch of the Bank of Madras. The Bank of Bengal had no branches prior to the proposal to transfer Government business to the Bank in 1861-62 but no less than 18 branches were established before 1868.

(4) The management of the Public Debt will continue to be conducted by the Bank for specified remuneration.

THE DIRECTORATE.

Managing Governors .. .. .. { Sir N. M. Murray, Kt. / Sir Osborne Smith, Kt.

In Schedule 1, Part 1, of the Act, the various descriptions of business which the Bank may transact are laid down, and in Part 2 it is expressly provided that the Bank shall not transact any kind of banking business other than that sanctioned in Part 1.

Briefly stated, the main classes of business sanctioned are :—

(1) Advancing money upon the security of :—

(*a*) Stocks, &c., in which a trustee is authorised by Act to invest trust monies.

(*b*) Securities issued by State aided Railways, notified by the Governor-General-in-Council.

(*c*) Debentures, or other securities issued under Act, by, or on behalf of, a District Board.

(*d*) Goods, or documents of title thereto, deposited with, or assigned to the Bank.

(*e*) Accepted Bills of Exchange or Pro. Notes.

(*f*) Fully paid shares and debentures of Companies with limited liability or immoveable property or documents of title relating thereto, as collateral security where the original security is one of those specified in *a*, *b*, *c*, *d* and, if authorised by the Central Board, in *e*.

(2) With the sanction of the Local Government, advancing money to Courts of Wards upon security of estates in their charge.

(3) Drawing, accepting, discounting, buying and selling bills of exchange and other negotiable securities payable in India and Ceylon and, subject to the directions of the Governor-General in Council, the discounting, buying and selling of bills of exchange payable outside India for and from or to such Banks as may be approved.

(4) Investing the Banks' funds in the securities referred to in (1) *a*, *b*, *c*.

(5) Making Bank Post Bills and Letters of Credit payable in India and Ceylon.

(6) Buying and selling gold and silver.

(7) Receiving deposits.

(8) Receiving securities for safe custody.

(9) Selling such properties as may come into the Bank's possession in satisfaction of claims.

(10) Transacting agency business on commission.

(11) Acting as Administrator, for winding up estates.

(12) Drawing bills of exchange and granting letters of credit payable out of India for the use of principles in connection with (11) and also for private constituents for *bona fide* personal needs.

(13) Buying, for the purpose of meeting such bills, &c., bills of exchange payable out of India at any usance not exceeding six months.

(14) Borrowing money in India.

(15) Borrowing money in England upon security of assets of the Bank, but not otherwise.

The principal restrictions placed on the business of the Bank in Part 2 are as follows :—

(1) It shall not make any loan or advance :—

(*a*) For a longer period than six months;
(*b*) upon the security of stock or shares of the Bank;
(*c*) save in the case of estates specified in Part 1 (Courts of Ward) upon mortgage or security of immoveable property or documents of title thereof.

(2) The amount which may be advanced to any individual or partnership is limited.

(3) Discounts cannot be made or advances on personal security given, unless such discounts or advances carry with them the several responsibilities of at least two persons or firms unconnected with each other in general partnership.

The Balance Sheet of the Bank as at 30th June 1928 was as follows :—

LIABILITIES.	Rs.	a.	p.	ASSETS.	Rs.	a.	p.

THE EXCHANGE BANKS.

T... carrying on Exchange business in... merely branch agencies of Banks ha... head offices in London, on the Co... in the Far East and the United Sta... inally their business was confined aln... sively to the financing of the exter... of India; but in recent years mo..., while continuing to finance this pa... s trade, have also taken an active pa... nancing of the internal portion also at... where their branches are situated. ...e the Banks carried on their operatio... dia almost entirely with money bo... sewhere, principally in London—th... ffices of the Banks attracting deposits for use in India by offering rates of interest much higher than the English Banks were able to quote. Within recent years however it has been discovered that it is possible to attract deposits in India on quite as favourable terms as can be done in London and a very large proportion of the financing done by the Exchange Banks is now carried through by means of money actually borrowed in India. No information is available as to how far *each* Bank has secured deposits in India, but the following statement published by the Director-General of Statistics in India shows how rapidly such deposits have grown in the aggregate within recent years.

TOTAL DEPOSITS OF ALL EXCHANGE BANKS SECURED IN INDIA.
In Lakhs of Rupees.

Year	Deposits
1895	1030
1900	1050
1905	1704

Exchange Banks' Investments.

Turning now to the question of the investment of the Banks' resources, so far as it concerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India.

The financing of the import trade originated and is carried through however for the most part by Branches outside India, the Indian Branches' share in the business consisting principally in collecting the amount of the bills at maturity and in furnishing their other branches with information as to the means and standing of the drawees of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned. The Exchange Banks have practically a monopoly of the export finance in India and in view of the dimensions of the trade which has to be dealt with the Banks would under ordinary circumstances require to utilise a very large proportion of their resources in carrying through the business. They are able however by a system of rediscount in London to limit the employment of their own resources to a comparatively small figure in relation to the business they actually put through. No definite information can be secured as to the extent to which rediscounting in London is carried on but the following figures appearing in the balance sheets dated 31st December 1927 of the undernoted Banks will give some idea of this

LIABILITY ON BILLS OF EXCHANGE RE-DISCOUNTED AND STILL CURRENT.

	£
Chartered Bank of India, Australia and China.	7,045,000
Eastern Bank, Ld.	789,000
Hongkong and Shanghai Banking Corporation.	6,718,000
Mercantile Bank of India, Ld.	3,268,000
National Bank of India, Ld...	6,915,000
P. & O. Banking Corporation, Ld.	7,623,000
	32,358,000

The above figures do not of course relate to re-discounts of Indian bills alone, as the Banks operate in other parts of the world also, but it may safely be inferred that bills drawn in India form a very large proportion of the whole.

The bills against exports are largely drawn at three months' sight and may either be "clean" or be accompanied by the documents relating to the goods in respect of which they are drawn. Most of them are drawn on well known firms at home or against credits opened by Banks or financial houses in England and bearing as they do an Exchange Bank endorsement they are readily taken up by the discount houses and Banks in London. Any bills purchased in India are sent home by the first possible Mail so that presuming they are rediscounted as soon as they reach London the Exchange Banks are able to secure the return of their money in about 16 or 17 days instead of having to wait for three months which would be the case if they were unable to rediscount. It must not be assumed however that all bills are rediscounted as soon as they reach London as at times it suits the Banks to hold up the bills in anticipation of a fall in the London discount rate while on occasions also the Banks prefer to hold the bills on their own account as an investment until maturity.

The Banks place themselves in funds in India for the purpose of purchasing export bills in a variety of ways of which the following are the principal :—

(1) Proceeds of import bills as they mature.

(2) Sale of drafts and telegraphic transfers payable in London and elsewhere out of India.

(3) Purchase of Council Bills and Telegraphic Transfers payable in India from the Secretary of State.

(4) Imports of bar gold and silver bullion.

(5) Imports of sovereigns from London, Egypt or Australia.

The remaining business transacted by the Banks in India is of the usual nature and need not be given in detail.

An interesting event in Indian Banking history is the recent entry in the Banking field here of one of the English "Big Five." This has been brought about by the acquisition of the business of Cox & Co., by Lloyds Bank.

The following is a statement of the position of the various Exchange Banks carrying on business in India as at 31st December 1927:—

In Thousands of £.

JOINT STOCK BANKS.

Previous to 1906 there were few Banks of this description operating in India, and such as were then in existence were of comparatively small importance and had their business confined to a very restricted area. The rapid development of this class of Bank, which has been so marked a feature in Banking within recent years, really had its origin in Bombay and set in with the establishment of the Bank of India and the Indian Specie Bank in 1906. After that time there was a perfect stream of new flotations, and although many of the new Companies confined themselves to legitimate banking business, on the other hand a very large number engaged in other businesses in addition and can hardly be properly classed as Banks.

These Banks made very great strides during the first few years of their existence, but it was generally suspected in well informed circles that the business of many of the Banks was of a very speculative and unsafe character and it was a matter of no great surprise to many people when it became known that some of the Banks were in difficulties.

The first important failure to take place was that of the People's Bank of India and the loss of confidence caused by the failure of that Bank resulted in a very large number of other failures, the principal being that of the Indian Specie Bank.

Since those events of ten years ago confidence has been largely restored. But in April 1923 the Alliance Bank of Simla suspended payment and is now in voluntary liquidation. The effect of the failure of this old established Bank might have been disastrous but for the prompt action of the Imperial Bank which dealt with the situation in close association with the Government of India. The Imperial Bank undertook to pay the depositors of the Alliance Bank 50 per cent. of the amounts due to them. A panic was averted and a critical period was passed through with little difficulty.

During 1923 the Tata Industrial Bank, which was established in 1918, was merged in the Central Bank of India.

The following shows the position of the better known existing Banks as it appears in the latest available Balance Sheets :—

In Lakhs of Rupees.

JOINT STOCK BANKS.

Previous to 1906 there were few Banks of this description operating in India, and such as were then in existence were of comparatively small importance and had their business confined to a very restricted area. The rapid development of this class of Bank, which has been so marked a feature in Banking within recent years, really had its origin in Bombay and set in with the establishment of the Bank of India and the Indian Specie Bank in 1906. After that time there was a perfect stream of new flotations, and although many of the new Companies confined themselves to legitimate banking business, on the other hand a very large number engaged in other businesses in addition and can hardly be properly classed as Banks.

These Banks made very great strides during the first few years of their existence, but it was generally suspected in well informed circles that the business of many of the Banks was of a very speculative and unsafe character and it was a matter of no great surprise to many people when it became known that some of the Banks were in difficulties.

The first important failure to take place was that of the People's Bank of India and the loss of confidence caused by the failure of that Bank resulted in a very large number of other failures, the principal being that of the Indian Specie Bank.

Since those events of ten years ago confidence has been largely restored. But in April 1923 the Alliance Bank of Simla suspended payment and is now in voluntary liquidation. The effect of the failure of this old established Bank might have been disastrous but for the prompt action of the Imperial Bank which dealt with the situation in close association with the Government of India. The Imperial Bank undertook to pay the depositors of the Alliance Bank 50 per cent. of the amounts due to them. A panic was averted and a critical period was passed through with little difficulty.

During 1923 the Tata Industrial Bank, which was established in 1918, was merged in the Central Bank of India.

The following shows the position of the better known existing Banks as it appears in the latest available Balance Sheets :—

INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come. The use of the word "Shroff" is usually associated with a person who charges usurious rates of interest to impecunious people, but this is hardly fair to the people known as "shroffs" in banking circles, as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India. Under present conditions the Banks in India can never hope to be able to get into sufficiently close touch with the affairs of the vast trading community in India to enable them to grant accommodation to more than a few of these traders direct and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very considerable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give. The shroff's position as an intermediary between the trading community and the Banks usually arises in something after the following manner. A shopkeeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs. 25,000 to stock his shop suitably. He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accommodation, if he is satisfied that the business is safe. The business, as a rule, is arranged through a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs. 2,500 each. A hoondee usually drawn at a currency of about 2 months is almost invariably taken by the shroffs in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money, and it is at this point that the assistance of the Banks is called into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement, and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawer. The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, *viz.*, (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shewn that the class of business above referred to is one of the safest the Banks can engage in.

The rates charged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year. Generally speaking, however, a charge of two annas per cent. per mensem above the Bank's rate of discount, or 1½ °/ₒ is a fair average rate charged in Bombay to a first class borrower. Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay.

The shroffs who engage in the class of business above described are principally Marwaries and Multanis having their Head Offices for the most part in Bikanir and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable extent.

THE BANK RATE.

Formerly each Presidency Bank fixed its own Bank Rate, and the rates were not uniform. Now the Imperial Bank fixes the rate for the whole of India. The rate fixed represents the rate charged by the Banks on demand loans against Government securities only and advances on other securities or discounts are granted as a rule at a slightly higher rate. Ordinarily such advances or discounts are granted at from one-half to one per cent. over the official rate; but this does not always apply and in the monsoon months, when the Bank rate is sometimes nominal, it often happens that such accommodation is granted at the official rate or even less.

The following statement shows the average Bank Rate since the Imperial Bank was constituted:—

Year.	1st Half-year.	2nd Half-year.	Yearly average.
1921	6·038	5·108	5·573
1922	7·132	4·510	5·821
1923	7·410	4·5	5·959
1924	8·05	5·315	6·682
1925	6·585	4·701	5·643
1926	5·651	4·	4·825
1927	6·508	4·956	5·732
1928	6·945	....	....

BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two are by far the most important. The members at these places consist of the Imperial Bank, most of the Exchange Banks and English Banking Agency firms, and a few of the better known of the local Joint Stock Banks. No Bank is entitled to claim to be a member as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

The duties of settling Bank are undertaken by the Imperial Bank at each of the places mentioned and a representative of each member attends at the office of that Bank on each business day at the time fixed to deliver all cheques he may have negotiated on other members and to receive in exchange all cheques drawn on him negotiated by the latter. After all the cheques have been received and delivered the representative of each Bank advises the settling Bank of the difference between his total receipts and deliveries and the settling Bank thereafter strikes a final balance to satisfy itself that the totals of the debtor balances agrees with the total of the creditor balances. The debtor Banks thereafter arrange to pay the amounts due by them to the settling Bank during the course of the day and the latter in turn arranges to pay on receipt of those amounts the balances due to the creditor Banks. In practice however all the members keep Bank accounts with the settling Bank so that the final balances are settled by cheques and book entries thus doing away with the necessity for cash in any form.

The figures for the Clearing Houses in India above referred to are given below:—

Total amount of Cheques Cleared Annually.

In lakhs of Rupees.

INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come. The use of the word "Shroff" is usually associated with a person who charges usurious rates of interest to impecunious people, but this is hardly fair to the people known as "shroffs" in banking circles, as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India. Under present conditions the Banks in India can never hope to be able to get into sufficiently close touch with the affairs of the vast trading community in India to enable them to grant accommodation to more than a few of these traders direct, and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very considerable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give. The shroff's position as an intermediary between the trading community and the Banks usually arises in something after the following manner. A shopkeeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs. 25,000 to stock his shop suitably. He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accommodation, if he is satisfied that the business is safe. The business, as a rule, is arranged through a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs. 2,500 each. A hoondee usually drawn at a currency of about 2 months is almost invariably taken by the shroffs in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money, and it is at this point that the assistance of the Banks is called into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawers. The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, *viz.*, (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shewn that the class of business above referred to is one of the safest the Banks can engage in.

The rates charged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year. Generally speaking, however, a charge of two annas per cent. per mensem above the Bank's rate of discount, or 1½ °/ₒ is a fair average rate charged in Bombay to a first class borrower. Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay.

The shroffs who engage in the class of business above described are principally Marwaries and Multanis having their Head Offices for the most part in Bikanir and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable extent.

THE BANK RATE.

Formerly each Presidency Bank fixed its own Bank Rate, and the rates were not uniform. Now the Imperial Bank fixes the rate for the whole of India. The rate fixed represents the rate charged by the Banks on demand loans against Government securities only and advances on other securities or discounts are granted as a rule at a slightly higher rate. Ordinarily such advances or discounts are granted at from one-half to one per cent. over the official rate; but this does not always apply and in the monsoon months, when the Bank rate is sometimes nominal, it often happens that such accommodation is granted at the official rate or even less.

The following statement shows the average Bank Rate since the Imperial Bank was constituted:—

Year.	1st Half-year.	2nd Half-year.	Yearly average.
1921	6·038	5·108	5·573
1922	7·132	4·510	5·821
1923	7·410	4·5	5·959
1924	8·05	5·315	6·682
1925	6·585	4·701	5·643
1926	5·651	4·	4·825
1927	6·508	4·956	5·732
1928	6·945	....	....

BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two are by far the most important. The members at these places consist of the Imperial Bank, most of the Exchange Banks and English Banking Agency firms, and a few of the better known of the local Joint Stock Banks. No Bank is entitled to claim to be a member as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

The duties of settling Bank are undertaken by the Imperial Bank at each of the places mentioned and a representative of each member attends at the office of that Bank on each business day at the time fixed to deliver all cheques he may have negotiated on other members and to receive in exchange all cheques drawn on him negotiated by the latter. After all the cheques have been received and delivered the representative of each Bank advises the settling Bank of the difference between his total receipts and deliveries and the settling Bank thereafter strikes a final balance to satisfy itself that the totals of the debtor balances agrees with the total of the creditor balances. The debtor Banks thereafter arrange to pay the amounts due by them to the settling Bank during the course of the day and the latter in turn arranges to pay on receipt of those amounts the balances due to the creditor Banks. In practice however all the members keep Bank accounts with the settling Bank so that the final balances are settled by cheques and book entries thus doing away with the necessity for cash in any form.

The figures for the Clearing Houses in India above referred to are given below:—

Total amount of Cheques Cleared Annually.

In lakhs of Rupees.

INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come. The use of the word "Shroff" is usually associated with a person who charges usurious rates of interest to impecunious people, but this is hardly fair to the people known as "shroffs" in banking circles, as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India. Under present conditions the Banks in India can never hope to be able to get into sufficiently close touch with the affairs of the vast trading community in India to enable them to grant accommodation to more than a few of these traders direct and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very considerable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give. The shroff's position as an intermediary between the trading community and the Banks usually arises in something after the following manner. A shopkeeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs. 25,000 to stock his shop suitably. He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accommodation, if he is satisfied that the business is safe. The business, as a rule, is arranged through a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs. 2,500 each. A hoondee usually drawn at a currency of about 2 months is almost invariably taken by the shroffs in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money, and it is at this point that the assistance of the Banks is called into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawer. The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, *viz.*, (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shewn that the class of business above referred to is one of the safest the Banks can engage in.

The rates charged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year. Generally speaking, however, a charge of two annas per cent. per mensem above the Bank's rate of discount, or 1½ °/ₒ is a fair average rate charged in Bombay to a first class borrower. Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay.

The shroffs who engage in the class of business above described are principally Marwaries and Multanis having their Head Offices for the most part in Bikanir and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable extent.

The Railways.

The history of Indian Railways very closely reflects the financial vicissitudes of the country. Not for some time after the establishment of Railways in England was their construction in India contemplated, and then to test their applicability to Eastern conditions three experimental lines were sanctioned in 1845. These were from Calcutta to Raniganj (120 miles), the East Indian Railway; Bombay to Kalyan (33 miles), Great Indian Peninsula Railway; and Madras to Arkonam (39 miles), Madras Railway. Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853, wherein, after dwelling upon the great social, political and commercial advantages of connecting the chief cities by rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the Mutiny, the barriers imposed on free communication were severely felt. As there was no private capital in India available for railway construction, English Companies, the interest on whose capital was guaranteed by the State, were formed for the purpose. By the end of 1859 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions. These companies were (1) the East Indian; (2) the Great Indian Peninsula; (3) the Madras; (4) the Bombay, Baroda and Central India; (5) the Eastern Bengal; (6) the Indian Branch, now the Oudh and Rohilkund State Railway; (7) the Sind, Punjab and Delhi, now merged in the North Western State Railway; (8) the Great Southern of India, now the South Indian Railway. The scheme laid the foundations of the Indian Railway system as it exists to-day.

Early Disappointments.

The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition on which investors would come forward. This guarantee was five per cent. coupled with the free grant of all the land required; in return the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met; the interest charges were calculated at 22*d*. to the rupee; the Railways were to be sold to Government on fixed terms at the close of twenty-five years and the Government were to exercise close control over expenditure and working. The early results were disappointing. Whilst the Railways greatly increased the efficiency of the administration, the mobility of the troops, the trade of the country, and the movement of the population, they failed to make profits sufficient to meet the guaranteed interest. Some critics attributed this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of local conditions; the result was that by 1869 the deficit on the Railway budget was Rs. 166½ lakhs. Seeking for some more economical method of construction, the Government secured sanction to the building of lines by direct State Agency, and funds were allotted for the purpose, the metre-gauge being adopted for cheapness. Funds soon lapsed and the money available had to be diverted to converting the Sind and Punjab lines from metre to broad-gauge for strategic reasons. Government had therefore again to resort to the system of guarantee, and the Indian Midland (1882-85), since absorbed by the Great Indian Peninsula; the Bengal-Nagpur (1883-87) the Southern Maratha (1882); and the Assam Bengal (1891) were constructed under guarantees, but on easier terms than the first companies. Their total length was over 4,000 miles,

Famine and Frontiers.

In 1879, embarrassed by famine and by the fall of the exchange value of the rupee, Government again endeavoured to enlist unaided private enterprise. Four companies were promoted:—the Nilgiri, the Delhi-Umballa-Kalka, the Bengal Central, and the Bengal North-Western. The first became bankrupt, the second and third received guarantees, and the Tirhut Railway had to be leased to the fourth. A step of even greater importance was taken when Native States were invited to undertake construction in their own territories, and the Nizam's Government guaranteed the interest on 330 miles of line in the State of Hyderabad. This was the first of the large system of Native State Railways. In the first period up to 1870, 4,255 miles were opened, of which all save 45 were on the broad-gauge; during the next ten years there were opened 4,239, making the total 8,494 (on the broad-gauge 6,562, the metre 1,865, and narrow 67). Then ensued a period of financial ease. It was broken by the fall in exchange and the costly lines built on the frontier. The Penjdeh incident, which brought Great Britain and Russia to the verge of war, necessitated the connection of our outposts at Quetta and Chaman with the main trunk lines. The sections through the desolate Harnai and Bolan Passes were enormously costly; it is said that they might have been ballasted with rupees; the long tunnel under the Khojak Pass added largely to this necessary, but unprofitable, outlay.

Rebate Terms Established.

This induced the fourth period—the system of rebates. Instead of a gold subsidy, companies were offered a rebate on the gross earnings of the traffic interchanged with the main line, so that the dividend might rise to four per cent. but the rebate was limited to 20 per cent. of the gross earnings. Under these conditions, there were promoted the Ahmedabad-Prantej, the South Behar, and the Southern Punjab, although only in the case of the first were the terms strictly adhered to. The Barsi Light Railway, on the two feet six inches gauge, entered the field without any guarantee, and with rolling stock designed ot illustrate the carrying power of this gauge. The rebates terms being found unattractive in view of the competition of 4 per cent. trustee stocks; they were revised in 1896 to provide for an

purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of nearly ten millions. At the end of seventy-four years from 1880, when the annuity expires, the Government will come into receipt of a clear yearly income of upwards of £2,700,000, equivalent to the creation of a capital of sixty to seventy millions sterling. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal. But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the Indian railways in order to counterbalance the loss during the period when the revenue did not meet the interest charges. According to one estimate it should be £50 millions. But even if that figure be taken, Government have a magnificent asset in their railway property.

Improving Open Lines.

These changes induced a corresponding change in Indian Railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete. A direct broad-gauge route from Bombay to Sind is needed, but chiefly for strategic purposes. The poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, keep this scheme in the background. There does not exist any through rail connection between India and Burma, although several routes have been surveyed; the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Manipur route, and the Hukong valley route. The metre-gauge systems of Northern and Southern India must also be connected and Karachi given direct broad-gauge connection with Delhi, a project that is now under investigation. But these works are subordinate to the necessity for bringing the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of India found the main lines totally unprepared. Costly works were necessary to double lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London, under the chairmanship of Lord nchcape, to consider ways and means. This mmittee found that the amount which d be remuneratively spent on railway contion in India was limited only by the capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum could not always be provided.

Government Control and Re-organisation of Railway Board.

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counterchecks established, leading up to the Railway Branch of the Public Works Department of the Government of India. As traffic developed, the Indian Railways outgrew this dry nursing, and when the original contracts expired, and the interests of Government and the Companies synchronised, it became not only vexatious but unnecessary. Accordingly in 1901-02 Mr. Thomas Robertson was deputed by the Secretary of State to examine the whole question of the organization and working of the Indian Railways, and he recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a Secretary. The Board was formally constituted in March 1905. The Board was made subordinate to the Government of India in which it was represented by the Department of Commerce and Industry. It prepared the railway programme of expenditure and considered the greater questions of policy and economy affecting all the lines. Its administrative duties included the construction of new lines by State agency, the carrying out of new works on open lines, the improvement of railway management with regard both to economy and public convenience, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines, and the general supervision over the working and expenditure of the Company's lines. Two minor changes have taken place since the constitution of the Railway Board. In 1908, to meet the complaint that the Board was subjected to excessive control by the Department of Commerce and Industry, the powers of the Chairman were increased and he was given the status of a Secretary to Government with the right of independent access to the Viceroy; he usually sits in the Imperial Legislative Council as the representative of the Railway interest. In 1912 in consequence of complaints of the excessive interference of the Board with the Companies, an informal mission was undertaken by Lord Inchcape to reconcile differences. Various changes were introduced during the years 1912-1920 such as the modification of the rule that the President and members of the Railway Board should all be men of large experience in the working of railways due to the importance of financial and commercial considerations in connection with the control of Indian Railway policy. This decision was, however, revised in 1920 and an additional appointment of Financial Adviser to the Railway Board created instead. The question of the most suitable organization was further fully examined by the Acworth Committee in 1921

INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come. The use of the word "Shroff" is usually associated with a person who charges usurious rates of interest to impecunious people, but this is hardly fair to the people known as "shroffs" in banking circles, as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India. Under present conditions the Banks in India can never hope to be able to get into sufficiently close touch with the affairs of the vast trading community in India to enable them to grant accommodation to more than a few of these traders direct and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very considerable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give. The shroff's position as an intermediary between the trading community and the Banks usually arises in something after the following manner. A shopkeeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs. 25,000 to stock his shop suitably. He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accommodation, if he is satisfied that the business is safe. The business, as a rule, is arranged through a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs. 2,500 each. A hoondee usually drawn at a currency of about 2 months is almost invariably taken by the shroffs in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money, and it is at this point that the assistance of the Banks is called into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement, and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawers. The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, *viz.*, (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shewn that the class of business above referred to is one of the safest the Banks can engage in.

The rates charged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year. Generally speaking, however, a charge of two annas per cent. per mensem above the Bank's rate of discount, or $1\frac{1}{2}$ °/ₒ is a fair average rate charged in Bombay to a first class borrower. Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay.

The shroffs who engage in the class of business above described are principally Marwaries and Multanis having their Head Offices for the most part in Bikanir and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable extent.

THE BANK RATE.

Formerly each Presidency Bank fixed its own Bank Rate, and the rates were not uniform. Now the Imperial Bank fixes the rate for the whole of India. The rate fixed represents the rate charged by the Banks on demand loans against Government securities only and advances on other securities or discounts are granted as a rule at a slightly higher rate. Ordinarily such advances or discounts are granted at from one-half to one per cent. over the official rate; but this does not always apply and in the monsoon months, when the Bank rate is sometimes nominal, it often happens that such accommodation is granted at the official rate or even less.

The following statement shows the average Bank Rate since the Imperial Bank was constituted:—

Year.	1st Half-year.	2nd Half-year.	Yearly average.
1921	6·038	5·108	5·573
1922	7·132	4·510	5·821

1926	5·651	4·	4·825
1927	6·508	4·956	5·732
1928	6·945	....	....

BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two are by far the most important. The members at these places consist of the Imperial Bank, most of the Exchange Banks and English Banking Agency firms, and a few of the better known of the local Joint Stock Banks. No Bank is entitled to claim to be a member as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

The duties of settling Bank are undertaken by the Imperial Bank at each of the places mentioned and a representative of each member attends at the office of that Bank on each business day at the time fixed to deliver all cheques he may have negotiated on other members and to receive in exchange all cheques drawn on him negotiated by the latter. After all the cheques have been received and delivered the representative of each Bank advises the settling Bank of the difference between his total receipts and deliveries and the settling Bank thereafter strikes a final balance to satisfy itself that the totals of the debtor balances agrees with the total of the creditor balances. The debtor Banks thereafter arrange to pay the amounts due by them to the settling Bank during the course of the day and the latter in turn arranges to pay on receipt of those amounts the balances due to the creditor Banks. In practice however all the members keep Bank accounts with the settling Bank so that the final balances are settled by cheques and book entries thus doing away with the necessity for cash in any form.

The figures for the Clearing Houses in India above referred to are given below :—

The Railways.

The history of Indian Railways very closely reflects the financial vicissitudes of the country. Not for some time after the establishment of Railways in England was their construction in India contemplated, and then to test their applicability to Eastern conditions three experimental lines were sanctioned in 1845. These were from Calcutta to Raniganj (120 miles), the East Indian Railway; Bombay to Kalyan (33 miles), Great Indian Peninsula Railway; and Madras to Arkonam (39 miles), Madras Railway. Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853, wherein, after dwelling upon the great social, political and commercial advantages of connecting the chief cities by rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the Mutiny, the barriers imposed on free communication were severely felt. As there was no private capital in India available for railway construction, English Companies, the interest on whose capital was guaranteed by the State, were formed for the purpose. By the end of 1859 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions. These companies were (1) the East Indian; (2) the Great Indian Peninsula; (3) the Madras; (4) the Bombay, Baroda and Central India; (5) the Eastern Bengal; (6) the Indian Branch, now the Oudh and Rohilkund State Railway; (7) the Sind, Punjab and Delhi, now merged in the North Western State Railway; (8) the Great Southern of India, now the South Indian Railway. The scheme laid the foundations of the Indian Railway system as it exists to-day.

Early Disappointments.

The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition on which investors would come forward. This guarantee was five per cent. coupled with the free grant of all the land required; in return the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met; the interest charges were calculated at 22*d*. to the rupee; the Railways were to be sold to Government on fixed terms at the close of twenty-five years and the Government were to exercise close control over expenditure and working. The early results were disappointing. Whilst the Railways greatly increased the efficiency of the administration, the mobility of the troops, the trade of the country, and the movement of the population, they failed to make profits sufficient to meet the guaranteed interest. Some critics attributed this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of local conditions; the result was that by 1869 the deficit on the Railway budget was Rs. 166½ lakhs. Seeking for some more economical method of construction; the Government secured sanction to the building of lines by direct State Agency, and funds were allotted for the purpose, the metre-gauge being adopted for cheapness. Funds soon lapsed and the money available had to be diverted to converting the Sind and Punjab lines from metre to broad-gauge for strategic reasons. Government had therefore again to resort to the system of guarantee, and the Indian Midland (1882-85), since absorbed by the Great Indian Peninsula; the Bengal-Nagpur (1883-87) the Southern Maratha (1882); and the Assam Bengal (1891) were constructed under guarantees, but on easier terms than the first companies. Their total length was over 4,000 miles.

Famine and Frontiers.

In 1879, embarrassed by famine and by the fall of the exchange value of the rupee, Government again endeavoured to enlist unaided private enterprise. Four companies were promoted:—the Nilgiri, the Delhi-Umballa-Kalka, the Bengal Central, and the Bengal North-Western. The first became bankrupt, the second and third received guarantees, and the Tirhut Railway had to be leased to the fourth. A step of even greater importance was taken when Native States were invited to undertake construction in their own territories, and the Nizam's Government guaranteed the interest on 330 miles of line in the State of Hyderabad. This was the first of the large system of Native State Railways. In the first period up to 1870, 4,255 miles were opened, of which all save 45 were on the broad-gauge; during the next ten years there were opened 4,239, making the total 8,494 (on the broad-gauge 6,562, the metre 1,865, and narrow 67). Then ensued a period of financial ease. It was broken by the fall in exchange and the costly lines built on the frontier. The Penjdeh incident, which brought Great Britain and Russia to the verge of war, necessitated the connection of our outposts at Quetta and Chaman with the main trunk lines. The sections through the desolate Harnai and Bolan Passes were enormously costly; it is said that they might have been ballasted with rupees; the long tunnel under the Khojak Pass added largely to this necessary, but unprofitable, outlay.

Rebate Terms Established.

This induced the fourth period—the system of rebates. Instead of a gold subsidy, companies were offered a rebate on the gross earnings of the traffic interchanged with the main line, so that the dividend might rise to four per cent. but the rebate was limited to 20 per cent. of the gross earnings. Under these conditions, there were promoted the Ahmedabad-Prantej, the South Behar, and the Southern Punjab, although only in the case of the first were the terms strictly adhered to. The Barsi Light Railway, on the two feet six inches gauge, entered the field without any guarantee, and with rolling stock designed ot illustrate the carrying power of this gauge. The rebates terms being found unattractive in view of the competition of 4 per cent. trustee stocks; they were revised in 1896 to provide for an

absolute guarantee of 3 per cent. with a share of surplus profits, or rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent. on the capital outlay. Under these terms, a considerable number of feeder line companies was promoted, though in none were the conditions arbitrarily exacted. As these terms did not at first attain their purpose, they were further revised, and in lieu was substituted an increase in the rate of guarantee from 3 to 3½ per cent. and of rebate from 3½ to 5 per cent. with equal division of surplus profits over 5 per cent. in both cases. At last, the requirements of the market were met, and there was for a time a mild boom in feeder railway construction and the stock of all the sound companies promoted stood at a substantial premium. Conditions changed after the war and the Acworth Committee so far from approving of this system, considered that the aim of the Government should be to reduce by amalgamation the number of existing companies and that it should only be in cases where the State cannot or will not provide adequate funds that private enterprise in this direction should be encouraged.

The existing Branch Line Companies have ceased for some time to raise additional capital for capital requirements. They have either obtained overdrafts from various Banks for this purpose at heavy rates of interest or issued debentures at special rates of interest (usually about 7 per cent.) or in several cases asked for money to be advanced to them by the Railway Board. So far, therefore, from reducing the amount that the Government of India have to raise in the open market, they were increasing the amount. For the above reasons, the Government of India have abolished this system and are now prepared themselves to find the capital required for the construction of extensions or branches to existing main line systems. They have also announced their readiness to consider the question of constructing branch or feeder lines which were not expected to be remunerative from the point of view of railway earnings upon a guarantee against loss from a Local Government or local authority which might desire to have such lines constructed for purely local reasons or on account of administrative advantages likely to accrue in particular areas. This proposal was put forward as affording a suitable method of reconciling the interests of the Central and the Local Governments and of providing for local bodies and for Local Governments a method of securing the construction of railways which may be required for purely local reasons and which, while not likely to prove remunerative on purely railway earnings, are likely to give such benefits to Local Governments and local bodies as will more than repay the amounts paid under the guarantee. Some such arrangements have already been made with Local Government in Madras, Punjab, Burma and Bombay.

Railway Profits Commence.

Meantime a much more important change was in progress. The gradual economic development of the country vastly increased the traffic, both passenger and goods. The falling in of the original contracts allowed Government to renew them on more favourable terms. The development of irrigation in the Punjab and Sind transformed the North-Western State Railway. Owing to the burden of maintaining the unprofitable Frontier lines, this was the Cinderella Railway in India—the scapegoat of the critics who protested against the unwisdom of constructing railways from borrowed capital. But with the completion of the Chenab and Jhelum Canals, the North-Western became one of the great grain lines of the world, choked with traffic at certain seasons of the year and making a large profit for the State. In 1900 the railways for the first time showed a small gain to the State. In succeeding years the net receipts grew rapidly. In the four years ended 1907-08 they averaged close upon £2 millions a year. In the following year there was a relapse. Bad harvests in India, accompanied by the monetary panic caused by the American financial crisis, led to a great falling off in receipts just when working expenses were rising, owing to the general increase in prices. Instead of a profit, there was a deficit of £1,240,000 in the railway accounts for 1908-09. But in the following year there was a reversion to a profit, and the net Railway gain has steadily increased. For the year ended March 1919 this gain amounted to £10,573,000. Although in a country like India, where the finances are mainly dependent upon the character of the monsoon, the railway revenue must fluctuate, there was no reason to anticipate a further deficit, but the net railway gain decreased to £3,767,000 in 1920-21 and there was an actual loss of £6,182,000 in 1921-22. As a result of the steps taken by the Railway Board, however, on the report of the Acworth Committee in 1921, this loss was changed into a gain of £813,000 in 1922-23 and this was further increased to a gain of £4,275,000 in 1923-24, of £8,579,800 in 1924-25 and of £5,796,000 in 1925-26. Thanks to the separation of the Railway from the General Finances which is described later, and provided that the present railway policy is not influenced too much by political considerations, railways should continue to show a net yearly gain.

Contracts Revised.

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were constructed. The five per cent. dividend, guaranteed at 22*d*. per rupee, and the half-yearly settlements made these companies a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian, the great line connecting Calcutta with Delhi and the Northern provinces. When the contract lapsed, the Government exercised their right of purchasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking fund for the redemption of capital. The railway thus became a State line; but it was released to the Company which actually works it. Under these new conditions the East Indian Company brought to the State in the ten years ended 1909 after meeting all charges, including the payments on account of the terminable annuity by means of which the

purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of nearly ten millions. At the end of seventy-four years from 1880, when the annuity expires, the Government will come into receipt of a clear yearly income of upwards of £2,700,000, equivalent to the creation of a capital of sixty to seventy millions sterling. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal. But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the Indian railways in order to counterbalance the loss during the period when the revenue did not meet the interest charges. According to one estimate it should be £50 millions. But even if that figure be taken, Government have a magnificent asset in their railway property.

Improving Open Lines.

These changes induced a corresponding change in Indian Railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete. A direct broad-gauge route from Bombay to Sind is needed, but chiefly for strategic purposes. The poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, keep this scheme in the background. There does not exist any through rail connection between India and Burma, although several routes have been surveyed; the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Manipur route, and the Hukong valley route. The metre-gauge systems of Northern and Southern India must also be connected and Karachi given direct broad-gauge connection with Delhi, a project that is now under investigation. But these works are subordinate to the necessity for bringing the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of India found the main lines totally unprepared. Costly works were necessary to double lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London, under the chairmanship of Lord Inchcape, to consider ways and means. This Committee found that the amount which could be remuneratively spent on railway construction in India was limited only by the capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum could not always be provided.

Government Control and Re-organisation of Railway Board.

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counterchecks established, leading up to the Railway Branch of the Public Works Department of the Government of India. As traffic developed, the Indian Railways outgrew this dry nursing, and when the original contracts expired, and the interests of Government and the Companies synchronised, it became not only vexatious but unnecessary. Accordingly in 1901-02 Mr. Thomas Robertson was deputed by the Secretary of State to examine the whole question of the organization and working of the Indian Railways, and he recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a Secretary. The Board was formally constituted in March 1905. The Board was made subordinate to the Government of India in which it was represented by the Department of Commerce and Industry. It prepared the railway programme of expenditure and considered the greater questions of policy and economy affecting all the lines. Its administrative duties included the construction of new lines by State agency, the carrying out of new works on open lines, the improvement of railway management with regard both to economy and public convenience, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines, and the general supervision over the working and expenditure of the Company's lines. Two minor changes have taken place since the constitution of the Railway Board. In 1908, to meet the complaint that the Board was subjected to excessive control by the Department of Commerce and Industry, the powers of the Chairman were increased and he was given the status of a Secretary to Government with the right of independent access to the Viceroy; he usually sits in the Imperial Legislative Council as the representative of the Railway interest. In 1912 in consequence of complaints of the excessive interference of the Board with the Companies, an informal mission was undertaken by Lord Inchcape to reconcile differences. Various changes were introduced during the years 1912-1920 such as the modification of the rule that the President and members of the Railway Board should all be men of large experience in the working of railways due to the importance of financial and commercial considerations in connection with the control of Indian Railway policy. This decision was, however, revised in 1920 and an additional appointment of Financial Adviser to the Railway Board created instead. The question of the most suitable organization was further fully examined by the Acworth Committee in 1921

absolute guarantee of 3 per cent. with a share of surplus profits, or rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent. on the capital outlay. Under these terms, a considerable number of feeder line companies was promoted, though in none were the conditions arbitrarily exacted. As these terms did not at first attain their purpose, they were further revised, and in lieu was substituted an increase in the rate of guarantee from 3 to 3½ per cent. and of rebate from 3½ to 5 per cent. with equal division of surplus profits over 5 per cent. in both cases. At last, the requirements of the market were met, and there was for a time a mild boom in feeder railway construction and the stock of all the sound companies promoted stood at a substantial premium. Conditions changed after the war and the Acworth Committee so far from approving of this system, considered that the aim of the Government should be to reduce by amalgamation the number of existing companies and that it should only be in cases where the State cannot or will not provide adequate funds that private enterprise in this direction should be encouraged.

The existing Branch Line Companies have ceased for some time to raise additional capital for capital requirements. They have either obtained overdrafts from various Banks for this purpose at heavy rates of interest or issued debentures at special rates of interest (usually about 7 per cent.) or in several cases asked for money to be advanced to them by the Railway Board. So far, therefore, from reducing the amount that the Government of India have to raise in the open market, they were increasing the amount. For the above reasons, the Government of India have abolished this system and are now prepared themselves to find the capital required for the construction of extensions or branches to existing main line systems. They have also announced their readiness to consider the question of constructing branch or feeder lines which were not expected to be remunerative from the point of view of railway earnings upon a guarantee against loss from a Local Government or local authority which might desire to have such lines constructed for purely local reasons or on account of administrative advantages likely to accrue in particular areas. This proposal was put forward as affording a suitable method of reconciling the interests of the Central and the Local Governments and of providing for local bodies and for Local Governments a method of securing the construction of railways which may be required for purely local reasons and which, while not likely to prove remunerative on purely railway earnings, are likely to give such benefits to Local Governments and local bodies as will more than repay the amounts paid under the guarantee. Some such arrangements have already been made with Local Government in Madras, Punjab, Burma and Bombay.

Railway Profits Commence.

Meantime a much more important change was in progress. The gradual economic development of the country vastly increased the traffic, both passenger and goods. The falling in of the original contracts allowed Government to renew them on more favourable terms. The development of irrigation in the Punjab and Sind transformed the North-Western State Railway. Owing to the burden of maintaining the unprofitable Frontier lines, this was the Cinderella Railway in India—the scapegoat of the critics who protested against the unwisdom of constructing railways from borrowed capital. But with the completion of the Chenab and Jhelum Canals, the North-Western became one of the great grain lines of the world, choked with traffic at certain seasons of the year and making a large profit for the State. In 1900 the railways for the first time showed a small gain to the State. In succeeding years the net receipts grew rapidly. In the four years ended 1907-08 they averaged close upon £2 millions a year. In the following year there was a relapse. Bad harvests in India, accompanied by the monetary panic caused by the American financial crisis, led to a great falling off in receipts just when working expenses were rising, owing to the general increase in prices. Instead of a profit, there was a deficit of £1,240,000 in the railway accounts for 1908-09. But in the following year there was a reversion to a profit, and the net Railway gain has steadily increased. For the year ended March 1919 this gain amounted to £10,573,000. Although in a country like India, where the finances are mainly dependent upon the character of the monsoon, the railway revenue must fluctuate, there was no reason to anticipate a further deficit, but the net railway gain decreased to £3,767,000 in 1920-21 and there was an actual loss of £6,182,000 in 1921-22. As a result of the steps taken by the Railway Board, however, on the report of the Acworth Committee in 1921, this loss was changed into a gain of £813,000 in 1922-23 and this was further increased to a gain of £4,275,000 in 1923-24, of £8,579,800 in 1924-25 and of £5,796,000 in 1925-26. Thanks to the separation of the Railway from the General Finances which is described later, and provided that the present railway policy is not influenced too much by political considerations, railways should continue to show a net yearly gain.

Contracts Revised.

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were constructed. The five per cent. dividend, guaranteed at 22*d*. per rupee, and the half-yearly settlements made these companies a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian, the great line connecting Calcutta with Delhi and the Northern provinces. When the contract lapsed, the Government exercised their right of purchasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking fund for the redemption of capital. The railway thus became a State line; but it was released to the Company which actually works it. Under these new conditions the East Indian Company brought to the State in the ten years ended 1909 after meeting all charges, including the payments on account of the terminable annuity by means of which the

purchase of the line was made, and interest of all capital outlay subsequent to the date on purchase, a clear profit of nearly ten millions. At the end of seventy-four years from 1880, when the annuity expires, the Government will come into receipt of a clear yearly income of upwards of £2,700,000, equivalent to the creation of a capital of sixty to seventy millions sterling. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal. But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the Indian railways in order to counterbalance the loss during the period when the revenue did not meet the interest charges. According to one estimate it should be £50 millions. But even if that figure be taken, Government have a magnificent asset in their railway property.

Improving Open Lines.

These changes induced a corresponding change in Indian Railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete. A direct broad-gauge route from Bombay to Sind is needed, but chiefly for strategic purposes. The poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, keep this scheme in the background. There does not exist any through rail connection between India and Burma, although several routes have been surveyed: the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Manipur route, and the Hukong valley route. The metre-gauge systems of Northern and Southern India must also be connected and Karachi given direct broad-gauge connection with Delhi, a project that is now under investigation. But these works are subordinate to the necessity for bringing the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of India found the main lines totally unprepared. Costly works were necessary to double lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London, under the chairmanship of Lord Inchcape, to consider ways and means. This Committee found that the amount which could be remuneratively spent on railway construction in India was limited only by the capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum could not always be provided.

Government Control and Re-organisation of Railway Board.

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counterchecks established, leading up to the Railway Branch of the Public Works Department of the Government of India. As traffic developed, the Indian Railways outgrew this dry nursing, and when the original contracts expired, and the interests of Government and the Companies synchronised, it became not only vexatious but unnecessary. Accordingly in 1901-02 Mr. Thomas Robertson was deputed by the Secretary of State to examine the whole question of the organization and working of the Indian Railways, and he recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a Secretary. The Board was formally constituted in March 1905. The Board was made subordinate to the Government of India in which it was represented by the Department of Commerce and Industry. It prepared the railway programme of expenditure and considered the greater questions of policy and economy affecting all the lines. Its administrative duties included the construction of new lines by State agency, the carrying out of new works on open lines, the improvement of railway management with regard both to economy and public convenience, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines, and the general supervision over the working and expenditure of the Company's lines. Two minor changes have taken place since the constitution of the Railway Board. In 1908, to meet the complaint that the Board was subjected to excessive control by the Department of Commerce and Industry, the powers of the Chairman were increased and he was given the status of a Secretary to Government with the right of independent access to the Viceroy; he usually sits in the Imperial Legislative Council as the representative of the Railway interest. In 1912 in consequence of complaints of the excessive interference of the Board with the Companies, an informal mission was undertaken by Lord Inchcape to reconcile differences. Various changes were introduced during the years 1912-1920 such as the modification of the rule that the President and members of the Railway Board should all be men of large experience in the working of railways due to the importance of financial and commercial considerations in connection with the control of Indian Railway policy. This decision was, however, revised in 1920 and an additional appointment of Financial Adviser to the Railway Board created instead. The question of the most suitable organization was further fully examined by the Acworth Committee in 1921

and a revised organization which is described later was introduced from 1st April 1924.

Some of the difficulties involved in the constitution of a controlling authority for the railways of India may be realized from a study of the "Notes on the Relation of the Government to Railways in India" printed as an appendix to the Railway Administration report for 1922-23. These notes bring out the great diversity of conditions prevailing which involve the Railway Department in the exercise of the junctions of —

(a) the directly controlling authority of the three State-worked systems aggregating 15,414 miles in 1925,

(b) the representative of the predominant owning partner in systems aggregating 27,325 miles,

(c) the guarantor of many of the smaller companies, and

(d) the statutory authority over all railways in India.

Moreover in all questions relating to railways or extra municipal tramways in which Provincial Governments are concerned, the Railway Department is called upon to watch the interests of the Central Government and is frequently asked to advise the Local Governments. Its duties do not end there. The future development of railways depends largely on the Government of India and the Railway Department is therefore called upon to plan out schemes of development, to investigate and survey new lines and to arrange for financing their construction. The statement of the varied responsibilities of the Government of India in regard to railways might be extended almost indefinitely. It will perhaps be sufficient to mention only the complications that may and do arise owing to the very considerable railway mileage in Indian States. In the exercise of all these functions the Railway Department is a Department of the Government of India, its policy must be in accord with the policy of the Government as a whole and every decision must be made with that consideration in mind. The evolution of a satisfactory authority for the administration of these varied functions has proved extremely difficult and the question was one of those referred to the Railway Committee (1920-21) presided over by Sir William Acworth who expressed the unanimous opinion that material changes were necessary in the constitution of the Railway Board. Amongst their recommendations they advised the early appointment of a Chief Commissioner of Railways whose first duty should be to prepare a definite scheme for the reorganization of the Railway Department and Mr. C. D. M. Hindley, formerly Agent of the East Indian Railway and Chairman of the Calcutta Port Trust, was appointed Chief Commissioner on November 1st, 1922.

The principal constitutional change involved in this appointment is that the Chief Commissioner who takes the place of the President of the Railway Board is solely responsible—under the Government of India—for arriving at decisions on technical matters and for advising the Government of India on matters of railway policy and is not, as was the President, subject to be out-voted and over-ruled by his colleagues on the Board. The detailed re-organization of the Railway Board in accordance with the Chief Commissioner's proposals required careful consideration but one of the most important of his recommendations namely the appointment of a Financial Commissioner was considered of particular urgency and the Secretary of State's sanction was therefore obtained to the appointment with effect from 1st April 1923. While in the person of the Chief Engineer the Railway Board has always had available the technical advice of a senior Civil Engineer in Mechanical Engineering questions it has had to depend on outside assistance. The disadvantages of this arrangement have become increasingly evident and it was therefore decided with effect from November 1st, 1922, to create the new appointment of Chief Mechanical Engineer with the Railway Board.

The reorganization carried out in 1924 had for one of its principal objects the relief of the Chief Commissioner and the Members from all but important work so as to enable them to devote their attention to larger questions of railway policy and to enable them to keep in touch with Local Governments, railway administrations and public bodies by touring to a greater extent than they had been able to do in the past. This object was effected by placing a responsible Director at the head of each of the main branches of the Board's work, namely, Civil Engineering, Mechanical Engineering, Traffic and Establishment. The former Chief Engineer and the Chief Mechanical Engineer, who had been employed mainly in cultivative work, became Directors and together with the Directors of Traffic and Establishment have been made responsible for the direct disposal of the work of their branches under the general orders of the Railway Board.

The posts of Joint Secretary and 4 Assistant Secretaries were replaced by 6 Deputy Directors working under the Directors and in charge of branches dealing with Establishment, Works, Projects, Stores, Statistics and Traffic. One Assistant Director was also added to supervise the Technical Branch and the Drawing Office. The disposal of the general work of the Railway Board was provided for by the continuance of the post of Secretary in whose name all letters and orders of the Board are issued. The position of the Board as a Department of the Government of India has been maintained and it works under the Member for Commerce and Railway. As already stated the Chief Commissioner is the Secretary to the Government of India in the Railway Department and orders issued by the Board over the signature of the Secretary are orders of the Government of India.

Experience of the working of this organization during 1924-25 and the decision agreed to by the Legislative Assembly in September 1924 to separate railway finances from the general finances of the country made it necessary to appoint a Deputy Director and an Assitant Director of Finance. An Assistant Director of Statistics was also added during that year. Later a Director of Finance was added to the establishment occupying, as regards disposal of work, the same position as the Directors referred to above.

Further experience of the reduction of work resulting from the large delegation of powers and responsibility to the Agents of State-managed Railways and the Board of Directors of Company-managed railways enabled a re-arrangement of work to be made during 1925-26 accompanied by a reduction in the staff. Under this rearrangement the posts of 3 Deputy Directors, an Assistant Director and the Assistant Secretary were held in abeyance. The personal work was transferred from the Directors of Establishment to the Secretary and a temporary post of Deputy Secretary was created. Further a separate technical office was established to take charge of the technical work of the engineering branches. The Technical Officer also acts as *ex-officio* Secretary to the permanent Standardization Committees which have been appointed to deal progressively with all questions of standards of equipment.

The present superior staff under the Railway Board, therefore, consists of 5 Directors, 4 Deputy Directors, a Technical Officer, 2 Assistant Directors, a Secretary and a Deputy Secretary.

The question of transferring the supervision of railway accounts of State Railways from the Finance Department to the Railway Board has been under consideration for some time and in accordance with a resolution adopted, by the Legislative Assembly in September 1925, a start has been made with the transfer of the supervision of railway accounts on the East Indian Railway. At the same time a separate Audit Staff has been appointed reporting directly to the Auditor-General. If the revised procedure proves a success, it will probably be extended to other State Railways.

Management.

The Railways managed by Companies have Boards of Directors in London and are represented in India by an Agent. The Company managed railways are generally organised on a departmental basis with a Traffic Manager, Chief Engineer, Locomotive and Carriage and Wagon Superintendent, Controller of Stores and Chief Auditor, while the State managed lines have generally adopted the divisional organisation with a Chief Operating Superintendent, Chief Commericial Manager, Chief Engineer, Chief Mechinical Engineer, Controller of Stores and Chief Auditor.

Clearing Accounts Office.

It was stated in last year's Administration Report that a Clearing Accounts Office, with a Statutory Audit Office attached thereto, was opened in December 1926 to take over work relating to the check and apportionment of traffic interchanged between State-managed Railways. The work of the different railways was gradually transferred to this office, the North Western Railway being taken over first on the 1st January 1927, the East Indian Railway following on the 1st April, and the Eastern Bengal Railway on the 1st January 1928. The Great Indian Peninsula Railway work was not transferred till after the close of the year.

At the request of the Bombay, Baroda and Central India Railway an exhaustive experiment was conducted to check the accuracy of the results obtained by the revised procedure, and as the experiment was completely successful, the Board of Directors of the Bombay, Baroda & Central India Railway have recently agreed to the transfer of the check and apportionment of their foreign traffic to the Clearing Accounts Office.

During the year under review demonstrations explaining the Clearing Accounts Office procedure were given to the representatives of the Press as well as to the representatives of the various railways who visited the office to study the new procedure. An important demonstration was given to the representatives of the Southern Railways at Madras who were so impressed with the superiority of the new procedure that they unanimously recommended to their Home Boards the transfer of the work of check and apportionment of earnings from interchanged traffic to the Clearing Accounts Office, and it is hoped that a branch Clearing Accounts Office will be opened at Madras early in 1929 to deal with such traffic.

The Railway Conference.

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted in 1876. This Conference was consolidated into a permanent body in 1903 under the title of the Indian Railway Conference Association. It is under the direct control of the railways, it elects a President from amongst the members, and it has done much useful work.

The Indian Gauges.

The standard gauge for India is five feet six inches. When construction was started the broad-gauge school was strong, and it was thought advisable to have a broad-gauge in order to resist the influence of cyclones. But in 1870; when the State system was adopted it was decided to find a more economical gauge, for the open lines had cost £17,000 a mile. After much deliberation, the metre-gauge of 3 feet 3⅜ inches was adopted, because at that time the idea of adopting the metric system for India was in the air. The original intention was to make the metre-gauge lines provisional; they were to be converted into broad-gauge as soon as the traffic justified it; consequently they were built very light. But the traffic expanded with surprising rapidity, and it was found cheaper to improve the carrying power of the metre-gauge lines than to convert them to the broad-gauge. So, except in the Indus Valley, where the strategic situation demanded an unbroken gauge, the metre gauge lines were improved and they became a permanent feature in the railway system. Now there is a great metre-gauge system north of the Ganges connected with the Rajputana lines and Kathiawar. Another System in Southern India embracing the Southern Maratha and the South India Systems. These are not yet connected, but the necessary link from Khandwa by way of the Nizam's Hyderabad-Godaveri Railway, cannot be long delayed. All the Burma lines are on the metre-gauge. Since the opening of the Barsi line, illustrating the capacity of the two feet six inch gauge; there has been developed a tendency to construct feeders on this rather than on the metre-gauge.

The following statement brings out the more important features of the operation of Indian railways during the year 1927-28 together with similar information for the year 1926-27:—

		1926-27.	1927-28.
Mileage open on the 31st March—			
1. Single line		35,542·41	36,156·09
2. Double line or more		3,506·47	3,555·49
3. Total route mileage		39,048·88	39,711·58
4. Total track mileage		52,886·27	53,846·48
Capital and Revenue Earnings and Expenditure—			
5. Total capital at charge including ferries and suspense on open line	Rs.	7,88,66,66,000	8,22,86,25,000
6. Gross earnings	"	1,12,35,66,000	1,18,22,17,000
7 Gross earnings per train mile	"	6·58	6·58
8. Working expenses	"	69,70,08,000	72,30,76,000
9. Working expenses per train mile	"	4·08	4·02
10. Net earnings	"	42,65,58,000	45,91,41,000
11. Percentage of working expenses to gross earnings.		62·04	61·16
12. Percentage of net earnings on total capital outlay.		5·41	5·58
Equipment—			
13. Locomotives		9,873	9,554
14. Passenger carriages		20,599	20,112
15. Other passenger vehicles		5,879	5,406
16. Goods stock		2,30,726	228,271
Rail motors		..	32
Steam coaches		..	21
Electric motor coaches and trailors		..	213
Passenger Traffic—			
17. Number of passengers carried		6,04,371,800	623,114,800
18. Passenger miles		20,366,250,000	21,704,290,000
19. Average journey	Miles.	33·7	34·8
20. Earnings from passengers carried	Rs.	38,11,89,000	39,17,95,000
21. Average rate charged per passenger per mile	Pies.	3·59	3·47
22. Total coaching earnings	Rs.	44,48,35,000	45,67,39,000
Goods Traffic—			
23. Number of tons carried		85,833,000	89,791,000
24. Net ton miles		20,374,679,000	21,902,222,000
25. Average haul		239·4	243·9
26. Earnings from tonnage carried	Rs.	65,00,65,000	69,39.99,000
27. Average rate charged for carrying a ton of goods one mile	Pies.	6·12	6·08
28. Total goods earnings		65,35,63,000	69,58,32,000
Number of employees		772,563	800,102

At the close of the year 1927-28, the total capital invested in railways was Rupees 8,22,86,25,000 represented by a property which in terms of route mileage amounted to 39,712 miles of railway. This property brought in to the owners a return of 5·58 per cent. on the capital at charge. Similar figures for the railways owned by the State are:—

	Rs.
Total capital at charge	7,28,87,81,000
Total route mileage	28,426
Return on capital outlay	5·40

In 1926-27 there was a falling off of Rs. 179 lakhs in the net gain from the working of State-owned Railways due principally to enhanced interest charges amounting to 106 lakhs, to a decline in earnings of 66 lakhs and an increase in working expenses and other charges amounting to 26 lakhs.

State versus Company Management.—The relative advantages and disadvantages of State and Company management of the railways owned by Government which comprise the great bulk of the railway mileage in India have been the subject of discussion in official circles and the public press for many years. In India the question is complicated by the fact that the more important companies have not in recent years been the owners of the railways which they manage and the headquarters of their Boards are in London. The subject was one, perhaps the most important, of the terms of reference of the

Acworth Railway Committee. That Committee was unfortunately, unable to make a unanimous recommendation on this point, their members being equally divided in favour of State management and Company management. They were, however, unanimous in recommending that the present system of management by Boards of Directors in London should not be extended beyond the terms of the existing contracts and this recommendation has met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed. The approaching termination of the East Indian Railway contract on 31st December 1924 and of that of the Great Indian Peninsula Railway on 30th June 1925 rendered an early decision on this question imperatve. When the question was debated in the Legislative Assembly in February 1923, the non-official Indian Members were almost unanimously in favour of State management and indeed were able to carry a resolution recommending the placing of the East Indian Railway and the Great Indian Peninsula Railway under State management at the close of their present contracts. The Government of India, however, expressed themselves as being so convinced by the almost universal failure of this method in other countries that they proposed, while accepting tne necessity for taking over the managment of the East Indian Railway and the Great Indian Peninsula Railway to continue their efforts to devise a satisfactory form of Company domiciled in India to take these railways over eventually on a basis of real Company management. On 1st January 1925 the East Indian Railway was amalgamated with the Oudh and Rohilkhand Railway and brought under direct State Management while on 1st July 1925 the Great Indian Peninsula Railway followed suit. The Naini-Jubbulpore Section of the East Indian Railway was transferred to the Great Indian Peninsula Railway on 1st October 1925.

Termination of the Contract with the Burma Railways Co.—After the transfer of the East Indian and the Great Indian Peninsula Railway to State management, the next State-owned company managed railway system to fall due for the termination of contract is the Burma Railways. The contract for this line being terminable on the 31st December 1928 notice had to be given before 31st December 1927 and the future management of the line engaged the attention of the Government during the year under review. After careful consideration, and having full regard to the views of the Government and the Legislative Council of Burma who expressed themselves in favour of State-management, it was decided, with the approval of the Secretary of State to take over the BurmaRailways for management by the State after the termination of the present contract with the Burma Railways Company on the 3st December 1928. While the transfer of the line to State-management will entail the payment to the Burma Railways Company of a sum of £ 3,000,000 it is likely to result in an increase in net annual revenue of about half a crore to Government.

Separation of the Railway from the General Finances.—The question of the separation of the railway from the general finances has been under consideration for some time and as a result of the recommendations of the Acworth Committee in 1921, the question was further examined by the Railway Finance Committee and the Legislative Assembly but it was decided to postpone a definite decision for the present.

The question was examined afresh in connection with the recommendation of the Retrenchment Committee in 1923, that the railways in India should be so worked as to yield an average return of at least 5½ per cent. on the capital at charge and it was decided that a suitable time had arrived when this separation could be carried out. A resolution was accordingly introduced in the Assembly on the 3rd March 1924, recommending to the Governor-General in Council:— "that in order to relieve the general bud get from the violent fluctuations caused by the incorporation therein of the railway estimates and to enable the railway to carry out a continuous railway policy based on the necessity of making a definite return over a period of years to the State on the Capital expended on railways:—

(1) The railway finances shall be separated from the general finances of the country and the general revenues shall receive a definite annual contribution from railways which shall be the first charge on railway earnings.

(2) The contribution shall be a sum equal to five-sixths of 1 per cent. on the capital at charge of the railways (excluding capital contributed by Companies and Indian States and Capital expenditure on strategic Railways) at the end of the penultimate financial year *plus* one-fifth of any surplus profits remaining after payment of this fixed return, subject to the condition that if any year railway revenues are insufficient to provide the percentage of five-sixths of 1 per cent. on the capital at charges surplus profits in the next or subsequent years, will not be deemed to have accrued for purposes of division until such deficiency has been made good. From the contribution so fixed will be deducted the loss in working, and the interest on capital expenditure on strategic lines.

(3) Any surplus profits that exist after payment of these charges shall be available for the Railway administration to be utilised in

(*a*) forming reserves for.

(*i*) equalising dividends, that is to say, or securing the payment of the percentage contribution to the general revenues in lean years,

(*ii*) depreciation,

(*iii*) writing down and writing off capital,

(*b*) the improvement of services rendered to the public,

(*c*) the reduction of rates.

(4) The railway administration shall be entitled, subject to such conditions as may be prescribed by the Government of India, to borrow temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings out of the revenue budgets of subsequent years.

The following statement brings out the more important features of the operation of Indian railways during the year 1927-28 together with similar information for the year 1926-27:—

		1926-27.	1927-28.

In 1926-27 there was a falling off of Rs. 179 lakhs in the net gain from the working of State-owned Railways due principally to enhanced interest charges amounting to 106 lakhs, to a decline in earnings of 66 lakhs and an increase in working expenses and other charges amounting to 26 lakhs.

State versus Company Management.—The relative advantages and disadvantages of State and Company management of the railways owned by Government which comprise the great bulk of the railway mileage in India have been the subject of discussion in official circles and the public press for many years. In India the question is complicated by the fact that the more important companies have not in recent years been the owners of the railways which they manage and the headquarters of their Boards are in London. The subject was one, perhaps the most important, of the terms of reference of the

Acworth Railway Committee. That Committee was unfortunately, unable to make a unanimous recommendation on this point, their members being equally divided in favour of State management and Company management. They were, however, unanimous in recommending that the present system of management by Boards of Directors in London should not be extended beyond the terms of the existing contracts and this recommendation has met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed. The approaching termination of the East Indian Railway contract on 31st December 1924 and of that of the Great Indian Peninsula Railway on 30th June 1925 rendered an early decision on this question imperatve. When the question was debated in the Legislative Assembly in February 1923, the non-official Indian Members were almost unanimously in favour of State management and indeed were able to carry a resolution recommending the placing of the East Indian Railway and the Great Indian Peninsula Railway under State management at the close of their present contracts. The Government of India, however, expressed themselves as being so convinced by the almost universal failure of this method in other countries that they proposed, while accepting tne necessity for taking over the managment of the East Indian Railway and the Great Indian Peninsula Railway to continue their efforts to devise a satisfactory form of Company domiciled in India to take these railways over eventually on a basis of real Company management. On 1st January 1925 the East Indian Railway was amalgamated with the Oudh and Rohilkhand Railway and brought under direct State Management while on 1st July 1925 the Great Indian Peninsula Railway followed suit. The Naini-Jubbulpore Section of the East Indian Railway was transferred to the Great Indian Peninsula Railway on 1st October 1925.

Termination of the Contract with the Burma Railways Co.—After the transfer of the East Indian and the Great Indian Peninsula Railway to State management, the next State-owned company managed railway system to fall due for the termination of contract is the Burma Railways. The contract for this line being terminable on the 31st December 1928 notice had to be given before 31st December 1927 and the future management of the line engaged the attention of the Government during the year under review. After careful consideration, and having full regard to the views of the Government and the Legislative Council of Burma who expressed themselves in favour of State-management, it was decided, with the approval of the Secretary of State to take over the BurmaRailways for management by the State after the termination of the present contract with the Burma Railways Company on the 3st December 1928. While the transfer of the line to State-management will entail the payment to the Burma Railways Company of a sum of £ 3,000,000 it is likely to result in an increase in net annual revenue of about half a crore to Government.

Separation of the Railway from the General Finances.—The question of the separation of the railway from the general finances has been under consideration for some time and as a result of the recommendations of the Acworth Committee in 1921, the question was further examined by the Railway Finance Committee and the Legislative Assembly but it was decided to postpone a definite decision for the present.

The question was examined afresh in connection with the recommendation of the Retrenchment Committee in 1923, that the railways in India should be so worked as to yield an average return of at least 5½ per cent. on the capital at charge and it was decided that a suitable time had arrived when this separation could be carried out. A resolution was accordingly introduced in the Assembly on the 3rd March 1924, recommending to the Governor-General in Council:—"that in order to relieve the general bud get from the violent fluctuations caused by the incorporation therein of the railway estimates and to enable the railway to carry out a continuous railway policy based on the necessity of making a definite return over a period of years to the State on the Capital expended on railways:—

(1) The railway finances shall be separated from the general finances of the country and the general revenues shall receive a definite annual contribution from railways which shall be the first charge on railway earnings.

(2) The contribution shall be a sum equal to five-sixths of 1 per cent. on the capital at charge of the railways (excluding capital contributed by Companies and Indian States and Capital expenditure on strategic Railways) at the end of the penultimate financial year *plus* one-fifth of any surplus profits remaining after payment of this fixed return, subject to the condition that if any year railway revenues are insufficient to provide the percentage of five-sixths of 1 per cent. on the capital at charges surplus profits in the next or subsequent years, will not be deemed to have accrued for purposes of division until such deficiency has been made good. From the contribution so fixed will be deducted the loss in working, and the interest on capital expenditure on strategic lines.

(3) Any surplus profits that exist after payment of these charges shall be available for the Railway administration to be utilised in

(*a*) forming reserves for.

(*i*) equalising dividends, that is to say, or securing the payment of the percentage contribution to the general revenues in lean years,

(*ii*) depreciation,

(*iii*) writing down and writing off capital,

(*b*) the improvement of services rendered to the public,

(*c*) the reduction of rates.

(4) The railway administration shall be entitled, subject to such conditions as may be prescribed by the Government of India, to borrow temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings out of the revenue budgets of subsequent years.

(5) In accordance with present practice the figures of gross receipts and expenditure of railways will be included in the Budget Statement. The proposed expenditure will, as at present, be placed before the Legislative Assembly in the form of a demand for grants and on a separate day or days among the days allotted for the discussion of the demands for grants the Member in charge of the Railways will make a general statement on railway accounts and working. Any reductions in the demand for grants for railways resulting from the votes of the Legislative Assembly will not ensure to general revenues, *i.e.*, will not have the effect of increasing the fixed contribution for the year.

(6) The Railway Department will place the estimate of railway expenditure before the Central Advisory Council on some date prior to the date for the discussion of the demand for grants for railways."

When introducing this resolution the Hon'ble Member for Commerce stated that it had been represented to him that there was a general feeling in the House that before the House was asked to commit itself to those proposals, it should be allowed to refer them to a committee of the House. He further stated that he had no objection to this course provided that the committee met rapidly. This was agreed to and members were appointed.

The committee met twice and considered the resolution but was not able within the time allowed to satisfy itself fully as to the effect of the proposals in the resolution on the control of the Assembly over railway finance and policy and as to the amount and form of contribution to be paid by the railways to general revenues. In the circumstances, the committee recommended that the consideration of the resolution be adjourned till the autumn session to allow the committee further time for examination. Government raised no objection to this proposal and it was agreed to by the Assembly.

The resolution was further examined by the Standing Finance Committee in September and as a result of the views expressed by the committee and in the Assembly certain modifications were introduced. The final resolution agreed to by the Assembly on September 20th, 1924, and accepted by Government differed from the original resolution in that the yearly contribution had been placed at 1 per cent. instead of 5/6th per cent. on the capital at charge and if the surplus remaining after this payment to General Revenues should exceed 3 crores, only ⅔rd of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining ⅓rd was to accrue to General Revenues. At the same time a Standing Finance Committee for Railways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund. This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body. This would be in addition to the Central Advisory Council which will include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State. These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years. They would, however, only hold good as long as the E. I. Railway and the G. I. P. Railway and existing State Managed Railways remain under State-management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrangements in this resolution.

The Assembly in an addendum recommended that the railway services and the Railway Board should be rapidly Indianised and that the stores for the State Managed Railways should be purchased through the organisation of the Indian Stores Department.

Re-organisation problems.—The growing complexity of railway administration in India and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various railways to revise their organisations. The general direction in which this re-organisation is being considered is that of consolidation into one department of the operating or transportation work of the railway, including the provision of power. This system which is commonly known as the divisional system, was first adopted on the Great Indian Peninsula Railway during 1922-23 and entailed :—

(*a*) the separation of the commercial and operative duties of the Traffic Department,

(*b*) the separation of the mechanical and running duties of the Locomotive Department,

(*c*) the fusion of the operative duties of the Traffic Department with the running duties of the Locomotive Department.

Under the new organisation there is now—

(1) a Chief Transportation Superintendent in charge of all operating functions,

(2) a Chief Traffic Manager in charge of the commercial side of the railway,

(3) a Chief Mechanical Engineer in charge of the design and construction of rolling stock and of all repairs and renewals of rolling stock carried out in the central workshops.

This organisation is more or less similar to the divisional organisation found on most American Railways with the exception that the Engineering Department still works on a departmental basis. This, however, is being changed and the maintenance of Way and Works is being brought into the divisional organisation while new construction will still remain outside.

A somewhat similar organisation was introduced on the North-Western Railway from 1st October 1924, except that it follows rather the organisation in force on the South African Railways where the railways are divided into a number of areas or divisions each under one chief officer and all reporting to the General Manager who is assisted by a number of principal officers in charge of definite phases of the working. A similar organisation was also introduced on the East Indian and Oudh and Rohilkhand Railways early in 1925.

Investigation into the present form of Railway Accounts.—Mention was made in last year's report of the investigation by Sir

Arthur Dickinson into the system of accounts followed on Indian railways. Sir Arthur Dickinson completed his investigation in March 1927 and submitted his report in August 1927. His recommendations which are of a far reaching character are at present under consideration.

The Standing Finance Committee.—The Standing Finance Committee for Railways met 12 times in the course of the year. The first two meetings were held on the 6th and 7th June 1927 at Bombay where the Committee examined the programmes of Railways for the purchase of rolling stock in 1928-29 and approved of the creation of several superior appointments and the construction of two new lines and a metre gauge bridge over the Irrawaddy river at Sagaing. The next two meetings were held at Calcutta on the 1st and 2nd August 1927 and at these the Committee discussed and approved of the construction of several new lines, including a broad gauge line from Lucknow *via* Sultanpur to Jaunpur and a metre gauge line from Trichinopoly *via* Karaikudi to Manamadura, and the creation of certain appointments on the South Indian Railway. At the fifth meeting, which was held at Simla on the 17th September 1927, the Committee further considered and accepted the detailed rolling stock programmes of Railways for 1928-29 and also approved of proposals for the creation of certain additional posts on the superior establishment of Railways, the revision of the cadre of the Superior Loco. and Carriage and Wagon establishment on the Bengal Nagpur Railway, the creation of a Production and Progress Department in the Bombay, Baroda and Central India Railway workshops at Ajmer and Parel, the remodelling of the Jhansi workshops and the formation of a College at Dehra Dun for railway staff. The Committee next met at Madras and at its meetings held on the 22nd and 23rd November 1927 examined and approved of the programmes of capital expenditure and expenditure from the Depreciation Fund of Railways for the year 1928-29, and the proposals for advance grants for general purposes stores for that year, the revision of the cadre of the superior electrical engineering establishment of the Eastern Bengal Railway, the creation of certain appointments including that of a Chief Medical Officer on the North Western Railway and the construction of several new lines including a line from Salem *via* Attor to Vriddhachalan and a system of branch lines in the Minbu and Pakkoku Districts in Burma. On the following day, *i.e.*, the 24th November 1927, the Committee inspected the existing station premises and yards at Erode and the lay out proposed for their remodelling. The last few meetings of the Committee were held at Delhi on the 26th, 27th and 28th January and 15th February 1928. At these meetings the Committees examined the estimates of receipts and expenditure and the demands for grants for Railwy for 1928-29 and the supplementary demands for 1927-28 prior to their being placed before the Legislative Assembly; they also discussed and approved of proposals for the revision of the superior traffic cadre of the Burma Railways, the creation of certain superior appointments, the electrification of the Madras suburban section of the South Indian Railway, the remodelling of the Erode Junction station and the construction of a chord line connecting Lyallpur with Chananwala and certain other new lines.

Imperial Indian Mail, Punjab Limited & P. & O. Express.—A new standard of travel in India was instituted in November 1926 by a weekly service between Bombay and Calcutta in connection with the English Mail steamers. The Imperial Indian Mail, as the train is called, is a joint service of the East Indian and Great Indian Peninsula Railways. The popularity of the train has been firmly established, and during the seasonal months the accommodation has been filled to capacity. The special features of this train are the provision of a parlour car, a compartment for luggage wanted on journey, bedding, the services of an experienced conductor and staff and high class catering. The train is vestibuled throughout, giving passengers access to all parts without the necessity of waiting for station halts. Accommodation is provided for 32 passengers in 14 two-berth and 4 single berth compartments. Seven of the two-berth compartments have two lower berths and the remainder a lower and an upper berth. The additional floor space in the latter compartments enables two easy-chairs to be provided. The exterior of the Imperial Indian Mail is finished in cream and gold, and the service as a whole compares favourably with the finest luxury train service provided by any railway in the world.

The success of this train naturally led to the introduction of similar services between Bombay and the north of India *via* Delhi and from October 7th, 1927, a special train called the Punjab Limited was inaugurated by the G.I.P. Railway for the benefit of overseas passengers travelling between Bombay and the Punjab. The train accommodates 48 passengers, each compartment having 3 berths, two lower and one upper, with an upper shelf for luggage. A cane easy-chair and carpets are provided in each compartment. The services of a train conductor are placed at the disposal of passengers, and bedding, blankets and pillows are provided at a cost of Rs. 5 per journey. The Punjab Limited is painted cream with gold lettering, and a special feature of the service lies in the accelerated timings. The journey from Bombay to Delhi is accomplished in 27 hours 15 minutes. The latest type of dining car, with special fittings such as bracket table lamps with silk shades, etc., is attached to this service.

From the same date the Bombay, Baroda and Central India Railway introduced in conjunction with the North Western Railway a new weekly train for first class long distance passengers and mails between Bombay and Peshawar connecting with the outward Mail steamers at Ballard Pier. This train reduced the time of the journey to Delhi and the Punjab as under :—

	Previous time.		New time.		Difference.	
	Hrs.	Mts.	H4s.	Mrs.	Hrs.	Mts.
Delhi ..	27	50	23	50	4	0
Lahore ..	39	5	32	0	7	5
Peshawar ..	51	55	42	35	9	20

With the close of the outward season, second class and local (1st & 2nd class) passengers were also carried on this train. The performance

of this train has been uniformly excellent and has been freely commented on by the Press both in India and in England. On two occasions, when the Mail steamer has been late, the run between Bombay and Delhi has been performed in 21 hours, or at an average speed of 41 miles per hour for the 865 miles. The running of this train has effected delivery of the English mails a day earlier in Delhi and in most places in the Punjab. From 1st September 1928 a new train, the Frontier Mail, will run daily from Bombay to Peshawar to approximately the same timings.

Earnings.—Of the total earnings on all Railways of Rs. 118,22 crores, Rs. 69,58 crores or 58.9 per cent. were from goods traffic, Rs. 39.18 crores or 33.1 per cent from passenger traffic and Rs. 9.46 crores or 8.0 per cent. from parcels, luggage and miscellaneous earnings.

Passenger Earnings.—Passenger earnings showed an increase of 2.77 per cent from Rs. 38.13 to Rs. 39.18 crores. The following table shows the numbers of and earnings from passengers separately for each class for the 4 years previous to the War and for the 5 latest years.

Year.	Number of passengers carried (in thousands)				
	1st Class.	2nd Class.	Inter	3rd Class.	Season & Vendor's tickets.
	Rs.	Rs.	Rs.	Rs.	Rs.
1910	685	2,784	10,702	3,15,839	24,341
1911	703	2,947	11,409	3,31,055	25,687
1912	700	3,030	10,508	3,56,789	26,810
1913-14	715	3,253	12,000	3,90,412	30,114
1923-24 †	1,199	10,128	11,374	5,44,622	..
1924-25 †	1,101	9,778	12,201	5,53,266	..
1925-26 †	1,033	9,901	13,602	5,74,608	..
1926-27 †	1,012	10,006	14,945	5,78,409	..
1927-28 †	981	9,963	17,351	5,94,821	..

Year.	Earnings from passengers (in thousands of rupees)				
	1st class.	2nd class.	Inter.	3rd class.	Season & vendor's tickets.
	Rs.	Rs.	Rs.	Rs.	Rs.
1910	58,82	77,23	94,99	14,65,16	15,85
1911	66,38	83,83	1,08,88	15,73,15	16,85
1912	62,90	83,31	91,37	17,01,35	17,55
1913-14	68,94	88,70	1,03,48	18,37,03	19,36
1923-24 †	1,31,17	2,02,73	1,41,10	33,32,82	..
1924-25 †	1,22,93	1,92,00	1,48,01	34,12,45	..
1925-26 †	1,20,42	1,89,42	1,59,61	34,76,45	..
1926-27 †	1,17,75	1,88,27	1,61,79	33,43,97	..
1927-28 †	1,13,71	1,95,67	1,69,32	34,39,25	..

† The number of season and vendor's tickets and their earnings included under the respectively classes; the former at the rate of 50 single journeys per month.

Rates Advisory Committee.

Mention was made in last year's report of the establishment of the Rates Advisory Committee to investigate and make recommendations to Government on the following subjects :—

(1) Complaints of undue preference ;

(2) Complaints that rates are unreasonable in themselves ;

(3) Complaints or disputes in respect of terminals ;

(4) The reasonableness or otherwise of any conditions as to the packing of articles specially liable to damage in transit or liable to cause damage to other merchandise ;

(5) Complaints in respect of conditions as to packing attached to a rate ;

(6) Complaints that Railways do not fulfil their obligations to provide reasonable facilities under Section 42 (3) of the Indian Railways Act.

At the end of 1926-27 there remained 5 cases outstanding with the Committee and 9 new cases were referred to the Committee during 1927-28. Up to 31st March 1928 the Committee had submitted their report on the following four cases :—

(1) Complaint of undue preference from the Grain merchants of Ajmere against the B. B. & C. I. Railway in the matter of concession rates for the carriage of food grains consigned to the B. B. & C. I. Railway Indian Co-operative Association, Ajmere.

(2) Complaint from the Central Province Portland Cement Company, against the G. I. P. Railway as regards the unreasonableness of the terminal charge levied on coal delivered at the siding leading to the Company's works at Jukehi.

(3) Complaint of the Amritsar Sugar Mills Co. against the E. I. and N. W. Railways that the rates for jagree from stations on the B. & N. W. Railway *via* Barabanki and Saharanpur to Amritsar were unreasonable.

(4) Complaint of undue preference from the Katni Lime Manufacturers Association against the G. I. P. Railway *re :* the rates for lime from Katni-Murwara to and *via* Naini for stations north and west of Naini.

As regards (1) the Committee recommended the withdrawal of the concession and this was agreed to by the Government of India. In the case of (2) the Committee were of opinion that the terminal charge at Jukehi should be remitted. This recommendation was not accepted by the Government of India. In the case of the Amritsar Sugar Mills Co., the Committee recommended that the N. W. Railway should quote a rate of .28 pies per maund per mile for jagree for refining purposes, subject to the ordinary terminal charge at destination. This was accepted with certain modifications. As regards the fourth case it was held by the Committee that the rates charged did not affect the complainants adversely, their real cause of grievance being delays to consignments. The Committee therefore had no recommendations to make as regards the rates.

Owing to the serious illness of Sir Narsimha Sarma, K.C.S.I., President of the Committee, the sittings of the Committee were temporarily suspended from 21st January 1928. The suspension of the sittings of the Committee, however, did not preclude the submission of applications to the Railway Department and Agents of Railways in accordance with the procedure in force. Preliminary enquiries in connection with such applications continued to be made and those of them which were to be submitted to the Committee were sent to them when the Committee resumed their sittings in April 1928.

Kumbh Mela. 1927.

This exceptionally large *mela* occurs once in 12 years at Hardwar and although there are melas every year and a large mela half way between each Kumbh Mela yet the number of pilgrims visiting Hardwar at any of these Melas does not approach the number visiting it for the Kumbh Mela. The total number of inward and outward passengers carried by rail was 356,473 and 335,728 respectively which necessitated the running of 143 inward and 206 outward special trains between March 12th and April 21st. Hardwar is situated on a Branch Line and both the Branch and the adjoining Main line are single track. The normal traffic to and from Hardwar can be quite easily carried on a single line and the expenditure which would be incurred in doubling the track merely for the Kumbh Mela traffic once in 12 years would not be justified. To ensure that there should be no hitch in the running of such a large number of trains on a single line section very careful preparations were made by the E. I. Railway beforehand, such as the installation of train control at Hardwar, the building of extra mela platforms and other facilities at Hardwar, the increase of facilities, such as extra crossing stations, on the sections Hardwar-Lhaksar and Lhaksar-Saharanpore. careful selection of staff and the issue of detailed instructions to all the staff concerned. The traffic was worked by means of the 'Flow' system under which trains run in one direction only for certain definite periods during the 24 hours. The 25 hours were divided into four periods o 7 to 11 hours, 11 to 15 hours, 15 to 2 hours, and 23 to 7 hours. Specials were despatched from Hardwar one after the other from 17 to 11 hours, again from 15 to 23 hours, while empty trains were worked in from 11 to 15 hours and from 23 to 7 hours.

All necessary steps were taken in conjunction with the Civil authorities to prevent overcrowding and to secure the convenience of passengers by the appointment of additional supervising and other staff, Medical and sanitary arrangements, drinking water, refreshment and waiting rooms and other measures. It is specially worthy of note that no goods wagons were used during the whole period for the carriage of passengers. The public press were Many of in praising the railway arrangements.unanimous the pilgrims thanked the Officials on the spot while important bodies like the Chief Khalsa

Diwan passed resolutions placing on record their appreciation of the facilities provided by the Railway.

Publicity.

The year 1927-28 marked a very considerable advance in the Publicity activities of the Indian railways. The Central Publicity Bureau of the Railway Board was inaugurated on 1st April 1927, a Chief Publicity Officer was appointed and provided with an Assistant and a small clerical staff. The office was located in Victoria Terminus, Bombay, it being felt that, to commence with, Bombay's position as the main port of arrival in India, closer touch could be kept with travellers and further more, Bombay presented certain distinct advantages from the point of view of printing facilities, etc.

The first three months were spent in organising and in working out schemes for the development of existing Publicity business and in formulating a programme for progress in new fields. Among some of the principal lines upon which it was decided to concentrate attention are :—

- Cinema film production and display ;
- Poster production and display ;
- Pamphlet production and display ;
- Publication of an *Indian State Railways Magazine* ;
- Demonstration Trains ;
- Upper and Lower class special excursion trains ;
- Press propaganda in India ;
- Press propaganda in Europe, America and other parts of the world ;
- Reciprocal publicity with the leading railways of the world.

The most important of these activities is undoubtedly the cinema film production and display as 80 per cent. of this is directed towards encouraging primary industries and the welfare of agriculturists and villagers. It must be remembered in this connection that owing to the very large proportion of illiterates in India, the cinema is the outstanding method of conveying information to the masses. Each State Railway is provided with a travelling cinema projection outfit which moves continuously from place to place over the different systems and by this means the propaganda films issued from the Central Publicity Bureau are widely circulated. That these displays, which are free, are fully appreciated is proved by the patronage accorded to them. For the six months ending December 1927 with a total of 396 displays, an attendance of 7½ lakhs of spectators was registered. Progressive census shows that this figure is steadily mounting. The work in this branch of the Publicity work has so increased that the appointment of a special Assistant became essentital, and has been created.

A large number of posters by leading artists has been prepared for display in India and in the principal countries of the world focussing attention on the attraction which India has to offer to travellers and toursits.

Following up these posters many attractive pamphlets have been written by first class journalists and are now available in the leading Information and Travel Bureaux in India, Europe, America and other countries.

The production of the *Indian State Railways Magazine* commenced in the month of October 1927, and from the outset proved extremely popular. This publication is intended to be partly a publicity medium and partly to encourage the railwaymen of India to take a wider outlook on railway and general affairs, it contains a variety of articles on travel, archaeology, shikar, transportation, welfare, fiction and natural history.

Upper and third class conducted tours and bazar specials have been run by several of the railways with considerable success and the extension of these is contemplated in the near future.

An intensive Advertising Campaign has been carried out in Great Britain and from the number of enquiries received regarding tours in India there can be no doubt that it has proved successful. This publicity was carried out jointly with the P. & O. Co., who report that there has been an increase of 300 per cent. in their cold weather short period passenger traffic to India.

Shortly after the inauguration of the Central Publicity Bureau, the need was felt for a representative in England for the purpose of giving information and advice to potential travellers at Home and to handle enquiries arising out of press propaganda. A Publicity Officer was appointed and temporary offices secured in London in which a State Railways Bureau was opened. There is no doubt that this departure has entirely justified itself and it has been decided that in 1929 a similar appointment will be created and an office opened in New York.

Capital Expenditure.—The outlay during the year 1926-27 was Rs. 34·41 crores, of which Rs. 32·44 crores represented expenditure incurred on State-owned lines.

Considerable progress has been made with the programme of new construction. Close on 700 miles of new railway were opened for traffic during 1927-28, and at the close of the year there were some 2,500 miles under construction.

Trade review.—The earnings of railways are dependent on the general prosperity of the country which in the case of India is most easily measured by the agricultural position and the returns of foreign trade.

Taken all round the year was a most profitable one for Railways, the gross earnings of State-owned lines reaching the record figure of 104 crores, or an increase of 5½ crores compared with 1926-27. Goods traffic was responsible for most of the increase in gross receipts, the earnings from goods carried on all railways amounting to 69¼ crores as compared with 65 crores in 1926-27. This large rise in goods traffic was considerably influenced by a marked increase in the cotton crop and in the export of raw jute. There were also considerable increases in the export of wheat, rice, oilseeds and tea The increase of one crore in passenger earningns is accounted for by an increase of over 18 million in the number of passengers carried, largely the effect of reduction of fares.

The tonnage of and earnings from the main commodities on Class I Railways during the last two years are shown in the table below :—

Commodity.	1926-27. No. of tons originating in millions.	1926-27. Rs. in crores.	1927-28. No. of tons originating in millions.	1927-28. Rs. in crores.	Increase + or Decrease— in Earnings (lakhs.)
(1) Fuel for public and Foreign Railways ..	18·95	9.65	20·38	10·17	+52

Open Mileage.—The total route mileage on March 31st, 1928, was 39·711·58 made up of—

Broad-gauge..	19,584·68 miles
Metre-gauge.. ..	16,254·63 ,,
Narrow-gauge	3,872·27 ,,

Under the classification adopted for statistical purposes, this mileage is divided between the three classes of railways as follows :—

Class I	35,586·81
Class II	2,953·49
Class III	1,171·28

Class I includes all the 5′-6″ gauge mileage, 13,990 miles or 87 per cent. of the metre-gauge, and 2,012 or 54 per cent. of the narrow-gauges.

The State owned 28,426 miles or about 71 per cent. and directly managed 15,867 miles or about 40 per cent. of the total mileage open at the end of the year.

During the year 1927-28, 699 miles of new lines were opened for public traffic. Of this mileage, 504 miles belong to Class I, and 178 miles to Class II Railways.

Additions to Equipment.—During 1927-28 a considerable number of old carriages were replaced during the year by new carriages of larger seating capacity with the result that there was an increase in third class accommodation of 23,154 on the broad-gauge and 13,407 in the metre-gauge making a total increase of 41,561. There was a decrease in goods wagons of 1991 on the broad-gauge but an increase of 1551 on the metre-gauge.

The following table shows total figures of seating accommodation under the four classes:—

Class I Railways.	Number of seats in passenger carriages. 1st.	2nd.	Inter.	Third.
5′-6″ ..	22,908	41,639	58,710	627,324
3′-3⅜″ ..	10,207	13,785	9,877	339,042

340 covered wagons were added to the stock of class IR ys (B.G.)and 2,331 open wagons were reduced. On the Metre-gauge a total of 1,878 goods vehicles were added.

The Opening of the Khyber Railway.—The opening of the Khyber Railway on November 2, 1925, marks an interesting stage in the development of India's great railway system. Previously the railway stopped short at Jamrud a few miles from Peshawar on the Indian side of the Khyber Pass. This pass has been the main trade route to India from the north from the earliest days and most of the trade with far distant Central Asia still follows this route in picturesque caravans.

The question of extending the railway along the trade route was first considered in 1890 and since then three possible routes have been surveyed, namely, the Loi Shilman route, the Mullagarhi Shilman route and the Khyber Pass route.

As a result of a survey rapidly made in 1919 by Colonel G. R. Hearn, C.I.E., D.S.O., R.E., it was decided to build a railway through the Khyber Pass on a new alignment and after considering the merits of a line built to a two feet gauge, a metre-gauge with rack and a 5′-6″ gauge adhesion line it was finally decided that a 5′-6″ gauge line should be adopted.

The total length of the Khyber Railway is 27·74 miles from Jamrud to the Afghanistan frontier. Although this line is only a short one yet the work entailed has been very heavy. Starting at a height of about 1,500′ it rises to about 3,500′ at Landi Kotal and then descends to a height of about 2,400′ at Landi Khana.

The ruling grade for up trains to Landi Kotal is 1 in 33 compensated for curvature while that for down trains from Landi Khana is 1 in 25 also compensated.

The line passes through 32 tunnels with a total length of nearly 3 miles. There are in all ten stations excluding Jamrud and of these, three are reversing stations necessitated by the development of distance for reductions of gradient.

Financial Results of Working.—The total gross earnings of all railways in India during the year 1926-27 amounted to Rs. 112·36 crores as compared with 113·39 crores in 1925-26. These figures, however, include railways owned by Indian States and companies for which the Government of India has no direct financial responsibility. The figures of receipts and expenditure for railways with which the Government are directly concerned are as follows:—

		(Omitting 000), 1926-27.
		Rs.
Traffic receipts from Government Railways ..		99,44,69
Interest on Depreciation and Reserve Fund balances ..		20,96
Surplus profits from Subsidized Companies' railways ..		30,16
Total ..		99,95,81
	Rs.	
Working expenses including depreciation ..	60,95,02	
Surplus profits paid to Companies ..	1,42,28	
Interest on Government debt ..	22,67,37	
Land and subsidy to Companies ..	3,09	
Miscellaneous ..	13,10	
Total charges ..		5,80,76
Net gain ..		91,01,62
Contribution at 1 % on Capital at charge Surplus ..		8,94,19
Contribution of one-fifth of Surplus ..		1,78,83
Total contribution from Railway Revenues ..		7,59,59
Deduct loss on strategic lines ..		1,58,46
Net payment due from Railway to General Revenues in 1926-27. ..		6,01,13

After meeting all interest and annuity charges Government therefore received a net profit of 7·50 crores on the capital at charge of the State *minus* the net receipts, that is the gross receipts *minus* the working expenses, have in recent years given the following returns:—

	Per cent.
1913–14 ..	5·01
1922–23 ..	4·38
1923–24 ..	5·24
1924–25 ..	5·85
1925–26 ..	5·31
1926–27 ..	4·95
1927-28 ..	5.30

Up to date figures of the results of working of other countries are not available, but the following table compares the latest available figures of average receipts per ton mile of those countries which have published statistics of working later than 1919:—

	Receipts per ton mile. Pies.
United States of America 1925 ..	5·85
United Kingdom 1925 ..	15·17
Japan 1924-25 ..	7·22
Switzerland 1924 ..	21·91
	Receipts per ton mile Pies.
South Australia 1924-25 ..	17·01
Canadian Railways 1925 ..	5·30*
India 1926-27 ..	6·12

* Converted at $ 4·80=£ 1 and at Re. 1=1s. 6d.

In the case of receipts per passenger mile the figures for United States of America and India are as follows:—

United States of America 1925. 15·58 pies

India 1926-27 .. .. .. 3·44 „

while in England the present fare charged per mile third class is 18 pies.

From the above it will be seen that railway transportation of freight in India is probably the cheapest in the world and still more so for passenger traffic.

An examination of the latest available figures of operating ratios of foreign countries brings out results not unfavourable to Indian Railways.

	Year.	Operating Ratio
United States of America	1926	73·21 per cent.
France	1925	84·15 „ „
English Railways	1926	89·64 „ „
South African Railways	1925-26	77·58 „ „
Argentine Railways	1922	73·23 „ „
Canadian Railways	1926	78·79 „ „
India	1923-24	63·50 „ „
	1924-25	60·45 „ „
	1925-26	62·69 „ „
	1926-27	62·04 „ „
	1927-28	61·16 „ „

Value of Railway Materials Purchased.—The value of stores purchased by Indian Railways in 1927-28 shows a large increase from Rs. 28·03 crores to Rs. 35·87 crores. The principal increases were under Permanent Way (377 lakhs), Rolling Stock (244 lakhs, Electric plant (80 lakhs), Building and Station materials and Fencing (33 lakhs), Tools and Stores (25 lakhs) and Bridge work (15 lakhs). The value of indigenous material slightly fell from Rs. 15·49 crores to 15·16 crores in spite of an increase in permanent way of 21 lakhs, Tools and Stores of 8 lakhs, and Building and Station materials and Fencing of 8 lakhs. The fall was due to a decrease of 34 lakhs under the head ' Rolling Stock and 31 lakhs under other materials.

—	Value of imported materials.			Value of indigenous materials.	Total purchases 1927-28.	Total purchases 1926-27.
	Purchased direct.	Purchased through Agents in India.	Total imported materials.			
	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.
Rolling-Stock ..	5·76	0·98	6·74	0·49	7·23	4·79
Tools and stores	0·99	2·98	3·97	3·94	7·91	7·66

* Other materials consist of coal and coke, stone, bricks Indian lime and ballast, etc.

Kargali Colliery.—The East Indian and Bengal Nagpur Railway's Joint Bakaro Colliery started taking current during the year. The Joint Jarangdih Colliery is also taking current.

The working of this Colliery has been very satisfactory. The raising and despatching of coal from the shaft working was commenced in November and both electric winding Engines are in use. The colliery may now be said to be completely electrified.

Mohpani Colliery.—The Colliery was finally closed down during the year and the property made over to the Civil Authorities.

Bhurkunda Colliery.—Development work underground is proceeding satisfactorily. The Colliery commenced despatches to the North Western Railway from June 1927.

The Power House has been completed and by the end of the year it is hoped to have dispensed with all Steam Engines and Pumps. The output of railway owned collieries during 1927-28 was 3,161,545 tons out of a total of 70,50,336 tons consumed on class I Rys.

Number of Staff.—The total number of employees on Indian Railways at the end of the year 1927-28 was 800,102 as compared with 772,563 at the end of 1926-27. The increase in route mileage during the same period was 699 miles. The following table shows the number of employees by communities on 31st March 1927 and 1928 :—

	Europeans.	Statutory Indians.					Grand Total.
		Hindus.	Muham-madans.	Anglo-Indians.	Other Classes.	Total.	
1926-27	5,076	5,58,764	1,70,018	14,352	24,353	7,67,487	7,72,563
1927-28	5,110	5,73,901	1,79,262	14,374	27,455	7,94,992	8,00,102

Indianisation.—The various Railway Companies managing State and other Railway lines have followed the lead given by Government and accepted the recommendation of the Lee Commission that the extension of existing training facilities should be pressed forward as expeditiously as possible in order that recruitment in India may be advanced as soon as practicable up to 75 per cent. of the total number of vacancies in the Superior Services of the Railway concerned.

Schemes of recruitment.—The Secretary of State's approval to the schemes of recruitment and training of superior officers of the State Railways in the main branches of service—(1) Civil Engineering, (2) Transportation, (3) Commercial and (4) Mechanical Engineering—were received and the Regulations for the recruitment of these services issued under Railway Department Resolution No. 2508-E of 15th July 1926. The Regulations were revised in form and republished during 1927-28. Regulations for the recruitment and training in India of Officers for the Electrical Engineering and Signal Engineering Departments were incorporated in the Regulations for the Mechanical Engineering and Transportation (Power) Departments.

Six vacancies in the Indian Railway Service of Engineers and seven in the Transportation (Traffic) and Commercial Departments were filled during the year under these Regulations. The quota committees formed by Provincial Local Administrations nominated 88 candidates to appear for the two competitive examinations.

Towards the close of the year arrangements were afoot for the selection of the first batch of Special Class Apprentices for the Mechanical Engineering and Transportation (Power) Departments under the new Regulations.

The Board have under preparation a scheme for the recruitment and training in India of Officers for the State Railway Coal Department and also regulations for the recruitment in India of Medical Officers for State Managed Railways.

Public interest in the question has been maintained during the year, finding voice in the press and by interpellations in the Legislature. Considerable progress has been made with the scheme for the training of junior railway officers and of the senior subordinate staff on Indian railways. In this connection a Transportation School was opened at Chandausi on March 2nd, 1925.

The Railway Training School at Lyallpur for the North Western Railway has made progress since the last report. A temporary training school for the G.I.P. Railway has been established at Bina, pending the provision of a permanent school at Dhond and the scheme for forming a similar school at Gomoh for the E.I. and E.B. Railways is under consideration.

These schools provide courses of training for probationers before they are allowed to take up regular duties and for members of the staff to enable them to qualify for promotion to the upper grades ; and in addition to these courses, separate refresher courses are provided through which the entire subordinate staff are passed through at definite intervals.

College for training Railway Officers at Dehra Dun.—The provision of an institution to give practical training to junior officers on railways has been a long-felt need. The Railway Transportation School at Chandausi, which is meant for the training of subordinates only, could neither be suitably extended to provide a college for officers nor afford the facilities necessary for the purpose. The Railway Board have, therefore, decided to provide a college at Dehra Dun, which place is eminently suited for the purpose owing to its climate, situation and proximity to two other similar institutes, *viz.*, the Forest Research Institute and the Prince of Wales' Royal Indian Military College. The layout of the Railway College is under preparation and it is expected that work will soon be commenced. The scheme is estimated to cost about Rs. 20 lakhs.

Fatalities and Injuries.—During 1927-28 there was a decrease of 177 in the number of persons killed and an increase of 527, in the number of persons injured as compared with the figures of 1926-27. The number of passengers killed shows a decrease of 40 while the number of passengers injured shows a decrease of 86.

The following table shows the numbers killed and injured separately under passengers' railway servants and others for 1927-28 as compared with 1926-27 :—

—	Killed.		Injured.	
	1927-28.	1927-28.	1925-26.	1926-27.
A. Passengers—				
(1) Accidents to trains, rolling-stock, permanent-way, etc.	45	16	103	126
(2) Accidents caused by the movement of vehicles used exclusively on railways	339	324	1,046	1,117
(3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles	3	7	29	21
B. Servants—				
(1) Accidents to trains, rolling stock, permanent-way, etc.	24	25	165	126
(2) Accidents caused by the movement of vehicles used exclusively on railways	323	319	1,323	1,253
(3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles	54	46	2,713	2,204
C. Others—				
(1) Accidents to trains, rolling-stock, permanent-way, etc.	38	19	84	35
(2) Accidents caused by the movement of vehicles used exclusively on railways	2,203	2,107	732	793
(3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles	41	30	68	61
Total ..	3,070	2,893	6,263	5,736

Of the total number of 3,070 persons killed 1,833 were trespassers on the line and 302 committed suicide. Thus 2,135 or over 70 per cent. of the persons killed on railway premises were for causes over which the railways have no control.

Local Advisory Committees.—108 meetings were held of the Local Advisory Committees on State-owned Railways during the year as compared with 92 in the previous year and 84 in 1925-26. Two new Committees were formed by the Bengal Nagpur Railway, at Ranchi for Bihar and Orissa and at Nagpur for the Central Provinces. A Resolution recommending that Local Advisory Committees should be reconstituted and their powers increased was debated on September 14th, 1927, in the Council of State, but after Government had agreed to communicate the discussion to Agents of Railways for such action as it might be found possible to take, the Resolution was withdrawn. The number of meetings held on the different railways during the year was as follows :—

Railway.		*No. of meetings.*
Assam Bengal		2
Bengal and North-Western.	Muzaffarpur ..	3
	Gorakphur ..	3
Bengal Nagpur ..	Calcutta ..	9
	Bihar & Orissa ..	3
	Central Provinces.	2
B.B. & C. I.		8
Burma		2
Eastern Bengal		10
East Indian ..	Calcutta ..	12
	Cawnpore ..	3
	Lucknow ..	3
G.I.P.	Bombay ..	12
	Nagpur	3
M. & S. M.		10
North Western ..	Lahore ..	12
	Karachi	4
Rohilkhund and Kumaon		3
South Indian		4
	Total..	108

Many different subjects were discussed at the meetings thus indicating the increasing importance attached by the public to the existence of the Committees. The following may be mentioned as typical of the subjects discussed :—

Overcrowding in trains.
Alterations in Time Tables.
Arrangements for the provision of refreshments and drinking water for passengers.
Remodelling of and improvements to stations.
Facilities for 3rd Class passengers.
Reduction in fares.
Concession in fares.
Rates for goods traffic.
Opening of new stations.

Electrification schemes.
Design of railway carriages.
Sanitary arrangements in lavatories of 3rd class carriages.
Settlement of claims.
Passengers travelling without tickets.
Construction of new lines.
Running of through trains and carriages.
Return tickets.
Arrangements in connection with fairs and during rush periods.
Late running of trains.
Intermediate class accommodation on certain trains.
Mileage coupon tickets.
Railway risk notes.
Waiting rooms for Intermediate class passengers.
Travelling cinema cars.
Provision of lavatories in servants' compartments.
Electric fans in intermediate compartments.
Checking of passenger's luggage in trains.
Cold storage transit for fish and refrigerator vans for perishables.
Road motor competitions.

THE CHIEF RAILWAYS IN INDIA.

The Assam-Bengal Railway, which is constructed on the metre gauge, starts from Chittagong and runs through Surma Valley across the North Cachar Hills into Assam. It is worked under a limited guarantee by a company.

Mileage open	.. ..	10·88
Capital at charge	..	Rs. 23,13,76,000.
Net earnings	..	Rs. 1,08,12,000.
Earnings per cent.	.. ..	4·67.

Bengal and North-Western.

The Bengal and North-Western Railway was constructed on the metre gauge system by a company without any Government assistance other than free land and was opened to traffic in 1885. The system was begun in 1874 as the Tirhut State Railway. In 1890 this line was leased by Government to the Bengal and North-Western Railway. Since then extensive additions have been made in both sections. It is connected with the Rajputana metre gauge system at Cawnpore and with the Eastern Bengal State Railway at Khatihar and the East Indian Railway at Benares and Mokameh Ghat.

Mileage open	.. ..	2,077.
Capital at charge	..	Rs. 20,44,35,000.
Net earnings	..	Rs. 2,33,76,000.
Earnings per cent.	.. ..	11·43.

Bengal-Nagpur.

The Bengal-Nagpur Railway was commenced as a metre gauge from Nagpur to Chhatisgarh in the Central Provinces in 1887. A company was formed under a guarantee which took over the line, converted it to the broad gauge and extended it to Howrah, Cuttack and Katni. In 1901 a part of the East Coast State Railway from Cuttack to Vizagapatam was transferred to it and in the same year sanction was given for an extension to the coal fields and for a connection with the Branch of the East Indian Railway at Hariharpur.

Mileage open	..	3,412.
Capital at charge	..	Rs. 70,51,03,000.
Net earnings	..	Rs. 3,56,60,000.
Earnings per cent.	..	5·06.

Bombay Baroda.

The Bombay, Baroda and Central India Railway is one of the original guaranteed railways. It was commenced from Surat via Baroda to Ahmedabad, but was subsequently extended to Bombay. The original contract was terminable in 1880, but the period was extended to 1905; and then renewed under revised conditions. In 1885 the Rajputana Malwa metre gauge system of State railways was leased to the Company and has since been incorporated in it. On the opening of the Nagda-Muttra, giving broad gauge connection through Eastern Rajputana with Delhi the working was entrusted to this Company. On the acquisition of the Company in April 1907 the purchase price was fixed at £11,685,581.

Mileage open	.. ..	3,831.
Capital at charge	..	Rs. 76,51,66,000.
Net earnings	..	Rs. 4,71,49,000.
Earnings per cent.	.. ..	6·16.

Burma Railways.

The Burma Railway is an isolated line, and although various routes have been surveyed there is little prospect of its being connected with the Railway system of India in the near future. In reply to a question in the Imperial Legislative Council in 1919, Sir Arthur Anderson said :—" During 1914-15 extensive survey operations were carried out to ascertain the best alignment for a railway connection along the coast route between Chitagong and certain stations on the Burma Railways south of Mandalay. A rival route via the Hukong Valley between the northern section of the Assam-Bengal Railway and the section of the Burma Railways north of Mandalay was to have been surveyed during the following year but was postponed because of the war. It is now proposed to commence this survey during the coming cold weather, and on its completion, Government will have sufficient information to enable them to decide which route shall be adopted. Thus no arrangements for the construction of a line have yet been made nor has any concession been granted, but it is probable that the line selected will be built at the cost of Government and worked by one or other of the main lines which it will connect. It was commenced as a State Railway and transferred in 1896 to a Company under a guarantee.

From Jan. 1st. 1929, its working will be taken over by the State.

Mileage open	.. ..	1,908.
Capital at charge	.. Rs.	31,35,12,000.
Net earnings	.. Rs.	2,18,07,000.
Earnings per cent.	.. ..	7·25.

Eastern Bengal.

The Eastern Bengal State Railway was promoted under the original form of guarantee and was constructed on the broad gauge. The first portion of the line running to Calcutta over the Ganges was opened in 1862. In 1874 sanction was granted for the construction on the metre gauge of the Northern Bengal State Railway, which ran from the north bank of the Ganges to the foot of the Himalayas on the way to Darjeeling. These two portions of the line were amalgamated in 1884 into one State Railway.

Mileage open	.. ..	1,740.
Capital at charge	.. Rs.	48,03,93,000.
Net earnings	.. Rs.	2,53,64,000.
Earnings per cent.	.. ..	5·28.

East Indian.

The East Indian Railway is one of the three railways sanctioned for construction as experimental lines under the old form of guarantee. The first section from Howrah to Pandua was opened in 1854 and at the time of the Mutiny ran as far as Raniganj. It gives the only direct access to the port of Calcutta from Northern India and is consequently fed by all the large railway systems connected with it. In 1880 the Government purchased the line, paying the shareholders by annuities, but leased it again to the company to work under a contract which was terminable in 1919.

The contract was not terminated until January 1st, 1925, when the State took over the management. From July 1st,1925, the Oudh & Rohilkhund railway was amalgamated with it.

Mileage open	.. ..	4,011.
Capital at charge	.. Rs.	1,41,70,42,000.
Net earnings	.. Rs.	8,68,35,000.
Earnings per cent.	.. ..	6·13.

Great Indian Peninsula.

The Great Indian Peninsula Railway is the earliest line undertaken in India. It was promoted by a Company under a guarantee of 5 per cent. and the first section from Bombay to Thana was open for traffic in 1853. Sanction was given for the extension of this line *via* Poona to Raichur, where it connects with the Madras Railway, and to Jubbulpore where it meets the East Indian Railway. The feature of the line is the passage of the Western Ghats, these sections being 15¾ miles on the Bhore Ghat and 9¼ miles on the Thul Ghat which rise 1,131 and 972 feet. In 1900, the contract with the Government terminated and under an arrangement with the Indian Midland Railway that line was amalgamated and leased to a Company to work.

The contract was terminated on June 30th, 1925, when the State took over the management.

Mileage open	.. ..	3,656.
Capital at charge	.. Rs.	1,17,46,16,000.
Net earnings	.. Rs.	5,62,15,000.
Earnings per cent.	.. ..	4·78.

Madras and Southern Mahratta Railway.

The Madras Railway was the third of the original railways constructed as experimental lines under the old form of guarantee. It was projected to run in a north-westerly direction in connection with the Great Indian Peninsula Railway and in a south-westerly direction to Calicut. On the expiry of the contract in 1907 the line was amalgamated with the Southern Mahratta Railway Company, a system on the metre gauge built to meet the famine conditions in the Southern Mahratta Country and released to a large Company called the Madras and Southern Mahratta Railway Company.

Mileage open	.. ..	30·65.
Capital at charge	.. Rs.	59,91,03,000.
Net earnings	.. Rs.	3,81,39,000.
Earnings per cent.	.. ..	6·39.

The North-Western.

The North-Western State Railway began its existence at the Sind-Punjab-Delhi Railway, which was promoted by a Company under the original form of guarantee and extended to Delhi, Multan and Lahore and from Karachi to Kotri. The interval between Kotri and Multan was unbridged and the railway traffic was exchanged by a ferry service. In 1871-72 sanction was given for the connection of this by the Indus Valley State Railways and at the same time the Punjab Northern State Railway from Lahore towards Peshawar was begun. In 1886 the Sind-Punjab-Delhi Railway was acquired by the State and amalgamated with these two railways under the name of the North-Western State Railway. It is the longest railway in India under one administration.

Oudh and Rohilkhand.

Oudh and Rohilkhand Railway was another of the lines constructed under the original form of guarantee. It began from the north bank of the Ganges running through Rohilkhand as far as Saharanpur where it joins the North-Western State Railway. It was not until 1887 that the bridge over the Ganges was completed and connected with the East Indian Railway. To effect a connection between the metre gauge systems to the North and those to the South of the Ganges; a third rail was laid between Bhuriwal and Cawnpore. The Company's contract expired in 1889 when the Railway was purchased by the State and has since been worked as a State Railway.

The working of this railway was amalgamated with that of the East Indian Railway from 1st July 1925.

The South Indian.

The South Indian Railway was one of the original guaranteed railways. It was begun by the Great Southern India Railway Company as a broad-gauge line ; but was converted after the seventies to the metre-gauge. This line has been extended and now serves the whole of the Southern India, south of the south-west line of the Madras Railway. Between Tuticorin and Ceylon a ferry service was formerly maintained, but a new and more direct route to Ceylon *via* Rameshwaram was opened at the beginning of 1914. As the original contract ended in 1907, a new contract was entered upon with the Company on the 1st of January 1908.

The Indian States.

The principal Indian State Railways are the Nizam's, constructed by a company under a guarantee from the Hyderabad State; the Kathiawar system of railways, constructed by subscriptions, among the several Chiefs in Kathiawar; the Jodhpur and Bikaner Railways, constructed by the Jodhpur and Bikaner Chiefs; the system of railways in the Punjab, constructed by the Patiala, Jind, Maler Kotla, and Kashmir Chiefs; and the railways in Mysore, constructed by the Mysore State.

PROGRAMME OF FUTURE CONSTRUCTION.

At the end of the financial year 1927-28 a total of 3,629 miles of new lines was under construction, distributed as follows :—

	Miles.
5-'6" gauge	1,429.81
3'-3⅜" gauge	1,820.61
2'-6" gauge	378.34

During 1927-28 sanction was accorded to the construction of new lines totalling 16·6 miles.

	Miles.
5'-6" gauge	697.46
3'-3⅜" gauge	760.11
2'-6" gauge	158.81

Khyber Railway.

The construction of the Khyber Railway, a length of about 28 miles, was sanctioned in July 1920 and in November of that year, after various preliminary difficulties had been overcome, the work of construction, actually commenced. Owing to the peculiar and arduous conditions under which the construction had to be carried out, five years elapsed before the section from Jamrud to Landikotal, a length of about 21 miles, was completed and opened for public traffic on 2nd November 1925. The remaining portion from Landikotal to Landikhana was opened in April 1926.

This is the first 5 feet 6 inches gauge line which has been built to the new Standard Dimensions and allows for a maximum running width of 12 feet and running height of 15 feet 6 inches. The great engineering difficulties which have had to be overcome, and the standard to which the railway has been built render it a technical achievement ranking with the greatest engineering works carried out by Railway Engineers.

The line is situated entirely outside the administrative border of British India in the strip of tribal territory which separates it from Afghanistan. The trade that passes through the Khyber Pass is already considerable and it is hoped that the railway will still further increease its volume, thereby bringing profit and employment to many who in the past have subsisted with difficulty on the meagre agricultural resources of the country which it traverses.

Lines under Construction.

Of the total of 3,629 miles of lines of various gauges under construction at the end of the year, a brief account of some of the more important is given below.

Raipur-Vizianagram Railway.

This trunk line on the 5'-6" guage, 261 miles in length, passes through a large undeveloped area, and will provide direct communication between the Central Provinces and the new Harbour now under construction at Vizgapatam on the east coast. The section of the line from Vizianagram to Parvatipuram, 48 miles long, was completed and opened to traffic in 1924.

During 1926-27 some realigning work has been carried out which will appreciably reduce the length of the line. Work at the northern and southern ends is progressing well but on the middle portion sickness and delay in obtaining possession of land have impeded progress. The line will be opened by sections as they are ready, but it is not expected that the whole line will be opened throughout till 1931.

Vizagapatam Harbour.

The suction dredger, 'Vizagapatam' which met with a serious accident in May 1927, returned from Calcutta, after undergoing necessary repairs, about the end of December. Throughout the year reclamation work was vigorously pushed on, and bunds were constructed around the railway and the manganese wharf area on the north side of the dock reclamation area and the storage canal. Good progress was made with the sinking of the monliths of the wharf wall, though work was at first somewhat hampered owing to the late delivery of the two loco cranes which had been ordered from England. The provision of an additional wharf for dealing exclusively with the manganese ore traffic, and of a dry dock, was sanctioned during the year, and a start was made with their construction. Work on the construction of staff quarters is well in hand. The general lay out of the railway connections was approved by the Railway Board and the preparation of the estimates was taken in hand. Certain anti-malarial measures were also carried out in accordance with the advice of the Director of the Central Malaria Organisation with the Government of India.

Lucknow-Sultanpur Jaunpur (E. I. Railway).

The question of constructing a railway between Jaunpur and Lucknow *via* Sultanpur has been long under consideration. The object of the scheme is to open out the country along the Goomti river between the Oudh and Rohilkhand main and loop lines. The railway will run more or less along the watershed between the Goomti and Sai Rivers and will cross a well cultivated fertile tract of country. The construction of the line which is about 142 miles long on the 5′ 6″ guage was sanctioned in August 1927 and will take about 2½ years to complete.

Unao-Madhoganj (E. I. Railway.)

The construction of a line between Unao and Madhoganj a distance of 48 miles on the 5′-6″ gauge was sanctioned in August 1927. The principal object of this line is to open up the tract of country bounded on the west by the Ganges, on the east by the East Indian Railway main line Bareilly to Lucknow and on the south by the Lucknow-Cawnpore Branch. The line may eventually form part of a larger scheme for a through line between Unao and Chandausi *via* Jalalabad and Budaon; but as it was financially sound on its own merits and would not conflict with further developments it was decided to proceed with it independently especially in view of the fact that the area which the line would traverse, would be watered by the Sarda Canal under construction. It is hoped to have the line open for public traffic by the end of 1929.

Kartal-Kamasin (G. I. P. Railway).

The construction of this broad guage branch on the Great Indian Peninsula Railway, 59 miles long, was sanctioned in February 1928. It is intended to serve a fertile and well irrigated area in the Banda District of the United Provinces, and will open out the Ken Baghain Doab commanded by the Ken Canal. The land acquisition proceedings are in hand. The construction of the line is expected to take about three years a possibility of an extension of the branch to Lalitpur is being investigated.

Vasad-Borsad-Katana (B. B. & C. I. Railway).

The construction of this line, about 26 miles long on the Bombay, Baroda and Central India Railway broad gauge was sanctoned in December 1927. It will traverse a rich agricultural tract of the Borsad Taluka and will greatly stimulate trade and development therein. Arrangements are at present in hand to obtain possession of the land required for the line, and it is hoped to open it in 1930.

Chak Jhumra Khushab Railway.

The construction of this broad guage chord line by the N. W. Railway was sanctioned in two parts, (*i*) from Chak Jhumra to Chiniot in November 1926 and (*ii*) the remainder in April 1927. It will provide across connection between the Lyallpur District and Shahpur which is badly required and will also provide a shorter alternative route to Waziristan to the relief of the main line north of Lahore. About 80 miles of new line are involved and two large bridges over the Chenab and Jhelum rivers. It is hoped to open this line in 1929.

Lyallpur-Chananwala (N. W. Ry.)

The construction of the Lyallpur-Chananwala Railway, on the 5′-6″ gauge, was sanctioned in February 1928, and with the Chak Jhumra-Khushab line will provide a cross connection from Kundian to Chananwala which will probably be extended to Bhatinda. The line, which is about 110 miles in length, will connect up the important towns of Sargodha, Chiniot, Lyallpur, Samundri, Tandlianwala, Okara, Dipalpur and Fazilka, and will probably be open for traffic about the middle of 1930.

Batala-Butari (N. W. Railway).

The construction of this railway, about 42 miles in length, was sanctioned in January 1928. It will form a loop connecting Batala on the Amritsar-Pathankot branch with Butari on the Amritsar-Jullundur section of the main line of the North Western Railway.

Besides touching three important places of pilgrimage it will traverse one of the most fertile tracts in the Punjab. It is anticipated that the line will be opened for traffic in about a year's time.

Kangra Valley Railway.

This line is a 2′-6″ gauge extension from the N. W. Ry. broad gauge terminal at Pathankote and traverses the wide and fertile tract known as the Kangra Valley. The line will shorten the journey to the important hill station of Dalhousie and Dharamsala.

The Punjab Government which has in hand the construction of the Uhi-Hydro-Electric scheme, had agreed to guarantee this line against loss in working over a number of years, as a rail connection of some kind is necessary for the transport of machniery and stores required for the Hydro Electric Scheme and for maintenance of the transmission lines after opening.

Abdulpur-Nawabganj (E. B. Railway.)

The construction of this broad gauge line about 57 miles long was sanctioned in October 1927. From the railway point of view the line is very important as it will permit of traffic being diverted from the Godagari ferry to *via* the Sara bridge with a considerable reduction in working expenses. The line will serve Rampur Boaliar or Rajshahi, a district town of considerable local importance. It is expected that the section from Abdulpur to Rampur Boalia 28 miles will be open for traffic early in 1929.

Salem-Vriddhachalam (S. I. Railway.)

This railway is the outcome of several proposals, some dating as far back as 1909, for lines to serve the Salem and South Arcot district. The line which is to be on the metreguage, will be about 83 miles long and together with the Vriddhachalam-Cuddalore Railway now under construction, will form a cross feeder connecting Salem Junction on the broad-gauge with Cuddalore on the metre-gauge. It will also pass through fairly populous country and busy trade centres and will afford facilities for the general development of trade besides developing the well irrigated country to be traversed.

Trichinopoly-Manamadura (S. I. Railway).

The construction of this line 94 miles in length and on the metre-gauge, was sanctioned in the year 1927-28. It is one of the lines recommended by Mr. Izat, who was deputed in the year 1921, to investigate the railway requirements of Southern India. The line will traverse a thickly populated country and serve several important towns including Siviganaga in the vicinity of which there are several renowned temples largely attended by pilgrims. It will also afford the relief to the Trichinopoly-Manamadura Section of the South Indian Railway main line which will be needed when the Villupuram-Trichinopoly line is open.

Taungdwingyi-Kyankpadaung (Burma Railways.)

The first section from Taungdwingyi to Natmauk has already been opened for traffic Steady progress has been maintained on the Natmauk-Pinchaung and Pinchaung-Kyankpadaung Sections. The work on major bridges was hampered by heavy floods. It is expected that the whole line will be opened throughout in March 1930.

Minbu-Pakokku (Burma Railways.)

The construction of this important metre-gauge line, about 312 miles in length, as part of the Burma Railways system, was sanctioned in December 1927. It involves a wagon ferry over the Irrawaddy river connecting Patanago and Malun. The line is designed to open out a large area at present lacking in means of transportation.

Electrification of the Madras Suburban Section. South Indian Railways.

A scheme for the electrification of the suburban lines of the South Indian Railway from Madras Beach to Tambaram was sanctioned during the year 1927-1928 at an estimated cost of Rs. 42 lakhs approximately. It is anticipated that the introduction of electric traction on this section will not only enable the railway administration to cope with the normal increase in traffic, but will also considerably encourage the development of suburban passenger traffic in the area.

Madras Hydro-Electric Schemes.

Similarly further investigations had also to be made of the Madras Hydro-Electric projects and of the schemes for the electrification of the Madura-Trichinopoly and certain other section of the South Indian Railway for which it is intended to obtain power from hydro-electric sources. The results of these further investigations are still awaited.

Electrification of Suburban Lines near Calcutta.

With regard to the Calcutta suburban electrification schemes, it was found necessary in view of the heavy expenditure involved to carry out further investigation s both as to the probable development of traffic in the suburban area and the estimated cost of the project, in order to ascertain to what extent the introduction of electric traction on the section would be justified financially.

Terminal Facilities for Passenger Traffic of the Bombay, Baroda and Central India Railway at Bombay.

The Railway Board with the approval of the Secretary of State for India have sanctioned the construction of the Bombay, Baroda and Central India Railway terminal station at Bellasis Road, Bombay, for dealing with the long distance passenger traffic at an estimated cost of Rs. 1,52,90,000. The work is in progress. When completed this station will take the place of Colaba station which will be closed a n d dismantled.

Calcutta Chord Railway.

This line starts from a point near Dankheri station on the Burdwan-Howrah Chord of the East Indian Railway and joins the Eastern Bengal Railway near Dum Dum Junction.

It is about 8 miles in length and includes a bridge over the Hooghly river at Bally. This connection is primarily intended for export of coal from the East Indian Railway. But it is likely in the near future to be used also for coal from the Bengal Nagpur Railway Coalfields, and with the developments anticipated in the terminal arrangements at Calcutta and the electrification of the lower portion of the Eastern Bengal Railway a large proportion of the Suburban passenger traffic will eventually pass over it.

INDIA AND CEYLON.

The possibility of connecting India and Ceylon by a railway across the bank of sand extending the whole way from Rameswaram to Mannar has been reported on from time to time, since 1895 various schemes having been suggested.

The South Indian Railway having been extended to Dhanushkodi, the southernmost point of Rameswaram Island, and the Ceylon Government Railway to Talaimannar, on Mannar Island, two points distant from each other about 21 miles across a narrow and shallow strait, the project has again been investigated with the idea of connecting these two terminal stations by a railway constructed on a solid embankment raised on the sand bank known as "Adam's Bridge," to supersede the ferry steamer service which has been established between these two points.

In 1913, a detailed survey was made by the South Indian Railway Company, and a project has now been prepared. This project contemplates the construction of a causeway from Dhanushkodi Point on the Indian side to Talai mannar Point on the Ceylon side, a length of 20·05 miles of which 7·19 will be upon the dry land of the various lands, and 12·86 will be in water. The sections on dry land will consist of low banks of sand pitched with coral and present no difficulty. The section through the sea will be carried on a causeway which it is proposed to construct in the following way. A double row of reinforced concrete piles, pitched at 10 feet centres and having their inner faces 14 feet apart, will first be driven into the sand. These piles will then be braced together longitudinally with light concrete arches and chains and transversely with concrete ties, struts and chains. Behind the piles slabs of reinforced concrete will be slipped into position, the bottom slabs being sunk well into the sand of the sea bottom. Lastly, the space enclosed by the slabs will be filled in with sand.

The top of the concrete work will be carried to six feet above high water level, and the rails will be laid at that level. The sinking of the piles and slabs will be done by means of water jets. This causeway, it is expected, will cause the suspended sand brought up by the currents, to settle on either side bringing about rapid accretion and eventually making one big island of Rameswaram island and Mannar island.

Indo-Burma Connection.

The raids of the Emden in the Bay of Bengal in 1914, and the temporary interruption of communications between India and Burma, stimulated the demand for a direct railway connection between India and Burma. Government accepted the position and appointed Mr. Richards, M. Inst. C.E., to be the engineer-in-charge of the surveys to determine the best route for a railway from India to Burma. The coast route appears to be the best one but at present would not be remunerative. This would start from Chittagong, which is the terminus and head-quarters of the Assam-Bengal Railway and a seaport for the produce of Assam. The route runs southwards through the Chittagong district, a land of fertile rice fields intersected by big rivers and tidal creeks and it crosses the Indo-Burma frontier, 94 miles from the town of Chittagong. For about 160 miles further it chiefly runs through the fertile rice lands of Arrakan and crosses all the big tidal rivers of the Akyab delta. These include the Kalidan river which drains 4,700 miles of country and even at a distance of about 30 miles from its mouth is more than hals a mile wide. About 260 miles from Chittagong the railway would run into the region of mangrove swamps which fringe the seacoast north and south of the harbour of Kaukkphu stretching out into the mangrove swamps like ribs from the backbone. Innumerable spurs of the Arrakan Yoma have to be crossed. Yoma is a mountain ridge which extends from Cape Negrais northwards until it loses itself in a mass of tangled hills east of Akyab and Chittagong. At its southern end the height of the ridge is insignificant but it has peaks as high as 4,000 feet before it reaches the altitude of Sandway and further north it rises much higher. It is a formidable obstacle to railway communication between India and Burma. This route is estimated to cost about £7,000,000 and would have to be supplemented by branch lines to Akyab where there is at present a considerable rice traffic and the cost of this would have to be added to the £7,000,000 already referred to.

The other routes examined have been the Hukong Valley route and the Manipur route which were surveyed by the late Mr. R. A. Way many years ago. The Manipur route was estimated to cost about £5,000,000 as it has to cross three main ranges of hills with summit levels of 2,650, 3,600 and 8,900 feet long. Altogether there would be about four miles of tunnelling through the three main ridges and through other hills and more than 100 miles of expensive undulating railway with grades as steep as 1 in 50 and 11,000 feet of aggregate rise and fall. The Hukong valley route is only about 284 miles long and it presents fewer engineering difficulties than either the Coast or the Manipur route. One hundred and fifty miles of this route lie in open country capable of cultivation though at present it is only very thinly populated. Only one range of hills has to be crossed and this can be negotiated with a summit tunnel of 5,000 feet long at a height of 2,500 feet. There are less than fifty miles of very heavy work and only about 4,500 ft. aggregate of rise and fall. The Hukong Valley route although cheaper than the Manipur route is not a practical financial proposition and both may be ruled out of consideration.

Main results of working of all Indian Railways treated as one system.

(*a*) Value f.o.b. (*b*) Export values. (*c*) Revised.

The feature which stands out most prominently in a survey of the mineral industries of India is the fact that until recent years little has been done to develop those minerals which are essential to modern metallurgical and chemical industries, while most striking progress has been made in opening out deposits from which products are obtained suitable for export, or for consumption in the country by what may conveniently be called direct processes. In this respeet India of to-day stands in contrast to the India of a century ago. The European chemist armed with cheap supplies of sulphuric acid and alkali, and aided by low sea freights and increased facilities for internal distribution by the spreading network of railways has been enabled to stamp out, in all but remote localities, the once flourishing native manufactures of alum, the various alkaline compounds, blue vitriol, copperas, copper, lead, steel and iron, and seriously to curtail the export trade in nitre and borax. The reaction against that invasion is of recent date. The high quality of the native-made iron, the early anticipation of the processes now employed in Europe for the manufacture of high-class steels, and the artistic products in copper and brass gave the country a prominent position in the ancient metallurgical world, while as a chief source of nitre India held a position of peculiar political importance until, less than forty years ago, the chemical manufacturer of Europe found among his by-products, cheaper and more effective compounds for the manufacture of explosives.

With the spread of railways, the development of manufactures connected with jute, cotton and paper; and the gradually extended use of electricity the demand for metallurgical and chemical products in India has steadily grown. Before long the stage must be reached at which the variety and quantity of products required, but now imported, will satisfy the conditions necessary for the local production of those which can be economically manufactured only for the supply of groups of industries.

Coal.

Most of the coal raised in India comes from the Bengal and Bihar and Orissa—Gondwana coal-fields. Outside Bengal and Bihar and Orissa the most important mines are those at Singareni in Hyderabad, and in Central Provinces but there are a number of smaller mines which have been worked at one time or another.

The subjoined statement shows the production of all mines in British India and in Indian States during 1927, as compared with 1926:—

Province.	1926.	1927.
	Tons.	Tons.
Assam	301,061	323,342
Baluchistan	15,586	14,444
Bengal	5,137,688	5,554,990
Bihar and Orissa ..	13,955,775	14,517,866
Central India	216,708	217,661
Central Provinces ..	635,252	666,758
Hyderabad	637,779	707,213
Punjab	68,043	62,704
Rajputana	31, 275	17,358
Total ..	20,999,167	22,082,336

Coal Prices.—The value of the coal produced in India is reported annually by mine-owners. It represents the actual or estimated wholesale price of coal at the pit's mouth.

The total value of the coal produced in India decreased from Rs. 10,14,99,634 (£7,574,599) in 1926 to Rs. 9,48,70,013 (£7,079,852) in 1927.

There was a further reduction in the pit's mouth value per ton of coal for India as a whole from Rs. 4-13-4 to Rs. 4-4-9, but in contrast to the previous year all provinces did not participate in this fall. In the two great coal provinces Bihar and Orissa and Bengal, the value dropped by Rs. 0-9-7 and Rs. 0-12-7 respectively. In the Central Provinces it fell by Rs. 0-13-7; in Central India the fall was Rs. 0-2-10, and in the Punjab Rs. 0-2-3. The maximum fall, Rs.. 1-1-1, was in Baluchistan.

Labour in the Coal Mining Industry.

The average number of persons employed in the coalfields during 1927 showed an appreciable decrease in spite of the substantial increase in production. The average output per person employed, therefore, again showed an advance on the previous year, the figure of 110.5 tons for 1925 rising to 113.1 tons for 1926 and 122 3 tons in 1927; the figures for the last two years are higher than has previously been recorded, and indicate a higher average grade of efficiency in the mines at work than has hitherto been attained. This increased output per person employed is specially marked in Assam, Bengal, Bihar and Orissa, the Central Provinces and Hyderabad.

There was, however, a small increase in the number of *deaths by accident;* these amounted to 196, which is, nevertheless, a considerable improvement on the annual average for the quinquennium 1919-23, which was 274; in addition, it relates to production $2\frac{1}{3}$ million tons in excess of the average for 1919-23. The death-rate was 1·1 per thousand persons employed in 1927 against 0·99 for 1926; the average figure for the period 1919-23 was 1·36.

IRON ORE.

Bengal and Bihar and Orissa are the only provinces in India in which iron ore is mined for smelting by European methods. Iron smelting, however, was at one time a widespread industry in India and there is hardly a district away from the great alluvial tracts of the Indus, Ganges and Brahmaputra in which slag heaps are not found. The primitive iron smelter finds no difficulty in obtaining sufficient supplies of ore from deposit that no European ironmaster would regard as worth his serious consideration. Early attempts to introduce European processes for the manufacture of pig-iron and steel were recorded in 1830 in the South Arcot Districts. Since that date various other attempts have been made but none proved a success before that now in operation near Barakar in Benggi. The site of the **Barakar Iron-Works** was

originally chosen on account of the proximity of both coal and ore supplies. The outcrop of iron stone shales between the coal-bearing Barakar and Raniganj stages stretches east and west from the works, and for many years the clay ironstone nodules obtainable from this formation formed the only supply of ore used in the blast furnaces. Recently magnetite and hematite have been obtained from the Manbhum and Singhbhum districts, and the production from the lastnamed district has largely replaced the supplies of ore hitherto obtained near the iron-works. The Bengal Iron and Steel Company, Limited, have now given up the use of ores obtained from the neighbourhood of Barakar and Raniganj and are now obtaining most of their ores from the Kolhan Estate, Singhbhum. Some years ago the Bengal Iron Steel Co., Ltd., secured two deposits of iron-ore in Saranda (Singhbhum) forming parts of two large hill masses known as Notu Buru and Buda Buru respectively. Recent prospecting in this part of Singhbhum has led to the discovery of numerous additional deposits of iron-ore, the extension of which has been traced into Keonjhar and Bonal States in Orissa, a total distance of some 40 miles in a S. S. W. direction. At Pansira Buru, a portion of Notu Buru, the deposit has been opened up, and now feeds the Barakar ironwork. Pansira Buru rises to over 2,500 feet above sea level, the low ground on the west side being at about 1,100 feet above sea-level. The uppermost 400 to 450 feet of this hill has now been opened up, and the workings indicate the existence of a deposit about a quarter of a mile long, perhaps 400 feet thick and proved on the dip for about 500 feet. The ore body appears to be interbedded with the Dharwar slates, from which it is separated by banded hematite-jaspers. The ore itself is high-grade micaceous hematite, often lateritised at the outcrop. Cross-cut into the interior of the deposit show that the hæmatite becomes very friable not far below the outcrop. In fact the characteristics of this ore, including the surface lateritisation, are almost exactly reproduced in the iron-ore deposits of Goa and Ratnagiri. **The Tata Iron and Steel Company** at Sakchi possesses slightly richer and purer ore-bodies in the Raipur district, supplies of ore are at present drawn from the deposits in Mayurbhanj. The ore-deposits have all been found to take the form of roughly lenticular leads or bodies of hæmatite, with small proportions of magnetite, in close association with granite on the one hand and granulitic rocks on the other.

Quantity and value of Iron-ore produced in India during the years 1926 and 1927.

(a) Estimated. (b) Excludes 1,909 tons of hæmatite quartzite.

The Production of iron-ore in India has been steadily on the increase in 1927 there was an increase over the previous year of 11·3 per cent., amounting to 187,440 tons.

The output of iron and steel by the *Tata Iron and Steel Co., Ltd.*, at Jamshedpur works again showed an increase; the production of pig-iron rose from 609,429 tons in 1926 to 624,028 tons in 1927, and of steel (including steel rails) from 360,980 tons in 1926 to 414,738 tons in 1927; but the production of ferro-manganese fell from 10,503 tons in 1926 to 5,092 tons in 1927. The production of pig-iron by the Bengal Iron Co., Ltd., recovered from the low figures of 52,674 tons in 1925 and 20,050 tons in 1926 to 132,649 tons in 1927; their output of products made from this pig-iron increased however, from 44,454 tons of sleepers and chairs and 26,364 tons of pipes and other castings in 1926 to 61,494 tons and 26,431 tons respectively in 1927. There was a large increase in the production of pig-iron by the Indian Iron and Steel Co., Ltd., from 253,431 tons in 1926 to 363,516 tons in 1927.

The Mysore Iron Works commenced producing pig-iron in 1923, when the quantity manufactured amounted to 9,732 tons; in 1927-28 the output of pig-iron mounted to 19,858 tons against 19,523 tons in 1926.

The number of indigenous furnaces that were at work in the Central Provinces during the year 1927 for the purpose of smelting iron-ore was 5 less than in the previous year; 95 furnaces were operating in the Bilaspur district, 48 in Raipur, 47 in Mandla, 11 in Drug5 3 in Saugor and 1 in Jubbulpore, making 206 in all.

There was a further increase in the **production of pig-iron** in India from 902,433 tons in 1926 to 1,140,051 tons, whilst the quantity exported rose from 309,505 tons in 1926-27 to 393,249 tons in 1927-28. Japan was the principal consumer of Indian pig-iron in 1927-28, nearly 69 per cent. of the total exports going to that country. There was a very slight rise in the export value, which was Rs. 45·1 (£3·37) per ton in 1926-27 and Rs. 45.4 (£3.39) in the following year.

The Steel Industry (Protection) Act 1924-Act No. XIV of 1924—authorised, to companies employing Indians, bounties, which were granted upon rails and fishplates wholly manufactured in British India from material wholly or mainly produced from Indian iron-ore and complying with specifications approved by the Railway Board, and upon iron or steel railway wagons a substantial portion of the component parts of which had been manufactured in British India. This Act was repealed by the Act No. III of 1927 and consequently the payment of bounties ceased on the 31st March 1927, but the Industry is protected to a certain extent by varying tariffs on different classes of imported steel.

Exports of Pig-iron from India during 1926-27 and 1927-28.

MANGANESE ORE.

This industry commenced some thirty years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines. The most important deposits occur in the Central Provinces, Madras, Central India, and Mysore—the largest supply coming from the Central Provinces. The uses to which the ore is put are somewhat varied. The peroxide is used by glass manufacturers to destroy the green colour in glass making, and it is also used in porcelain painting and glazing for the brown colour which it yields. The ore is now used in the manufacture of ferro-manganese for use in steel manufacture. Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high nrices prevailing.

Record Output in 1927.—A rise in the output of manganese ore in India has again to be recorded, the total for 1926, 1,014,928 tons, valued at £2,590,357 f.o.b Indian ports, rising to 1,129,353 tons, valued at £2,844,237 f.o.b. Indian ports during 1927. The figures for output in 1926 and 1927 are the highest yet recorded and exceed that for 1907, when 902,291 tons were raised. It will be noticed that concurrently with a rise in output there was, also in contrast to the change recorded, in the previous year, a rise in value the total value for 1927 being £253,880 greater than that for 1926. In 924 first-grade ore c.i.f. United Kingdom ports fetched an average price of 22.9*d.* per unit; in 1925 this price fell to 21.5*d.* and in 1926 to 18*d.* During 1927 the price fell from 19. 9*d.* in January to 16.5*d.* in September and recovered to 17*d.* in December the average for the year being again 18*d.* Consequently the increase in total value is proportionate to the increase in total quantity.

GOLD.

The greater part of the total output of gold in India is derived from the Kolar gold field in Mysore. During the last decade the production of this mine reached its highest point in 1905 when 616,758 ounces were raised. In 1906 the quantity won was 565,208 ounces and this figure fell to 535,085 ounces in 1907. The figures for the latter years reveal a small improvement. The Nizam's mine at Hutti in Hyderabad comes next, but at a respectable distance, to the Kolar gold field. This mine was opened in 1903. The only other mines from which gold was raised were those in the Dharwar district of Bombay and the Anantapur district of Madras. The Dharwar mines gave an output of 2,993 ounces in 1911 but work there ceased in 1912. The Anantapur mines gave their first output of gold during the year 1910; the amount being 2,532 ounces, valued at Rs.1,51,800. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) being obtained in the year 1898. The Kyaukpazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell in subsequent years until, in 1922, it was no more than 24 oz. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

PETROLEUM.

Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java, and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two the eastern area is by far the most important, and the most successful oil-fields are found in the Irrawaddy valley. Yenangyaung is the oldest and most developed of these fields. Native wells have been at work here for over 100 years, and to 1886, prior to the annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The Yenangyat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. Singu now holds the second place among the oil-fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and 1908 the production of this field was 43 million gallons, and after a fall to 31½ million gallons in 1910 it rose to 56½ million gallons in 1912. Several of the islands off the Arakan coasts are known to contain oil deposits but their value is uncertain. About 20,000 gallons were obtained from the eastern Barongo Island near Akyab, and about 37,000 gallons from Ramri Island in the Kyaukpyu district during 1911. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons which increased to nearly 4 million gallons in 1912. The existence of oil in Assam has been known for many years and an oil spring was struck near Makum in 1867. Nothing more, however, was done until 1883, and from that year up till 1902 progress was slow. Since that year the annual production has been between 2½ and 4 million gallons.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab. In Baluchistan geological conditions are adverse, and though some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

Output in 1927.—The world's production of petroleum in 1926 amounted to a little over 151½ million tons, of which India contributed 0.79 per cent. In 1927 the world's production jumped to some 171 million gallons, of which the Indian proportion on a practically stationary production fell to 0.72 per cent. India is now eleventh on the list of petroleum producing countries.

Petroleum statistics prove that it is becoming more and more difficult to maintain the output of India (including Burma) at the high levels it reached in 1919 and 1921 when peak productions of well over 305½ million gallons were reached. During 1927, the total production amounted to a little over 281 million gallons against less than 280½ million gallons in 1926 and a little over 289½ million gallons in 1925. Although, therefore, there has not been an actual decrease, this can only be regarded as an arrest in the decline that has set in, and which, with possible interruptions, is likely to continue slowly and steadily during the present generations unless a new field of importance is discovered. The chances of the latter recede year by year as exhaustive geological research continues to prove fruitless.

Amber, Graphite and Mica.—Amber is found in very small quantities in Burma, the output for 1927 being 70·6 cwts. valued at Rs. 27,180. Graphite is found in small quantities in various places but little progress has been made in mining except in Travancore. The total output in 1921 was 25 tons. India has for many years been the leading producer of mica, turning out more than half of the world's supply. In 1914, owing to the war, the output was only 38,189 cwts. compared with 43,650 cwts. in 1913. Owing to necessary restrictions with regard to the export of mica, the output fell off considerably in the year 1915, but subsequent demand in the United Kingdom for the best grade of ruby mica led to a considerable increase in production during the following years.

There was a small increase in the declared production of mica from 41,924 cwts. valued at Rs. 22,19,367 (£165,624) in 1926 to 42,614 cwts. valued at Rs. 24,52,055 (£182,989) in 1927. But the output figures are incomplete, and a more accurate idea of the size of the industry is to be obtained from the export figures. In both the years 1926 and 1927 the quantity exported was roughy double the reported production. The United States of America and the United Kingdom, which are the principal importers of Indian mica absorbed 52 per cent. and 35 per cent. respectively of the total quantity exported during 1926 and 23.7 per cent. and 49.4 per cent. respectively during 1927. During this latter year Germany took 14.2 per cent. of the quantity exported. The average value of the mica exported fell slightly from Rs. 122 (£9.1) per cwt. in 1926 to Rs. 119.5 (£8.9) per cwt. in 1927.

Tin, Copper, Silver and Lead.—The only persistent attempt to mine tin is in Burma. The output was for some time insignificant but rose in 1913 to 116 tons valued at £46,000 which fell to £38,000 in 1914. In 1925 Burma yielded 2,308 tons. Copper is found in Southern India, in Rajputana, and at various places along the outer Himalayas, but the ore is smelted for the metal alone, no attempt being made to utilize the by-products. In 1924 the production of 2,935 tons of copper-matte valued at Rs. 15,94,527 was reported by the Burma Corporation, Ltd., in the Northern Shan States.

Works at the Mosaboni Mine of the Indian Copper Corporation, Ltd., in the Singhbhum District, was practically suspended during the year 1926, pending the raising of the capital required for the erection of the necessary concentrating, smelting, refinery and power plants. Early in 1927, the Anglo-Oriental and General Investment Trust, Ltd., London, assumed control, a sum of £350,000 was subscribed and the erection of the new plant commenced at once at the company's new site at Moubhandar Ghatsila, together with an assisted siding from the Bengal-Nagpur Railway main line at Ghatsila, and an aerial ropeway from the mine.

The ore reserves (surface and underground) now amount to 624,539 short tons, with an average assay value of 3.88 per cent. copper representing a copper content of 24,232 tons. The quantity of ore raised in 1927 was 5,000 tons valued at Rs. 2,00,000 (£14,925). This is in addition to 35,823 tons previously produced during development.

In addition there is now a regular production of copper matte at the Namtu smelting plant of the Burma Corporation, Ltd., assaying on the average about 41 per cent. of copper, 35 per cent. of lead and 70 ounces of silver to the ton. The production during 1926 was 11,441 tons valued at Rs. 44,78,064 (£334,184) and averaging 41.6 per cent. of copper and during 1927, 11,872 tons valued at Rs. 44,13,205 (£329,344) averaging 40.3 per cent. of copper. The matte is exported to Hamburg for further treatment.

In contrast to the considerable increase recorded in the previous year there was a small decrease in the production of tin-ore in Burma from 3,548 tons valued at Rs. 61,01,858 (£455,362) in 1926 to 3,495 tons valued at Rs. 66,17,773 (£493,864) in 1927. This decrease was due to decreases in the output of Tavoy and the Southern Shan States partly balanced by a further considerable increase in the output of Mergui.

The production of silver from the Bawdwin mines of Upper Burma, increased from 5,103,646 ozs., valued at Rs. 88,49,722 (£660,427) in 1926 to 6,004,437 ozs., valued at Rs. 94,67,196 (£706,507) in 1927. The output of silver obtained as a bye-product from the Kolar gold mines of Mysore decreased to the extent of 2,163 ozs.

Zinc.—A monograph on zinc ores issued by the Imperial Institute in 1917 says that during the past fifty years zinc ores have received but little attention in India, and no production was recorded until 1913. In 1914 the production was 8,553 tons, and although the output fell to 96 tons in 1915, there is a prospect of India becoming an important producer of zinc ore in the future. Important silver-lead-zinc deposits occur at Bawdwin, in Tawngpeng State one of the Northern Shan States in Upper Burma. The mines are connected with the Mandalay-Lashio Branch of the Burma railways by a narrow-gauge line 51 miles long, the lines meeting at Manhpwe, which is about 544 miles from Rangoon. They were worked for many centuries by the Chinese for silver, and have long been known to contain zinc ore; until recently, however, no serious attempt appears to have been made to market the ore for its zinc values. In 1907 the present undertaking was started by the Burma Mines, Ltd., with the idea of recovering the lead from the old slag heaps left by the Chinese, estimated at 125,000 to 160,000 tons, and later to work the deposit. Smelting operations on these slags were first carried out at Mandalay, but later the works were transferred to Namtu, about 13 miles below the mines on the narrow-gauge railway. The deposits, which comprise an area of about 2,500 acres, have now been taken over by the Burma Corporation, Ltd., and its production of zinc amounted to 58,286, tons valued at Rs. 73,19,468 (£546,229) in 1927 against 48,834 tons valued at Rs. 63,24,491 (£471,977) in 1926. The exports during 1927 amounted to 67,135 tons valued at Rs. 70,06,018 (£522,737) against 43,056 tons valued at Rs. 43,03,775 (£321,177) in the preceding year.

Gem Stones.—The only precious and semi-precious stones at present mined in India are the diamond, ruby, sapphire, spinel, tourmaline garnet, rock-crystal, agate, cornelian, jadeite

and amber. The production of diamonds in Central India rose from 68.60 carats valued at Rs. 28,559 (£2,131) in 1926 to 112.74 carats valued at Rs. 44,943 (£3,354) in 1927. Amber has already been referred to ; of the rest only the ruby, sapphire and jadeite attain any considerable value in production and the export of the latter has declined owing to the disturbances in China, which is the chief purchaser of Burmese, jadeite. The output of the ruby mines in 1924 was only 101,097 carats or less than half the average annual quantity produced during the two preceding quinquennial periods. In 1922 an exceptionally valuable ruby of nearly 23 carats was found of rare size and quality. A severe decline in the output from the Mogo- ruby mines of Upper Burma in 1924, followed in 1925 by a marked drop in value, bore witness to a serious decline in the industry. The Burma Ruby Mines, Limited, ultimately decided to go into liquidation and the mines were offered for sale in September, 1926. The skeleton organisation left in charge of the mines has, however made good use of its opportunities, with the result that the value of the output in 1926 Rs. 4,66,772 exceeded that of the previous year by over a *lakh* of rupees. During 1927, however, production fell in value by over 1¾ lakhs of rupees to Rs. 2,79,834 due mainly to a decrease in the value of the sapphires (and pinels) produced, there being a slight increase in the value of the rubies won.

Radio-active Minerals.—The General Report of the Director of the Geological Survey of India for 1913 includes a brief report by R. C. Burton on an occurrence of pitchblende at mica mines near Singar, Gaya district, Bengal. The pitchblende occurs as rounded nodules in a pegmatite that is intrusive in mica schists. Other minerals occuring in the pegmatite are mica, triplite, ilmenite, tourmaline, and uranium ochre ; whitish columbite, zircon, and torbernite have also been recorded. Of these minerals triplite is stated to be the commonest.

The importance of the find of uranium oxide impregnating the triplite led to the discovery of weathered pitchblende, and as the pits were deepened the weathering became less and less until pure pitchblende was obtained. In the six months from July 1913 to February 1914, eight hundred weight of pitchblende was obtained from Abrakhi Hill together with six tons of uranium earth debris, five to six hundred tons of triplite and two tons of tantalite. These ores were raised under a prospecting license in respect of Abrakhi Hill alone and in March 1914, mining lease for thirty years was obtained in respect of sixty square miles of the Singar estate. The first intention was to work only the five square miles round Abrakhi and a syndicate was formed for this purpose, which on the outbreak of war, was refused a Trading License on account of the German element in it.

Stock Exchanges.

There are about 446 Share and Stock Broker in **Bombay**. They carry on business in the Brokers' Hall, bought in 1899 from the funds of the **Share and Stock Brokers' Association** formed to facilitate the negotiations and the sale and purchase of Joint Stock securities promoted throughout the Presidency of Bombay. Their powers are defined by rules and regulations framed by the Board of Directors and approved by the general body of Brokers. The Board has the power to fix the rates in times of emergencies. The official address of the Secretary is Dalal Street, Fort, Bombay.

At first the admittance fee for a broker was Rs. 5 which was gradually raised to Rs. 7,000. The fee for the Broker's card has increased and it was recently sold by public auction for Rs. 21,800. In 1921 a number of cards were sold at Rs. 40,000 each and the proceeds were employed to purchase an adjoining building for the extension of the business. This building was pulled down and the extension was completed last year. The present value of the card is about Rs. 7,000. The rules of the Association were revised in October 1916 and from the New Year the purchaser of shares has to pay the stamp and transfer fee instead of the seller. There are two classes of Exchange Brokers, Europeans and Indians, the latter being certified for recognition by the native Stock Exchange. Business in Government Paper and all other Trustees' Authorised Securities is carried on under the rules of the Bombay Stock Exchange, but in the street outside the hall.

In November 1917 a second Stock Exchange was opened in Bombay, with its headquarters in Apollo Street, known as the **Bombay Stock Exchange, Ltd.** This separate Exchange no longer functions older body; it was revived in 1922. It has ceased to function again

Committee of Enquiry.—In 1923 the Government of Bombay appointed a Committee to enquire into the constitution, government, customs, practices, rules, regulations and methods of business of the Native Share and Stock Brokers' Association of Bombay and to investigate any such complaints of the public and to make any such enquiries with reference to any of the aforesaid matters or any other matter appertaining to the aforesaid Association as the Committee may deem proper and thereafter with a view to protect the investing public against the interested or irregular control of business to formulate such definite proposals for the future constitution, control, direction and regulation of the aforesaid Association as the Committee may deem proper.

The Committee issued a report early in 1924 signed by all the members save one who appended a minority report. The majority report made several important recommendations for reform, notably one aimed at the prevention of corners and another for facilitating the handling of legitimate complaints against the brokers on the part of the public. The Association, however, adopted the minority report which leaves the constitution and practice of the Exchange very little modified.

In the middle of the year 1925 there was heavy speculation in certain mill scrips. The market was tremendously oversold, the usual crisis ensured, leading to the temporary closing of the Exchange and the suspension of all dealings and a public agitation for thorough reform arose. The brokers were at first unwilling to yield to this demand. But a threat of Government intervention and control altered their attitude. In the end, they submitted new draft rules under which wild speculation will be discouraged and the recurrence of such crisis as that indicated above will be unlikely.

For many years the **Calcutta** Share Market had its meeting place in various gullies in the business quarter and was under no control except that of established market custom. In 1908 the **Calcutta Stock Exchange Association** was formed, a building was leased in New China Bazar Street now called Royal Exchange Place, a representative committee was formed, and the existing trade customs were focussed into rules drawn up for the conduct of business. Admittance as a member of the Stock Exchange is by vote of the committee, and the entrance fee is at present Rs. 500. The market custom differs very materially from that of most other Stock Exchanges since there are no settlement days, delivery is due the second day after the contract is passed and sales of securities are effected for the most part under blank transfers. Another difference in procedure as compared with the London Stock Exchange is that there are no "Jobbers" in the Calcutta market. The Dealers who take their place, more or less, are not compelled to quote a buyer's and a seller's rate and are themselves Brokers as well as dealers, calling upon the Banks and other clients and competing with Brokers.

There are about 150 members, besides outside brokers, the former consisting of European, Jewish, Marwari, and Bengalee firms. The Marwaris predominate. The volume of *bona fide* Investment business is comparatively small and insufficient for the number of Brokers. The principal business transacted on the Calcutta Stock Exchange is connected with the shares in Jute Mills. Coal Companies, Tea Companies registered in India, Miscellaneous industrial concerns (such as Paper, Flour, Sugar). Railway and Transit Companies and Debentures, the latter comprising those of Industrial concerns and Trustees. Investment Securities, namely, Municipal and Port Trust Debentures. The association has an honorary secretary and is not at present affiliated to the Bengal Chamber of Commerce.

The **Madras** Stock Exchange situated at No. 9 Broadway consists of about 100 Members of which 25 are working Members. It was opened on 6th April 1920 and deals principally in Mill shares. Business is regulated by rules drawn up by the Directors. There is a Board of arbitration. There is an admittance membership card of Rs. 1,000 and an annual subscription of Rs. 100. The original 100 members were elected by the first Directors and each of the working members have deposited a security of Rs. 3,000.

(*b*) To encourage friendly feeling and unanimity among business community and associations on all subjects connected with the common good of Indian business.

(*c*) To enter into any arrangement with any Government or authority supreme, municipal, local or otherwise that may seem conducive to the Federation's objects or any of them, and to obtain from any such Government or authority all rights, concessions, and privileges which the Federation may think it desirable to obtain and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions.

(*d*) To sell or dispose of the undertaking of the Federation or any part thereof for such consideration as the Federation may think fit and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this Federation.

(*e*) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of this Federation.

(*f*) To undertake and execute any trusts the undertaking of which may seem to the Federation desirable either gratuitously or otherwise.

(*g*) To draw, make, accept, discount, execute and issue bills of exchange, promissory notes, bills of lading, warrants, debentures and other negotiable or transferable instruments or securities.

The Rules provide for two classes of members, *viz.*, numbers consisting of Chambers of Commerce (Subscription Rs. 300) and others consisting of Commercial Associations (Subscription Rs. 150).

The following were elected a provisional Committee of the Federation :—

President—Sir Dinshaw M. Petit.

Members :—Messrs. G. D. Birla, Sir Purshottamdas Thakurdas, Vidyasagar Pandya, Jamal Mahomed, Lala Harkishen Lal, Adamji Haji Dawood, Jamshed N. R. Mehta, Vikramjit Singh, Shri Ram, W. C. Bannerjee, B. F. Madon, Kasturbhai Lalbhai, D. P. Khaitan and Rai Bahadur A. C. Bannerjee, the last two being appointed Treasurers.

The following are details of the principal Chambers of Commerce and kindred bodies in India at the present time :—

BENGAL.

The Bengal Chamber of Commerce was founded in 1834. Its headquarters are in Calcutta. Other societies connected with the trade and commerce of the city are the Royal Exchange, the Bengal Bonded Warehouse Association, the Calcutta Trades Association, the Bengal National Chamber of Commerce and the Marwari Chamber of Commerce. The Bengal Chamber is registered with a declaration of membership of 300. Its objects are the usual purposes connected with the protection of trade "in particular in Calcutta." There are two classes of members. Permanent (Chamber and Associated) and Honorary.

Merchants, bankers, shipowners, representatives of commercial, railway and insurance companies, brokers, persons and firms engaged in commerce, agriculture, mining or manufacture, and joint stock companies or other corporations, formed for any purpose or object connected with commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature, may be elected as permanent members of the Chamber.

The following are the office bearers of the Chamber for the year 1927-28 :—

President.—The Hon'ble Sir George Godfrey (Messrs. Bird & Co.)

Vice-President.—Mr. J. H. Fyfe, M. L. C. (Messrs. Mackinnon, Mackenzie & Co.)

Committee.—Mr. A. Alker (Messrs. Shaw Wallace & Co.); Mr. G. L. Colvin, C.B., C.M.G., D.S.O. (E. I. Ry.); G. Cook (National Bank of India, Ltd.); T. W. Dowding, M.L.C. (Messrs. Turner Morrison & Co., Ltd.) ; Mr. B. E. G. Eddis (Messrs. Gillanders Arbuthnot & Co.); Mr. J. Reid Kay (Messrs. James Finlay & Co., Ltd.); Mr. R. A. Fowler (Messrs. McLeod & Co).,

The Secretary of the Chamber is Mr. D. K. Cunnison. Assistant Secretary, Mr. A. C. Daniel.

The following are the public bodies (among others) to which the Chamber has the right of returning representatives, and the representatives returned for the current year are :—

Council of State.—The Hon'ble Sir George Godfrey.

Bengal Legislative Council.—Mr. A. McD. Eddis (Messrs. Gladstone, Wylie & Co., Ltd.); Mr. C. C. Miller (Messrs. Hoare, Miller & Co. Ltd.); Mr. Geo. Morgan, C.I.E., (Messrs. Kilburn & Co.);Mr. P. Parrott (Messrs. Kilburn and Co.); Mr. J. H. Fyfe (Messrs. Mackinnon Mackenzie & Co.); Mr. O. S. Martin (Messrs. Martin & Co.)

Calcutta Port Commission.—Mr. J. H. Fyfe (Messrs. Mackinnon, Mackenzie & Co.); Mr.L. W. Dowding (Messrs. Turner, Morrison & Co. (Ld.); Mr. B. E. G. Eddis, (Messrs. Gillanders, Arbuthnot & Co.) ; Mr. J. Reid Key, (Messrs. Jas. Finlay & Co., Ltd.) ; Mr. A. McD. Eddis, M.L.C. (Messrs. Gladstone, Wyllie & Co.) & Mr. P. Parrott, M.L.C. (Messrs. Kilburn & Co.)

Calcutta Municipal Corporation.—Mr. J. Campbell Forrester, M.L.C. (Smith Forrester & Co.) ; Mr. Geo. Morgan, C.I.E., M.L.C. (Morgan, Walker & Co.); Mr. H. H. Hessling (Messrs. Steiners Ld.); H. C. N. Prance, (The Bengal Telephone Coy.,Ld.);Mr. Norman R. Luke, M.L.C. (Messrs. James Luke & Sons) & Mr. F. V. Rushforth (Messrs. Normans, Ross & Co.).

Chambers of Commerce.

Modern commerce in India was built up by merchants from the west and was for a long time entirely in their hands. Chambers of Commerce and numerous kindred Associations were formed by them for its protection and assistance. But Indians have in recent years, taken a large and growing part in this commercial life. The extent of their participation varies greatly in different parts of India, according to the natural proclivities and genius of different races. Bombay, for instance, has led the way in the industrial and commercial regeneration of the new India, while Bengal, very active in other fields of activity, lags behind in this one. Arising from these circumstances we find Chambers of Commerce in Bombay, Karachi, Calcutta, Madras and other important centres, with a membership both European and Indian; but alongside these have sprung up in recent years certain Associations, such as the Bombay Indian Merchants' Chamber and Bureau, of which the membership is exclusively Indian. These different classes of bodies are in no sense hostile to one another and constantly work in association.

The London Chamber of Commerce in 1921 realizing the increasing attention demanded by the economic development of India, took steps to form an "East India Section" of their organization. The Indian Chambers work harmoniously with this body, but are in no sense affiliated to it, nor is there at present any inclination on their part to enter into such close relationship, because it is generally felt that the Indian Chambers can themselves achieve their objects better and more effectively than a London body could do for them, and on various occasions the London Chamber, or the East India Section of it have shown themselves out of touch with what seemed locally to be immediate requirements in particular matters

A new movement was started in 1913 by the Hon. Sir Fazulbhoy Currimbhoy Ibrahim, a leading millowner and public citizen of Bombay, which aims at effecting great improvement in strengthening Indian commercial organization. Sir Fazulbhoy's original plan was for the formation of an Indian Commercial Congress. The proposal met with approval in all parts of India. The scheme was delayed by the outbreak of war but afterwards received an impetus from the same cause and the first Congress was held in the 1915 Christmas holiday season, in the Town Hall, Bombay. The list of members of the Reception Committee showed that all the important commercial associations of Bombay were prepared to co-operate actively.

The Congress was attended by several hundred delegates from all parts of India. Mr. (now the Hon. Sir) D. E. Wacha, President of the Bombay Indian Merchants' Chamber, presided as Chairman of the Reception Committee, at the opening of the proceedings and the first business was the election of Sir Fazulbhoy Currimbhoy as the first President. The Congress resolved upon the establishment of an Associated Indian Chamber of Commerce, and elected a Provincial Committee empowered to take the necessary steps to get the Association registered and to enrol members and carry on work. The Congress also approved of the draft constitution.

The following are the principal paragraphs of a Memorandum of Association and Statement of Objects of the new Associated Chamber as approved by the Congress:—

I. The name of the Chamber will be "THE ASSOCIATED INDIAN CHAMBER OF COMMERCE."

II. The Registered Office of the Chamber will be in Bombay.

III. The objects for which the Chamber is established are:—

(1) To discuss and consider questions concerning and affecting trade, commerce, manufactures and the shipping interests, at meeting of delegates from Indian Chambers of Commerce and Commercial Associations or Bodies and to collect and disseminate information from time to time on matters affecting the common interests of such Chambers or Associations or Bodies and the commercial, manufacturing and shipping interests of the country.

(2) To attain those advantages by united action which each Chamber or Association or body may not be able to accomplish in its separate capacity.

(3) To organize Chambers of Commerce, Commercial Associations or Bodies in different trade centres of the Country.

(4) To convene when necessary the Indian Commercial Congress at such places and at such times as may be determined by a Resolution of the Chamber.

The Articles of Association provided "There shall be an annual meeting of the Associated Indian Chamber held at Bombay on a date to be fixed by the Executive Council in the month of February," or at some other time, and "semi-annual or special meetings . . . may be convened by the Executive Council or on the requisition of one-third of the total number of members addressed to the Secretary . . . "

The organization languished for lack of support for some years until a number of merchants specially interested in Currency and Exchange questions revived it in 1926 at Delhi and 1927 at Calcutta, the initiative in the new activities hailing, like the first movement, from Bombay. The Commercial Congress held in Calcutta on 31st December 1926 and 1st and 2nd January 1927, decided upon the formation of a "Federation of Indian Chambers of Commerce" and agreed to the registered office of this body being "at the place where the President for the year has his headquarters or where he directs it to be located." Among the objects for which the Federation is established are the following:—

(*a*) To promote Indian busineses in matters of inland and foreign trade, transport, industry and manufactures, finance and all other economic subjects.

(*b*) To encourage friendly feeling and unanimity among business community and associations on all subjects connected with the common good of Indian business.

(*c*) To enter into any arrangement with any Government or authority supreme, municipal, local or otherwise that may seem conducive to the Federation's objects or any of them, and to obtain from any such Government or authority all rights, concessions, and privileges which the Federation may think it desirable to obtain and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions.

(*d*) To sell or dispose of the undertaking of the Federation or any part thereof for such consideration as the Federation may think fit and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this Federation.

(*e*) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of this Federation.

(*f*) To undertake and execute any trusts the undertaking of which may seem to the Federation desirable either gratuitously or otherwise.

(*g*) To draw, make, accept, discount, execute and issue bills of exchange, promissory notes, bills of lading, warrants, debentures and other negotiable or transferable instruments or securities.

The Rules provide for two classes of members, *viz.*, numbers consisting of Chambers of Commerce (Subscription Rs. 300) and others consisting of Commercial Associations (Subscription Rs. 150).

The following were elected a provisional Committee of the Federation :—

President—Sir Dinshaw M. Petit.

Members :—Messrs. G. D. Birla, Sir Purshottamdas Thakurdas, Vidyasagar Pandya, Jamal Mahomed, Lala Harkishen Lal, Adamji Haji Dawood, Jamshed N. R. Mehta, Vikramjit Singh, Shri Ram, W. C. Bannerjee, B. F. Madon, Kasturbhai Lalbhai, D. P. Khaitan and Rai Bahadur A. C. Bannerjee, the last two being appointed Treasurers.

(*d*) To sell or dispose of the undertaking of the Federation or any part thereof for such consideration as the Federation may think fit and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this Federation.

(*e*) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of this Federation.

(*f*) To undertake and execute any trusts the undertaking of which may seem to the Federation desirable either gratuitously or otherwise.

(*g*) To draw, make, accept, discount, execute and issue bills of exchange, promissory notes, bills of lading, warrants, debentures and other negotiable or transferable instruments or securities.

The Rules provide for two classes of members, *viz.*, numbers consisting of Chambers of Commerce (Subscription Rs. 300) and others consisting of Commercial Associations (Subscription Rs. 150).

The following were elected a provisional Committee of the Federation :—

President—Sir Dinshaw M. Petit.

Members :—Messrs. G. D. Birla, Sir Purshottamdas Thakurdas, Vidyasagar Pandya, Jamal Mahomed, Lala Harkishen Lal, Adamji Haji Dawood, Jamshed N. R. Mehta, Vikramjit Singh, Shri Ram, W. C. Bannerjee, B. F. Madon, Kasturbhai Lalbhai, D. P. Khaitan and Rai Bahadur A. C. Bannerjee, the last two being appointed Treasurers.

The following are details of the principal Chambers of Commerce and kindred bodies in India at the present time :—

BENGAL.

The Bengal Chamber of Commerce was founded in 1834. Its headquarters are in Calcutta. Other societies connected with the trade and commerce of the city are the Royal Exchange, the Bengal Bonded Warehouse Association, the Calcutta Trades Association, the Bengal National Chamber of Commerce and the Marwari Chamber of Commerce. The Bengal Chamber is registered with a declaration of membership of 300. Its objects are the usual purposes connected with the protection of trade "in particular in Calcutta." There are two classes of members. Permanent (Chamber and Associated) and Honorary.

Merchants, bankers, shipowners, representatives of commercial, railway and insurance companies, brokers, persons and firms engaged in commerce, agriculture, mining or manufacture, and joint stock companies or other corporations, formed for any purpose or object connected with commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature, may be elected as permanent members of the Chamber.

The following are the office bearers of the Chamber for the year 1927-28 :—

President.—The Hon'ble Sir George Godfrey (Messrs. Bird & Co.)

Vice-President.—Mr. J. H. Fyfe, M. L. C. (Messrs. Mackinnon, Mackenzie & Co.)

Committee.—Mr. A. Alker (Messrs. Shaw Wallace & Co.); Mr. G. L. Colvin, C.B., C.M.G., D.S.O. (E. I. Ry.); G. Cook (National Bank of India, Ltd.); T. W. Dowding, M.L.C. (Messrs. Turner Morrison & Co., Ltd.); Mr. B. E. G. Eddis (Messrs. Gillanders Arbuthnot & Co.); Mr. J. Reid Kay (Messrs. James Finlay & Co., Ltd.); Mr. R. A. Fowler (Messrs. McLeod & Co).,

The Secretary of the Chamber is Mr. D. K. Cunnison. Assistant Secretary, Mr. A. C. Daniel.

The following are the public bodies (among others) to which the Chamber has the right of returning representatives, and the representatives returned for the current year are :—

Council of State.—The Hon'ble Sir George Godfrey.

Bengal Legislative Council.—Mr. A. McD. Eddis (Messrs. Gladstone, Wylie & Co., Ltd.); Mr. C. C. Miller (Messrs. Hoare, Miller & Co. Ltd.); Mr. Geo. Morgan, C.I.E., (Messrs. Kilburn & Co.); Mr. P. Parrott (Messrs. Kilburn and Co.); Mr. J. H. Fyfe (Messrs. Mackinnon Mackenzie & Co.); Mr. O. S. Martin (Messrs. Martin & Co.)

Calcutta Port Commission.—Mr. J. H. Fyfe (Messrs. Mackinnon, Mackenzie & Co.); Mr. L. W. Dowding (Messrs. Turner, Morrison & Co. (Ld.); Mr. B. E. G. Eddis, (Messrs. Gillanders, Arbuthnot & Co.); Mr. J. Reid Key, (Messrs. Jas. Finlay & Co., Ltd.); Mr. A. McD. Eddis, M.L.C. (Messrs. Gladstone, Wyllie & Co.) & Mr. P. Parrott, M.L.C. (Messrs. Kilburn & Co.)

Calcutta Municipal Corporation.—Mr. J. Campbell Forrester, M.L.C. (Smith Forrester & Co.); Mr. Geo. Morgan, C.I.E., M.L.C. (Morgan, Walker & Co.); Mr. H. H. Hessling (Messrs. Steiners Ld.); H. C. N. Prance, (The Bengal Telephone Coy., Ld.); Mr. Norman R. Luke, M.L.C. (Messrs. James Luke & Sons) & Mr. F. V. Rushforth (Messrs. Normans, Ross & Co.).

Chambers of Commerce.

Modern commerce in India was built up by merchants from the west and was for a long time entirely in their hands. Chambers of Commerce and numerous kindred Associations were formed by them for its protection and assistance. But Indians have in recent years, taken a large and growing part in this commercial life. The extent of their participation varies greatly in different parts of India, according to the natural proclivities and genius of different races. Bombay, for instance, has led the way in the industrial and commercial regeneration of the new India, while Bengal, very active in other fields of activity, lags behind in this one. Arising from these circumstances we find Chambers of Commerce in Bombay, Karachi, Calcutta, Madras and other important centres, with a membership both European and Indian; but alongside these have sprung up in recent years certain Associations, such as the Bombay Indian Merchants' Chamber and Bureau, of which the membership is exclusively Indian. These different classes of bodies are in no sense hostile to one another and constantly work in association.

The London Chamber of Commerce in 1921 realizing the increasing attention demanded by the economic development of India, took steps to form an "East India Section" of their organization. The Indian Chambers work harmoniously with this body, but are in no sense affiliated to it, nor is there at present any inclination on their part to enter into such close relationship, because it is generally felt that the Indian Chambers can themselves achieve their objects better and more effectively than a London body could do for them, and on various occasions the London Chamber, or the East India Section of it have shown themselves out of touch with what seemed locally to be immediate requirements in particular matters

A new movement was started in 1913 by the Hon. Sir Fazulbhoy Currimbhoy Ibrahim, a leading millowner and public citizen of Bombay, which aims at effecting great improvement in strengthening Indian commercial organization. Sir Fazulbhoy's original plan was for the formation of an Indian Commercial Congress. The proposal met with approval in all parts of India. The scheme was delayed by the outbreak of war but afterwards received an impetus from the same cause and the first Congress was held in the 1915 Christmas holiday season, in the Town Hall, Bombay. The list of members of the Reception Committee showed that all the important commercial associations of Bombay were prepared to co-operate actively.

The Congress was attended by several hundred delegates from all parts of India. Mr. (now the Hon. Sir) D. E. Wacha, President of the Bombay Indian Merchants' Chamber, presided as Chairman of the Reception Committee, at the opening of the proceedings and the first business was the election of Sir Fazulbhoy Currimbhoy as the first President. The Congress resolved upon the establishment of an Associated Indian Chamber of Commerce, and elected a Provincial Committee empowered to take the necessary steps to get the Association registered and to enrol members and carry on work. The Congress also approved of the draft constitution.

The following are the principal paragraphs of a Memorandum of Association and Statement of Objects of the new Associated Chamber as approved by the Congress:—

I. The name of the Chamber will be "THE ASSOCIATED INDIAN CHAMBER OF COMMERCE."

II. The Registered Office of the Chamber will be in Bombay.

III. The objects for which the Chamber is established are:—

(1) To discuss and consider questions concerning and affecting trade, commerce, manufactures and the shipping interests, at meeting of delegates from Indian Chambers of Commerce and Commercial Associations or Bodies and to collect and disseminate information from time to time on matters affecting the common interests of such Chambers or Associations or Bodies and the commercial, manufacturing and shipping interests of the country.

(2) To attain those advantages by united action which each Chamber or Association or body may not be able to accomplish in its separate capacity.

(3) To organize Chambers of Commerce, Commercial Associations or Bodies in different trade centres of the Country.

(4) To convene when necessary the Indian Commercial Congress at such places and at such times as may be determined by a Resolution of the Chamber.

The Articles of Association provided "There shall be an annual meeting of the Associated Indian Chamber held at Bombay on a date to be fixed by the Executive Council in the month of February," or at some other time, and "semi-annual or special meetings . . . may be convened by the Executive Council or on the requisition of one-third of the total number of members addressed to the Secretary . . . "

The organization languished for lack of support for some years until a number of merchants specially interested in Currency and Exchange questions revived it in 1926 at Delhi and 1927 at Calcutta, the initiative in the new activities hailing, like the first movement, from Bombay. The Commercial Congress held in Calcutta on 31st December 1926 and 1st and 2nd January 1927, decided upon the formation of a "Federation of Indian Chambers of Commerce" and agreed to the registered office of this body being "at the place where the President for the year has his headquarters or where he directs it to be located." Among the objects for which the Federation is established are the following:—

(*a*) To promote Indian businesses in matters of inland and foreign trade, transport, industry and manufactures, finance and all other economic subjects.

(b) To encourage friendly feeling and unanimity among business community and associations on all subjects connected with the common good of Indian business.

(c) To enter into any arrangement with any Government or authority supreme, municipal, local or otherwise that may seem conducive to the Federation's objects or any of them, and to obtain from any such Government or authority all rights, concessions, and privileges which the Federation may think it desirable to obtain and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions.

(d) To sell or dispose of the undertaking of the Federation or any part thereof for such consideration as the Federation may think fit and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this Federation.

(e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of this Federation.

(f) To undertake and execute any trusts the undertaking of which may seem to the Federation desirable either gratuitously or otherwise.

(g) To draw, make, accept, discount, execute and issue bills of exchange, promissory notes, bills of lading, warrants, debentures and other negotiable or transferable instruments or securities.

The Rules provide for two classes of members, *viz.*, numbers consisting of Chambers of Commerce (Subscription Rs. 300) and others consisting of Commercial Associations (Subscription Rs. 150).

The following were elected a provisional Committee of the Federation :—

President—Sir Dinshaw M. Petit.

Members :—Messrs. G. D. Birla, Sir Purshottamdas Thakurdas, Vidyasagar Pandya, Jamal Mahomed, Lala Harkishen Lal, Adamji Haji Dawood, Jamshed N. R. Mehta, Vikramjit Singh, Shri Ram, W. C. Bannerjee, B. F. Madon, Kasturbhai Lalbhai, D. P. Khaitan and Rai Bahadur A. C. Bannerjee, the last two being appointed Treasurers.

The following are details of the principal Chambers of Commerce and kindred bodies in India at the present time :—

BENGAL.

The Bengal Chamber of Commerce was founded in 1834. Its headquarters are in Calcutta. Other societies connected with the trade and commerce of the city are the Royal Exchange, the Bengal Bonded Warehouse Association, the Calcutta Trades Association, the Bengal National Chamber of Commerce and the Marwari Chamber of Commerce. The Bengal Chamber is registered with a declaration of membership of 300. Its objects are the usual purposes connected with the protection of trade "in particular in Calcutta." There are two classes of members. Permanent (Chamber and Associated) and Honorary.

Merchants, bankers, shipowners, representatives of commercial, railway and insurance companies, brokers, persons and firms engaged in commerce, agriculture, mining or manufacture, and joint stock companies or other corporations, formed for any purpose or object connected with commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature, may be elected as permanent members of the Chamber.

The following are the office bearers of the Chamber for the year 1927-28 :—

President.—The Hon'ble Sir George Godfrey (Messrs. Bird & Co.)

Vice-President.—Mr. J. H. Fyfe, M. L. C. (Messrs. Mackinnon, Mackenzie & Co.)

Committee.—Mr. A. Alker (Messrs. Shaw Wallace & Co.); Mr. G. L. Colvin, C.B., C.M.G., D.S.O. (E. I. Ry.); G. Cook (National Bank of India, Ltd.); T. W. Dowding, M.L.C. (Messrs. Turner Morrison & Co., Ltd.) ; Mr. B. E. G. Eddis (Messrs. Gillanders Arbuthnot & Co.); Mr. J. Reid Kay (Messrs. James Finlay & Co., Ltd.); Mr. R. A. Fowler (Messrs. McLeod & Co).,

The Secretary of the Chamber is Mr. D. K. Cunnison. Assistant Secretary, Mr. A. C. Daniel.

The following are the public bodies (among others) to which the Chamber has the right of returning representatives, and the representatives returned for the current year are :—

Council of State.—The Hon'ble Sir George Godfrey.

Bengal Legislative Council.—Mr. A. McD. Eddis (Messrs. Gladstone, Wylie & Co., Ltd.); Mr. C. C. Miller (Messrs. Hoare, Miller & Co. Ltd.); Mr. Geo. Morgan, C.I.E., (Messrs. Kilburn & Co.);Mr. P. Parrott (Messrs. Kilburn and Co.); Mr. J. H. Fyfe (Messrs. Mackinnon Mackenzie & Co.); Mr. O. S. Martin (Messrs. Martin & Co.)

Calcutta Port Commission.—Mr. J. H. Fyfe (Messrs. Mackinnon, Mackenzie & Co.); Mr. L. W. Dowding (Messrs. Turner, Morrison & Co. Ld.); Mr. B. E. G. Eddis, (Messrs. Gillanders, Arbuthnot & Co.) ; Mr. J. Reid Key, (Messrs. Jas. Finlay & Co., Ltd.) ; Mr. A. McD. Eddis, M.L.C. (Messrs. Gladstone, Wyllie & Co.) & Mr. P. Parrott, M.L.C. (Messrs. Kilburn & Co.)

Calcutta Municipal Corporation.—Mr. J. Campbell Forrester, M.L.C. (Smith Forrester & Co.) ; Mr. Geo. Morgan, C.I.E., M.L.C. (Morgan, Walker & Co.); Mr. H. H. Hessling (Messrs. Steiners Ld.); H. C. N. Prance, (The Bengal Telephone Coy.,Ld.);Mr. Norman R. Luke, M.L.C. (Messrs. James Luke & Sons) & Mr. F. V. Rushforth (Messrs. Normans, Ross & Co.).

Bengal Boiler Commission.—Messrs. John Williamson (Union Jute Mills, South), H. H. Reynolds (Andrew Yule & Co.) and H. E. Skinner (Jessop & Co., Ld.).

Board of Trustees of the Indian Museum.—Mr. T. W. Dowding, M.L.C. (Turner, Morrison & Co., Ltd.).

Bengal Smoke Nuisances Commission.—Messrs. B. Thornton (Burn & Co., Ltd.) and J. Williamson (Union Jute Coy.'s S. Mill).

Calcutta Improvement Trust.—Mr. Geo. Morgan, C.I.E., M.L.C. (Morgan, Walker & Co.).

The Chamber elects representatives to various other bodies of less importance, such as the committee of the Calcutta Sailors' Home, and to numerous subsidiary associations. The following are the recognised associations of the Bengal Chamber of Commerce:—

Calcutta Wheat and Seed Trade Association, Indian Jute Mills Association, Indian Tea Association, Calcutta Tea Traders' Association, Calcutta Fire Insurance Association, Calcutta Import Trade Association, Calcutta Marine Insurance Agents' Association, The Wine, Spirit and Beer Association of India, Indian Mining Association, Calcutta Baled Jute Association, Indian Paper Makers' Association, Indian Engineering Association, Calcutta Jute Fabrics Shippers' Association, Calcutta Hydraulic Press Association, Jute Fabric Brokers, Association, Baled Jute Shippers' Association, Calcutta Jute Dealers' Association, Calcutta Hides and Skins Shippers' Association, Calcutta Sugar Importers' Association, Indian Lac Association for Research and Calcutta Accident Insurance Association, and Salt Importers' Association of Bengal.

The Chamber maintains a Tribunal of Arbitration for the determination, settlement and adjustment of disputes and differences relating to trade, business, manufactures, and to customs of trade, between parties, all or any of whom reside or carry on business personally or by agent or otherwise in Calcutta, or elsewhere in India or Burmah, by whomsoever of such parties the said disputes and differences be submitted. The Secretary of the Chamber acts as the Registrar of the Tribunal, which consists of such members or assistants to members as may, from time to time, annually or otherwise be selected by the Registrar and willing to serve on the Tribunal. The Registrar from time to time makes a list of such members and assistants.

The Chamber also maintains a Licenser Measurers Department controlled by a special committee. It includes a Superintendent (Mr. R. Ellis), Deputy Superintendent (Mr. A. H. Lugg), Head Office Manager (Mr. C. G. Smith) and six Assistant Superintendents (Messrs. J. G. Smyth) A. H. Mathews, G. C. G. Smyth and E. H. W. Wootten, J. B. F. Henfrey and B. Perry, and the staff at the time of the last official returns consisted of officers. The usual system of work for the benefit of the trade of the port is followed. The Department has its own provident fund and compassionate funds and Measurers' Club. The Chamber does not assist in the preparation of official statistical returns. It publishes weekly the *Calcutta Prices Current*, and also publishes a large number of statistical circulars of various descriptions in addition to a monthly abstract of proceedings and many other circulars on matters under discussion.

INDIAN CHAMBER OF COMMERCE, CALCUTTA.

The Indian Chamber of Commerce was established in November 1925, to promote and protect the trade, commerce and industries of India, and in particular the trade, commerce and industries in or with which Indians are engaged or concerned; to aid and stimulate the development of trade, commerce and industries in India with capital principally provided by or under the management of Indians; to watch over and protect the general commercial interests of India or any part thereof, and the interests of persons, in particular the Indians, engaged in trade, commerce or industries in India; to adjust controversies between members of this Chamber; to arbitrate in the settlement of disputes arising out of commercial transactions between parties willing or agreeing to abide by the judgment and decision of the Tribunal of the Chamber; to promote and advance commercial and technical education and such study of different branches of Art and Science as may tend to develop trade, commerce and industries in India; to provide, regulate and maintain a suitable building or room or suitable buildings or rooms for a Commercial Exchange in Calcutta; and to do all such other things as may be conducive to the development of trade, commerce and industries, or incidental to attainment of the above objects or any of them.

There are two classes of Members—Local and Mofussil. The Local Members pay an annual subscription of Rs. 100 and the Mofussil members Rs. 50. Merchants, Bankers, Shipowners, representatives of commercial, transport or insurance companies, brokers and persons engaged in commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature who are Indians, shall be eligible for election as members of the Chamber.

The following constitute the Managing Committee of the Chamber for the year 1928:—President: Mr. Faizullabhai Gangjee; Senior Vice-President: Mr. Sheokissan Bhatter; Vice-President: Mr. A. L. Ojha, M.L.C.
Members: Mr. D. P. Khaitan, Mr. D. S. Erulkar, Mr. N. Rajabally, Mr. E. P. Guzdar, Mr. G. D. Birla, Mr. Kumar Krishna Kumar, Mr. Anandji Haridas, Mr. Raj Shekhar Bose, Mr. N. L. Puri, Mr. K. J. Purohit, Mr. A. D. Madgaonkar, Mr. Habib Mahomed, Mr. Sajjan Kumar Chowdhury, Mr. R. L. Nopany, Mr. C. S. Rangaswami, Secretary, Mr M. P. Gandhi, M.A., F.R.E.S., F.S.S.

The Indian Chamber of Commerce has also appointed a Tribunal of Arbitration to arbitrate in all disputes relating to various trades. With a view to cover the varying nature of disputes arising in different trades, separate panels of Arbitration are appointed on the Tribunal of Arbitration for each of the following trades:—(1) Jute, (2) Gunny, (3) Piece-goods and Yarn, (4) Iron and Steel, (5) Coal and Minerals, (6) General. Registrar of the Tribunal of Arbitration: Mr. P. M. Gandhi.

Chamber's Representative on the Calcutta Port Commissioners: Mr. D. S. Erulkar, B.A. (Cantab.), Bar-at-Law.

Chamber's Representative on the Bengal Nagpur Railway Advisory Committee: Mr. Anandji Haridas.

Chamber's Representatives on the Ry. Rates Advisory Committee: (1) Mr. D. S. Erulkar, B.A. (Cantab.), Bar-at-Law, (2) Mr. D. P. Khaitan, (3) Mr. E. P. Guzdar, (4) Mr. Faizullabhai Gangjee, (5) Mr. A. D. Addy.

Chamber's Representative on the Calcutta Society for the Prevention of Cruelty to Animals: Mr. E. P. Guzdar.

Chamber's Representatives on the Bengal Conciliation Panel: (1) Mr. D. P. Khaitan, (2) Mr. Anandji Haridas, (3) Mr. N. Rajabally.

BOMBAY.

The object and duties of the Bombay Chamber, as set forth in their Memorandum and Articles of Association, are to encourage a friendly feeling and unanimity among commercial men on all subjects involving their common good; to promote and protect the general mercantile interests of this Presidency; to collect and classify information on all matters of general commercial interest; to obtain the removal, as far as such a Society can, of all acknowledged grievances affecting merchants as a body, or mercantile interests in general: to receive and decide references on matters of usage and custom in dispute, recording such decisions for future guidance, and by this and such other means, as the Committee for the time being may think fit, assisting to form a code of practice for simplifying and facilitating business; to communicate with the public authorities, with similar Associations in other places and with individuals, on all subjects of general mercantile interests; and to arbitrate between parties willing to refer to, and abide by, the judgment of the Chamber.

The Bombay Chamber was established in 1836, under the auspices of Sir Robert Grant, who was then Governor of the Presidency, and the programme described above was embodied in their first set of rules. According to the latest returns, the number of Chamber members is 154 and the number of Associated members is 4. Of these numbers 19 represent banking institutions, 7 shipping agencies and companies, 3 firms of solicitors, 3 railway companies, 11 insurance companies, 16 engineers and contractors, 99 firms engaged in general mercantile business.

All persons engaged or interested in mercantile pursuits desirous of joining the Chamber and disposed to aid in carrying its objects into effect are eligible for election to membership by ballot. The Chamber member's subscription is Rs. 360 and the Associate member's subscription is Rs. 300 per annum. Gentlemen distinguished for public services, or "eminent in commerce and manufactures," may be elected honorary members and as such are exempt from paying subscriptions. Any stranger engaged or interested in mercantile pursuits and visiting the Presidency may be introduced as a visitor by any Member of the Chamber inserting his name in a book to be kept for the purpose, but a residence of two months shall subject him to the rule for the admission of members.

Officers of the Year.

The affairs and funds of the Chamber are managed by a committee of nine ordinary members, consisting of the President and Vice-President and seven members. The committee must, as a rule, meet at least once a week and the minutes of its proceedings are open to inspection by all members of the Chamber, subject to such regulations as the committee may make in regard to the matter. A general meeting of the Chamber must be held once a year and ten or more members may requisition, through the officers of the Chamber, a special meeting at any time, for specific purpose.

The Chamber elects representatives as follows to various public bodies:—

The Council of State, one representative.

Legislative Council of the Governor of Bombay, two representatives.

Bombay Municipal Corporation, one member, elected for three years.

Bombay Improvements Committee, one member, elected for two years.

Board of Trustees of the Port of Bombay, five members, elected for two years.

The following are the officers of the Chamber for the year 1929-30 and their representatives on the various public bodies:—

President.—G. L. Winterbotham, Esq., M.L.C.
Vice-President.—E. Miller, Esq., M.L.C.
Committee.—Sir Leslie Hudson, Kt.; P. Barker, Esq.; D. S. Burn, Esq.; C. C. Gulliland, Esq.; L. A. Halsall, Esq.; A. R. Ingram, Esq.; G. Z. Meli, Esq.
Secretary.—R. J. F. Sulivan, Esq.
Asst. Secretary.—H. Royal, Esq.
Representatives on—
Council of State: The Hon'ble Sir Arthur Froom, Kt.
Bombay Legislative Council: G. L. Winterbotham, Esq., and E. Miller, Esq.
Bombay Port Trust: Sir Leslie Hudson, Kt; G. L. Winterbotham, Esq., M.L.C.; F. C. Annesley, Esq.; E. Miller, Esq.; M.L.C.; P. Barker, Esq.
Bombay Improvement Committee: R. H. Parker, Esq.
Bombay Municipal Corporation: D. J. C. Wallace, Esq.
Sydenham College of Commerce & Economics: H. H. Sawyer, Esq. and A. G. Gray, Esq.
Railway Advisory Committees—
G. I. P.: F. C. Annesley, Esq.
B. B. & C. I.: E. C. Reid, Esq.
Bombay Smoke Nuisances Commission: B. Brown, Esq.
St. George's Hospital Advisory Committee: F. B. Thornely, Esq.
Indian Central Cotton Committee: T. G. Ralli, Esq.
Empire Cotton Growing Corporation: B. C. Reade, Esq.
Back Bay Reclamation Scheme—
Standing Advisory Committee: Sir Leslie Hudson, Kt.
Lay-out Committee: Sir Leslie Hudson Kt.

Bombay Development Department—Special Advisory Committee: A. M. Reith, Esq.
Auxiliary Force Advisory Committee: H. R. Watson, Esq.
Ex-Services Association: G. L. Winterbotham, Esq., M.L.C. (*Ex-officio*).
Federation of Chambers of Commerce of the British Empire: Sir Malcolm Hogg, Kt.
Bombay Telephone Company, Ltd.: G. L. Winterbotham, Esq., M.L.C.
Railway Rates Advisory Committee: F. G. Travers, Esq.; L. A. Halsall, Esq.; J. F. Macdonell, Esq; E. Miller, Esq, M.L.C.; G. Sugdury, Esq.
Government of Bombay Road Board: E. Miller, Esq., M.L.C.
Governor's Hospital Fund: C. N. Moberly, Esq., C.I.E.

Special Work.

One of the most important functions performed by the Chamber is that of arbitration in commercial disputes. Rules for this have been in existence for many years and have worked most satisfactorily. The decisions are in all cases given by competent arbitrators appointed by the General Committee of the Chamber and the system avoids the great expense of resort to the Law Courts.

A special department of the Bombay Chamber is its Statistical Department, which prepares a large amount of statistical returns connected with the trade of the port and of great importance to the conduct of commerce. The department consists of fourteen Indian clerks who, by the authority of Government, work in the Customs House and have every facility placed at their disposal by the Customs authorities. They compile all the statistical information in connection with the trade of the port, in both export and import divisions, which it is desirable to record. No other Chamber in India does similar work to the same extent.

The Bombay Chamber publishes a Daily Arrival Return which shows the receipts into Bombay of cotton, wheat and seeds, and a Daily Trade Return, which deals with trade by sea and shows in great detail imports of various kinds of merchandise and of treasure, while the same return contains particulars of the movements of merchant vessels.

The Chamber publishes twice a week detailed reports known as Import and Export manifests, which give particulars of the cargo carried by each steamer to and from Bombay.

Three statements are issued once a month. One shows the quantity of exports of cotton, seeds and wheat from the principal ports of the whole of India. The second gives in detail imports from Europe, more particularly in regard to grey cloths, bleached cloths, Turkey red and scarlet cloths, printed and dyed goods, fancy cloth of various descriptions, woollens, yarns, metals, kerosine oil, coal, aniline dyes, sugar, matches, wines and other sundry goods. The third statement is headed, "Movement of Piece-goods and Yarn by Rail," and shows the despatches of imported and local manufactured piece-goods and yarn from Bombay to other centres of trade served by the railways.

The "Weekly Return" issued by the Chamber shows clearances of a large number of important designations of merchandise. A return of "Current Quotations" is issued once a week, on the day of the departure of the English mail, and shows the rates of exchange for Bank and Mercantile Bills on England and Paris, and a large quantity of general banking and trade information.

The annual reports of the Chamber are substantial tomes in which the whole of the affairs of the Chamber and the trade of the port during the past year are reviewed.

The Chamber has also a Measurement Department with a staff of 18, whose business is that of actual measurement of exports in the docks before loading in steamers. Certificates are issued by these officers with the authority of the Chamber to shippers and ship agents as to the measurement of cotton and other goods in bales or packages. The measurers are in attendance on the quays whenever there are goods to be measured and during the busy season are on duty early and late. The certificates granted show the following details:—

(*a*) The date, hour and place of measurement:
(*b*) the name of the shipper;
(*c*) the name of the vessel;
(*d*) the port of destination;
(*e*) the number and description of packages;
(*f*) the marks;
(*g*) the measurement, and in the case of goods shipped by boats;
(*h*) the registered number of the boat;
(*i*) the name of the tindal.

Certificates of weight and of origin are also issued by the Chamber.

Associated Chambers of Commerce of India and Ceylon.

HEAD OFFICE LOCATED IN BOMBAY FOR 1929.

President: G. L. Winterbotham, Esq., M.L.C., President of the Bombay Chamber of Commerce.
Deputy President: Chairman for the time being of the Burma Chamber of Commerce, Rangoon.
Deputy, President: A. L. Carnegie, Esq., President, Upper India Chamber of Commerce, Cawnpore.
Secretary: R. J. F. Sulivan, Esq., Bombay Chamber of Commerce.

Bombay Millowners' Association.

The Bombay Millowners' Association was established in 1875 and its objects are as follows:—

(*a*) To encourage friendly feeling and unanimity amongst Millowners and users of steam water and/or electric power on all subjects connected with their common good.
(*b*) To secure good relations between members of the Association.
(*c*) To promote and protect the trade, commerce and manufactures of India in general and of the cotton trade in particular.
(*d*) To consider questions connected with the trade, commerce and manufactures of its members.
(*e*) To collect and circulate statistics and to collect, classify and circulate information relating to the trade, commerce and manufactures of its members.

Any individual partnership or company, owning one or more mill or mills or one or more press or presses or one or more ginning or other factory or factories actuated by steam, water, electric and/or other power is eligible for membership, members being elected by ballot. Every member is entitled to one vote for every complete sum of Rs. 50 paid by him as annual subscription.

The membership of the Association in 1928 numbered 89.

The following is the Committee for 1929 :—

H. P. Mody, Esq., (*Chairman*), Lalji Naranji Esq., M.L.C., (*Deputy Chairman*), Sir, Dinshaw M. Petit, Bart., Sir Vict r Sassoon, Bart., Sir Ness Wadia, K.B.E., C.I.E., The Hon'ble Sir Dinshaw E. Wacha, Kt., Sir Fazulbhoy Currimbhoy, Kt., C.B.E., Sir Joseph Kay, Kt., The Honb'ble Sir Munmohandas Ramji, Kt., A. Geddis, Esq., Jehangir B. Petit, Esq., M.L.C., the Hon'ble Mr. Ratansi D. Morarji, N. B. Saklatvala, Esq., C.I.E., S. D. Saklatvala, Esq., H. H. Sawyer, Esq., F. F. Stileman, Esq., F. Stones, Esq., O.B.E., Madhavji D. Thackersey, Esq., C. N. Wadia, Esq., C.I.E., and T. Watts, Esq., T. Maloney, Esq., (*Secretary*.)

The following are the Association's Representatives on public bodies :—

Bombay Legislative Council: Mr. J. B. Petit, M.L.C.

Legislative Assembly: Sir Victor Sasoon, Bart., M.L.A.

Wadia, Esq., C.I.E., A. Geddis, Esq., S.D. Saklatvala, Esq., G. M. Rose, Esq., and B. K. Mantri, Esq., B.A., Barister-at-Law, Secretary of the Association.

Indian Merchants' Chamber.

The Indian Merchants' Chamber was established in the year 1907. Its objects are:—

(*a*) To encourage friendly feeling and unanimity among business community on all subjects connected with the common good of Indian merchants.

(*b*) To secure organised action on all subjects relating to the interests of the Indian business community directly and indirectly.

(*c*) To promote the objects of the Indian business community in matters of inland and foreign trade, shipping and transport, industry and manufacture, banking and insurance.

(*d*) To collect and disseminate statistical and other information securing the promotion of the objects of the Chamber and to make efforts for the spread of commercial and economic knowledge.

(*e*) To take all steps which may-be necessary for promoting, supporting or opposing legislation or other action affecting the aforesaid interests by the Government or any Department thereof or by any local body or bodies and in general to take the initiative to secure the welfare of the business community in all respects.

(f) To make representations to Local, Central or Imperial authorities, Executive or Legislative on any matter affecting trade, commerce, manufacture or shipping, banking or insurance.

(g) To undertake by arbitration the settlement of commercial disputes between merchants and businessmen and also to provide for arbitration in respect of disputes arising in the course of trade, industry or transport, and to secure the services of expert technical and other men to that end if necessary or desirable.

(h) To advance and promote commercial and technical education and to found and support establishments and institutions for such purposes.

(i) To undertake special enquiries and action for securing redress for legitimate grievances of any branch of trade or industry as also all such other actions as may be conducive to the extension of trade, commerce or manufactures, or incidental to the attainment of the above objects.

(j) To secure the interests and well-being of the Indian business communities abroad.

(k) And generally to do all that may be necessary in the interests of the realisation of the above objects of the Chamber directly or indirectly.

There are three classes of members:—

(1) Ordinary, (2) Patrons and (3) Honorary

(1) There are three classes of ordinary members:—

The offices of the Chamber are in the Phoenix Building, Graham Road, Ballard Estate, Bombay.

KARACHI.

The objects and duties of the Karachi Chamber of Commerce are set forth in terms similar to those of Bombay. Qualifications for membership are also similar. Honorary Membership may be conferred upon "any gentlemen interested in the affairs and objects of the Chamber" subject to election by the majority of votes of members. All new members joining the Chamber pay Rs. 500 entrance fee and the monthly subscription is Rs. 18. The subscription to the Chamber's periodical returns is at present fixed at Rs. 5 per month. The affairs of the Chamber are managed by a committee of ten members, consisting of a Chairman, Vice-Chairman and eight members, elected at the annual meeting of the Chamber as early in the year as possible. The Chamber elects a representative on the Bombay Legislative Council, three representatives on the Karachi Port Trust and two on the Karachi Municipality. There were last year 75 members of the Chamber. The following are the officers for the current year:—

Chairman—Mr. F. Clayton, C.I.E., M.L.C. (Fleming, Shaw & Co.).

Vice-Chairman.—R. D. England, Esq. (Messrs. Grahams Trading Co., Ltd.).

Committee.—Messrs. R. S. Backhouse (David Sassoon & Co., Ltd.), J. R. Baxter (Mackinnon Mackenzie & Co.), P. Crawford (Shaw, Wallace & Co.,), J. Morf (Volkart Bros.), W. M. Petrie (Ralli Brothers), A. G. Rice (Chartered Bank of India, Australia and China), A. I. Sleigh (North-Western Railway) and H. C. Whitehouse (Strauss & Co., Ltd.)

Representatives on the Bombay Legislative Council.—Mr. F. Clayton, M.L.C.

Representatives on the Karachi Port Trust.—Mr. F. Clayton, M.L.C., Mr. E. A. Pearson & Mr. J. R. Baxter.

Representatives on the Karachi Municipality.—Mr. F. R. Hawkes, O.B.E. & Mr. E. G. H. Mewburn.

Secretary.—Major Alan Duguid, A.F.C., late R.A.F.

Public Measurer.—Major Alan Duguid (Ag.)

The following are the principal ways in which the Chamber gives a special assistance to members. The Committee take into consideration and give an opinion upon questions submitted by members regarding the custom of the trade or of the Port of Karachi. The Committee undertake to nominate European surveyors for the settlements of disputes "as to the quality or condition of merchandise in which both parties desire the Chamber to do so." When two members of the Chamber or when one member and a party who is not a member have agreed to refer disputes to the arbitration of the Chamber or of an arbitrator or arbitrators nominated by the Chamber, the Committee will undertake to nominate an arbitrator or arbitrators, under certain regulations. Similarly, the Chamber under certain regulations, will undertake to appoint an arbitrator or arbitrators for the settlement of disputes in which neither of the parties are members of the Chamber. A public measurer is appointed under the authority of the Chamber to measure pressed bales of cotton, wool, hides and other merchandise arriving at or leaving the port.

MADRAS.

The Madras Chamber of Commerce was founded in 1836. All merchants and other persons engaged or interested in the general trade, commerce and manufactures of Madras are eligible for membership. Any assistant signing a firm or signing *per-pro* for a firm is eligible. Members who are absent from Madras but pay their subcriptions may be represented in the Chamber by their powers-of-attorney, as honorary members, subject to ballot Honorary members thus elected are entitled to the full privilege of ordinary members. Election for membership as by ballot at a general meeting, a majority of two-thirds of the recorded votes being necessary to secure election. Every member pays an entrance fee of Rs. 100, provided that banks, corporate bodies and mercantile firms may be represented on the Chamber by one or more members and are liable for an entrance fee of Rs. 100 once in ten years each. The subscriptions shall not exceed Rs. 300 per annum, payable quarterly in advance, subject to reduction from time to time in accordance with the state of the Chambers' finances. Absentees in Europe pay no subscription and members temporarily absent from Madras pay one rupee per month. Honorary members are admissible to the Chamber on the usual conditions. Members becoming insolvent cease to be members but are eligible for re-election without repayment of the entrance donation.

The Chamber undertakes arbitrations and surveys, the granting of certificates of origin and the registration of trade marks. One of the rules for the last named is "that no trade mark or ticket shall be registered on behalf of an Indian firm trading under a European name."

The following publications are issued by the Chamber :—Madras Price Current and Market Report, Tonnage Schedule and Madras Landing Charges and Harbour Dues Schedule.

There are 56 members and 6 Honorary Members of the Chamber in the current year and the Officers and Committee for the year are as follows :—

Chairman : Mr. K. Kay, M.L.C.

Corporation of Madras: Mr. A. J. Powell, Mr. D. M. Reid & Mr. A. S. Rose.

Federation of Chambers of Commerce of the British Empire: Sir Gordon Fraser, Kt.

Secretary: Lt. Col. C. H. Brock, O.B.E., V.D.

SOUTHERN INDIA.

The Southern India Chamber of Commerce has its Registered Office in Madras. The objects of the Chamber are those usual for such bodies, concerning the promotion of trade, especially in the Madras Presidency, and the interests of members. Special objects are stated to be:—

"To maintain a Library of books and publications of commercial interest, so as to diffuse commercial information and knowledge amongst its members.

"To establish Museums of commercial products or organise exhibitions, either on behalf of the Chamber or in co-operation with others"

There are two classes of members, permanent and honorary. The usual condition as to eligibility for election prevail.

The right of electing two representatives to the Madras Port Trust was accorded to the Chamber by the Madras Port Trust Amendment Act, 1915. Members of the Chamber hold seats in the Madras Legislative Council and the Chamber has also been accorded the right of electing a representative to that body. Under the Madras City Municipal Act, 1919, the Chamber has the right of electing two Councillors to the Madras Corporation. Under the State Aid to Industries Act 1923 the Chamber has the right to elect one member to the Board of Industries.

The Chamber also sends its representatives to the Road Board, the Town Planning Trust the Provincial Cotton Committee, Auditors Approval Committee, Vizagapatam Harbour Works Committee, the Advisory Committees of the South Indian and Madras and Southern Mahratta Railways, the Madras University and the Government Institute of Commerce Advisory Council, Madras.

The Chamber has 230 members on the roll and has its own building.

President.—Sir M. Ct. Muthia Chetty.

Vice-Presidents.—Dewan Bahadur Govindas Chathoorbhujadas and Mr. C. Abdul Hakim Sahib Bahadur.

Honorary Secretaries.—Yusuff Sait & V. C. Rangaswamy.

Assistant Secretary.—P. R. Nair, B.A., B Com.

NORTHERN INDIA.

The Northern India Chamber of Commerce, Lahore, was inaugurated in November 1923, to watch over the mercantile interests of the hitherto practically unrepresented area of Northern India and the N. W. F. Province.

The main aims and objects of the Chamber are to promote and protect commerce and industries, to obtain the redress of any grievances and hardships under which the general mercantile community suffer, and to establish just and equitable principles of trading, etc. Among its other activities, the Chamber undertakes the conduct of surveys and arbitrations, the registration of trade marks, etc.

Members are elected by ballot, the entrance fee and annual subscription for firms in Lahore being Rs. 100 and Rs. 200 respectively.

The following are the Officers, Committee, etc., for the year from April 1927 :—

Chairman: Mr. W. R. Macpherson.

,, A. Graham.
Mr. G. Gompertz (*Secretary*).

The rules of the Chamber provide that by the term 'member' be understood a mercantile firm or establishment, or the permanent Agency of a mercantile firm or establishment, or a society of merchants carrying on business in Coconada or other place in the Districts of Kistna, Godavari, Vizagapatam, and Ganjam, and duly elected according to the Rules of the Chamber, and that all such be eligible. but only members resident in Cocanada can hold office. Members are elected by ballot. The Committee, when called upon by disputing members or non-members of the Chamber, give their decision upon all questions of mercantile usage and arbitrate upon any commercial matter referred to them for final judgment. In either case a minimum fee of Rs. 16 must accompany the reference with Rs. 5 from a nonmember and Re. 1 from a member as payment for the Chamber's Sealed Certificate.

The Committee consisting of 3 members, including the Chairman, is elected by ballot at the general meeting in January in each year for a term of 12 months. The entrance fee for each member, whose place of business is in Cocanada, is Rs. 100 and for each member whose place of business is elsewhere is Rs. 50. The subscription for each member whose place of business is in Cocanada is Rs. 120 per annum payable quarterly and for each member whose place of business is elsewhere is Rs. 60 per annum, payable in advance. Committee meetings are held on the 1st Tuesday in the month and general meetings on the 3rd Tuesday or when ordered.

A Fortnightly Circular of current rates of produce, freights, and exchange is drawn up by the Committee.

CEYLON.

The Ceylon Chamber of Commerce was established on the 25th March 1839 and was incorporated in 1895, with its headquarters at Colombo. All firms and persons engaged in the general trade of Ceylon are admissible as members and every person or firm desirous of joining the Chamber must after having furnished one month's notice of their intention to apply for membership be proposed by one member, seconded by another and balloted for by the whole Chamber. The affairs of the Chamber are conducted by a Board of Directors consisting of Chairman and Vice-Chairman and 10 members.

The following is the membership of the Board at the present time:—

Mr. S. P. Hayley, (*Chairman*), Mr. C. H. Figg (*Vice-Chairman*), Mr. George Brown, Mr. C. S. Burns. Mr. J. M. Caldwell, Mr. R. W. Fowke, Mr. H. G. P. Maddocks, Mr. C. A. Pearcy, Mr. A. D. Skrine, Mr. G. G. Smith, and Mr. J. A. Tarbat.

Secretary.—Mr. C. F. Whitaker.

Representative in the Legislative Council.—Hon'ble Mr. M. J. Cary.

DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS.

The Department of Statistics was reabsorbed into the Department of Commercial Intelligence with effect from the 1st December 1922. The joint department has its office at No. 1, Council House Street, Calcutta, the headquarters of the Director-General. It embraces two distinct classes of work: (*a*) the collection and dissemination of information connected with overseas trade which may be of use to Indian firms, and (*b*) the compilation and publication of All-India statistics. Among the important publications for which the Director-General is responsible are the following annual volumes: Review of the Trade of India, Statement of the Foreign Sea-borne Trade and Navigation of British India, Statistical Abstract for British India, Agricultural Statistics, Estimates of Area and Yield of Principal Crops and Indian Customs Tariff. The department

also publishes a weekly journal—"The Indian Trade Journal"—the principal features of which are (a) information as to tariff changes in foreign countries which affect Indian interests, (b) notices of tenders called for and contracts placed by Government departments and public bodies, (c) crop reports and forecasts, (d) Government orders, communiques and other notifications affecting trade, (e) analysis of Indian trade statistics, (f) market reports, prices and trade movements of the staple exports and imports, (g) trade enquiries for securing trade Introductions, (h) summaries of the leading features of consular and other trade reports, and (i) abstracts of the proceedings of the various Chambers of Commerce in India.

The Department also administers the COMMERCIAL LIBRARY AND READING ROOM located at No. 1, Council House Street, Calcutta. This was at first a small departmental br ary used for the purpose of answering enquiries, but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate libraries attached to the Departments of Commercial Intelligence, Statistics, and Patents and Designs, and the resultant Commercial Library and Reading Room was placed under the administrative control of the Director-General. It has now been expanded into a first-class technical library containing over 11,100 volumes as well as Indian and foreign statistical publications, and over 400 technical and commercial journals and market reports. Ordinarily books are consulted in the Library, but they are also available on loan upon deposit of value throughout India.

The Department works in close co-operation with Directors of Industries and other Government Departments in India, with the Indian Trade Commissioner in London, with His Majesty's Trade Commissioners in India and the Dominions, and with Consular Officers in various parts of the world. And the yearly increase in its correspondence shows that it is steadily being used more and more both by firms in India and by overseas firms interested in Indian exports.

THE BRITISH TRADE COMMISSIONER SERVICE IN INDIA.

The British Trade Commissioners in India are part of the world-wide Commercial Intelligence Organisation of the Imperial Government. The Department of Overseas Trade, London, which is the headquarters of this organisation, is a joint department of the Board of Trade and the Foreign Office and was created in 1917 with the specific object of stimulating the overseas trade of the United Kingdom by securing commercial information from all parts of the world; by disseminating it to British manufacturers and exporters; by undertaking such special constructive activities as may be found possible; and by assisting traders in the removal of their difficulties. The Department has nothing to do with the regulation of trade. It passes no measures and makes no restrictive or regulative orders. Briefly, the policy on which it is based is the policy of assistance without interference.

The Department of Overseas Trade maintains a network of trained and experienced Commercial Intelligence Officers throughout the world; who forward a constant supply of commercial information to London and provide local assistance in the promotion of British economic interests. Those overseas officers who are stationed in the British Empire are members of the Trade Commissioner Service while Foreign countries are served by the Commercial Diplomatic Service forming part of the British Diplomatic Missions and by the Consular Service.

Mr. T. M. Ainscough, C.B.E., was appointed His Majesty's Senior Trade Commissioner in India in January 1918 and opened an office in Calcutta in March of that year. For five years, owing to the pressing need for economy in the Public Service, he was singlehanded in covering this vast territory. In 1923, however, two additional Trade Commissioners were appointed to India. Mr. W. D. M. Clarke was posted to the Calcutta office and Major R. W. Clarke opened an office in Bombay at Exchange Buildings, Sprott Road, Ballard Estate. The territory is now divided between the Calcutta and Bombay posts and this development allows the Senior Officer to travel almost continuously to any part of India which may call for his attention and to devote his time to some of the broader politico-economic problems which are becoming so important in view of the changing political conditions in India.

Functions of Commissioner.—The primary duty of the British Trade Commissioner comprises the collection of information in regard to opportunities that may arise within his territory for securing and developing trade by British manufacturers and merchants, both in the United Kingdom and other parts of the British Empire. He is, therefore, enjoined carefully to watch and report from time to time to the Board of Trade and the Governments of the Dominions concerned on all matters affecting the trade, industry and commerce of his area. His general functions are to maintain cordial relations with the governing authorities of his area; to enter into personal relations with the Chambers of Commerce, Trade Associations, and similar bodies, and with the principal representative importers and local manufacturers; to visit the principal commercial centres; to report upon foreign competition, on financial and trade conditions, and new legislation affecting trade; to make an annual general report on the conditions and prospects of trade in his area; and to furnish special reports and monographs on

particular questions which are likely to be of interest to British manufacturers and exporters. He is also expected to supply a regular flow of commercial information of all kinds to his department; to maintain an active correspondence with firms in the United Kingdom or the Dominions who wish to extend their trade with his area; and to give all possible assistance to the representatives of British firms who may visit his territory.

Every effort is made by His Majesty's Trade Commissioners to keep in touch with British representatives and agents in India. The offices are equipped with a complete range of directories and reference books of all kinds and information is available with regard to such matters as tariff conditions, port dues and charges throughout the world, etc. A library consisting of over 1,000 catalogues of the leading British manufacturing engineers is maintained in Calcutta and Bombay, and firms desiring information with regard to specific manufacturers of particular machinery or processes are invited either to call personally or to communicate their requirements in writing. It is hoped that local importers and buyers will cooperate by making a more extended use of the information available in the offices and by bringing to the attention of the British Trade Commissioners any cases where the interests of exportes from the United Kingdom or the Dominions may be adversely affected by foreign competition or otherwise.

For many years British traders have deplored the fact that there have not been available officials with commercial experience who could help them in voicing their difficulties and in meeting foreign competition. As a rule these complaints eulogized the Consuls of other countries and invited the attention of Government to their many virtues. In response to this agitation the greatest care has been taken by the British Government to select, as their trade officers Overseas, men of sound commercial training and experience who have acquired some reputation in their respective spheres, and a comprehensive and businesslike organization has been built up at the Department of Overseas Trade, London, to deal with the information sent home. It now rests with the British mercantile community, both at home and also Overseas, to co-operate freely and frankly with the Trade Commissioners and to recognize the work they are doing in the Imperial interest by assisting them with such information and particulars with regard to foreign competing goods, conditions of trade, etc., as they are able to afford.

H. M.'s TRADE COMMISSIONERS IN INDIA.

Calcutta—

Mr. T. M. Ainscough, C.B.E.,

His Majesty's Senior Trade Commissioner in India and Ceylon.

Mr. W. D. Montgomery Clarke,

His Majesty's Trade Commissioner at Calcutta.

Post Box No. 683, Fairlie House, Fairlie Place.

Telegraphic Address—" Tradcom, Calcutta."

Telephone No. " Calcutta 1042."

Bombay—

Major R. W. Clarke,

His Majesty's Trade Commissioner at Bombay.

Post Box No. 815, Exchange Buildings, Sprott Road, Ballard Estate.

Telegraphic Address—" Tradcom, Bombay"

Telephone No.—" Bombay 23095."

Ceylon—

Imperial Trade Correspondent,

The Principal Collector of Customs Colombo.

INDIAN COTTON DUTIES ACT.

The origin of this fiscal measure dates back to 1894 when the embarrassment caused to the finances of India by the fall in exchange drove the Government of India to the necessity of adopting measures to increase their sources of revenue. Among these measures was the re-imposition of the Customs Tariff which had been in force prior to 1882 subject, however, to this difference that cotton yarns and fabrics, which had formerly been subjected to an import duty, were in 1894, excluded from the list of dutiable articles. This partial re-imposition of import duties had been recommended by the Herschell Commission which, in reporting in 1893 on the currency question, had favoured this method of adding to the revenue as being the least likely to excite opposition. In point of fact, however, this recommendation which was carried into effect in the Indian Tariff Act of March 1894 gave rise to very marked opposition. In support of their policy the Government appealed to the Resolutions passed in 1877 and reaffirmed in 1879 by the House of Commons, the first of which had condemned the levy of import duties on cotton fabrics imported into India as "being contrary to sound commercial policy," while the latter called upon the Government of India to effect "the complete abolition of these duties as being unjust alike to the Indian consumer and to the English producer." It was, however, an open secret that the decision to exclude from the list of dutiable articles cotton yarns and fabrics was not the decision of the Government of India but that of the Secretary of State. It was pertinently pointed out that the volume of trade in cotton goods and

yarns then represented nearly one-half of the total imports from abroad, and that the exemption of these important commodities when practically every single other commodity was being subjected to an import duty could not be justified on its merits as a sound fiscal measure, much less when it was an admitted fact that the Budget would still show a deficit.

Excise Duties Imposed.—The opposition to this measure, though it failed to secure its rejection in the Legislative Council, was strong enough to induce the Secretary of State to reconsider the matter. Yielding to the united representations of the Government of India and of Indian public opinion, His Majesty's Government eventually agreed to the re-imposition of import duties on cotton yarns and fabrics provided that it could be shown that such a measure was necessitated by the position of Indian finances, and that it was combined with an Excise duty which would deprive the import tax of any protective character. Accordingly in December 1894, consequent on the further deterioration in the financial position, two bills were introduced in the Legislative Council. The first of these subjected cotton yarns and fabrics to the general import duty of 5 per cent. *ad valorem*. The second imposed an Excise duty on all cotton yarns of 20's and above produced by Mills in British India. In introducing this latter Bill the then Finance Minister, Sir James Westland, was careful to explain that the policy underlying its provisions had been imposed on the Government of India by the Secretary of State in pursuance of the Resolution of the House of Commons quoted above. The provisions of this particular Bill are of little interest. From the first it was recognised that they were unpractical, Lancashire and Indian spinners disagreed as to the point at which the line should be drawn exempting Indian yarns from the Excise Duty. Practical difficulties were pointed out by Indian spinners as to the impossibility of spinning precisely to a particular count. From the Lancashire point of view it was contended that the Bill offered facilities for evasion while it was admitted that under the system adopted in the Bill, the taxation of Indian and Lancashire products was not being carried out on a similar basis.

Act of 1896.—The Act was in fact doomed to be short-lived, and in December 1895 the Government of India were compelled to reconsider the whole position and to introduce an entirely new measure which became law in January 1896 as the Indian Cotton Duties Act II of 1896. This measure proceeded from two conclusions, namely, that no attempt should be made to obtain any duty from yarns whether imported or locally manufactured, and that an equal rate of duty should be applied to all woven goods whether imported or of Indian origin. With the object of conciliating the opposition, the rate of duty was fixed at 3½ per cent. as opposed to the general rate of Customs duty of 5 per cent. The main provisions of the Act provided that the assessment for the purposes of collecting the Excise duty should be based on returns submitted by the mill-owners; and that provision should be made for a rebate in the case of woven goods exported out of India. No control beyond a requirement that statistical returns should be furnished was attempted in respect of spinning mills. On the other hand certain concessions in the matter of import duty on Mill stores were made by executive order so as to place Indian Mills on a footing more or less equal to their Lancashire competitors.

Criticisms of the Measure.—It is not possible within the limits of the present article to do more than summarise the criticisms with which this measure was received in India. Much of the opposition was based on grounds of a transient character; as for instance that the Indian industry was then in a state of continued depression and that it had been hard hit, particularly in respect of its export trade, by the currency legislation, and by the uncertainty as to the fiscal policy of Government. In some quarters objection was offered to the exemption of yarn, which was shown, would place the Indian hand weaving industry at an advantage with the Indian power weaving industry. But the hostility to this measure, as also to the earlier measures already described, clearly proceeded from the feeling that the policy of the Government of India and of the Secretary of State had been dictated by Lancashire, and that the action of Lancashire was due not so much to the fact that there was any real competition between Indian and Manchester goods, but to a desire to handicap the Indian industry whose progress was already causing uneasiness to Lancashire interests. It was argued that the imports from Lancashire were practically all of the higher counts, which, for climatic and other reasons, Indian mills could not produce: that in any case the advantage to the Indian millowner of the import duty was inconsiderable and was counterbalanced by certain drawbacks, arising from the inferiority of Indian labour, which could not be overcome; and that this advantage, such as it was, could scarcely be said to have a protective character, in view of the higher cost of initial equipment in the case of an Indian mill which has to import its machinery, and of working expenses consequent on the scarcity of skilled labour and on the necessity of importing stores required in the production of cloth. Finally, from the standpoint of the consumer, very severe criticism was directed against the reduction, in favour of imported cotton goods, of the general rate of duty from 5 per cent. to 3½ per cent. on the ground that the effect of the legislation would relieve the richer classes who were consumers of the finer Manchester fabrics and impose new taxation on the poorer classes whose requirements were met by the Indian mills.

Later Factors in the Situation.—Since the passing of this measure into law the policy of the Government of India in this respect has frequently been the subject of attack in the press and in the Legislatures in India, while it has also formed the subject of continued representations by the industrial interests affected and political organizations. In more recent years the agitation in favour of the abolition of the Excise duties was revived by the growth in England of a strong body of public opinion in opposition to the policy of Free Trade. Advantage was taken of this new phase in English economic thought to press on behalf of India the acceptance of a policy of Protection—now adopted by the Government of India in the

form of discriminating use of the current necessarily high important tariff for fostering Indian industries—and the removal of the Excise duties was claimed by the opponents of this measure as a necessary corollary of the application to the British Empire of the principles associated with the name of Mr. Chamberlain. A new factor in the situation which strengthened the position of those who were in opposition to the Excise duties was to be found in the severe competition which Indian mills have to face in China as well as in India from the Japanese industry. The Japanese market was lost to India in the early years of this century. More recently, however, Japan has entered as a competitor with India into the China market, while within the last few years it has pushed its advantage as against the Indian millowner in the Indian market itself.

Policy of 1917.—The policy of Government towards the Cotton Duties underwent a further development in 1917. In the budget of that year provision was made for interest and sinking fund charges on £ 100 millions, the contribution of India towards the cost of the war. This demanded in addition to the natural increase in the revenues fresh taxation to the extent of £ 3 millions per annum. Amongst the expedients adopted to produce this revenue was the raising of the import duty on cotton goods from 3½ per cent. to 7½ per cent. which is the general tariff rate. At the same time the cotton excise duty was fixed to remain at the previous figure of 3½ per cent.. thus giving the indigenous industry a slight protection to the extent of 4 per cent. The question of the abolition of the Excise entirely had to be dismissed from consideration in view of the demands upon the exchequer, as it was estimated to produce in 1917-18 £ 320,000. By means of the increase in the tariff on Cotton Duties the Finance Member estimated to produce an additional £ 1 million per annum. The proposal was received with immense satisfaction in India as a step towards the righting of what is almost everywhere regarded as a reverse economic wrong. It aroused very vehement protests in Lancashire where the cotton industry organised its political vote and brought great pressure to bear upon the Secretary of State to withdraw the measure. Mr. Austen Chamberlain, the then Secretary of State for India, stood firm and with the Government at his back refused to budge an inch from the position which he had taken up in supporting the Government of India in this matter. There were anxious moments in the House of Commons when the Labour Party joining with the Irish Nationalists and the Lancashire vote mobilised its forces against the Government especially as the attitude of Mr. Asquith and his following was obscure. In the end Mr. Asquith gave his support to the Government policy on the understanding that this, in common with all other fiscal issues, would be reconsidered at the end of the war. With this support, the Bill was carried through the House of Commons by a large majority.

The Recent Position.—The question has frequently come under discussion in the Indian Legislature during the past few years and the new political constitution alters its perspective there inasmuch as it subjects taxation not merely to debate but to the actual votes of both Council of State and Legislative Assembly. The latter house paid most attention to the Excise and both the annual Budgets and the right of unofficial members to move Resolutions afforded opportunities for pressing the popular view upon Government. During the life of the first Assembly—1921-1923, inclusive—the position was still dominated by the financial difficulties of Government and the necessity for utilising every possible source of income for meeting successive deficits.

Excise Duty Suspended.—In November 1925 two months after further pressure from the Legislative Assembly, which Government at the time indicated that they would regard as decisive so far as public opinion on the question of the rival claims reduction of provincial contributions and abolition of the Excise Duty was concerned, an Ordinance to suspend levy and the collection of the Cotton Excise Duty was issued. Thatr Odinance stated that the duty would not be levied and collected or assessed on any cotton goods produced in any mill in British India on or after December 1, 1925, and before March 1, 1926. At the same time a statement was issued by the Governor-General explaining the reasons which led him in exercise of the powers conferred upon him by the Government of India Act, to promulgate that Ordinance. The statement was as follows:—"In August last when replying to a deputation which waited upon me on behalf of the millowners of Bombay and Ahmedabad to urge the relief of the mill-industry from the cotton excise duty I affirmed the Government of India stood by the letter and the spirit of the pledge given by my predecessor, Lord Hardinge, that the excise duty would be abolished as soon as financial considerations permitted. At the same time while fully recognising the special difficulties, with which the cotton mill industry in India was faced, it was necessary for me to explain that it was impossible to grant this request in the middle of the financial year before the year had fully declared itself and before the commitments and the prospects of next year were known.

"Again, on the 16th September 1925 when a motion for suspension of the collection of the cotton excise duty was debated in the Legislative Assembly it was made clear on behalf of Government that suspension must inevitably be followed immediately by abolition and that abolition ought to be considered only in connection with the finances of the year as a whole, that is, at the time of the budget when the claims of the cotton mill industry could be balanced against rival claims. It was definitely stated that a vote for suspension would be taken by Government as an expression of the view that the abolition of the cotton excise duty should take precedence of other claims. The Assembly accepted by a large majority the motion for suspension.

"The time has not yet come when a detailed estimate of the revenue and expenditure of the current year or of the prospects for 1926-27 can be made, but the final results of the monsoon are now known and it is possibly to make a

more reliable estimate of the financial position than in September. On such information as is now before them, the Government of India are satisfied that there would be no serious risk of a large deficit in the current year if the cotton excise duty were suspended for the rest of the year and that there is a reasonable prospect that the budget for next year can be balanced without assistance from the cotton excise duty in the absence of any big change for the worse in the next few months.

"I and my Government have, therefore, come to the conclusion that the moment has arrived when financial considerations permit of the abolition of the duty. This can, however, be finally accomplished only by the passage of the necessary legislation by the Indian Legislature."

"In the meanwhile having regard to the emergency caused by the grave difficulties confronting the industry, to the pledge given and reaffirmed and to the expressed views of the Legislative Assembly, I have decided that with effect from the 1st December 1925 the duty shall be suspended by Ordinance. It is the intention of my Government, unless the financial position as disclosed in the budget estimates for next year substantially fails to confirm present anticipations, to place before the legislature at the time of the budget proposals for the abolition of the duty."

The duty, having thus been suspended till the end of the financial year, 1925-26, was finally abolished in the Budget and Finance Bill for 1926-27 passed by the Legislature in March 1926.

The statistics of yarn and cloth production previously maintained under the Cotton Duties Act are still compulsory under the authority of Act XX of 1916 (The Cotton Industry Statistics Act.)

THE INDIAN CENTRAL COTTON COMMITTEE.

The Indian Central Cotton Committee of 1917-18, a full summary of whose report appears on pages 291-294 of the Indian Year Book of 1922, reviewed the position of cotton growing in India very thoroughly and made a series of recommendations for the improvement of cotton growing and marketing which have proved to be of the greatest value. One of their recommendations was that a permanent Indian Central Cotton Committee should be established to promote the welfare of the cotton-growing industry generally, to advise the Government of India and Local Governments in regard to matters of cotton policy, especially with reference to legislation for the prevention of ma-practices and similar matters.

The Indian Central Cotton Committee was appointed by resolution of the Government of India in April 1921, and worked as an advisory body until 1923. Another recommendation of the original Committee was that a cotton cess should be levied to provide funds for the work of the Central Cotton Committee and for agricultural and technological research on cotton. The Cotton Cess Act was passed in 1923 and at the same time the Central Cotton Committee was incorporated and its members ship enlarged in order to make it fully representative of all sections of the industry. Its constitution and present membership is as follows:—

President:—The Agricultural Adviser to the Government of India, *ex-officio* (Dr. D. Clouston, C.I.E.

Representatives of Agricultural Department.—Mr. R. D. Anstead, C.I.E., Director of Agriculture, Madras; Mr. T. F. Main, O.B.E., Director of Agriculture, Bombay; Mr. G. Clarke, C.I.E., Director of Agriculture, United Provinces; Mr. D. Milne, C.I.E., Director of Agriculture Punjab; Mr. F. J. Plymen, Director of Agriculture, Central Provinces; Mr. T. D. Stock, Deputy Director of Agriculture, Burma.

The Director-General of Commercial Intelligence and Statistics (*ex-officio*), Dr. D. B. Meek, O.B.E.,

Representatives of Chamber of Commerce and Associations.—Mr. W. Ellis Jones, (Vice-President), East India Cotton Association; Mr A. Fotiadi, Bombay Chamber of Commerce; Mr. S. D. Saklatwala, Bombay Millowners' Association; Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E., M.L.A., The Indian Merchants' Chamber, Bombay; Mr. F. G. Travers, Karachi Chamber of Commerce; Seth Kasturbhai Lalbhai, M.L.A., Ahmedabad Millowners' Association; Mr. S. L. Symonds, Tuticorin Chamber of Commerce; Mr. S. H. Taylor, Upper India Chamber of Commerce; Lala Niranjan Prasad, Karachi Indian Merchants' Association; Mr. W. Roberts, Empire Cotton Growing Corporation.

Commercial Representatives Nominated by Local Governments.—Sir S. B. Mehta, Kt., C.I.E., Rao Bahadur J. J. Deshmukh, Central Provinces; Mr. Robert Lee, Madras; Rai Bahadur Lala Sewak Ram, M.L.C., Punjab; Mr. B. K. Lahiri, Bengal.

Co-operative Representative.—Rao Saheb V. Krishna Menon, B.A.

Representatives of Cotton Growers.—M. R. Ry., R. Appaswamy Naidu Garu; M. R. Ry.: B. P. Sesha Reddi Garu, Madras; Rao Bahadur Bhimbhai Ranchhodji Naik, M.L.C., Mr. Bakshi Darghansingh, Bombay; Kunwar Bikram Singh, M.L.C., Rai Saheb M. Amba Prasad, M.L.C., United Provinces; Sardar Ujjal Singh, M.A., M.L.C., Capt. L. H. G. Conville, Punjab; Rao Bahadur M. G. Deshpande; Mr. M. P. Kolhe, B.A., LL.B., M.L.C., Central Provinces and Berar.

Representatives of Indian States.—Mr. B. A. Collins, C.I.E., I.C.S., Director-General of Industries and Commerce, Hyderabad State; Mr. C. V. Sane, B. Ag., M. Sc., Director of Agriculture, Baroda State; Mr. H. H. Pandya, Administrative Officer, Department of Agriculture, Gwalior, Gwalior State; Mr. A. Howard, C.I.E., Director, Institute of Plant Industry and Agricultural Adviser to the States in Central India and Rajputana.

Additional persons nominated by the Governor-General in Council.—Mr. C. R. Palairet, Representative of the Indore State; Dr. W. Youngman, Economic Botanist to Government, Central Provinces; Rao Saheb Bhimbhai M. Desai

Deputy Director of Agriculture, Surat, Gujerat: Dr. W. Burns, Principal, Agricultural College, Poona, Mr. G. R. Hilson, Cotton Specialist, Madras; Dr. L. C. Coleman, Director of Agriculture, Mysore State.

Secretary.—Mr. J. H. Ritchie, M.A., B.SC., I.A.S.

Deputy Secretary.—Mr. W. J. Jenkins, M.A., B.SC., I.A.S. (on leave.)

Director:—Technological Laboratory.—Mr. A. James Turner, M.A., B. SC.

From the commencement the Central Cotton Committee took steps to deal with the various malpractices reported by the original Committee which by spoiling the reputation of the Indian cottons and rendering them less valuable for spinning purposes, were reducing the returns of the grower and causing great economic loss to the country at large.

The Cotton Transport Act passed in 1923 enables any Local Government with the consent of its Legislative Council to notify definite areas of cotton for protection and to prevent the importation of cotton from outside the area except under license. Prior to the passing of the Act inferior cottons were imported in large quantities into the staple cotton tracts for purposes of adulteration, and the reputation of several valuable cottons had been ruined by this abuse. The Act has now been applied to the most important staple cotton areas of the Bombay and Madras Presidencies and of the Baroda, Rajpipla, Chhota Udepur, Hyderabad and Holkar States and with excellent results.

More recently the **Cotton Ginning and Pressing Faotries Act, (XII of 1925)** has been passed which provides for a certain measure of control of ginning and pressing factories and especially for the marking of all bales of cotton pressed with a press mark and serial number which enables them to be traced to their origin. This Act, with the minimum of official interference, places the cotton trade in a position itself to deal with abuses, and should lead to a very marked improvement in the quality of Indian cottons.

The Central Cotton Committee has also devoted considerable attention to constructive action for the improvement of the marketing of cottons and to bringing to the notice of the trade, both in India and abroad, those improved varieties which have now reached a commercial scale and has carried out some important enquiries into the financing of the cotton crop up-country and primary cotton marketing. As an instance of the progress in cotton growing which has been made since 1917 it may be stated that since that date approx imately half a million bales of cotton of about 1" staple have been added to the Indian crop by the work of the Agricultural Departments. In general it may be said that the Committee affords a common meeting ground for representatives of all sections of the Cotton trade and of the cotton-growing industry thus enabling a number of problems to be tackled from every point of view and definite progress made towards their solution.

Research Studentships.—The Committee has also instituted a scheme of research studentships to enable distinguished graduates of Indian Universities to undertake research on cotton problems under the direction of experienced reasearch workers in India. Six to eight such studentships are awarded every year.

Statistics—By the efforts of the Committee great improvement has been effected in cotton statistics. The compilation of statistics relating to the raw cotton received, and of raw cotton consumed in the spinning mills in the British provinces and in the States of Hyderabad, Mysore, Baroda, Gwalior and Indore, the establishment of statistical returns relating to the number of bales of raw cotton pressed weekly in every Province and many of the Indian States, and the revival of the rail-borne trade returns of cotton for trade blocks are some of the results already achieved by the Committee in this direction.

Research.—By means of the Cotton Cess the Committee is provided with funds for the promotion of research. It maintains in Bombay a fully equipped Technological Laboratory which includes a complete experimental, spinning plant and a scientific laboratory for research on the cotton fibre. This laboratory provides Agricultural Departments with complete and authoritative reports on the spinning value of new cottons, thus providing a much needed facility. In addition it is now possible to undertake research work on a number of questions connected with the spinning qualities of cotton which have not been touched in the past. The Laboratory is unique in that it is probably the only institution of its kind which approaches the subject primarily from the standpoint of the grower.

The Committee contributes the greater part of the funds for the Indore Institute of Plant Industry which is a Central Agricultural Research Institute for cotton where many problems of fundamental importance are being studied.

In addition by means of grants-in-aid to Agricultural Departments it has provided for special investigations on problems of general applicability which would otherwise have been left untouched through lack of staff and funds. Such schemes are in operation in all major cotton-growing provinces and now number thirteen.

His Excellency the Viceroy (Lord Reading) when he visited Bombay in December 1924 and formally opened the Committee's Spinning Laboratory laid great stress on the importance and value of the Committee's work.

THE EAST INDIA COTTON ASSOCIATION, LIMITED.

Bombay.—The Association is the out come of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. Until the end of 1917 the Cotton Trade of Bombay was in the hands of seven distinct bodies, *viz.*, The Bombay Cotton Trade Association, Ltd., The Bombay Cotton Exchange, Ltd., The Bombay Millowners' Association, The Bombay Cotton Brokers' Association, Ltd., The Marwari Chamber of Commerce, The Bombay Cotton Merchants' and Muccadums' Association, Ltd., and The Japanese Cotton Shippers' Association. None of these

bodies were representative of the trade as a whole and their interests often came into conflict with each other. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in futures which was so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Cotton Contracts Committee was created under the Defence of India Act in June 1918 as a temporary measure under the Chairmanship of Mr. G. Wiles, I.C.S. This body was replaced by the Cotton Contracts Board in 1919, which continued to function until May 1922, when the Act under which the Board worked was repealed and its functions were carried on by the newly constituted East India Cotton Association who were granted a charter by Act No. XIV of 1922. Since then the Association, subject to its By-laws being passed by Government, have controlled the Cotton Trade of Bombay.

The present constitution of the Board is as follows:—Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E., M.L.A., President, Importers' Panel; Haridas Madhavdas, Esq., Vice-President, Exporters' Panel; The Hon'ble Mr. Ratansey D. Morarji, Lalji Naranji Esq., F. F. Stileman, Esq., Millowners' Panel; C. P. Bramble Esq., G. Boyagis, Esq., Exporters' Panel; K. H. McCormack, Esq., Piareylal Sheomukhrai, Esq., Importers' Panel; F. G. Travers, Esq., Lowjee Meghjee Esq., Commission Agents' and Merchants' Panel; Jetha Chai Devji, Esq., Purshotam Jivandas, Esq., Jethawallas' Panel; Major W. Ellis Jones, Anandilal Fodar, Esq., Chunilal B. Mehta, Esq., Brokers' Panel.

Officers.

D. Mehta, Esq., B.A., Secretary, F. F. Wadeson, Esq., J.P., Manager, Clearing House, C. M. Parikh, Esq., B. Com., Assistant Secretary.

Some of the objects for which the Association is established are:—To provide and maintain suitable buildings or rooms for a Cotton Exchange in the City of Bombay and elsewhere in India and to regulate admission to and prohibition of the use thereof and the nature and times of such user whether in the case of the general body or particular classes or any individual or firm or company using the Exchange; to provide forms of contracts compulsory or permissive and regulate the making, carrying out and enforcement or cancellation of contracts; to adjust by arbitration or otherwise controversies between persons engaged in the Cotton Trade; to establish just and equitable principles in the said Trade; to maintain uniformity of control of the said trade; to fix or adopt standards of classification of cotton, to acquire, preserve and disseminate useful information connected with the Cotton interest throughout all markets: to decrease or insure the local risk attendant upon business; and generally to control, promote and regulate the Cotton Trade in the Presidency of Bombay and elsewhere in India, improve its stability and augment the facilities with which it may be conducted. To establish and maintain a Clearing House for the purpose of dealing with cotton transactions, and to regulate admission to and prohibition of the user thereof and the nature and times of such user whether in the case of the general body or particular classes or any individual or firm or company using the Clearing House. To regulate the handling and exportation of Cotton from India and the importation of Cotton into India in so far as it may be imported. To bring, prosecute, or defend, or aid in bringing, prosecuting, or defending any suits, actions proceedings, applications, or arbitrations on behalf of Members or Associate Members or Special Associate Members or otherwise as the Directors of the Association may think proper or conducive to the objects of the Association, and to prescribe the principle of framing of contracts with a view to eliminate the temptation and possibility of speculative manipulation.

The Association has erected a fine Exchange Building at Sewri Cotton Depot, containing 112 Buyers' Rooms and 91 Sellers' Rooms, and a large Trading Hall on the lines of Liverpool and New York Exchanges.

The inaugural ceremony of the opening of the Exchange Building was performed by His Excellency Sir Leslie Wilson, Governor of Bombay on the 1st December 1925 in the presence of a large gathering which included most of the prominent business men of the City and many leading citizens.

There is a membership of 445 members.

The Bombay Cotton Annual containing matters relating to every branch of the Trade is published annually in November and statistics are issued twice weekly.

The Textile Industry.

India has been the home of the cotton trade from the earliest times. Its cotton, known as white wool, was well known to the ancients and its cloth was familiar to the West in the days of the overland route. The name Calico comes from the fine woven goods of Calicut, and the products of the Dacca handlooms are still remarkable as the finest muslins human skill can produce.

Indian Cotton.

The exports of Indian cotton began to assume importance with the opening of the sea route. They received an immense stimulus during the American Civil War, when the close blockade of the Confederate ports produced a cotton famine in Lancashire, and threw the English spinners back on India for their supply of raw material. When the war broke out the shipments of Indian cotton were 528,000 bales, but during the last year of the war they averaged 973,000 bales. Most of this cotton was sold at an enormously inflated price, and induced a flow of wealth into Bombay, the great centre of the trade, for which there was no outlet. The consequence was an unprece-

dented outburst of speculation known as the ' Share Mania," and when the surrender of Lee re-opened the Southern Ports widespread ruin followed. It is estimated that the surplus wealth brought into the country by the American Civil War aggregated £92 millions. Since then the cultivation of Indian cotton, although interrupted by famine, has steadily increased. For the last season for which returns are available 1926-27 the total area in all the territories reported on was computed at 25,006,000 acres which is 1,194,000 acres the revised figures of last year. The total estimated outturn was 4,952,000 bales of 400 lbs. which is 528,000 bales below the yield of last year.

Bombay, the Central Provinces and Hyderabad are the chief producing centres. The following table gives the rough distribution of the outturn. The figures are the estimated figures for the past season, and are not exact, but they indicate the distribution of the crop :—

Provinces and States.	1927-28.	
	Acres in Thousands.	Bales of 400 lb (In thousands)
Bombay (a)	6,912	1,431
Central Provinces and Berar	4,848	1.145
Madras (a)	1,946	391

Bombay is the great centre of the cotton trade. The principal varieties are Dholleras, Broach, Oomras (from the Berars), Dharwar and Coomptas. Broach is the best cotton grown in Western India. Hinganghat cotton, from the Central Provinces, has a good reputation. Bengals is the name given to the cotton of the Gangetic valley, and generally to the cottons of Northern India. The Madras cottons are known as Westerns, Coconadas, Coimbatores and Tinnevellys. The best of these is Tinnevelly. Cambodia cotton has been grown with success in Southern India, but it shows a tendency to revert. The high prices of cotton realised of recent years have given a great impetus to cultivation. Government have also been active in improving the class of cotton produced, by seed selection, hybridization and the importation of exotic cottons. Although these measures have met with a considerable measure of success, they have not proceeded far enough to leaven the whole outturn, which still consists for the mos part of a short-staple early maturing variety suitable to soils where the rainy season is brief

Reference has been made to the popularity of the Indian handloom cloths in the earliest days of which we have record. This trade grew so large that it excited alarm in England, and it was killed by a series of enactments, commencing in 1701, prohibiting the use or sale of Indian calicoes in England. The invention of the spinning jenny and the power loom and their development in England converted India from an exporting into an importing country, and made her dependent on the United Kingdom for the bulk of her piece-goods. The first attempt to establish a cotton mill in India was in 1838, but the foundations of the industry were really laid by the opening of the first mill in Bombay in 1856. Thereafter, with occasional set backs from famine, plague and other causes, its progress was rapid.

The following statement shows the quantity (in pounds) of yarn of all counts spun in all India for the twelve months April to March, in each of the past 4 years:—

—	1925-26.	1926-27.	1927-28.
BRITISH INDIA.			
Bombay Presidency	423,450,896	512,021,482	491,839,977

GRAND TOTAL ..	686,427,479	807,116,118	808,910,847

(*a*) Including the production of one mill only.
(*b*) Represents production during the 4 months April to July 1926 only, the mill being closed from August 1926.
(*c*) Represents production in March 1928.
† Includes 740,256 lbs. for which details are not available.
* Includes 64,285 lbs. ,, ,,
Note: The cotton mills in Burma started work in May 1923.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 74 per cent. of the quantity produced in British India. The United Provinces of Agra and Oudh and Madras produced about 7 per cent. and 8 per cent. respectively, while Bengal and the Central Provinces produced 4·7 and 5·2 per cent. Elsewhere the production is as yet very limited.

Bombay Island.

Here is a detailed statement of the quantity (in pounds) and the counts, or numbers, of yarn spun in Bombay island :—

——	1925-26.	1926-27.	1927-28.

Total ..	686,427,479	807,116,118	808,910,847

In the early days of the textile industry the energies of the millowners were largely concentrated on the production of yarn, both for the China market, and for the handlooms of India. The increasing competition of Japan in the China market, the growth of an indigenous industry in China and the uncertainties introduced by the fluctuations in the China exchanges consequent on variations in the price of silver compelled the millowners to cultivate the Home market. The general tendency of recent years has been to spin higher counts of yarn, importing American cotton for this purpose to supplement the Indian supply, to erect more looms, and to produce more dyed and bleached goods. This practice has reached a higher development in Bombay than in other parts of India, and the Bombay Presidency produces nearly 78·8 per cent. of the cloth woven in India. The United Provinces produces 3·2 per cent., the Central Provinces 4 per cent. and Madras 4 per cent. Grey and Bleached goods represent nearly 74 per cent. of the whole production.

ANALYSIS OF WOVEN GOODS.

The following brief extract is taken from the statement of the quantity (in pounds and their equivalent in yards) and description of woven goods produced in all India, including Native States :—

—	1925–26.	1926–27.	1927–28.
Grey and Bleached piece-goods—			
Pounds	339,265,174	381,711,804	403,467,863
Yards	1,414,303,80[illegible]	1,577,237,587	1,675,002,583
Coloured piece-goods—			
Pounds	116,695,306	145,320,359	148,297,621
Yards	540,156,845	681,477,373	681,557,222
Grey and coloured goods other than piece-goods—			
Pounds	3,726,511	4.151,302	4 205,147
Dozens	955,804	1,006,548	992,107
Hosiery—			
Pounds	872,261	983,308	1,210,366
Dozens	316,546	35[illegible],909	437,215
Miscellaneous—			
Pounds	3,772,129	4,289,022	5,828,863
Cotton goods mixed with silk or wool—			
Pounds	707,712	2,313,760	4,794,002
Total—			
Pounds	465,039,069	538,769,353	567,803,862
Yards	1,954,466,667	2,258,716,06[illegible]	2,356,559,805
Dozens	1,272,350	1,358,467	1,429,322

BOMBAY WOVEN GOODS.

The output of woven goods during the three years in the Bombay Presidency was as follows :—

The weight (in pounds represents the weight of all woven goods ; the measure in yards represents the equivalent of the weight of the grey and coloured piece-goods.)

—	1925–26.	1926–27.	1927–28.
Pounds	342,030,412	407,282,500	421,590,878
Yards	1,510,385,860	786,327,396	1,823,517,162
Dozens	885,931	829,849	920,817

The grand totals for all India are as follows :—

—	1925–26.	1926–27.	1927–28.
Pounds	465,039,069	538,769,353	567,803,862
Yards	1,954,460,667	2,258,716,065	2,356,559,805
Dozens	1,272,350	1,358,467	1,429,322

Progress of the Mill Industry.

The following statement shows the progress of the Mill Industry in the whole of India

Years ending 30th June	Number of Mills.	Number of Spindles.	Number of Looms.	Average No of Hands Employed Daily.	Approximate Quantity of Cotton Consumed.

* The Cotton Duties Act was abolished in April 1926.

The Jute Industry.

Considering its present dimensions, the jute industry of Bengal is of very recent origin. The first jute mill in Bengal was started at Rishra in 1855, and the first power-loom was introduced in 1859. The original outturn was 8 tons per day. In 1909 it had grown to 2,500 tons per day, it is now 4,000 tons per day, and it shows every indication of growing and expanding year by year. Another interesting thing about the jute industry of Bengal is that, although it is practically a monopoly of Scotsmen from Dundee, the industry itself owes its inception to an Englishman. The founder of the industry was George Acland, an Englishman, who began life as a midshipman in the navy, and was for some years in the East India Marine Service. He quitted this service while still a young man, and engaged in commercial pursuits in Ceylon, where he was successful. Later on he turned his attention to Bengal, and arriving in Calcutta about 1853 he got into touch with the management of the paper works, then at Serampore, where experiments were being tried with country grasses and fibre plants to improve the quality or cheapen the manufacture of paper. This seems to have suggested to Acland the manufacture of rhea, and in 1854 he proceeded to England, with a view to obtaining machinery and capital in order to manufacture goods from that material. During this trip he visited Dundee, and while there Mr. John Kerr, of Douglas Foundry, suggested to him the importing of machinery into Bengal "where the jute comes from and spin it there." This suggestion bore fruit, for shortly afterwards Acland placed orders with Kerr for a few systems of preparing and spinning machinery, and returned to India the same year accompanied by his two sons and a few Dundee mechanics who were to assist him in erecting and operating the first jute mill in Bengal. This, as has been stated, was at Rishra, the site of the present Wellington mills, near Serampore, and here, in 1855, the first machine spun jute yarns were made. As not infrequently happens the pioneer got very little out of his venture. After several ups and downs the Acland interest in the Rishra mill ceased in 1867, and the company which Acland had formed in 1854 was wound up in 1868.

Power-looms.—The pioneer's example was followed by Mr. George Henderson of that silk and firm, and in 1859 the Borneo Jute Co. was launched under his auspices. To this company is due the credit of introducing the power-loom for jute cloth. Unhampered by the financial difficulties which had burdened the Aclands, the Borneo Jute Co. made rapid progress, doubling their works in 1864, and clearing their capital twice over. In 1872 the mills were turned into a limited liability company, the present "Barnagore Jute Manufacturing Co., Ld." Four other mills followed in succession—Gouripore, Serajgunge, and India Jute Mills.

"From 1868 to 1873," writes Mr. David Wallace in "The Romance of Jute," "the five mills excepting the Rishra mill simply coined money and brought the total of their looms up to 1,250." To illustrate the prosperity of the industry at this period we may take the dividends paid by the Barnagore Company. On the working of their first half year, a 15 per cent. interim dividend was declared, which seemed to justify the enormous capital at which the company was taken over from the Borneo Company, and shares touched 68 per cent. premium. The dividend for the first year, ending August 1873, was 25 per cent., for 1874, 20 per cent., and for 1875, 10 per cent. Then came a change. The investing public had forgotten the effect of the Port Canning bubble, and the condition of the jute industry in 1872-73 seeming to offer a better return than coal or tea, both of which had just enjoyed a boom, it was only necessary to issue a prospectus of a jute mill to have all the shares snapped up in the course of an afternoon.

In 1872–73 three new companies were floated locally—the Fort Gloster, Budge and Sibpore, and two Home companies, the Champdany and Samnugger, all of which commenced operations in 1874. In 1874–5 eight other mills were launched—the Howrah, Oriental (now Union), Asiatic (now Soorah), Clive, Bengal Pressing and Manufacturing Co. (now the Belliaghatta-Barnagore branch mill), Rustomjee (now the Central), Ganges (registered in England), and Hastings, owned by Messrs. Birkmyre Bros., of Greenock fame—in all thirteen new companies, coming on all of a heap and swelling the total looms from 1,250 up to 3,500. This was too much of a strain for the new industry, and for the next ten years all the mills had a severe struggle. The older ones all survived the ordeal, but four of the new concerns—the Oriental, the Asiatic, the Bengal Pressing and Manufacturing Co. and the Rustomjee—became moribund, to appear again later on under new names and management. Fort Gloster also suffered badly.

Between 1875 and 1882 only one new mill was put up. This was Kamarhatty, promoted by Messrs. Jardine, Skinner & Co., which came into being in 1877, as the result of Dr. Barry's visit to Calcutta in 1876, when he transferred the agency of the Gouripore Co. from Messrs. Jardine, Skinner & Co. to his own firm. This mill, together with additions made by some of the other mills, brought the total looms up to 5,150 in 1882. By the end of 1885 the total was further augmented by the Hooghly, Titaghur, Victoria and Kanknarrah mills, bringing the number of looms at work up to 6,700. From this period on to 1894 no new mills came into existence except the Calcutta Twist Mill, with 2,460 spindles, since merged into the Wellington branch of the Champdany Co. Between 1896 and 1900 the following new mills were started:—The Gordon Twist Mill with 1,800 spindles (now acquired by Anglo-India), Khardah, Gondolpara (French owned), Alliance, Arathoon, Anglo-India, Standard, National, Delta (which absorbed the Serajgunge), and the Kinnison. A lull of four years witnessed large extensions to the existing mills, after which came the following series of new mills, besides further heavy extensions—Dalhousie, Alexandra, Naihati, Lawrence, Reliance, Belvedere, Auckland, Kelvin and Northbrook

Progress of the Industry.

THE record of the jute industry may well be said to be one of uninterrupted progress. The following statement shews **quinquennial averages** from the earliest year for which complete information is available with actuals for each year from 1917-18 up to 1925-26 and the figures in brackets represent the variations for each period, taking the average of the quinquennium. from 1879-80 to 1883-84 as 100 :—

—	Number of mills at work.	Authorised Capital (in lakhs of Rs.)	Number (in thousands) of Persons employed daily (average.)	Looms.	Spindles.
Average—					
1879-80 to 1883-84 ..	21 (100)	270·7 (100)	38·8 (100)	5·5 (100)	88 (100)
1884-85 to 1888-89 ..	24 (114)	341·6 (126)	52·7 (136)	7 (127)	138·4 (157)
1889-90 to 1893-94 ..	26 (124)	402·6 (149)	64·3 (166)	8·3 (151)	172·6 (196)
1894-95 to 1898-99 ..	31 (148)	522·1 (193)	86·7 (223)	11·7 (213)	244·8 (278)
1899-1900 to 1903-04 ..	36 (171)	680 (251)	114·2 (294)	16·2 (295)	334·6 (380)
1904-05 to 1908-09 ..	46 (219)	960 (355)	165 (425)	24·8 (451)	510·5 (580)
1909-10 to 1913-14 ..	60 (286)	1,209 (443)	208·4 (537)	33·5 (609)	691·8 (786)
1914-15 to 1918-19 ..	73 (348)	1,403·6 (519)	259·3 (668)	39·7 (722)	821·2 (933)
1917-18	76 (362)	1,428·5 (528)	266 (686)	40·6 (738)	834 (948)
1918-19	76 (362)	1,477·2 (546)	275·5 (710)	40 (727)	839·9 (954)
1919-20	76 (362)	1,563·5 (579)	280·4 (723)	41·0 (745)	856·3 (473)
1920-21	77 (367)	1,923·5 (712)	288·4 (758)	41·6 (745)	869·9 (908
1921-22	81 (386)	2,122·4 (784)	288·4 (743)	43·0 (782)	908·3 (1,032)
1922-23	86	2,324·7 (859)	321·2 (828)	47·5 (863)	1,003·1 (1,140)
1923-24	89	2,685·8 (992)	330·4 (851)	49·0 (891)	1,043·4 (1,185)
1924-25	90	2,213·3 (818)	341·7 (881)	50·3 (914)	1,067·6 (1,213)
1925-26	90	2,134·7 (788)	331·3 (854)	50·5 (918)	1,063·7 (1,209)

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The value of jute manufactures exported by sea in 1924-25 was over thirty-three times as great as the average value of the export in the period 1879-80 to 1883-84 :—

—	Jute manufactures. Gunny bags in millions of number.	Gunny cloths in millions of yards.	Value in lakhs of Rs.
1879-80 to 1883-84	54·9 (100)	4·4 (100)	124·9 (100)
1884-85 to 1888-89	77 (140)	15·4 (350)	162·9 (130)
1889-90 to 1893-94	111·5 (203)	41 (932)	289·3 (232)
1894-95 to 1898-99	171·2 (312)	182 (4,136)	518 (415)
1899-1900 to 1903-04	206·5 (376)	427·2 (9,709)	826·5 (662)
1904-05 to 1908-09	257·8 (469)	698 (15,864)	1,442·7 (1,154)
1909-10 to 1913-14	339·1 (618)	970 (2,045)	2,024·8 (1,621)
1914-15 to 1918-19	667·6 (1,216)	1,156 (26,273)	4,019·3 (3,218)
1919-20	342·7 (624)	1,275·1 (28,980)	5,001·5 (4,004)
1920-21	533·9 (987)	1,352·7 (33,800)	5,299·4 (4,273)
1921-22	396·7 (715)	1,120·5 (28,000)	2,999·5 (2,419)
1922-23	344·2 (637)	1,254·3 (31,350)	4,049·4 (3,265)
1923-24	413·7 (752)	1,348·7 (30,652)	4,228·3 (3,382)
1924-25	425·1 (774)	1,456·2 (33,095)	5,148·8 (4,122)
1925-26	425·0 (774)	1,461·3 (33,211)	5,752·1 (4,605)
1926-27	449·0 (818)	1,503·1 (34,161)	5,283·3 (4,222)
1927-28	463·1 (843)	1,552.7 (35,289)	5,330·9 (4,268)

Until the outbreak of war the exports by sea of raw jute were marked by increases from year to year, although the increase was very much less than that in the case of manufactures. During the war years exports declined very considerably. The cessation of the war stimulated the export trade and in 1919-20, the exports showed an increase, as compared with the average of the war quinquennium (1914-15 to 1918-19). In the following two years, the exports recorded a decrease and in 1922-23 they again made a recovery and amounted to 578,000 tons:

		Jute, raw, ton.	
Average	1879-80 to 1883-84..	375,000	(100)

The total quantity of jute manufactures exported by sea from Calcutta during the year 1922-23 was 668,000 tons as against 639,000 tons in the preceding year and 603,500 tons in the pre-war year 1913-14. The values of these exports amounted to Rs. 40·28 lakhs, or an increase of Rs. 10,36 lakhs over the preceding year and Rs. 12,08 lakhs over the pre-war year. The shipments of gunny bags were valued at Rs. 15,82 lakhs and of gunny cloth Rs. 24.24 lakhs as against Rs. 13,86 and Rs. 15,92 lakhs respectively in the preceding year and Rs. 12,48 and Rs. 15,58 lakhs in the pre-war year.

The price of raw jute reached a very high point in 1906-07, the rate being Rs. 65 per bale; in 1907-08 it dropped to Rs. 42 per bale, and the fall was accentuated in 1908-09 and 1909-10, the price having declined to 36·4 and Rs. 31, in 1917-18 it dropped to Rs. 38-8-0 but rose again in 1919-20 up to Rs. 77-8-0. In 1920-21 it dropped to Rs. 65, but rose again to Rs. 86. It again declined to Rs. 66. In 1921-22 the price rose to Rs. 73 at the end of September, but fell back again to Rs. 50 at the end of November and recovered at Rs. 64 at the close of the year.

The 1926 crop.—The final figures of outturn for the three provinces work out as follows:—

Province.	Bales. 1927.	1926.*
Bengal (including Cooch Behar & Tripura States)	9,054,700	10,769,200
Bihar and Orissa	† 717,000	† 819,300
Assam	458,000	599,000
Total ..	10,229,700	12,187,500

Province.	Area in Acres. 1927.	1926.*
Bengal (including Cooch Behar & Tripura States)	2,962,100	3,363,900
Bihar and Orissa (including Nepal)	241,000	297,000
Assam	168,000	186,000
Total ..	3,371,100	3,846,9[illegible]

* Revised. † Including Nepal.

The Indian Jute Mills Association now one of the most important, if not the most important, of the bodies affiliated to the Bengal Chamber of Commerce, was started under the following circumstances:—In 1886 the existing mills, finding that, in spite of the constant opening up of new markets, working results were not favourable, came to an agreement, with the late S. E. J. Clarke, Secretary to the Chamber of Commerce, as trustee, to work short time. The only mills which stood out of this arrangement were the Hooghly and Serajgunge. The first agreement, for six months dating from 15th February 1886, was subsequently renewed at intervals without a break for five years up to February 15, 1891. The state of the market at the time of the renewals dictated the extent of the short time, which varied throughout the five years between 4 days a week, 9 days a fortnight and 5 days a week. Besides short time, 10 per cent. of the sacking looms were shut down for a short period in 1890. An important feature of this agreement was a mutual undertaking by the parties not to increase their spinning power during the currency of the agreement, only a few exceptions being made in the case of a few incomplete new mills.

The present officials of the Association are:—

Chairman.—Mr. E. G. Abbott, M.L.C.

Members of Committee.—Mr. T. Douglas, Mr. D. J. Leckie, Mr. G. A. Mason, and Mr. M. P. Thomas.

Working days.—With the introduction of the electric light into the mills in 1896, the working day was increased to 15 hours, Saturdays included, which involved an additional amount of cleaning and repairing work on Sundays. In order to minimise this Sunday work and give them a free Sunday, an agitation was got up in 1897 by the Mill European assistants to have the engines stopped at 2 or 3 p.m. on Saturdays. The local Government took the matter up, but their action went no further than applying moral suasion, backed by a somewhat half-hearted threat. The Mill Association held meetings to consider the question and the members were practically agreed as to the utility of early closing on Saturdays, but, *more suo*, could not trust themselves to carry it out without legislation. Unfortunately the Government of India refused to sanction the passing of a Resolution by the provincial Government under the Factory Act and the matter was dropped. Only a year or two ago the Jute Mills Association in despair brought out an American business expert, Mr. J. H. Parks, to advise them on the possibility of forming a jute trust with a view to exercising some control over the production and price of jute. Mr. Parks came, and wrote a report which the Association promptly pigeon-holed because the slump was over and the demand was so prodigious that there was no need to worry about the price of jute.

An Association, styled the **Calcutta Jute Dealers Association,** has been formed in Calcutta to promote and to guard the common interests of its members as dealers in jute for local consumption. The members are balers and brokers of jute for sale to the jute mill in and around Calcutta. The present Committee:—Mr. Geo. Morgan, M.L.C., *Chairman.* Members:—Messrs. E. W. Christie, D. King, H. F. Mytton, A. C. Robertson, and R. G. Tarbat.

Effects of the War.—The official review of the Trade of India in 1916-17 says:—The value of the exports of raw jute increased in 1916-17 by nearly Rs. 65 lakhs to Rs. 1,629 lakhs. The quantity exported, however, was less than in the preceding year. The estimated yield of the crop was 12 per cent. above that of the previous year, *viz.*, 1,490,000 tons or 8,340,000 bales. Owing to the lack of tonnage and other abnormal circumstances brought about by the war, the quantity exported was 10 per cent. below that of the previous year. Of the consumers the United Kingdom and Italy took less, while the United States, France (mainly *via* Dunkirk), Russia (*via* Vladivostok) and Brazil took greater quantities. There were, of course, no exports to enemy countries which took more than 27 per cent. in the five years ending 1913-14, the pre-war year. The increase in the value accompanied by a decrease in the volume of exports was due to the very high range of prices during the months of September, October, November and December. Towards the close of the year under review prices steadily declined, and have since gone still lower.

Jute Manufactures.—The value of the exports now approximates to Rs. 42 crores. In spite of the war with its attendant difficulties of freight and finance, the exports of gunny cloth showed an increase of Rs. 241 lakhs of which Rs. 163 lakhs were due to higher prices and Rs. 78 lakhs to an increase in the volume of exports. There were also an increase of Rs. 118 lakhs in the value of gunny bags exported. The number of bags shipped increased while the weight decreased, sand bags for war purposes being lighter than the ordinary bags for transporting grain. Exports to Australia in 1916-17 were a record. The United Kingdom with Australia took more than half of the number of bags exported while the United States took more than half of the quantity of cloth exported.

There were 74 mills at work throughout the year with 41,292 looms and 863,339 spindles. The number of persons employed was 285,881. There were no difficulties as regards the supply of labour.

The number of gunny bags shipped from Calcutta during 1922-23 declined from 386 million bags to 342 million bags, but the value increased from Rs. 13,87 lakhs to Rs. 15,82 lakhs. Shipments of gunny cloth rose from 1,120 million yards to 1,251 million yards valued at Rs. 15,92 lakhs and Rs. 24,24 lakhs respectively.

Hemp and Jute Substitutes.

Experiments have been made during the last few years by the Agricultural Department of the Government of India with the **Deccan hemp** plant (*Hibiscus cannabinus*), which yields a fibre very similar to jute. As a result, a new variety of the plant, known as Type 3, has been obtained, which it is now proposed to introduce into several parts of India, and, as a beginning, the variety is to be grown on a number of estates in Bihar. A sample of the fibre prepared from this variety by the usual methods of retting was 10 ft. to 12 ft. long, of an exceptionally light colour, well cleaned, and of good strength

It was valued at £18 per ton with Bimlipatam jute at £12 10s., and Bengal first mark jute at £17 per ton. Deccan hemp has been grown fairly extensively in Bombay, the Central Provinces, and Madras, where it is used for ropes and cordage and also for the manufacture of a coarse sackcloth. A valuable feature of the plant is its suitability for cultivation in such parts of India as are not suitable for jute.

Prior to the war, the United Kingdom's requirements of hemp were mainly supplied by the following countries in order of importance:—the Philippine Islands, New Zealand, India, Russia, Italy and Germany. The opinion appears to be held that the effect of the war will be to cause very considerable changes in the character of the fibre market. There will probably be labour difficulties, it is thought, in the preparation of the hemp crops of Russia and Hungary and it is not unlikely that the world will look to countries such as India for the supply of fibres which may be used as substitutes for the European varieties of hemp. There can be no doubt that one of the early effects of the war was to firm up hemp prices. As far as Indian hemp is concerned, values were persistently depreciated during the first six months of 1914 owing to large stocks held; but the closure of the Russian hemp market on the outbreak of war resulted in a marked improvement in values, and there was a keen demand and a considerable rise in price. Exports from Calcutta during 1922-23 made a great recovery from the previous year. The quantity advanced by 37 per cent. from 197,412 cwts. to 269,487 cwts. and the value from Rs. 26·93 lakhs to Rs. 36·68 lakhs.

THE WOOL INDUSTRY.

Wool exported from India consists not only of wool grown in India itself, but of imports from foreign sources, these latter coming into India both by land and by sea. Imports by sea come chiefly from Persia, but a certain quantity from Persia also comes by land, while the main imports are from Afghanistan, Central Asia, Tibet and Nepal. Quetta, Shikarpur, Amritsar and Multan are the main collecting centres for wool received by land from Afghanistan and Persia, whence it is almost invariably railed to Karachi for subsequent export overseas.

Imports and Exports.—A considerable amount of wool is imported annually from Tibet, and in normal years, from Afghanistan Imports of raw wool advanced from nearly 5 million lbs. valued at Rs. 32 lakhs in 1926-27 to 5.8 million lbs. valued at Rs. 45 lakhs in 1927-28. The trade in raw wool continued to expand exports rising from 45 million lbs. to 59 million lbs. in quantity and from Rs. 3,93 lakhs to Rs. 4,36 lakhs in value.

Production in India.—The production of wool in India is estimated at 60 million lbs. the estimate being arrived at from the available figures of the number of sheep in the country and their estimated yield per fleece, the average quantity of wool yielded per sheep per annum being taken at only 2 lbs.

All Indian wools are classed in the grade of **carpet wools,** and it is correct to say of perhaps fully half the breeds of sheep found on the plains of India that they yield a kind of hair rather than of wool. They are reared chiefly on account of the mutton, and the fleece has been generally regarded as of subsidiary interest. In many respects, in actual fact, the Indian plains sheep approximate more nearly to the accepted type of the goat rather than of the sheep. Short remarks in his manual on Indian cattle and sheep, particularly with respect to the Madras type, that they "resemble a greyhound with tucked up belly, having some coarseness of form, the feet light, the limbs bony, sides flat and the tail short."

Mill manufacture.—The number of woollen mills at work in British India in 1902 was three, with an authorised capital of Rs. 38.50,000, and employing 23,800 spindles and 624 looms. The number of persons employed in the industry then was 2,559, and the quantity of woollen goods produced 2,148,000, lbs. At the end of 1917 the number of mills had risen to five, with an authorised capital of Rs. 2,56,50,000 employing 39,608 spindles and 1,155 looms. The weight of goods produced then was 9,744,264 lbs. and the number of persons employed 7,824. With regard to Indian States, there was one mill in Mysore in 1903 with a capital of Rs. 6,00,000, employing 1,430 spindles and 45 looms. The quantity of goods produced was 1,136,000 lbs. and the number of persons employed 297. In 1907 there was still only the one mill working in an Indian State—the authorised capital had been increased to Rs. 15,00,000, the quantity of goods produced to 1,724,087 lbs., and the number of persons employed to 563. Three of the mills manufacture all classes of woollen and worsted goods, the remainder manufacturing blankets only. The existence of these mills in India proved of great service to Government in the meeting of war requirements, and they were all employed to their fullest capacity in supplying army demands for greatcoat cloth, serges, putties, flannels, blankets and hosiery. Their total capacity, however, was not sufficient to meet the full requirements of the army, and consequently their supplies had to be supplemented by large imports from home. The bulk of the wool used by the Indian mills is Indian wool, although it is supplemented to some extent by the importation of merinos and cross-breds from Australia for the manufacture of the finer classes of goods. Their market for manufactured goods is almost entirely in India itself.

Blanket weaving and carpet manufacture are carried on in various parts of the country, notably in the Punjab and the United Provinces. Woollen pile carpets are made in many of the jails. Amritsar had a considerable trade at one time in weaving shawls from *pashm,* the fine under fleece of the Tibetan goat, but its place has been taken to some degree by the manufacture of shawls from imported worsted yarns, but more generally by the manufacture of carpets of a fine quality which find a ready sale in the world market. This work is done entirely on hand looms and the carpets fetch a high price.

Bibliography.—Notes on wool in India. By A. H. Silver and J. K. Mehta, Govt. Press, (Calcutta) (1919).

Silk.

In the early days of the East India Company the Indian Silk trade prospered greatly, and various sub-tropical races of the Silkworm were introduced. But the trade gradually declined for the following reasons:—

In the seventeenth and eighteenth centuries India's chief competior in the silk trade was the Levant Company. Successful efforts, however, were made to acclimatise in Europe one or two races of a temperate worm, procured from China and Japan. When sericulture became part of the agriculture of France and Italy, a quality of silk was produced entirely different from that of India and Turkey, and its appearance created a new demand and organized new markets.

All subsequent experience seems to have established the belief that the plains of India, or at all events of Bengal, are never likely to produce silk that could compete with this new industry. On the lower hills of Northern India, on the other hand, a fair amount of success has been attained with this (to India) new worm, as, for example, in Dehra Dun and Kashmir. In Manipur, it would appear probable that *Bombyx mori*, possibly obtained from China, has been reared for centuries. The caprice of fashion has, from time to time, powerfully modified the Indian silk trade. The special properties of the *korah* silk were formerly much appreciated but the demand for them has now declined. This circumstance, together with defective systems of rearing and of hand-reeling and weaving, accounts largely for the present depression in the mulberry silk trade of India.

Mulberry-feeding worms.—Sir George Watt states that in no other country does the necessity exist so pressingly as in India to treat the subject of silk and the silk industries under two sections, *viz.*, Bombycidae, the domesticated or mulberry-feeding silk worms; and Saturniidae, the wild or non-mulberry-feeding worms. In India the mulberry worm (*Bombyx Mori*) has been systematically reared for many centuries, there being six chief forms of it. In the temperate tracts of India various forms of *Morus alba*, (the mulberry of the European silk-producing countries), are grown specially as food for the silkworm. This is the case in many parts of the plains of Northern India, Baluchistan, Afghanistan, Kashmir, and along the Himalaya at altitudes up to 11,000 feet. The other species even more largely grown for the Indian silkworm is *M. Indica* of which there are many distinctive varieties or races. This is the most common mulberry of Bengal and Assam as also of the Nilgiri hills.

India has three well-known purely indigenous silkworms; the *tasar*, the *muga* and the *eri*. The first is widely distributed on the lower hills, more especially these of the great central tableland, and feeds on several jungle trees. The second is confined to Assam and Eastern Bengal, and feeds on a laurel. The third exists in a state of semi-domestication, being reared on the castor-oil plant. From an art point of view the *muga* silk is the most interesting and attractive, and the cocoon can be reeled readily. The *eri* silk, on the other hand, is so extremely difficult to reel that it is nearly always carded and spun—an art which was practised in the Khasi Hills of Assam long before it was thought of in Europe.

Experiments and results.—Numerous experiments have been made with a view to improving sericulture in India. French and other experts are agreed that one of the causes of the decline of the silk industry in India has been the prevalence of diseases and parasites among the worms, the most prevalent disease being pebrine. M. Lafont, who has conducted experiments in cross breeding, believes that improvement in the crops will be obtained as soon as the fight against pebrine and other diseases of the worms is taken up vigorously by the producers of seed and the rearers of worms, while improvement in the quality of the cocoons will be obtained by rearing various races, pure and cross breds.

In Kashmir and Mysore satisfactory results have been obtained. In the former State sericulture has been fostered on approved European principles with Italian reeling machinery, seed being imported annually on a large scale. In 1897 in Mysore Mr. Tata, after selecting a plantation and site for rearing houses, sent to Japan for a Superintendent and trained operatives. The Mysore authorities have made a grant of Rs. 3,000 a year to the Tata farm in return for instruction given to the people of Mysore in Japanese methods of growing the mulberry and rearing the insects. The products of the Mysore State are exported to foreign countries from Madras. The work of the Salvation Army is also noteworthy in various parts of India. They have furnished experts, encouraged the planting of mulberry trees, and subsidised several silk schools. The draft prospectus has been issued of a silk farm and institute to be started at Simla under the auspices of the Salvation Army. The Lieut.-Governor of the Punjab has permitted the school to be called after his name, and the Punjab Government made a grant of Rs. 2,000 towards the expenses. Sir Dorabji Tata has also made a donation of Rs. 1,000. The Bengal Silk Committee under the guidance of some French experts have conducted cross-breeding experiments with a view to establish a multi-voltine hybrid of European quality. There is a Government sericultural farm at Berhampore, where, it is said, a pure white multi-voltine of silk worm is reared. The results of the Bengal Committee's labours may be summed up as follows: the only really effective method of dealing with the problem is to work up gradually to a point at which the whole of the seed cocoon necessary for the province will be supplied to rearers under Government supervision, and to establish gradually a sufficient number of large nurseries throughout the silk districts of the province.

In 1915 there was issued by the Agricultural Research Institute, Pusa, a *Bulletin* (No. 48 of 1915) entitled "First Report on the Experiments carried out at Pusa to improve the Mulberry Silk Industry." In a short Prefatory note

Mr. Bainbrigge Fletcher (Imperial Entomologist) explains that the object of the Bulletin is to place on record some of the more important experiments which were commenced at Pusa, in the year 1910 and have since been carried on in the endeavour to fix a superior multivoltine race of the Mulberry Silkworm which would not degenerate and which would yield silk better both in quality and outturn than that supplied by the multivoltine races which are reared at present.

Central Nurseries.—The report of the Agricultural Department, Bengal, for the year ending June 30, 1913, gives an account of a scheme which has been devised with the object of reclaiming the silk industry. The aim of the scheme is gradually to establish throughout the silk districts a sufficient number of central nurseries with rearing houses and thus enable the whole of the seed cocoons required in the province to be supplied under Government supervision. It is believed that this is the only really effective method of dealing with the problem. A number of the existing smaller nurseries were closed during 1913 and others are being converted into enlarged and improved central nurseries with rearing houses complete. The ultimate success of the scheme depends largely on the willingness of the rearers to pay an adequate price for pure seed.

A pamphlet was published in 1915, by Mr. M. N. De, Sericultural Assistant at Pusa, which contains practical hints on improved methods which are recommended to be used for reeling mulberry silk in Bengal and other silk producing districts. It has been found that, by the provision of two small pulleys to the ordinary Bengal type of reeling machine, superior thread can be obtained, the cost of the extra apparatus is merely nominal (five or six annas per machine) whilst the suitability of the machine for cottage workers is maintained. By attention to such simple points as the stifling and storage of cocoons and the temperature and quality of the water used in the reeling pans, great improvements can be effected in most silk centres in Bengal and other districts.

Exports of Silk.—As a result of the war the trade has shown in some degree signs of revival from its decadent condition, both as regards its volume and value. The value of exports during 1915-16 improved by Rs. 12 lakhs to Rs. 27½ lakhs, of which raw silk accounted for Rs. 24 lakhs. In 1916-17 the total exports rose to Rs. 54¾ lakhs. In 1926-27 exports of raw silk amounted to Rs. 32 lakhs and of silk manufactures nearly Rs. 3 lakhs.

Indigo.

Indigo dyes are obtained from the Indigofera a genus of Leguminosae which comprises some 300 species, istributed throughout the tropical and warm temperate regions of the globe, India having about 40. Western India may be described as the headquarters of the species, so far as India is concerned, 25 being peculia to that Presidency. On the eastern side of India, in Bihar, Bengal, Assam and Burma, there is a marked decrease in the number of species but a visible increase in the prevalence of those that are met with.

There is evidence that when Europeans first began to export the dye from India, it was procured from the Western Presidency and shipped from Surat. It was carried by the Portuguese to Lisbon and sold by them to the dyers of Holland, and it was the desire to obtain a more amyle supply of dye stuff that led to the formation of the Dutch East India Company and so to the overthrow of the Portuguese supremacy in the East. Opposition to indigo in 17th century Europe was keen owing to its interference with the wood industry, but it was competition to obtain indigo from other sources than India that led on the first decline of the Indian indigo industry. In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had been given up—partly on account of the high duties imposed upon it and partly because sugar and coffee were found to be more profitable—the industry was revived in India, and, as one of the many surprises of the industry, the province of Bengal was selected for this revival. It had no sooner been organised, however, than troubles next arose in Bengal itself through misunderstandings between the planters, their cultivators and the Government, which may be said to have culminated in Lord Macaulay's famous *Memorandum* of 1837. This led to another migration of the industry from Lower and Eastern Bengal to Tirhut and the United Provinces. Here the troubles of the industry did not end, for the researches of the chemical laboratories of Germany threatened the very existence of any natural vegetable dye. They first killed the maddar dye of Europe, then the safflower, the lac and the *al* dyes of India, and are now advancing rapidly with synthetic indigo, intent on the complete annihilation of the natural dye. Opinions differ on many aspects of the present vicissitude; meantime the exports from India have seriously declined, and salvation admittedly lies in the path of cheaper production both in cultivation and manufacture. These issues are being vigorously faced and some progress has been accomplished, but the future of the industry can scarcely help being described as of great uncertainty. The issue is not the advantage of new regulations of land tenure, but one exclusively of natural *versus* synthetic indigo. (See Watt's "Commercial products of India.") In this connection it ma be noted that increases in the price of coal in England, due to labour difficulties, have greatly strengthened the position of natural indigo. In February 1915 a conference was held at Delhi when the possibility of assisting the **natural indigo industry** was considered from three points of viw—agricultural, research and commercial. The agricultural or botanical side of the question is fully discussed by Mr. and Mrs. Howard of Pusa in Bulletins Nos. 51 and 54 of

the Agricultural Research Institute. Other aspects of the question were fully examined last year in the Agricultural Journal of India by Mr. W. A. Davis, Indigo Research Chemist to the Government of India. An **Indigo Cess Bill** was passed in the Imperial Legislative Council in 1918. It provides for a cess on indigo exported from India for the scientific investigation of the methods of cultivation and manufacture of indigo, the proceeds of the cess being received and expended by Government.

Decline of the Industry.—Since synthetic indigo was put upon the market, in 1897, the natural indigo industry of India has declined very rapidly; apart from slight recoveries in 1906-07 and 1911-12, the decline continued without a break until the revival due to the impossibility of obtaining artificial dyes in sufficient quantities during the war.

In 1926-27 the total yield of indigo was estimated at 20,100 cwts. on an area of 100,400 acres. The exports (1600 cwts.) were valued at Rs. 4½ lakhs.

OILS AND OIL CAKES.

In 1927-28 Oilseeds occupied the fifth place among exports the first four being raw and manufactured jute, cotton food-grains and tea. Indian supplies were moderately satisfactory and in the case of groundnuts plentiful, while demand improved considerably. The total exports amounted to 1,210,000 tons valued at Rs. 26,69 lakhs showing an increase of 44 per cent in quantity and 40 per cent in value over the preceding year's figures. Compared with the pre-war average there was however a decrease of 17 per cent in quantity but an increase of 9 per cent in value.

The following table shows the quantities of the principal seeds exported during the past three years and the pre-war quinquennium :—

	Pre-war average	1825-26	1826-27	1927-28
	(Thousands of Tons)			
Linseed	379	308	192	222
Rape seed	273	112	94	66
Groundnuts ..	212	455	368	613
Castor	114	110	102	122
Cotton	240	197	51	153
Sesamum	119	40	2	11
Copra	31	..	2	..
Others	85	28	27	23
Total ..	1,453	1,250	838	1,210

A pamphlet on the subject recently publihsed by the Commercial Intelligence Department points out that it is both economically and industrially unsound for India to export her oil seeds instead of manufacturing the oils and oil cakes in India. It allows other countries to reap the manufacturers' profits and at the same time deprives Indian agriculture of the great potential wealth, as cattle-food and manure, contained in the oil cakes. An immense quantity of oil is, as a matter of fact, already manufactured in this country by more or less crude processes. Village oil mills worked by bullocks and presses worked by hand exist in all parts of the country and supply most of the local demand for oil. There has also been a great increase in recent years in the number of oil mills worked by steam or other mechanical power. These crush all the commoner oil seeds and development has been especially marked in the case of mustard oil, castor oil and groundnut oil. In spite of all this there has been a perceptible diminution in the export of oil from India, particularly of cocoanut oil and linseed oil, and an increase in the export of oil seeds, which is particularly marked in the case of copra and groundnuts. The situation created by the War has naturally led to too much discussion of the possibility of developing on a large scale the existing oil-milling industry in India.

There are three difficulties with which any proposal to develop in India an **oil-milling industry** on a great scale is faced. In the first place, there exist high protective tariffs in European countries which encourage the export from India of the raw material rather than the manufactured product. Secondly, there is a better market for the oil cake in Europe than in India and the freight on oil seeds is less than the freight on cake. Thirdly, it is much easier and less expensive to transport oil seeds by sea than it is to transport oil. While this has been the position in the European markets, Indian made oils, other than cocoanut oil, have made enough headway in Eastern markets to suggest the possibility of a development of those markets.

The problem of finding a market for **oil cakes** is equally important. The value of oil cakes is much better appreciated in Europe than in India. The Indian cultivator is prejudiced against the use of machine-made cake as a cattle food or as manure because he considers that it contains less oil and therefore less nourishment than the village-made cake. He is therefore unwilling to buy it except at a reduced price. His prejudices on this point have no justification in fact since experts are agreed that mill cake is a better food for cattle than village-made cake. Even when the mill cake contains less oil than the village cake, there is still more oil in the cake than cattle can digest. The excess of oil in the village cake, where it exists, is a drawback and not an advantage to the use of the cake as food. A considerable amount of demonstration work has been done by the Agricultural Departments of Government in order to remove the cultivator's prejudices and there is said now to be an increasing demand for most classes of mill cake.

Tea.

Tea cultivation in India is chiefly in Assam, Bengal and Southern India, the cultivation elsewhere being comparatively unimportant.

The total production of tea in India was estimated at 391 million lbs. in 1927, as compared with 393 million lbs. in 1926 and 364 million lbs. in 1925. Assam contributed 60 per cent., Northern India (excluding Assam) 26 per cent. and Southern India 14 per cent, the same as in the preceding year. The statement below shows the development of the industry during the past years.

——	1923	1924	1925	1926	1927
ACREAGE.	Acres.	Acres.	Acres.	Acres.	Acres.
Assam	411,900	413,300	416,500	420,400	423,800
Rest of Northern India ..	203,500	204,400	211,200	212,700	214,500
Southern India	95,800	97,000	100,000	106,300	114,600
Total ..	711,200	714,700	727,700	739,400	752,900
PRODUCTION.	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)
Assam	237,601	237,153	225,185	241,982	235,888
Rest of Northern India ..	92,076	91,351	89,017	99,804	101,923
Southern India	45,679	46,752	49,305	51,1[illegible]7	53,109
Total ..	375,356	375,256	363,507	392,933	390,920

Exports during the same years were as follows :—

Exports of tea by sea to foreign countries.

——	1923-24	1924-25	1925-26	1926-27	1927-28
	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)
From Northern India (Calcutta and Chittagong) ..	296,778	299,747	280,024	304,957	315,109
From Southern India (Madras ports)	38,560	37,717	43,945	44,172	46,142
From Bombay, Sind and Burma	3,417	2,643	2,576	1,373	761
Total	338,755	340,107	326,5[illegible]5	350,502	362,012

Exports during 1927-28 increased by 3 per cent. in quantity and 10 per cent. in value as compared with the exports in 1926-27, and amounted to 362 million lbs. valued at Rs. 32 crores, as compared with 350 million lbs. valued at Rs. 29 crores in the preceding year. The United Kingdom took 306 million lbs. of black tea, valued at Rs. 28½ crores as against 290 million lbs. valued at Rs. 24½ crores in the previous year. She also took 943,500 lbs. green tea, as compared with 1,220,000 lbs. in 1926-27. About 85 per cent. of the exports went to the United Kingdom, whereas in 1926-27 her share had been nearly 84 per cent. The re-exports of Indian tea from the United Kingdom also increased in 1927-28 to 48 million lbs. from 43 million lbs. in 1926-27, of which 17 million lbs. were shipped to the Irish Free State, 20 million lbs. to the Continent of Europe, 5 million lbs. to the United States and 4 million lbs. to Canada. Australia's demands for Indian tea decreased from 9 to 3 million lbs. and the exports to Iraq from 4 to 2 million lbs., to Ceylon, from 4,427,000 lbs. to 4,716,000 lbs. Persia took 4 million lbs. as compared with 6 million lbs. in the preceding year, while sales to Russia were 6 million lbs. as compared with only 101,000 lbs. in the previous year.

EXPORTS AND PRICES.

The following table shows the quantity of Tea exported by sea and by land to Foreign Countries from India, Ceylon, China and Java in the years 1898-99 to 1927-28 with variations in index numbers, taking the figure of 1896-97 as 100‡:—

—	India §	Ceylon.*	China.† Black and green.	China.† Brick, table and dust.	Java.†

1727-28	14 10	247	14 4	205

Tea Cess Fund.—In 1903 an Act, known as the Indian Tea Cess Act, IX of 1903, was passed at the request of the trade for promoting its sale and manufacture. Under this Act a duty of ¼ pie per lb was levied on all Indian tea exported up to the 30th April, 1921. From 1st May, 1921, the rate was raised to ½ pie per lb., and from the 21st April, 1923, to 6 annas per 100 lbs. (¾ pie per lb). The whole of the amount collected is made over to a fund known as the Tea Cess Fund, which is placed at the disposal of a Committee appointed for the purpose, and Government merely acts as a revenue collecting agency. The total amount collected in 1927-28 was Rs. 13,75,000, as against Rs. 13,13,000 in 1926-27 and Rs. 12,29,000 in 1925-26.

Quantity of Indian Tea exported by sea* (distinguished according to countries of final destination) and by land, in the years 1922-23 to 1927-28.

* Including shipments from the State of Travancore.

(*a*) Tea consigned from British India to Ceylon is almost entirely transhipped at Colombo to other countries and does not, therefore, appear in the Ceylon Customs Returns as imports into Ceylon.

(*b*) Exclusive of the exports from the North-West Frontier Province for the months, July 1923 to February 1924, for which returns were not received. † Includes Iraq.

‡ These figures are not strictly comparable with the previous figures as they represent all the trade registered at selected railway stations adjacent to the land frontiers, though a fair portion of them is frontier trade. The old system of registration of frontier trade by means of clerks posted on the important trade routes across the frontier has been discontinued from 1st April 1925. The figure for 1925-26 excludes exports from Burma.

Coffee.

The history of the introduction of coffee into India is very obscure. Most writers agree that it was brought to Mysore some two centuries ago by a Mahommedan pilgrim named Baba Budan, who, on his return from Mecca, brought seven seeds with him. This tradition is so universally believed in by the inhabitants of the greater part of South India, that there seems every chance of its being founded on fact. About the beginning of the 19th century there is no doubt coffee had found its way to India, and in 1823 a charter was granted to Fort Gloster, near Calcutta, authorising it to become a cotton mill, a coffee plantation and a rum distillery. Some of the coffee trees planted in fulfilment of that charter are supposed to be still alive, and about the same time coffee was successfully grown in the Botanic Gardens, Calcutta; but the industry of coffee planting nowhere found an abiding place on the plains of India but migrated to the hills of South India, in Mysore more especially, and thus into the very region where tradition affirms it had been introduced two centuries previously.

The first systematic plantation was apparently Mr. Cannon's near Chikmuglur. This was established in 1830. It is supposed, however, that Major Bevan may have actually grown coffee on the Wynad at a slightly earlier date and that Mr. Cockburn's Shevaroy plantation bears the same date as Mr. Cannon's. In 1840 Mr. Glasson formed a plantation at Manantoddy, and in 1846 plantations were organised on the Nilgiri hills.

The Position of the Industry.—The number of reporting plantations in 1927-28 was 3,315 covering a total area of 273,815 acres, as against 3,152 plantations with an area of 256,390 acres in 1926-27. But the area actually under coffee in the reporting plantations in the year under review was 155,839 acres, as compared with 153,433 acres in the preceding year. New land planted with coffee in these plantations during the year amounted to 6,550 acres, while the area of old cultivation abandoned was 4,144 acres, thus giving a net increase of 2,406 acres or about 2 per cent. over the total area under coffee in 1926-27. Of the total area under coffee during 1927-28, Mysore accounted for 51 per cent. Madras 24 per cent. Coorg 23 per cent. and Cochin and Travancore together 2 per cent.

The total reported production of cured coffee during the year was 35,563,321 lbs. as compared with 34,286,806 lbs. in the preceding year—the yield per acre of plucked area being 452 lbs. (254 lbs). in Travancore, 331 lbs. (213 lbs). in Madras, 222 lbs. (338 lbs.) in Coorg, 221) lbs. (234 lbs). in Mysore and 124 lbs. (161 lbs.) in Cochin. The figures for 1926-27 are shown in brackets.

Labour.—The daily average number of persons employed in the plantations during 1927-28 was returned at 91,353 of whom 61,510 were permanently employed (namely, garden labour 43,751 and outside labour 17,759) and 29,843 temporarily employed (outside labour) as compared with 83,881 persons (41,582 garden and 16,037 outside labour permanently employed and 26,262 temporary outside labour in 1926-27.

Exports.—The total exports of coffee decreased steadily from 242,00 cwts, in 1924-25 to 205,000 cwts in 1925-26 and to 150,000 cwts in 1926-27, but in 1927-28 the exports rose and amounted to 277,000 cwts. The principal destinations of Indian coffee were as usual the United Kingdom and France, and shipments to these countries rose from 49,446 and 21,957 cwts to 75,386 and 65, 533 cwts, respectively. Other European countries, namely, Germany, Netherlands, Norway and Belgium also increased their demands from 16,000, 13,000, 8,000 and 5,000 cwts to 33,000, 30,000, 16,000 and 10,000 cwts. respectively. Shipments to Iraq, Arabia and Australia also showed increases.

The exports during the coffee season (*i.e.*, July to June) were 261,523 cwts. in 1927-28 as compared with 241,296 cwts. in 1926-27.

Exports of Coffee.

	Cwts.
1902-03	269,165
1903-04	291,254
1904-05	329,647
1905-06	360,182
1906-07	228,094
1907-08	244,234
1908-09	302,022
1909-10	232,645
1910-11	272,249
1911-12	241,085
1912-13	267,000
1913-14	260,000
1914-15	290,000
1915-16	177,000
1916-17	198,000
1917-18	196,000

1920-21	233,400
1921-22	235,000
1922-23	169,000
1923-24	218,000
1924-25	242,000
1925-26	205,000
1926-27	150,000
1927-28	277,000

The pre-war average value of the coffee exports was Rs. 79,17,000.

INDIAN TOBACCO.

The tobacco plant was introduced into India by the Portuguese about the year 1605. As in other parts of the world, it passed through a period of persecution, but its ultimate distribution over India is one of the numerous examples of the avidity with which advantageous new crops or appliances are adopted by the Indian agriculturist. Five or six species of *Nicotiana* are cultivated, but only two are found in India, namely, *N. Tabacum* and *N. rustica*. The former is a native of South or Central America, and is the common tobacco of India. About the year 1829 experiments were conducted by the East India Company towards improving the quality of leaf and perfecting the native methods of curing and manufacturing tobacco. These were often repeated, and gradually the industry became identified with three great centres: namely, (1) Eastern and Northern Bengal (more especially the District of Rangpur); (2) Madras, Trichinopoly, Dindigul, Coconada and Calicut in Southern India; and (3) Rangoon and Moulmein in Burma. Bengal is the chief tobacco growing Province, but little or no tobacco is manufactured there. The chief factories are near Dindigul in the Madras Presidency, though, owing to the imposition of heavy import duties on the foreign leaf used as a cigar wrapper, some cigar factories have been moved to the French territory of Pondicherry.

The question of improving the quality of Indian tobaccos has received the attention of the Botanical section of the Agricultural Research Institute, Pusa, and three Memoirs have been published recording the results of investigations in that direction. The immediate problem at Pusa is the production of a good cigarette tobacco. Many attempts have been made in the past to introduce into India the best varieties of cigarette tobacco from America, but the results have been disappointing. It is now hoped to build up by hybridization new kinds of tobacco, suited to Indian conditions of growth, which possess in addition the qualities necessary to obtain a better price.

Area under Cultivation.—The cultivation of tobacco is very widespread in Burma. The two main varieties are called "Burmese tobacco" and "Havana tobacco." Of the Burmese tobacco there are two main varieties "Seywet-gyi," the large-leaved variety and "Seywet-gyun," a smaller-leaved variety with pointed leaves. The former yields a heavier crop, but the latter gives better quality. There is always a great demand on the market for both the Havana and the Burma tobacco. The smooth leaves of the Havana plant are used for the wrappers and the coarser Burmese leaf for the filling.

The most important tobacco tracts in British India are:—(*i*) the Coimbatore and Dindigal tract of Madras, where the *Usi-Kappal* and *Wara Kappal* varieties are largely grown, the former supplying the Trichinopoly cigar; (*ii*) the Godavari Delta of Madras; (*iii*) the Rangpur tract of Bengal; (*iv*) the Districts of Bihar and Orissa; (*v*) Guzerat in Bombay and (*vi*) the delta tract of Burma.

The season for harvesting varies in different localities ranging from December to June, but the bulk of the crop is harvested during the months of February, March and April. The leaves when quite dry, are assorted and placed in heaps in stacks to ferment. They are then tied into bundles of 25 or 30, a useless leaf being employed for tying each bundle. The leaves are laid perfectly flat, the bundles being fan-shaped. In this condition they are baled, the broom-like ends projecting outwards. By varying the degree of fermentation of the leaves, different qualities of tobacco are obtained. A black variety is used in India for cake tobacco, and this is the most common product, but a certain amount of yellow leaf is grown for cigar making.

Small Holding Crop.—The area under tobacco in British India is always well above the million-acre line, and there are some 100,000 acres in the Indian States. The outturn varies, according to the attention given to the crop, from 200lb. to as much as 3,000lb. of cured leaf per acre. The long-established Indian theory has been that the crop is suited only to small holdings, as it requires considerable attention and liberal manuring. But these latter conditions, as the history of the Assam tea industry shows, are not necessarily a bar to large plantations and organized production. The possibilities in this direction have been little explored largely because cultivation in small holdings was current when British influence was established in India, whereas the cultivation of tea owes its introduction entirely to British enterprise. The great bulk of the tobacco grown in the country disappears in local consumption, but the export trade is developing.

Since the duty in England is charged by weight and not by value, India, as an exporter of the relatively cheaper grades, has to pay more duty in proportion than some foreign countries. But the higher degree of preference she now enjoys will provide a substantial set off, and at the same time stimulate the efforts being made to raise the quality of production. Another factor in the same direction is the effect of the heavier import duties on tobacco shipped to India, and the consequent tendency of middle-class and other consumers to find satisfaction in the homegrown article.

The Cocaine Traffic.

The form of cocaine chiefly used in India is Cocaine Hydrochloride. This salt forms light shining crystals, with a bitterish taste, and is soluble in half its weight of water. The alkaloid cocaine—of which this is a salt—is obtained from the dried leaves of the Erythroxylon Cocaine which grows in Bolivia, Peru, Java, Brazil and other parts of South America. The leaves are most active when freshly dried and are much used by the Natives as a stimulant. Tea made from them has a taste similar to green tea and is said to be very effectual in keeping people awake. In India the Coca plant seems never to have been cultivated on a commercial scale. It has been grown experimentally in the tea districts of Ceylon, Bengal and Southern India and has been found to produce a good quality and quantity of cocaine. As the plant has not been seriously cultivated and as there is no possibility for the present of the drug being manufactured in India, no restrictions have as yet been placed on its cultivation.

Spread of the habit.—The cocaine traffic in India which seems to be reaching alarming proportion in spite of legislation and strict preventive measures is of comparatively recent growth; though it is impossible to estimate how widespread it was in 1903 when the Bombay High Court for the first time decided that cocaine was a drug included within the definition of an intoxicating drug in the Bombay Abkari Act. Since that date the illegal sale of cocaine in India has largely increased and the various provincial Excise Reports bear witness to the spread of the "Cocaine habit." The consumers of the drug, which is notoriously harmful, are to be found in all classes of society and in Burma even school children are reported to be its victims; but in India as in Paris the drug is mostly used by prostitutes or by men as an aphrodisiac. The habit has spread chiefly to those classes which are prohibited by religion or caste rules from partaking of liquor and the well-known Indian intoxicating drugs.

Smuggling.—So far as the cases already detected show, the persons who smuggle the drug by sea from Europe and places outside India, into India, are chiefly sailors, stewards, firemen and sometimes engineers and officers of foreign ships. The ports through which cocaine enters India are Bombay, Karachi, Calcutta, Madras, Marmagoa and Pondicherry. The main inland distributing centres are Delhi, Lucknow, Meerut, Lahore, Mooltan, Surat and Ahmedabad. Delhi especially is notorious for the cocaine trade. Great ingenuity is employed in smuggling cocaine through the Custom houses. It is packed in parcels of newspapers, books, toys and piece-goods and in trunks which have secret compartments. The retail trade in the towns is very cunningly organized and controlled. In addition to the actual retailers, there is a whole army of watchmen and patrols whose duty is to shadow the Excise and Police Officials and give the alarm when a raid is contemplated. During the War several cases of importation of Japanese cocaine were detected, the importers being Japanese and Chinese Sailors. The original marks on the packets and phials are usually destroyed so that the name of the manufacturing firm may not be found out. In 1922-23 the largest seizure of cocaine made by the Excise Department in the Bombay Presidency was one of 10,500 grains, while in 1923-24 a seizure of 24,000 grains was effected. In October 1924 the Excise Department made a seizure of 46,500 grains in a single case.

The Review of the Customs Adminstration in India 1925-26 contains the following paragraph:

"Most of the cocaine seized on import into India appears to have come from the Far East. The biggest seizures during the year were—

825 oz. at Rangoon.

525 oz. at Calcutta.

275 oz. at Bombay.

250, 198, and 149 oz. at Calcutta.

The total amount of cocaine seized by Custom Houses during the year was 3,453 oz."

The amount seized is either given to Hospitals in India or destroyed. It is no longer possible to buy cocaine from any betelnut seller as it was ten years ago, but scores of cases in the Police Courts show that the retail trade thrives, though to a diminished extent, in Bombay. High profits ensure the continuance of the trade.

The law in regard to Cocaine.—This varies in different provinces. A summary of the law in Bombay is as follows: No cocaine can be imported except by a licensed dealer and importation by means of the post is entirely prohibited. The sale, possession transport and export of cocaine are prohibited except under a license or permit from the Collector of the District. A duly qualified and licensed Medical practitioner is allowed to transport or remove 20 grains in the exercise of his profession; and as far as 6 grains may be possessed by any person if covered by a *bona fide* prescription from a duly qualified Medical practitioner. The maximum punishment for illegal sale, possession, transport, etc., under Act V of 1878 as amended by Act XII of 1912 is as follows: Imprisonment for a term which may extend to one year or fine which may extend to Rs. 2,000 or both and on any subsequent conviction imprisonment for a term which may extend to 2 years or fine which may extend to Rs. 4,000 or both. The law in Bombay has been further amended so as to enable security to be taken from persons who have been convicted of cocaine offences. The new Act also contains a section for the punishment of house owners who let their houses to habitual cocaine sellers.

The Opium Trade.

Two descriptions of opium must be distinguished. *Benares* opium which is manufactured from poppy grown in the United Provinces: and *Malwa* opium which is almost entirely produced in certain Native States in Central India and Rajputana.

Benares Opium.—Cultivation of poppy is confined to a limited area in the United Provinces and is permissible only under a license. The cultivator to whom advances of about one-third of the total amount eventually due to them are made by Govt. free of interest is required to sell the whole of his produce to the Govt. at a rate fixed by them, now Rs. 10 per seer of 700 consistence. The area under licensed cultivation has in recent years been much reduced: in 1912-13 it was 285,220 bighas yielding 26,813 maunds of opium, and in 1925-26 it stood at 113,691 bighas with an outturn of 14,001 maunds. The crude opium received from the cultivators is sent to the Govt. Factory at Ghazipur where it is made up into three different forms:—(1) For export to the Far East known as "Provision" opium. This opium is made up in cakes at 710 consistence, 40 cakes weighing 140 lbs. being packed in a chest: (2) For consumption in India known as "Excise" opium. This is also made up in cakes at 900 consistence, each weighing one seer, 60 cakes being packed in one chest; and (3) Medicinal opium, for use in India and for export to the United Kingdom only.

Malwa Opium.—The poppy from which Malwa opium is manufactured is grown chiefly in the Native States of Indore, Gwalior, Baroda, Ratlam, Jaora, Sitamau, Mewar, Partabgarh, Jhalawar, Kotah and Tonk. The British Government has no concern with the cultivation of the poppy, or the manufacture of the opium but it has since November, 1927, in collaboration with the States, been engaged in investigations directed to the ultimate abandonment by the States of poppy cultivation. The Government is used to regulate, before exports to China were stopped, the import of Malwa opium into, and the transport through, its territories. As the chief market for Malwa opium was China, and as the States in which the drug is produced had no access to the sea, except through British territory, the British Government were able to impose a duty on the importation of the drug on its way to Bombay for exportation by sea.

The poppy is sown in November, the plants flower in February, and by the end of March the whole of the opium has been collected by the cultivators.

Sales of Malwa opium for export to China have ceased since January 1913 and the trade has become extinct since 17th December of that year when the last shipment was made. Practically the whole of the Malwa opium exported from Bombay went to China.

Revenue.—The gross revenue derived by the Government of India from opium in recent years is as follows:—

Year	Rs.
1915–16	2,87,02,712
1916–17	4,74,00,073
1917–18	4,61,83,538
1918–19	4,93,36,670
1919–20	4,55,62,212
1921–21	3,53,41,234
1921–22	3,07,24,798
1922–23	3,78,92,068
1923–24	4,24,81,654
1925–26	3,79,76,177
1925–26	4,14,99,781
1926–27	4,31,48,876
1927–28 (Budget Estimate) ..	3,83,08,000

The only countries to which exports are now permitted are the United Kingdom (as regards medical opium) and the British Far Eastern Colonies, Siam, French Indo-China and the Dutch East Indies.

Internal Consumption.—The internal policy of the Government of India has been, and is, one of non-interference with the moderate use of raw opium, whether the object of the consumer be some real or supposed physical benefit, or merely the indulgence of the almost universal desire of human beings (particularly those whose occupations involve exposure, or severe bodily exertion), for a stimulant or a narcotic. Excessive indulgence has always been suppressed. The total consumption in British India has gone down considerably; it was 5,03,595 seers in 1912-13 and 2,91,272 seers in 1925-26, the latest period for which figures are available.

Agreement with China.—The fluctuations in the revenue derived from opium are directly attributable to the trade conditions arising out of the limitation of opium exports. In 1907 being satisfied of the genuineness of the efforts of the Chinese Government to suppress the habit of consuming opium in China, the Government of India agreed to co-operate by gradually restricting the amount of opium exported from India to China. In 1908 an arrangement was concluded by which the total quantity of opium exported from India was to be reduced annually by 5,100 chests from an assumed standard of 67,000 chests. Under a further agreement, signed in May 1911, the cessation of the trade was to be accelerated on evidence being shown of the suppression of the native production of opium in China, and in accordance with this agreement a further limitation was placed on exports to Chinese ports. The reduction of exports led to an increase in the price of the drug in China and a corresponding rise in the price obtained in India at the auction sales. For some considerable time, however, in 1912 the trade in China was paralysed by the imposition by Provincial Governors in defiance of instructions from the Central Government of restrictions on the importation and sale of Indian opium. Stocks accumulated

rapidly at Shanghai and Hongkong and the position in December 1912 had become so acute that a strong and influential demand was made on the Government of India to relieve the situation by the suspension of sales. Sales were accordingly postponed both of Benares and Malwa opium and in order to afford the Malwa trade the most complete relief, the Government of India undertook to purchase for its own use 11,253 chests of Malwa opium which remained to be exported in 1913. The present position in this regard is that the export trade to China has ceased since 1913. But these details are now of historical importance only.

Export.—Since April 1926, the public auctions at Calcutta have been discontinued, and no opium is exported to the Far East except by Govt. to the Govt. of the importing country under a direct sales agreement. The exports are covered by a certificate from the importing Govt. that the opium is required by them for legitimate purposes and will not be re-exported. In 1926, the Govt. of India also decided to extinguish exports to the Far East progressively in 10 years ending December 31st, 1925, except for strictly medicinal or scientific purposes. Number of chests exported has fallen from 34,827 in 1912 to 8,115 in 1926.

GLASS AND GLASSWARE.

Imports of glass and glassware declined in value from Rs. 2,53 lakhs in 1926-27 to Rs. 2,48 lakhs in 1927-28. As in the preceding year, the premier position was held by Japan which increased her share from Rs. 66½ lakhs to Rs. 69 lakhs, while the supplies from Czechoslovakia dropped to Rs. 61 lakhs from Rs. 63 lakhs in 1926-27 and Rs. 83 lakhs in 1925-26. There were also reduced importations from Germany, Belgium and the United Kingdom. Glass bangles recorded an increase from Rs. 85 lakhs to Rs. 89½ lakhs. Japan accounted for Rs. 26 lakhs and Czechos lovakia for Rs. 50 lakhs as compared with imports to the value of Rs. 21 lakhs and Rs. 51 lakhs respectively from these countries in the preceding year. Beads and false pearls imported chiefly from Czechoslovakia and Japan decreased from 35,000 cwts. to 31,000 cwts in quantity and from Rs. 31 lakhs to Rs. 27 lakhs in value. There was also a decrease under bottles and phials, imports of which amounted to 516,000 gross valued at Rs. 33 lakhs in 1927-28 as compared with 579,000 gross valued at Rs. 39 lahhs in the preceding year.

Manufacture of Glass in India.—Glass was manufactured in India in centuries before Chirst and Pliny makes mention of "Indian Glass" as being of superior quality. As a result of recent archæological explorations, a number of small crude glass vessels have been discovered indicative of the very primitive stage of the Industry. But no further traces of ancient Indian Glass Industry as such survive; yet, it is certain that by the sixteenth century it was an established Industry producing mainly bangles and small bottles. The quality of the material was inferior and the articles turned out were rough. Beyond this stage the industry had not progressed until the nineties of the last century. Manufacture of glass in India on modern European lines dates from the nineties of the last century, when some pioneer efforts were made in this line. Since then a number of concerns have been started, a number of them have failed, while some are still clinging to life owing to war conditions. They mainly devote themselves to the manufacture of bangles and lampware side by side with bottle-making on a small scale. This, therefore, is the criterion which determines the two well-defined classes of the industry in its present stage, (i) indigenous Cottage Industry and (ii) the modern Factory Industry.

(i) The indigenous Cottage Industry which is represented in all parts of the country, but has its chief centres in Firozabad District of U. P., and Belgaum District, in the South, is mainly concerned with the manufacture of cheap bangles made from "glass cakes or blocks" made in larger Factories. The industry is at present in a flourishing state and supplies nearly one-third of the Indian demand for bangles. The quality has been improved by the discovery of new glazing processes and for the present the turnover in this line has gone up to 20 lakhs of rupees a year. But these bangles have now to face a very hard competition from Japan whose "silky" bangles are ousting the old type Indian ones.

(ii) The modern Factory type of organization of this Industry is just in its infancy at present. The existing Factories either stop at producing glass cakes for bangles as in Firozabad or simple kind of lampwares and bottles. With the existing state of knowledge and machinery in India they can neither produce sheet and plate glass, nor do they pretend to manufacture laboratory or table glass. Artistic glassware is out of the question and the private capitalists who have to run their concerns mostly with commercial ends do not think it worth their while to spend money and labour on it. War caused a great decrease in volume—though not so much in value which was much increased—of the imports of the lampware, etc., and in order to meet the Indian demand for them, new Factories were started and old revived, which produced only cheap and simple kind of lampware and bottles on small scale. The total production of these Indian Glass Works has not been exactly estimated, but it is generally supposed that they were able to meet in these war years nearly half the Indian demand for this kind of glassware. There are at present 14 Factories engaged in the production of lampware, of which two or three only produce bottle and carboys also. The chief centres for the former kind are Bombay, Jubbulpore, Allahabad, and Bijhoi and Ambala; while bottles are only manufactured at Naini and Lahore, and recently at Calcutta.

During the latter years of the war period, a number of Glass Works were opened in the Bombay Presidency and adjoining districts, local manufacture having been stimulated by the cessation of imports of German, Austrian and Belgian glass.

Causes of failure.—Records of the earlier ventures have shown that the failures in some cases were due in part at least to preventible causes, prominent among which were (1) Lack of enlightened management. (2) Lack of proper commercial basis, as in some cases the proprietors had a number of other more larger concerns to look to. (3) Bad selection of site. An ideal site for a Glass Factory would be determined by the (*a*) nearness of quartz and fire-clay, (*b*) nearness of fuel, and (*c*) by the nearness of market. At least two must be present. In some concerns, two were absent. (4) Specialisation was lacking, some factories in their initial stages trying to manufacture three or four different kinds of glassware simultaneously like lampware, bottles, and bangles, etc. (5) Paucity of sufficient fluid capital for initial expenses for machinery or other improvements or even in some cases for running the concern in the beginning.

But beyond these there are certain real and special causes that contributed to the failure of some of these and hinder the progress of the rest. Chief among them are (1) The Industry is in its infant stage and hence such failures are but incidental. (2) No expert guidance in this line, there is a lack of men and good literature. (3) Paucity of skilled labour of higher type. The present Indian workmen in this line and blowers are few in number and illiterate. They, therefore, master the situation and are unamendable to management. (4) Heavy cost of good fuel, the works usually being situated where good sand and quartz can be obtained, and consequently, in most cases, at a great distance from the coal-fields. (5) To a certain extent, competition from Japan and other European countries.

Alkali used is almost entirely of English manufacture being Carbonate of Soda 98-99% in a powdered form. This Alkali has almost completely taken place of the various Alkaline Earths formerly employed by the Glass Bangle manufactures as the latter cannot be used in the manufacture of glass which is to compete with the imported article. These points must be carefully noted for future guidance.

The Industry developed considerably under war conditions; but in peace times, in this transition stage, immediate efforts must be made in the direction of what the Indian Industrial Commission say in their Report (Appendix E)., *viz.*: "The Glass Industry, even in its simplest form is highly technical and can be efficiently carried on only by scientifically trained managers and expert workmen. The present stage has been reached by importing men, only partially equipped with the necessary qualifications, from Europe and Japan, and by sending Indian students abroad to pick up what knowledge they can. The glass industry is a closed trade and its secrets are carefully guarded, so that the latter method has not proved conspicuously successful."

Bibliography—Indian Industries Commission Report (Appendix); Indian Munitions Board, Industrial Handbook, etc. "Notes on Glass Manufacture." By C. S. Fox. (Bulletin No. 29 of Indian Industries and Labour, 1922.)

WILD BIRDS' PLUMAGE.

The Bill for prohibiting the importation into England of wild birds' plumage, which was introduced into Parliament in 1913, was the occasion of a fierce controversy on the nature of the plumage traffic. Organised opposition to the Bill, although successful in preventing it from becoming law, failed to convince the public that the plumage trade was not one of great cruelty. The controversy continued with unabated vigour until May 1921, when an agreement was arrived at between the two parties. The most important clause in the agreement stipulates that within four months of the Bill becoming law an Advisory Committee shall be appointed by the Board of Trade. This Committee will consist of an independent chairman, two expert ornithologists, three representatives of the feather trade, and four other independent members. The function of this Committee will be to advise the Board of Trade as to additions to and removals from the existing schedule (ostrich and eider duck) of birds whose plumage may be imported. The passing of the Plumage Bill will thus place England ab east of the United States and of her own daughter Dominions in the suppression of a barbarous industry, as all legitimate methods of breeding birds for their plumage will be safeguarded as definite exceptions under the Plumage Bill.

Plumage birds.—The birds most killed on account of their plumage in India are paddy birds, egrets, kingfishers, bustards, junglefowl, pheasants, paroquets, peafowl, hoopoes and rollers. Egrets and rollers (popularly known as Blue Jays) are perhaps the birds which have been most extensively killed in the past, and of these, egrets have attracted the greatest attention. There are three species met with in India: the Large, Smaller and Little Egrets. All three are pure white slim birds which develop during the breeding season a dorsal train of feathers, which elongates and becomes "decomposed" as it is expressed, that is to say, the barbs are separate and distinct from each other, thus forming the ornamental plume or aigrette for which these birds are much sought after and ruthlessly destroyed. Thirty years ago the exports were valued at over six lakhs in one year, but since 1895 the export trade has steadily diminished. But, though legitimite exports have been stopped, the trade is so lucrative as to lead to many attempts at smuggling. Within a recent period of 12 months the Bombay Preventive Department, for example, seized egret plumes worth Rs. 2,19,047 in India and £44,000 in London. The rupee value represents the sum which the exporters paid to those who took the feathers from the birds, so the loss to the trade was considerable. In addition, penalties varying from Rs. 5,000 to Rs. 10,000 each and amounting altogether to Rs. 59,175 were inflicted on the ten merchants concerned in attempting to export the feathers. A case was reported from Rangoon in 1916 of a man being found in possession 22 lbs. of egret feathers valued at Rs. 66,000. Although frequently denied, there seem very little reason to doubt, that within the last decade egrets have been successfully bred in capti-

vity by the fisherfolk in the province of Sind. But whether such birds can be bred without cruelty, and if so whether the export of their plumage could be legalised without encouraging barbaries in other areas of the peninsula, is a question which can only be decided as a result of a searching and exhaustive inquiry.

Legislation.—Indian legislation on the subject will be studied with interest by those who have followed the course of legislation on this subject in other countries. Until 1887 no legislation was considered necessary in India. An Act of that year enabled local governments and municipal and cantonment authorities to make rules prohibiting under penalties the sale or possession of wild birds recently killed or taken during their breeding seasons, and the importation into any Municipal or cantonment area of the plumage of any wild birds during those seasons; and local governments were empowered to apply these provisions to animals other than birds.

Afterwards, in 1902, action was taken under the Sea Customs Act to prohibit the exportation of the skins and feathers of birds, except feathers of ostriches and skins and feathers exported *bona fide* as specimens illustrative of natural history. Act VIII of 1912 goes much further than the previous law. It schedules a list of wild birds and animals to which the Act is to apply in the first instance, enables local governments to extend this list, empowers local governments to establish "close times," presumably during the breeding seasons, in the whole of their territories or in specified areas, for wild birds and animals to which the Act applies, and imposes penalties for the capture, sale, and purchase of birds and animals in contravention of the "close time" regulations, and for the sale, purchase and possession of plumage taken from birds during the close time. There is power to grant exemptions in the interests of scientific research, and there are savings for the capture or killing by any person of a wild animal in defence of himself or of any other person, and for the capture or killing of any wild bird or animal in *bona fide* defence of property.

One defect in the law may be noticed. When an exporter is discovered, the Customs Department can on a magistrate's warrant have his house searched and seize the feathers found there to produce as evidence that he is engaged in the trade. But they have to return the feathers and can only take possession of them if they are discovered presently in course of export.

HIDES, SKINS AND LEATHER.

India's local manufac tures of skins and leather have steadily increased in recent years. Previous to the outbreak of war, the trade in raw hides in this country was good; there was a large demand for hides, and prices ruled high. While in the continental markets stocks were high owing to overtrading in the previous year, the United States had a shortage which was estimated at approximately two million pieces. On the declaration of war, the trade which had up till then been brisk was seriously dislocated. Exports to enemy countries, especially to the great emporium of Indian hides, Hamburg, were stopped, and exporters had to find new markets for the raw material. The raw hide business of India, it is well known, has hitherto been largely, if not quite entirely, in the hands of German firms or firms of German origin. Germany has had the largest share of India's raw hides. In the four months before the outbreak of war she took 39 per cent. of the total exports. In 1912-13 she took 32 per cent. and in 1913-14, 35 per cent. Raw hides were exported to Trieste in considerable quantities whence they were taken to Germany or Austria. In the four months before the outbreak of war 15 per cent. of India's exports passed through Trieste in 1913-14 the percentage was 21.

The trade showed a marked improvement in 1927-28 owing to a world shortage of hides and leather. The leather stocks of the world have been greatly depleted and the available supply of hides is sufficient to meet the increasing demand. Prices advanced, hides and heavy leather benefiting most, and the total exports increased in value by 23 per cent to Rs. 17,88 lakhs.

Conditions of the Trade.—The trade in hides and skins and the craft in leather manufacture are in the hands either of Mahomedans or of low caste Hindus, and are on that account participated in by a comparatively small community. The traffic is subject to considerable fluctuations concomitant with the vicissitudes of the seasons. In famine years for instance the exports of untanned hides rise to an abnormal figure. The traffic is also peculiarly affected by the difficulty of obtaining capital and by the religious objection which assigns it to a position of degradation and neglect: it has thus become a monopoly within a restricted community and suffers from the loss of competition and popular interest and favour.

No large industry has changed more rapidly and completely than that of leather. By the **chrome process**, for example, superior leather may be produced from the strongest buffalo hides in seven days, from cowhide in twenty-four hours, and from sheep and goat skins in six to eight hours; and these operations formerly took thirty days or as much as eighteen months. Of these changes the native tanners of India were slow to take advantage, but in spite of general backwardness the leather produced by some of the tanneries, especially those under European management, is in certain respects equal to the best imported articles. But since the outbreak of war pro-

gress has been more rapid and considerable quantities of special forms of chrome leather, for which Indian hides are particularly suitable, have found a ready market in London.

Protecting the industry.—The report of the Industrial Commission pointed out that the principal difficulty at present in the hides and leather industry was the lack of organisation and expert skill. Government action to foster the industry was first taken in September 1919, when a Bill was introduced in the Imperial Legislative Council further to amend the Indian Tariff Act, 1894. The effect of this Bill was officially described as follows: "It is to impose an export duty of 15 per cent. on hides and skins with a rebate of 10 per cent. on hides and skins exported to other parts of the Empire, and there tanned. Its object is to ensure that our hides and skins shall be converted into fully tanned leather or articles of leather so far as possible in India and failing this in other parts of the Empire, instead of being exported in a raw state for manufacture in foreign countries." Sir George Barnes who was in charge of the Bill and described the tanning industry as one of the most promising Indian industries explained that "the present position is that we have in India at the present time some hundreds of tanneries for the tanning of hides, a large number of which have come into existence in order to satisfy military requirements during the war. We have in fact the foundations of a flourishing tanning industry, but there is reason to fear that it may tend to dwindle and disappear with the diminution of military requirements, if some other support is not given. We want to keep this industry alive, and we believe that in this case protection in the shape of a 15 per cent. export duty is justifiable and ought to be effective. It is clearly just also that the same measure of protection should be extended to the tanners of skins whose business, as I have already stated, was injured by the necessities of the war. Though Indian tanneries have enormously increased in number during the past three years, they can only deal with a comparatively small proportion of the raw hides and skins which India produces, and it is to the advantage of India and the security of the Empire generally that this large surplus should, so far as possible, be tanned within the Empire, and with this end in view the Bill proposes a 10 per cent. rebate in respect of hides and skins exported to any place within the Empire. I should add that it is proposed to limit by notification the benefit of this rebate to hides and skins actually tanned within the Empire; and Indian hides and skins re-exported from an Empire port for the purpose of being tanned abroad will not be entitled to any rebate."

Indigenous methods.—India possesses a large selection of excellent tanning materials such as Acacia pods and bark, Indian sumach, the Tanner's cassia, Mangroves, and Myrabolans. By these and such like materials and by various methods and contrivances, hides and skins are extensively cured and tanned and the leather worked up in response to an immense, though purely local, demand.

GRAIN ELEVATORS.

The question of adopting elevators for the handling of Indian grain has engaged attention for some time and has assumed increased importance in the light of the railway congestion experienced in recent years and more particularly in the grain season. In the last three years great strides have been made by other countries in the adoption or perfecting of the elevator system, and a large mass of contemporary data on the subject has been brought together by the Commercial Intelligence Department. Since the subject is one that cannot receive adequate consideration in India till the facts are before the public, these have been embodied in a pamphlet entitled *Indian Wheat and Grain Elevators*, by the late Mr. F. Noel-Paton, Director General of Commercial Intelligence to the Government of India. The work gives full particulars regarding India's production of wheat, and shows that less than one-eighth of the crop is exported. It describes the conditions under which the grain is held and the risks that it runs. It is pointed out that the cultivator has no adequate means of preserving his wheat and that he is constrained to sell at harvest time: also that the prices then obtained by him are considerably lower than those usually current in later months. The constant nature of the European demand is explained and an attempt is made to gauge the probability that the enormously increased quantities of wheat to be expected when new irrigation tracts come into bearing would be accepted by Europe at one time and at a good price, or could be economically transported under a system in which a few months of congestion alternated with a longer period of stagnation. Figures are given which suggest that in practice the effect of equipping railways to do this is to intensify the evil and so to engage in a vicious circle. The author explains the structural nature of elevators and their functions as constituted in other countries. Particulars are given as to the laws that govern their operations in such countries.

TRADE MARKS.

The **Indian Merchandise Marks Act** (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the Customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for the purposes of the Merchandise Marks Act. The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature a provision was added to require that piece-goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description. **The number of detentions** under the Act during the twenty years ending 1924-25 has been :—

Average of the five years ending	1907-08	1,198
" " " " ..	1912-13	1,960
" " " " ..	1917-18	2,810
" " " " ..	1922-23	1,840
" " " " ..	1924-25	3,331

Detention is but rarely followed by confiscation, and there have been only 64 such cases during the past ten years. Usually detained goods are released with a fine, and this procedure was followed in 16,919 cases out of the 27,184 detentions ordered in the same period. In 10,198 cases the detained goods were released without the infliction of a fine. In this period of ten years 9 per cent. of the detentions were on account of the application of false trade marks or false trade descriptions. In 69 per cent. of the cases detention was ordered because the country of origin was either not stated or was falsely stated, and in 22 per cent. because the provisions of the Act for the stamping of piece-goods had been infringed.

INDIAN INVENTIONS AND DESIGNS.

A handbook to the **Patent Office** in India, which is published by the Government Press, Calcutta, gives the various Acts, rules, and instructions bearing on the subject together with hints for the preparation of specifications and drawings, hints for searchers and other valuable information that has not hitherto been readily accessible to the general public in so convenient a form. In the preface the Controller of Patents and Designs explains the scope of the Patent laws in India and indicates wherein they differ from English law and procedure.

The foundation of patent legislation throughout the world lies in the English "Statute of Monopolies" which was enacted in 1623, the 21st year of King James the First. In part this Act has been repealed, but the extant portion of the more important section 6 is as follows:— "Provided also that any declaration before mentioned shall not extend to any letters patent and grants of privilege for the term of fourteen years or under, hereafter to be made of the sole working or making of any manner of new manufactures within this realm to the true and first inventor and inventors of such manufactures, which others at the time of making of such letters patent and grants shall not use, so as also they be not contrary to the law nor mischievous to the State by raising prices of commodities at home, or hurt of trade, or generally inconvenient; the said fourteen years to be accomplished from the date of the first letters patent or grants of such privilege hereafter to be made, but that the same shall be of such force as they should be if this Act had never been made, and of none other."

The **existing Indian Patent Law** is contained in the Indian Patents and Designs Act, 1911, supplemented by the Indian Patents and Designs (Temporary Rules) Act, 1915, and by the Rules made under those Acts. The Patent Office does not deal with trade mark or with copyright generally in books, pictures, music and other matters which fall under the Indian Copyright Act III of 1914. There is, in fact, no provision of law in British India for the registration of Trade Marks which are protected under the Merchandise Marks Act (IV of 1889) which forms Chapter XVIII of the Indian Penal Code.

On the whole, Indian law and procedure closely follow that in the United Kingdom for the protection of inventions and the registration of designs, as they always have done in matters of major interest. One main difference exists, however, as owing to the absence of provision of law for the **registration of trade marks,** India cannot become a party to the International Convention under which certain rights of priority are obtainable in other countries.

The first Indian Act for granting exclusive privileges to inventors was passed in 1856, after an agitation that had been carried on fitfully for some twenty years. Difficulties arising from an uncertainty as to the effect of the Royal Prerogative prevented earlier action, and, owing to some informalities the Act itself was repealed in the following year. In 1859 it was re-enacted with modifications, and in 1872 the Patterns and Designs Protection Act was passed. The protection of Inventions Act of 1883, dealing with exhibitions, followed, and then the Inventions and Designs Act of 1888. All these are now replaced by the present Act of 1911.

The existing Acts extend to the whole of British India, including British Baluchistan and the Santhal Parganas. This of course includes Burma, but it does not embrace the Native States. Of the latter three, *viz.*, (1) Hyderabad (Deccan), (2) Mysore, (3) Gwalior have ordinances of their own, for which particulars must

be obtained from the Government of the States in question as they are not administered by the Indian Patent Office in Calcutta. The object of the Act of 1911 was to provide a simpler, more direct, and more effective procedure in regard both to the grant of patent rights and to their subsequent existence and operation. The changes made in the law need not here be referred to in detail. They gave further protection both to the inventor, by providing that his application should be kept secret until acceptance, and to the public, by increasing the facilities for opposition at an effective period. At the same time a Controller of Patents and Designs was established, with power to dispose of many matters previously referred to the Governor-General in Council, and provision was made for the grant of a sealed "patent" instead of for the mere recognition of an "exclusive privilege." The provisions of the Act follow with the necessary modifications those of the British Inventions and Designs Act of 1907.

Important amendments have been made in the Indian Patents and Designs Act since 1911, the most important being the priority given to Indian Inventors over others to apply for British patents within 12 months from the date of the Indian application. Similarly, an applicant for a British patent has priority over other applicants in India for 12 months from the date of his British application.

Printed Specification of applications for patents, which have been accepted (8 annas per copy), may be seen free of charge, together with other publications of the Patent Office at the following places:—

Note.—The quinquennial average figures are inserted only for comparative purposes. The progressive total of additions to stock (item 9) and net progressive absorption (item 10) are calculated on the annual figures and are not based on these averages. Item 9 is the sum of the yearly figures in item 5 and item 10 the sum of the yearly figures in item 8.

(a) Excludes gold imported and exported on behalf of the Bank of England.

(b) Figures are for calendar year ending 31st December.

The Indian Tariff Board 1928.

Five reports of the Indian Tariff Board were published in 1928,

(1) on the grant of protection to the ply-wood and tea chest industry,

(2) on the question of tariff equality in respect of the manufacture of camel hair cotton and canvas ply belting;

(3) on the grant of protection to the manufacture of wagons and underframes, component parts thereof and wire and wire nails,

(4) on the grant of protection to the oil industry, and

(5) on the grant of protection to the match industry.

Camel hair, cotton and canvas, ply belting.—This subject was referred to the Tariff Board as the outcome of representations which had been received by the Government of India that the development of certain industries in India was hampered by the fact that the duty on the finished article was lower than the duty on the materials which had to be imported for its manufacture. Thus whilst the imported cotton yarn from which cotton belting is manufactured was subject to a duty of 1½ anna per lb. and the black proofing, the most common imported raw material used for dressing the belt was subject to a duty of 15 per cent *ad valorem*. Cotton belting, on the other hand, was imported free of duty. In its report which was submitted to the Goverment of India in October 1927, the Tariff Board found that the Indian manufacturer was at adisadvantage in the matter of customs duty of Rs. 3-4-6 per 100 feet of belting and recommended that the 15 per cent. *ad valorem* duty on imported black proofing should be abolished and that a duty of 5 per cent *ad valorem* should be imposed on imported cotton belting. In the case of hair belting, which is woven partly from cotton yarn, and partly from a kind of imported yarn known as camel hair and is treated in the same way as cotton belting, the Tariff Board found that the total duty paid on the raw materials was Rs. 8-12-1·02 per 100 feet of belting manufacturred whereas no duty was leviable on imported hair belting. It, therefore, recommended that in this case also the 15 per cent. *ad valorem* duty on imported black proofing should be abolished, that the duty on imported camel hair yarn should be reduced from 15 per cent. to 6 per cent *ad valorem* and that a duty of 5 per cent *ad valorem* should be imposed on imported hair belting. In order that the duty on all three kinds of fabric belting should be uniform, the Board also recommended a duty of 5 per cent. on imported cotton ply belting though its manufacture in India is at present of small importance.

Decision of the Government of India—In a Resolution dated February 10th, 1928, the Government of India accepted the Board's recommendation that a duty of 5 per cent *ad valorem* should be imposed on imported cotton, camel hair and canvas ply belting but rejected the proposal that the duty on black proofing should be removed. They decided, however, that the duty on camel hair yarn should be reduced from 15 per cent. to 5 per cent. Legislation giving effect to this decision was embodied in the Tariff Amendment Act passed in March, 1928. (Act VII of 1928).

Ply-Wood and Tea Chest Industry.—The question of protection to the Ply-wood and Tea Chest industry was referred to the Tariff Board in May, 1927, at the request of the Assam Saw Mills and Timber Company, Limited, and the Assam Railways and Trading Company, Limited. In its reference to the Tariff Board, the Government of India pointed out that there was no import duty on tea chests and lead sheets for tea chests until 1916. A duty of 2½ per cent. was imposed in 1916 for revenue purposes and this was raised in 1923 to the general duty of 15 per cent. They also pointed out that imported tea chests and lead sheets for tea chests were ordinarily re-exported as containers for Indian tea and were then entitled to a refund of seven eighths of the import duty, provided they were identified to the satisfaction of the Collector of Customs and that re-export was made within two years from the date of importation. Such identification might sometimes be possible but would cause much trouble and delay both to the Customs administration and to the re-exporter. In view of the special circumstance that tea chests and lead sheets for tea chests were ordinarily imported for the purpose of subsequent re-export, the continuance of a revenue duty might be open to objection.

In its report which was submitted to the Government of India in September 1927 the Tariff Board found that, with the exception of tin for the manufacture of tinplate and possibly certain alkalies for the manufacture of casein cement, all the raw materials-the most important of which are timber, casein for glue and lead for linings—for the manufacture of tea chests are vailable in sufficient quantities in India. As regards the other conditions laid down by the Fiscal Commission, the Board found that very severe competition had been experienced in recent years in Northern India from imported tea chests, and that without some form of assistance, the ply-wood factories would be forced to suspend manufacture. If, however, adequate support were granted, the industry would be able to stand without protection within a reasonable period. It did not appear that the manufacture of plywood products other than chests required any assistance but such products constituted a very small portion of the out-turn of the existing factories—the two mentioned above and the Jalpaiguri Timber and Lead Mills Company, Limited—which were mainly engaged in the manufacture of tea chests.

As regards the measure of protection required, the Board found that the fair selling price of a tea chest 19″×19″×24″ in India on a production of 5,00,000 chests annually might be estimated at Rs. 2-15-6·4 against a price for imported chests of the same dimensions (without duty) f. o. r. Calcutta of Rs. 2-6-10·8. Allowing for the freight advantage of imported chests to the tea gardens, the adjusted import price

comparable to the fair selling price of Indian chests would be Rs. 2-5-7·8. The difference between the fair selling price and the adjusted import price, *viz.*, 9 annas 10.6 pies represented the measure of protection which the Board considered necessary subject to slight further adjustment.

As regards the form in which protection should be given, the Board held it undesirable to enhance the import duty above the general 15 per cent. *ad valorem* level in view of the additional burden on the Tea industry and of the practical difficulties that would be involved. It, therefore, recommended that the assistance should take the form of a specific export duty on tea chests other than those of which the plywood panels were of Indian manufacture. The import duty on all plywood articles other than tea chests and rubber boxes should remain unchanged at 15 per cent. *ad valorem* as should that on the fittings of tea chests and rubber boxes and the linings of tea chests. The import duty on the plywood panels and battens of tea chests and rubber boxes should be abolished. Its place should be taken by a specific export duty of 6 annas 6 pies per 100 lbs. of tea exported in chests of which the plywood panels were not of Indian manufacture. The Board recommended that, of this sum, 4½ annas per 100 lbs. of tea should be made over to the Indian Tea Cess Committee, the cess leviable under the Indian Tea Cess Act being reduced by 3 annas per 100 lbs. of tea.

The Board further recommended that the views of the plywood companies should be considered by local Governments in connection with the enunciation or planting of trees suitable for the Plywood industry. It also suggested that steps should be taken to extend and improve the facilities for research at the Forest Research Institute, Dehra Dun, in connection with the manufacture of plywood and that local Governments should co-operate with the Research Institute in its investigations. The specifications for opium chests should be drawn up by the Opium Department in consultation with the Indian Stores Department and the Indian plywood manufacturers in such a way as to ensure that, so far as possible, effect was given to the Government's policy of encouraging Indian industries. The period of protection recommended by the Board was five years.

Decision of the Government of India. In a Resolution dated February 18th, 1928, the Government of India accepted the findings of the Tariff Board except in regard to the form in which assistance to the Plywood industry should be given. They considered that the method proposed by the Board would lead to undesirable complications and they were unable to approve the imposition of an export duty for protective purposes. They were of opinion that the Board had attached undue weight to the grant of protection by means of an import duty. The additional burden imposed on the Tea industry by such a duty would not be a heavy one, and where protection was the object to be attained and not revenue, the refund of a drawback on re-export was not, in their view, open to objection in principle. They, therefore, decided to introduce legislation imposing a duty of 30 per cent. on all forms of plywood and on the battens and corner pieces of plywood chest and abolishing the drawback admissible on re-export. This rate of duty would give the same amount of protection as had been recommended by the Board. The Government of India considered that, for reasons of convenience in Customs administration, it should be applied to all forms of plywood though the imports other than tea chests, were so small that, if they alone were in question, no protection would be needed.

Legislation embodying this decision was introduced in the Legislative Assembly on March 9th, 1928, but has not been proceeded with.

Wagons and underframes, component parts thereof and wire and wire nails—The Report of the Tariff Board regarding the grant of protection to the manufacture of railway wagons and underframes, component parts thereof and wire and wire nails which was submitted to the Government of India in June, 1927, concluded the Statutory inquiry held by the Board into the steel industry. The Board's first report on this industry was summarised in the Times of India Year Book of 1927.

I. Wagons and under frames.—As regards railway wagons and underframes, the Steel Industry (Protection) Act of 1924 provided for the payment of bounties not exceeding Rs. 7 lakhs in each of the financial years 1924-25, 1925-26 and 1926-27. The Board found that under the stimulus of this scheme, the wagon industry (in which term they included also the construction of underframes) had made great progress and was in a position to meet a large proportion of the normal demand for wagons and underframes in India. In consequence partly of the reduction in the cost of material but largely of the decrease in costs resulting from large orders for a few standard types of wagons, wagon manufacturers had reached a stage at which they could normally withstand foreign competition with no assistance other than that of the existing revenue duty of 10 per cent. The Board, therefore, recommended that the bounty system should be abandoned and that no increase in the existing duty of 10 per cent. on wagons and underframes should be made. From the point of view of the wagon industry, an unfortunate situation had, however, arisen owing to improvements in railway administration which had made it possible to reduce the requirements of the railways in respect of new broad gauge wagons to such an extent that it would probably be unnecessary to place orders for this class of wagon for three years and possibly longer. This situation might have been alleviated, if not entirely averted, if the orders for 1450 broad gauge wagons which had been placed abroad in December, 1925, had been withheld and placed later with Indian firms. Special measures had, however, been taken temporarily to deal with it. The Peninsular Locomotive Company's works had been acquired by Government and sufficient orders for miscellaneous wagons and underframes had been placed with the remaining firms to keep their works in operation. In the Board's view, something more than this was required to assist the wagon industry until normal conditions returned. They, therefore, recommended that, until the demand for wagons and underframes

in India reached a total of 5,000 annually in terms of the type of wagon known as C-2, all orders should be placed in India by competitive tender from Indian manufacturers. In view of the absence of foreign competition and the fact that there are now only three firms—Messrs Burn and Company, the Indian Standard Wagon Company and Messrs. Jessop and Company—manufacturing wagons in India, of which the first two are under the same management, the Board considered it advisable that maximum prices within which tenders could be accepted should be fixed. They accordingly recommended that subject to minor adjustments, maximum prices should be fixed at the level of the lowest c. i. f. price as shown in the tenders for wagons in November 1925, and for underframes in April 1926. To these prices, an addition of 12½ per cent should be made, representing the addition which the Board considered necessary to secure on the average a reasonable price whilst orders for rolling stock were restricted below the capacity of Indian manufacturers. The appropriate charges for landing, wharfage, etc., and erection should be added.

The Board also recommended that the question of the extent to which it was advisable to anticipate future requirements for wagons and underframes or to replace old rolling stock should be reconsidered. They suggested that, on the revival of the normal demand for rolling stock, the system of restricting orders to the capacity of the firm tendering, as certified by the Indian Stores Department should cease but that adequate penalties should be provided and enforced for late delivery.

II. Component parts.—(a) *Forgings.*—The Board considered that the manufacture of forgings should be regarded at present as merely a process incidental to the construction of wagons and not as a separate industry and that, in these circumstances, when the demand for wagons became normal, the same duty should be imposed on imported forgings as on wagons and underframes. The restriction of the demand for broad-gauge wagons meant, however, restriction of the demand for wagon forgings and the Board, therefore, suggested that orders for forgings as spare parts should continue to be placed in India as far as possible and that, in comparing Indian with foreign prices, an allowance of 2½ per cent. above the existing revenue duty of 10 per cent should be made.

(b) *Steel Castings and Spring Steel.*—The Board found that, since its first enquiry, the annual demand for steel castings had sufficiently increased to permit of an economic output. They, therefore, considered that a good case had been made out for protection. They considered that the best and most economical method of extending help to the industry was by means of a bounty and accordingly recommended that on all steel castings manufactured by the Hukumchand Electric Steel Works for railway wagons, underframes and locomotives during the period October 1st, 1927, to September 30th, 1930, a bounty of Rs. 2-8-0 per cwt. should be paid to the Company subject to a maximum of Rs. 1,80,000 for the whole period. Subject to this maximum, no restriction should be placed on the amount to be paid in any one year. No recommendation was made in respect of spring steel as it is not yet manufactured on a commercial basis and no reliable information as to the cost of production had been forthcoming.

(c) *Bolts and Nuts.*—The manufacture of bolts and nuts in India is at present on so small a scale that the Board did not consider present costs a guide to the amount of protection required if large scale production were undertaken. There appeared, however, good ground for the removal of the inequality of tariff treatment as between the Indian manufacturer and his foreign competitors which existed under the Tariff Schedule under which high specific duties were charged on the steel bars from which bolts and nuts are manufactured whereas the duty on imported bolts and nuts was only 10 per cent *ad valorem.* The Board, therefore, recommended that, on all bolts and nuts falling under Article 61 of the Statutory Tariff Schedule, a specific duty of Rs. 2 per cwt. should be levied in place of an *ad valorem* duty of 10 per cent.

III. Wire and Wire Nails.—The Board held that as it appeared that wire rod, the main raw material for the manufacture of wire and wire nails, would not be manufactured in India for at least three years and as the debenture holders of the only company manufacturing wire in India, Indian Steel Wire Products, Limited had applied to the Trustees that the Company should be put into liquidation, the industry failed to qualify for protection. They, therefore, recommended that the protective duty on wire and wire nails should be discontinued until such time as the manufacture of wire rod in India was established on a commericial scale, when the question might be reconsidered.

Decision of the Government of India.—In a Resolution dated February 25th 1928, the Government of India accepted all the findings of the Tariff Board with the following exceptions. They found themselves unable to accept the recommendation that the maximum price for wagons should be the lowest approved price as shown in the tenders for wagons in November, 1925, and for underframes in April, 1926, plus an addition of 12½ per cent. and the appropriate charges for landing, wharfage, and erection. They considered that this addition would be appropriate only if the total orders to be placed in any one year were sufficient to keep the wagon building firms working to 60 per cent. of capacity and would be too low if the orders fell short of this figure. They, therefore, decided that tenders should in the first instance be called for only in India and the lowest tender should be accepted provided it were regarded as reasonable. Its reasonableness would be determined by comparison with the basic price of 1925 in respect of wagons and that of 1926 in respect of underframes and allowance, would be made either upwards or downwards for variations in steel prices and for the size of the orders to be placed. If the prices tendered were found to be unreasonably high for any type of wagon, the wagon building firms would be informed of the maximum price which the Government of India were prepared to pay and would be given an opportunity of accepting the order at that price. If they were unwilling to do so, simultaneous tenders would be called for in England and in India. In view, however, of the necessity for assisting the industry which arose from the fact that, with simultaneous tenders,

and a 10 per cent duty, there was a serious danger that orders would be lost to Indian firms, the Government of India decided that the rate of duty on wagons and underframes, and their component parts other than wheels, axles, vacuum brakes and certain other component parts which are not made in India, should be raised to the rates applicable to fabricated steel generally *viz.* 17 per cent. *ad valorem* if of British manufacture and 17 per cent. *ad valorem* plus Rs. 15 per ton if not of British manufacture. This increase in duty should have effect for three years only, at the end of which period it should again be possible to place orders on a normal scale. As regards steel castings, the Government of India held that the conditions justifying protection did not exist and were, therefore, unable to accept the bounty scheme recommended by the Board. They pointed out that, in addition to the Hukumchand Electric Steel Works, there was at least one other firm, the Kumardhubi Engineering Works which was equipped to produce steel castings from indigenous materials and that it appeared from the Board's own figures that the effective railway demand was barely sufficient to keep one firm fully employed. With two firms in the field, it would not be possible for either to obtain sufficient orders to bring down costs to an economic level, especially as some of the railways manufacture in part their own requirements.

Legislation giving effect to the Tariff Board's recommendations as modified by the Government of India was introduced in the Legislative Assembly in March 1928. That part of it relating to the increase in the duty on wagons and underframes and component parts was not, however, accepted by the Assembly. The proposals in regard to the imposition of a specific duty of Rs. 2 per cwt. on iron or steel bolts and nuts and the abolition of the protective duty of Rs. 60 per ton on certain kinds of iron or steel wire were passed into law as Act VIII of 1928.

Oil Industry.—The reference to the Tariff Board, in March 1928, of the question of granting protection to the oil industry was the outcome of representations received by the Government of India from a number of Companies engaged in the production of petroleum as to the effect of the price war which was then in progress between the Standard Oil Company of New York and the Royal Dutch Shell Group and which had been caused by the purchase by the Standard Oil Company from the Soviet Government of Russia of kerosene which the Royal Dutch Shell Group received rightfully belonged wholly or in part to them. It was represented to the Government of India that, as a result of this war, kerosene was being sold at prices well below world parity and it was from the serious losses consequent on these uneconomic prices that the Companies concerned asked for protection. The Tariff Board were directed :—

(1) to determine what price for kerosene should be taken to be equivalent to world parity at Indian ports and the extent to which current prices in India were below that level,

(2) to report whether it was in the national interest that protection against the dumping of imported kerosene should be given, and, if so, in what form and for what period, and

(3) to report whether it was likely that the price war would extend to petrol, what the consequences to the Indian producers were likely to be if it did and, in that case, what measures they would recommend.

In its report, which was submitted to the Government of India in June 1928, the majority of the Board held that the sale of kerosene in India below world parity as the result of the price war had been established. In arriving at this finding, they took the equivalent of world parity at Indian ports to mean not necessarily a fair selling price but the price of imported kerosene with reference to which the price of kerosene in India would be fixed ex-main installation in normal conditions. On this interpretation, they considered that the price should be determined by the f. o. b. American Gulf price plus freight from Gulf ports to India and incidental charges such as profit, storage, duty, etc. Taking inferior and superior kerosene in the same proportion as the Indian production, they estimated the equivalent of world parity at Indian ports at Rs. 4-8-4 per unit of 8 Imperial gallons in bulk. As the greater portion of the sales of kerosene in India was made by the Burmah Shell Oil Storage and Distributing Company of India, Limited, the Board held that the average price obtained by its ex-installaton from all areas in India, other than the economic areas of the Assam and Attock Oil Companies, nearly Rs. 3-10-9 per unit of 8 Imperial gallons in bulk, might fairly be taken as the current price of kerosene. This figure represented the price at which indigenous oil and imported oil were sold by the Burmah Shell Oil Storage and Distributing Company in the Indian market.

The reply of the majority of the Board to the second of its terms of reference was that no case had been made out for safeguarding the Indian Oil Industry against the sale of imported kerosene below world parity. Before arriving at this finding, the Board examined the present position of the production of oil in the various oil fields in India, and the financial position of the Oil Companies and also considered the various national interests affected by the Industry. As regards oil production, it found that the oils production in the main field in Burma, *viz.*, Yenangyaung, was now definitely on the decline and though in the Singu and Indaw fields in Burma, and in the Assam and Attock fields, there was the prospect of enhanced production, it was clearly a matter of considerable importance to the future oil production of India, that the Companies should be in a position to continue prospecting and development work. Its examination of the financial position of the Companies convinced it that profits had been considerably reduced and that the reduction might lead to some restoration of development work in the case of one or two companies. But it was satisfied that no premature closing of oil works would be necessary and that the present production of oil was not likely to be affected to any

in India reached a total of 5,000 annually in terms of the type of wagon known as C-2, all orders should be placed in India by competitive tender from Indian manufacturers. In view of the absence of foreign competition and the fact that there are now only three firms—Messrs Burn and Company, the Indian Standard Wagon Company and Messrs. Jessop and Company—manufacturing wagons in India, of which the first two are under the same management, the Board considered it advisable that maximum prices within which tenders could be accepted should be fixed. They accordingly recommended that subject to minor adjustments, maximum prices should be fixed at the level of the lowest c. i. f. price as shown in the tenders for wagons in November 1925, and for underframes in April 1926. To these prices, an addition of 12½ per cent should be made, representing the addition which the Board considered necessary to secure on the average a reasonable price whilst orders for rolling stock were restricted below the capacity of Indian manufacturers. The appropriate charges for landing, wharfage, etc., and erection should be added.

The Board also recommended that the question of the extent to which it was advisable to anticipate future requirements for wagons and underframes or to replace old rolling stock should be reconsidered. They suggested that, on the revival of the normal demand for rolling stock, the system of restricting orders to the capacity of the firm tendering, as certified by the Indian Stores Department should cease but that adequate penalties should be provided and enforced for late delivery.

II. Component parts.—(*a*) *Forgings.*—The Board considered that the manufacture of forgings should be regarded at present as merely a process incidental to the construction of wagons and not as a separate industry and that, in these circumstances, when the demand for wagons became normal, the same duty should be imposed on imported forgings as on wagons and underframes. The restriction of the demand for broad-gauge wagons meant, however, restriction of the demand for wagon forgings and the Board, therefore, suggested that orders for forgings as spare parts should continue to be placed in India as far as possible and that, in comparing Indian with foreign prices, an allowance of 2½ per cent. above the existing revenue duty of 10 per cent should be made.

(b) *Steel Castings and Spring Steel.*—The Board found that, since its first enquiry, the annual demand for steel castings had sufficiently increased to permit of an economic output. They, therefore, considered that a good case had been made out for protection. They considered that the best and most economical method of extending help to the industry was by means of a bounty and accordingly recommended that on all steel castings manufactured by the Hukumchand Electric Steel Works for railway wagons, underframes and locomotives during the period October 1st, 1927, to September 30th, 1930, a bounty of Rs. 2-8-0 per cwt. should be paid to the Company subject to a maximum of Rs. 1,80,000 for the whole period. Subject to this maximum, no restriction should be placed on the amount to be paid in any one year. No recommendation was made in respect of spring steel as it is not yet manufactured on a commercial basis and no reliable information as to the cost of production had been forthcoming.

(c) *Bolts and Nuts.*—The manufacture of bolts and nuts in India is at present on so small a scale that the Board did not consider present costs a guide to the amount of protection required if large scale production were undertaken.
